

University of North Texas Bulletin | 2025-2026 Undergraduate Catalog

Official release date is July 1, 2025

Catalog goes into effect at the beginning of the 2025 fall semester

The information in this catalog is subject to necessary corrections

If you have questions about catalog content or how to use the catalog, contact the Office of Catalog and Curriculum Support at catalog@unt.edu.

This catalog is an official bulletin of the University of North Texas and is intended to provide general information. It includes policies, procedures and fees in effect at the time of release. UNT reserves the right to make changes at any time to reflect current rules of the UNT System Board of Regents, university policies and procedures, changes in federal or state law and fee changes. Information provided in this catalog is subject to change without notice and does not constitute a contract between the University of North Texas and a student, an applicant for admission, or other individuals. Updated policies and procedures can be found on departmental or university websites.

This catalog does not include all university policies and procedures for which students are responsible. In addition to reading this catalog carefully, students should consult other publications, such as the *Student Handbook*, the *Code of Student Conduct*, *Parking Regulations*, *Housing Handbook* and specific contracts. This catalog becomes effective on the first day of the fall semester, 2025.

Non-Discrimination Policy

The University of North Texas System is firmly committed to equal opportunity and does not permit -- and takes actions to prevent -- discrimination, harassment (including sexual violence, domestic violence, dating violence and stalking) and retaliation on the basis of race, color, religion, national origin, sex, sexual orientation, gender identity, age, disability, genetic information, or veteran status in its application, employment practices and facilities; nor permits race, color, national origin, religion, age, disability, veteran status, or sex discrimination and harassment in its admissions processes, and educational programs and activities, facilities and employment practices. The University of North Texas System promptly investigates complaints of discrimination, harassment and related retaliation and takes remedial action when appropriate. The University of North Texas System also takes actions to prevent retaliation against individuals who oppose any form of harassment or discriminatory practice, file a charge or report, or testify, assist or participate in an investigative proceeding or hearing.

Equal Opportunity and Title IX coordinates and monitors the University's compliance with the requirements of federal and state non-discrimination laws. You may direct questions or concerns to Equal Opportunity and Title IX by phone at 940-565-2759, TTY access: 940-369-8652 or 800-735-2989 or by email at oeotix@unt.edu.

General Information Number

Directory assistance for all university offices is available through the main switchboard at 940-565-2000; metro 817-267-3731.

The university

The University of North Texas is a place where students transform their lives through education and opportunity.

Ranked a Tier One research university by the Carnegie Classification and designated a Hispanic-and Minority-Serving Institution, UNT is the flagship of the UNT System and is located in Denton. Boasting 240 degree programs and a thriving community of more than 46,000 students, UNT serves the North Texas region and helps drive the state's economy through innovative research, educational excellence focused on career readiness and a spirit of entrepreneurship. Together, with its branch campus in Frisco, UNT students earned more than 13,000 degrees last year.

UNT has been ranked in the nation's Top 100 for students graduating with least debt by U.S. News & World Report. The Princeton Review continually names UNT as a Best in the Southwest school and Forbes has listed UNT as an America's Top College for 17 consecutive years.

Location

UNT is in Denton, a town of about 140,000 people located 40 miles north of Dallas and Fort Worth. UNT occupies over 1,017 acres across three countries and maintains 176 buildings including Discovery Park, a 610,000-square-foot research facility, accessible from the main campus by shuttle buses. The main campus is easy to walk to or bike to, as are residence halls, athletic facilities and other areas of campus. UNT is teaching more than 3,100 students at its Frisco Landing and Inspire Park locations. Born from a partnership between UNT and the City of Frisco, Frisco Landing's 141,000-square-foot, state-of-the-art building was designed with a focus on student success and is the first permanent building to be built on the UNT at Frisco campus, located at the southwest corner of Preston Road and Panther Creek Parkway.

The Dallas-Fort Worth area is one of the largest, most dynamic regions in the United States and home to many of the nation's fastest growing cities. UNT fuels the North Texas region through innovation, education and research; forming partnerships with many businesses, industry, education, government and cultural organizations.

The university's mission

At the University of North Texas, our caring and creative community empowers our students to thrive in a rapidly changing world.

The university's purpose

Our students will be the innovative leaders of tomorrow.

The university's vision

We will become globally known for collaborative and imaginative educational innovation and scholarly activity that transforms our students and benefits the world around us.

Achieving the vision

The UNT community is guided by five core values — Courageous Integrity, Be Curious, We Care, Better Together and Show Your Fire. To achieve our vision, we will work together to solve complex issues and find ways to empower our students to succeed in the face of a rapidly changing world. This challenge calls on us to become more nimble and collaborative as an institution. Because we are a caring, creative campus, we value important connections that happen through collaboration, interdisciplinary engagement, connectivity and synergistic solutions to challenges at our university, in DFW and beyond. Thus, we will dedicate ourselves to creating a stronger collaborative environment where we hear and respond to the different perspectives of our internal and external communities to empower our students and meet the needs of Texas. The cross-cutting

synergies and connectivity created by building a culture based on our values will drive our success across all planning areas and enhance our reputation as an innovative, next-generation institution.

History of the university

UNT was founded in 1890 as Texas Normal College and Teachers' Training Institute. Joshua C. Chilton, the founding president, leased facilities above a hardware store on Denton's square to establish a teacher training institute. His opening-day remarks remain an important part of UNT's value system: "It will be our aim to become leaders in the education of the young men and women of Texas, fitting them to creditably fill the most important positions in business and professional circles. We desire the cooperation of all who believe in higher education and who want to see our state in the very front of intellectual as well as material progress."

The university has had seven names through the years:

1890: Texas Normal College and Teacher Training Institute
1894: North Texas Normal College
1901: North Texas State Normal College
1923: North Texas State Teachers College
1949: North Texas State College
1961: North Texas State University
1988: University of North Texas

Incoming students choose UNT for its innovative programs designed to meet the ever-changing needs of the future. UNT "firsts" through the years include:

- First jazz studies program in the U.S.
- First undergraduate emergency administration and planning program in the U.S.
- First bachelor's degree in digital retailing and in consumer experience management in the U.S. and first Master of Science program in merchandising offered completely online
- First retail program in the U.S. to integrate courses in merchandising, digital retailing, store operations, finance and retail strategy
- First school library certification program in the U.S. offered completely online
- First graduate applied anthropology program in the U.S. offered completely online
- First undergraduate program in applied behavior analysis in the U.S. and first accredited master's program in behavior analysis in the world
- First and only Ph.D. program in art education in Texas
- World's first graduate program in environmental philosophy and world's first field station in environmental philosophy, science and policy at Cape Horn, Chile
- First four-year aviation logistics program at a university in Texas and only such program in the nation
- First master's program in international sustainable tourism in the U.S. and the first to require a year abroad
- First M.S. program in artificial intelligence in Texas

Faculty

At the heart of the university's efforts to carry out its mission are the faculty. Individually, UNT faculty members have been singled out for contributions to their teaching and research fields through diverse national and international awards.

Collectively, the faculty have contributed significantly to research and scholarship within various fields through numerous publications, presentations at scholarly conferences, concerts, recitals, exhibitions and performances.

Faculty leadership in teaching, research, creative activities, performance and service activities has created national and international reputations for excellence for a number of academic programs within the university's 12 schools and colleges.

Student life

A wide array of student organizations gives UNT students the opportunity to build friendships with people of both similar and varied interests and provides avenues for organized and meaningful service. Student organizations represent many areas of interest, such as service professional, political, academic, spiritual, athletic, residential, and Greek. Being involved in a student organization promotes a sense of community and connection to the university, while serving to enhance the social, intellectual and developmental growth of students. For more information, see the Campus Resources section of this catalog, call the Student Activities Center at 940-565-3807 or visit studentactivities.unt.edu.

UNT libraries

The UNT Libraries facilitate teaching, learning, and research for students, faculty and information seekers at UNT and around the world. Our expert staff, spaces, services, and collections support your academic success and lifelong learning. As an essential component of education and research at UNT, the Libraries offer access to more than six million print and digital items, along with expert personnel to assist patrons in achieving their academic and scholarly goals. Visit us online at library.unt.edu.

Services

UNT Libraries' services include:

- Willis Library open 24/7 during long semesters
- Mac and PC laptop checkout
- Free video games, movies, music and more
- Electronic resources, including journals, books and other research materials
- Library instruction, subject guides and tutorials
- Research assistance from subject experts
- The Spark Makerspace in Willis Library, a service promoting the creative use of technology
- Accessible tables, study carrels, study spaces and computers in Willis, Sycamore, Discovery Park libraries, and Frisco Landing libraries

Libraries and collections

UNT Libraries have many exceptional collections:

- The Music Library is one of the country's largest music collections, with an extensive phonographic disc and tape collection, and the private jazz collections of Stan Kenton, Don Gillis, Whit Ozier and Leon Breeden.
- Special Collections preserve and provide access to an incredible wealth of materials that document the history and legacy of Texas, as well as touch on numerous topics of national import. Collections include the history of the university, oral histories and Texas county records. Other important archival collections include those of Sarah T. Hughes, Enid Justin and Ruth Salmon. The holdings also feature an outstanding miniature book collection; the private library of Anson Jones, President of the Republic of Texas; Texas Society of Sons of the American Revolution; the Weaver Collection of Juvenile materials; and examples of important early publishing, printing and binding styles. Other collections include the Lesbian, Gay, Bisexual, and Transgender Archive; the Latino/Latina Archive; and the Photography and Visual Materials Collection, which includes the photographic archives of several prominent photographers.
- The Government Information Connection assists with questions or advice about finding government, business, geographic, or legal information. Our subject provides a starting place for individuals looking for government information or services. The UNT Libraries have the distinction of being one of nine affiliated archives of the National Archives.

- The Media Library houses a large collection of audiovisual materials, including videos, 16 mm films and audio CDs. Video-on-demand service is provided for curriculum support. The Media Library is also home to the Nest, it is a gaming and game design space.
- Through collaborative efforts such as the Portal to Texas History and the UNT Digital Library, the Libraries provide digital content to a worldwide audience. The Portal is a gateway to Texas history materials from over 520 partners at libraries, museums and archives across Texas. The UNT Digital Library includes UNT electronic theses and dissertations, the Federal Communications Commission Record, UNT Scholarly Works, a Virtual Music Rare Book Room and the World War poster collections.

In addition to Willis Library, UNT Libraries include the following:

- The Discovery Park Library, which supports the College of Engineering and the College of Information.
- The Sycamore Library is home to the Juvenile and Curriculum Materials Collections, government documents, law, political science, geography, business collections and the nonprofit information resource center. The Collaboration and Learning Commons, housed within the library, offer student computing services, group and individual study spaces and two study rooms with presentation capabilities.
- The Frisco Landing Library is located on the second floor of the UNT at Frisco campus. The library provides resources, services, and spaces in an open library environment that promotes collaboration and supports student learning.
- The Library Annex and the Research Collection Library—both located off-campus—provide storage and house office space for a variety of library faculty and staff.

University Information Technology Services

The AITS Campus Helpdesk provides support services for students, faculty and staff for account-based issues as well as the usage of UNT issued resources, such as email, Virtual Labs and more. Users can request support over the phone, in person or online for any issues related to their UNT account or related resources. The AITS Campus Helpdesk can be reached at 940-565-2324, in Sage 330 or at helpdesk.unt.edu.

Students receive many online resources such as the Universities virtual lab offerings, Office 365 and LinkedIn Learning services. Active students can see a full list of services by going to helpdesk.unt.edu.

UNT offers many on campus resources including in person support, WiFi, and computer labs spread throughout campus, find a list of available computer lab resources at computerlabs.unt.edu. UNT offers WiFi in all buildings and most public spaces to all currently enrolled students, faculty and staff. Students can contact the Helpdesk at 940-565-2324 for more information regarding in-person support, or by going to Sage 330.

UNT has designated email as an official form of communication between the university and students. UNT provides email accounts to all students registered at the university through EagleConnect, eagleconnect.unt.edu. Students automatically are assigned email accounts during the application process, please contact the HelpDesk for more information.

Accreditation

University of North Texas is accredited by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC) to award associate, baccalaureate, masters, and doctorate degrees. University of North Texas also may offer credentials such as certificates and diplomas at approved degree levels. Questions about the accreditation of University of North Texas may be directed in writing to the Southern Association of Colleges and Schools Commission on Colleges at 1866 Southern Lane, Decatur, GA 30033-4097, by calling (404) 679-4500, or by using information available on SACSCOC's website (www.sacscoc.org).

Please note: SACSCOC should be contacted only to inquire about the accreditation status of UNT, to ask questions about the accreditation process, or to pursue procedures for filing complaints against UNT. General inquiries, such as admission requirements, financial aid, and educational programs, should be addressed directly to UNT and not SACSCOC's office.

In addition, the University of North Texas offers programs accredited by the following organizations.

AACSB International — The Association to Advance Collegiate Schools of Business
ABET-Computing Accreditation Commission
ABET-Engineering Accreditation Commission
ABET-Engineering Technology Accreditation Commission
Accreditation Commission for Programs in Hospitality Administration
Accrediting Council on Education in Journalism and Mass Communications
American Academy of Forensic Sciences-FEPAC
American Chemical Society
American Library Association
American Psychological Association Commission on Accreditation
American Speech-Language-Hearing Association
Behavior Analysis Accreditation Board of ABAI
Council for Accreditation of Counseling and Related Educational Programs
Council for Interior Design Accreditation
Council on Rehabilitation Education
Council on Social Work Education
National Association of Schools of Art and Design
National Association of Schools of Music
Network of Schools of Public Policy, Affairs, and Administration
Texas State Board for Educator Certification
Textile and Apparel Program Accreditation Commission (TAPAC)

See Accrediting Institutions for addresses of accrediting organizations.

In addition, the University of North Texas offers programs that are approved or recognized by:

American Alliance for Health, Physical Education, Recreation and Dance
Council for Exceptional Children
Educational Leadership Constituent Council
International Society for Technology in Education
National Council of Teachers of English
National Council of Teachers of Mathematics

Institutional memberships

The University of North Texas holds the following memberships.

American Association of Family and Consumer Sciences
American Association of State Colleges and Universities
American College Dance Festival Association
American Collegiate Retailing Association
American Council on Education
American Hotel and Lodging Association
American Institute of Indian Studies
American Mathematical Society
American Political Science Association
Association for Symbolic Logic
Association of Texas Colleges and Universities
Association of Texas Graduate Schools
Association of Women in Mathematics
Broadcast Education Association

Coalition of Urban and Metropolitan Universities
Conference of Southern Graduate Schools
Council for Chemical Research
Council for Higher Education Accreditation
Council for Public University Presidents and Chancellors
Council of Graduate Schools
Council on Undergraduate Research
Dallas Dance Council
Federation of North Texas Area Universities
Greater Denton Arts Council
Hospitality Sales and Marketing Association International

Institute of Internal Auditors

Institute of Management Accountants

Institute of International Education
International Council of Shopping Centers
International Council on Hotel, Restaurant and Institutional Education
International Textile and Apparel Association
Mathematical Association of America

Mid-American Universities International
National Association of State Universities and Land-Grant Colleges
National Collegiate Honors Council
National Restaurant Association
National Retail Federation
National Women's Studies Association
Oak Ridge Associated Universities
Society for Cinema and Media Studies
Texas Association of Broadcast Educators
Texas Educational Theatre Association
University Film and Video Association

Administration, faculty and librarians

See the Administration, faculty and librarians section for lists of university officers, UNT System officers and academic deans.

Information regarding individual faculty members and librarians is available from the Faculty Profile System (faculty.unt.edu/index.php). Select "Faculty Profiles" from the Browse menu. To access faculty information from a specific department or from the Libraries, use the drop-down menu at the head of the faculty list.

Graduate faculty of the Graduate School of Biomedical Sciences and the School of Public Health at the University of North Texas Health Science Center at Fort Worth (UNTHSC) also are members of the graduate faculty of the University of North Texas and thus can serve as mentors or committee members of UNT graduate students appropriate to their graduate appointment. See the *UNTHSC Graduate Catalog* for UNTHSC graduate faculty listings.

UNT presidents

Joshua C. Chilton (1890–1893)
John J. Crumley (1893–1894)
Menter B. Terrill (1894–1901)
J.S. Kendall (1901–1906)
W.H. Bruce (1906–1923)

Robert L. Marquis (1923–1934)
W.J. McConnell (1934–1951)
J.C. Matthews (1951–1968)
John J. Kamerick (1968–1970)
John L. Carter, Jr. (acting, 1970–1971)
C.C. Nolen (1971–1979)
John L. Carter, Jr. (acting, 1979–1980)
Frank E. Vandiver (1980–1981)
Howard W. Smith Jr. (ad interim, 1981–1982)
Alfred F. Hurley (1982–2000)
Norval F. Pohl (2000–2006)
Gretchen M. Bataille (2006–2010)
Phillip C. Diebel (ad interim, 2010)
V. Lane Rawlins (2010-2014)
Neal Smatresk (2014-2024)
Harrison Keller (2024-present)

From 1981 until 2000, the president also carried the responsibilities and title of Chancellor of the University and the University of North Texas Health Science Center at Fort Worth. Senate Bill 751 of the 76th Texas Legislature provided for the establishment of the University of North Texas System, and in July 1999, the Texas Higher Education Coordinating Board confirmed formal system status for UNT System Center (now in Dallas), including the Denton campus, UNTHSC at Fort Worth and the UNT Dallas Campus. In October 2000, the positions of president and chancellor were officially separated.

UNT chancellors

Frank E. Vandiver (1981)
Howard E. Smith (ad interim, 1981)
Alfred F. Hurley (1981–2002)
Lee Jackson (2002–2017)
Lesa Roe (2017-2021)
Michael R. Williams (2022-present)

On August 24, 2002, the UNT Board of Regents named Alfred F. Hurley Chancellor Emeritus of the UNT System and President Emeritus of the university.

2025-26 Academic calendar

Dates are subject to change by official action of UNT.

Fall 2025 calendar

KEY SEMESTER DATES	Full Term Aug 18 - Dec 12	8 Week I Session Aug 18 - Oct 10	8 Week II Session Oct 13-Dec 12
Schedule of Classes Available on myUNT	Mar 3	Mar 3	Mar 3
Registration Opens For specifics by student group/class, visit the registration guide.	Mar 17	Mar 17	Mar 17
Regular Registration Ends	Aug 14	Aug 14	Oct 9
Late Registration—For Students not Registered for the Term Students registering late will incur a late registration fee of \$75.	Aug 15 - Aug 22	Aug 15 - Aug 22	Oct 10 - 17

Admission

Admission policies are reviewed periodically and are subject to change. Check the UNT web site at admissions.unt.edu for the latest admission information or contact the Office of Admissions at 940-565-2681, 800-868-8211, Dallas–Fort Worth Metro 817-267-3731.

Application for admission for new undergraduate students

The University of North Texas is a selective university and does not guarantee admission of all applicants. It is recommended that students apply well in advance of stated application deadlines.

Applicants to the University of North Texas must meet academic requirements outlined in this catalog or other applicable publications of the university. The Office of Admissions, located in the Eagle Student Services Center provides complete admissions counseling for new students. Admissions Counselors are available to assist prospective students throughout the admissions process. Initial inquiries may be submitted online pages.unt.edu/undergradinfo, by calling us at (940) 565-2681, or by writing to the University of North Texas, Office of Admissions, 1155 Union Circle #311277, Denton, TX 76203-5017. The Office of Admissions requires undergraduate applicants to submit the ApplyTexas application online at www.applytexas.org or the Common Application online at www.commonapp.org. Students have the option to complete either application and are not required to submit both.

Prospective undergraduate students should apply as early as possible. All necessary credentials, including application forms, all official transcripts, test scores, etc., must be on file in the Office of Admissions by the following deadlines to be evaluated and processed for admission and enrollment at UNT.

Fall 2025

- February 1, 2025—to allow time for processing prior to the March 1, 2025, scholarship application deadline, freshmen should apply and pay fee no later than February 1, 2025
- March 1, 2025—priority application date for freshmen
- July 1, 2025—priority application date for transfer students
- July 15, 2025—deadline for freshmen applications; no applications will be accepted after this date.

Spring 2026

- December 1, 2025, for classes beginning January 12, 2026

Summer 2026

- May 1, 2026, for classes beginning check May mini start date
- May 15, 2026, for classes beginning check Summer I start date
- June 15, 2026, for classes beginning check Summer II start date

Fall 2026

- February 1, 2026—To allow time for processing prior to the March 1, 2026, scholarship application deadline, freshmen should apply and pay fee no later than February 1, 2026
- March 1, 2026—priority application date for freshmen
- July 1, 2026—priority application date for transfer students

Applications received after the deadlines must be accompanied by all official transcripts for evaluation. The prospective student must meet the stated admission requirements, must register for courses during late registration and will be subject to a late registration fee. All new undergraduate students enrolling must comply with state law and university policies concerning the Texas Success Initiative as described in the Academics section of this publication.

Former students

All previous, regularly admitted students who have been enrolled at UNT within the last year will not need to re-apply for admission. If you were previously admitted and have not enrolled at UNT at least once during the previous two consecutive long semesters prior to the term/semester you wish to return, please apply online at www.applytexas.org and fill out a readmit application. Students who have attended UNT but were not admitted under regular admission standards—non-degree seeking and dual credit high school students—must apply for regular admission and meet standards in order to return to UNT.

Programs with specific requirements

The Office of Admissions coordinates all policies and procedures for university admission. Some programs require that students meet additional requirements in order to be admitted to a particular program. Those programs with admission requirements in addition to those for general university admission are listed below. Students should consult that section of the catalog for specific program requirements.

Admission application fee

A non-refundable undergraduate application fee of \$75 is charged to all domestic, new, undergraduate, first-time-in-college and transfer applicants. A non-refundable undergraduate application fee of \$85 is charged to all international applicants. The fee must be paid in U.S. dollars. Admission applications will be processed after the application fee is received. Admission decisions will be made after all academic credentials are received and evaluated.

High school graduates

Note: Admission requirements are subject to change. For the latest information, visit the UNT web site at admissions.unt.edu.

The University of North Texas is a selective university and does not guarantee admission of all applicants. It is recommended that students apply well in advance of stated application deadlines.

Students admitted to the first term/semester of college work must have graduated from an accredited high school and complete the Foundation (HB5), Foundation with Endorsements (HB5), Distinguished Achievement (HB5), Minimum (UAP), Recommended (UAP) or Distinguished (UAP) high school program or complete the portion of the program that was available to them; or, successfully complete a curriculum that is equivalent in content and rigor to the Foundation, Foundation with Endorsements, Distinguished Achievement, Minimum (UAP), Recommended or Advanced (Distinguished Achievement) high school program at a high school that is exempt from offering such programs. Students must submit an application for admission to UNT with a transcript showing their high school credits in their graduating class. Transcripts showing rank in class should be sent after completion of the junior year. If your school does not rank, the Office of Admissions will assign you a rank based on a review of your high school transcript, including your SAT and/or ACT scores as pursuant by Section 51.9241 of the Texas Education Code.

In addition, it is recommended that students present satisfactory scores on the SAT or the ACT exam. Appropriateness of experience in lieu of academic credential (i.e., GED, home schooling, graduation from an unaccredited high school, etc.) may be assessed on an individual review basis by the UNT Admissions Review Committee (ARC). For more information, see "Admission by Individual Review" in this section of the catalog. To be more successful at UNT, we strongly recommend that students successfully complete the following classes in high school:

- English: 4 credits (English I-IV)
- Mathematics: 4 credits (Algebra I, Geometry, Algebra II and Pre-Calculus)
- Sciences: 4 credits (to be selected from Biology, Chemistry, Environmental Sciences and Physics)
- Social Sciences: 4 credits (World Geography, World History Studies, U.S. Government and Economics and U.S. History)
- Foreign Language: 2 credits (Levels I-III proficiency of the same language) (UNT recommends 3 credits)

- Health: 1/2 credit minimum
- Fine Arts: 1 credit
- Physical Education: 1 1/2 credits
- Computer Science: 1 credit (demonstrated proficiency at Level I)
- Electives: 3 1/2 credits
- Speech: 1/2 credit

*In March 2016, College Board began administering a new version of the SAT exam. Any scores from prior to March 2016 will be re-centered compared to new SAT scores, in accordance with the SAT equivalency guidelines published by College Board. Any SAT scores mentioned are subject to change. Please visit admissions.unt.edu for updated information.

Entrance examination

Guaranteed admission is granted to students who have earned a minimum score on the SAT or ACT exam and minimum score requirements vary according to the applicant's rank in their high school graduating class. The writing sections of either exam is not required. SAT or ACT exam scores are recommended but not required for admission. High school seniors who plan to attend UNT should take entrance examinations at least five months before enrollment dates. See a high school counselor for more information or visit: The College Board web site at sat.collegeboard.org; or ACT, www.actstudent.org. (The UNT institutional codes for score reporting purposes are SAT, 6481; ACT, 4136.)

Admission of new freshmen

Policies for the admission of new freshmen are established by the North Texas Board of Regents. Students who do not meet the requirements for automatic or regular admission should refer to the section titled "Admission by Individual Review" for more information.

Per the Texas Education Code TEC 51.803-51.809, Uniform Admissions Policy (UAP) requires applicants to four-year public universities to meet college readiness standards through completion of a high school graduation program or equivalent or through SAT or ACT score benchmarks. Students who attend an out-of-state high school are exempt from the UAP.

Students must meet one of the following college readiness standards in order to be eligible for consideration for admission at a Texas Four-Year Public Institution:

Successfully complete the Foundation (HB5), Foundation with Endorsements (HB5), Distinguished Achievement (HB5), Minimum (UAP), Recommended (UAP) or Distinguished (UAP) high school program or complete the portion of the program that was available to them; or

Successfully complete a curriculum that is equivalent* in content and rigor to the Foundation, Foundation with Endorsements, Distinguished Achievement, Minimum (UAP), Recommended or Advanced (Distinguished Achievement) high school program at a high school that is exempt from offering such programs; or

Satisfy the College Readiness Benchmarks on the SAT or ACT assessment: SAT - 1500 out of 2400 (for tests prior to March 2016) or 1090 out of 1600 (for tests March 2016 to present) or ACT - 18 English, 22 Reading, 22 Mathematics and 23 Science

*Under TEC Section 51.807 and with consultation of the Texas Education Agency, the Texas Higher Education Coordinating Board has determined that the high schools are responsible for providing the appropriate documentation to confirm the curriculum requirements and/or equivalencies.

Applicants meeting the curriculum or the SAT/ACT* assessment score requirements mandated by the Texas Education Code, but not meeting UNT's admission requirements, may be reviewed individually by the Office of Admissions. Students must meet requirements as outlined by TEC Sections 51.801-51.809 to be considered for admission at UNT.

Note: Admission requirements are subject to periodic review and change. For the latest information, visit the UNT web site: admissions.unt.edu.

Automatic admission

In compliance with state law, applicants who graduated in the top 10 percent* of their high school class and who completed a high school graduation program or equivalent program recognized under the Uniform Admissions Policy (UAP) as outlined under the Texas Education Code TEC 51.803-51.809 shall be admitted automatically to the university.

Regular admission

Applicants shall be guaranteed admission if they meet the UAP requirement and:

- Rank in the top 10% of your high school class and submit SAT or ACT scores
- Rank in the next 15% and have a minimum 1030 SAT or 20 ACT
- Rank in the 2nd quarter and have a minimum 1130 SAT or 23 ACT
- Rank in the 3rd quarter and have a minimum 1250 SAT or 26 ACT
- Have a cumulative unweighted high school GPA of 3.00 or higher on a 4.00 scale

Applicants who rank in the 4th quarter, applicants whose GPAs are below the standard, or applicants who do not meet the requirements in either the automatic or regular admissions categories, will have their applications reviewed by a UNT admission officer. (See "Admission by Individual Review" in this section.)

Undergraduate admission requirements

Classification	Prerequisites	Official transcripts	Entrance exam ¹
Beginning freshman (student who has never attended college or community college following high school graduation)	Graduation from an accredited high school and meet one of the following college readiness standards: Successfully complete the Foundation (HB5), Foundation with Endorsements (HB5), Distinguished Achievement (HB5), Minimum (UAP), Recommended (UAP) or Distinguished (UAP) high school program or complete the portion of the program that was available to you; or successfully complete a curriculum that is equivalent (as documented by the high school) in content and rigor to the Foundation, Foundation with Endorsements, Distinguished Achievement, Minimum (UAP), Recommended or Advanced (Distinguished Achievement) high school program at a high school that is exempt from offering such programs; or satisfy the College Readiness Benchmarks on the SAT or ACT assessment: SAT - 1500 out of 2400 (for tests prior to March 2016) or 1090 out of 1600 (for tests March 2016 to present) or ACT - 18 English, 22 Reading, 22 Mathematics and 23 Science	Yes: GPA through at least junior year.	Automatic admission— Applicants who graduated in the top 10 percent of their high school class shall be admitted automatically to the university.* Regular admission— Applicants shall be guaranteed admission if they <ul style="list-style-type: none">• rank in the next 15 percent and have a minimum 1030 SAT or 20 ACT, or• rank in the 2nd quarter and have a minimum 1130 SAT or 23 ACT, or• rank in the 3rd quarter and have a minimum 1250 new SAT or 26 ACT.
Transfer freshman (fewer than 15 college credit hours)	Graduation from an accredited high school. Minimum 2.5 college GPA (on a 4.0 scale) and must be eligible to return to all institutions attended.	Yes: Transcript from high school and each college or university attended.	Individual review— Applicants who do not meet the high school GPA

Transfer freshman (at least 15 but less than 30 college hours)	Minimum college 2.5 college GPA (on a 4.0 scale) and must be eligible to return to all institutions attended.	Yes: Transcript from each college or university attended.	requirement may be admitted only by individual review.*
Transfer student (30-44 college credit hours)	Minimum 2.25 college GPA (on a 4.0 scale) and must be eligible to return to all institutions attended.	Yes: Transcript from each college or university attended.	No.
Transfer student (more than 44 college credit hours)	Minimum 2.00 college GPA (on a 4.0 scale) and must be eligible to return to all institutions attended.	Yes: Transcript from each college or university attended.	No.
Non-degree seeking ²	None.	If needed for course prerequisites.	No.
Early admission student	Top quarter of high school class; solid B average; be on target to meet Texas Education Code, Sections 51.801-51.809 requirements; letters from school counselor or principal recommending early admission, and from parents or guardians concurring with intention; interview in admissions office.	Yes: Through junior year. Transcript must reflect completion of 3 units of English and 3 units each of solid mathematics, social science and natural science.	Minimum 1250 SAT or 26 ACT

Notes for admissions chart

* For automatic admission, freshman applicants should submit SAT or ACT exam scores. It is recommended but not required that all freshman applicants to the University of North Texas submit SAT or ACT exam scores. High school seniors who plan to attend UNT should take entrance examinations at least five months before enrollment dates. See high school counselor for more information or visit: the College Board web site: www.collegeboard.org or the ACT web site: www.act.org. (The UNT institutional codes for score reporting purposes are SAT, 6481; ACT 4136.)

¹ UNT applicants should take entrance exams at least five months before admission deadline. See high school counselor for information. The **writing section** of the SAT or ACT is not a requirement for admission to UNT.

² A non-degree student is an undergraduate student who is eligible to take up to 15 semester credit hours. After which time, non-degree students must apply as a degree seeking student.

Texas uniform admission policy (SB 3826)

State law TEC 51.803-51.809, Uniform Admissions Policy (UAP) requires applicants to four-year public universities to meet college readiness standards through completion of a high school graduation program or equivalent or through SAT or ACT score benchmarks. Students who attend an out-of-state high school are exempt from the UAP.

Students must meet one of the following college readiness standards in order to be eligible for consideration for admission at UNT:

1. Successfully complete the Foundation (HB5), Foundation with Endorsements (HB5), Distinguished Achievement (HB5), Minimum (UAP), Recommended (UAP) or Distinguished (UAP) high school program; or
2. Successfully complete a curriculum that is equivalent (as documented by the high school) in content and rigor to the Foundation, Foundation with Endorsements, Distinguished Achievement, Minimum (UAP), Recommended or

Advanced (Distinguished Achievement) high school program at a high school that is exempt from offering such programs; or

3. Satisfy the College Readiness Benchmarks on the SAT or ACT assessment: SAT - 1500 out of 2400 (for tests prior to March 2016) or 1090 out of 1600 (for tests March 2016 to present) or ACT - 18 English, 22 Reading, 22 Mathematics and 23 Science

Under TEC Section 51.807 and with consultation of the Texas Education Agency, the Texas Higher Education Coordinating Board has determined that the high schools are responsible for providing the appropriate documentation to confirm the curriculum requirements.

Applicants meeting the curriculum or the SAT/ACT assessment score requirements mandated by the Texas Education Code, but not meeting UNT's admission requirements, may be reviewed individually by the Office of Admissions.

Early admission

On an individual basis, UNT may admit high school students to the freshman class after completion of the junior year of high school. To be considered, students must:

1. be ranked in the top quarter of their class;
2. have a strong B average;
3. have completed 3 units of English and 3 units each of solid mathematics, social science and natural science;
4. present minimum combined SAT (combined critical reading/verbal + math) score of 1250 or ACT composite of 26;
5. submit letters from high school counselor or principal recommending early admission;
6. submit a letter from parents or guardians stating they approve of early admission; and
7. arrange an interview in the Office of Admissions.

Under this program, high school seniors may be enrolled concurrently at UNT through coordination with the UNT Director of Admissions and the high school.

Texas Success Initiative

See "Texas Success Initiative" in the Academics section of this catalog for additional information.

The Texas Success Initiative (TSI) is a state statute requiring all undergraduate students entering a Texas public institution of higher education to demonstrate readiness for college-level English language arts and reading (ELAR) and mathematics before enrolling in college-level coursework. Students may demonstrate college readiness by achieving the statutory threshold on the state-approved TSI Assessment unless they are exempt (see the Academics section of this catalog for exemption information). Students must satisfy all TSI requirements before receiving a baccalaureate degree.

The TSI Assessment minimum score threshold required to demonstrate college readiness in each subject is as follows:

	Math	ELAR
TSI Assessment	CRC 950	CRC 945 and Essay 5-8
January 11, 2021-present	or CRC 910-949 and Diagnostic Level 6	or CRC 910-944 and Diagnostic Level 5-6 and Essay 5-8

	Reading	Math	Writing
TSI Assessment	351	350	Placement Score of 340 and Essay Score of 4+

Prior to January 11, 2021		or
		Placement Score of less than 340, ABE level of at least 4 and an Essay Score of at least 5

Students shall participate in a designated education plan for each semester of enrollment for those subjects where readiness has not been demonstrated. Students may demonstrate readiness by either passing the highest level of indicated coursework or by scoring above statutory threshold on the TSI Assessment.

College readiness testing is not used in admission decisions at UNT. UNT must, however, have the results of a readiness assessment before Orientation and registration. For more information, visit advisingservices.unt.edu or contact the Office of Advising Services at 940-565-3633 or TSI@unt.edu.

Texas Academy of Mathematics and Science students

The Texas Academy of Mathematics and Science (TAMS) is an early admission residential program on the campus of the University of North Texas for high school students interested in pursuing STEM fields. Academy students take university courses taught by full-time UNT faculty and earn as many as 60 credit hours toward a baccalaureate degree. Students selected for this program may participate in some high school-related activities (e.g., science fairs, math competitions) as well as university activities (e.g., intramural sports competitions, university competitions that are age-appropriate for TAMS students). TAMS accepts 9th, 10th, and 11th graders, but students must complete the two-year program regardless of when the student enters the Academy.

Students must satisfy GPA requirements and adhere to TAMS's and UNT's Student Code of Conduct each semester in order to remain in TAMS, and students who are dismissed from or leave the program before the end of the two-year cycle must receive special permission from the University of North Texas and the Dean of TAMS to keep taking courses that will lead toward a baccalaureate degree. For additional information, contact the TAMS Office of Admissions at tamsadmissions@unt.edu.

Eagle Bound Program (Admissions Partnership Agreement)

The University of North Texas has an admission partnership, called the Eagle Bound Program, with several community college districts, including Collin College, the Dallas County Community College District (DCCCD), North Central Texas College (NCTC), Hill College, Grayson College and Weatherford College. The Eagle Bound Program allows students who meet UNT admission requirements to establish a concurrent admission relationship with UNT prior to completing their studies at their community college.

Contact the Office of Admissions for additional information.

Note: Concurrent admission programs are subject to periodic review.

Academic fresh start for admissions decisions

Section 51.931 of the Texas Education Code allows Texas resident students who were enrolled in a post-secondary institution 10 or more years ago to seek admission to UNT without consideration of that academic work.

To take advantage of this option, you must request it prior to your first enrollment at UNT. You must report and submit all of your college transcripts with your application for admission. You must also complete and submit a Fresh Start request form. Hours excluded under the Fresh Start option may still be used to claim exemption from the Texas Success Initiative.

Contact the Office of Admissions for more information at 940-565-2681, or online at admissions.unt.edu.

Transfer students

A transfer student is defined as any student new to UNT who has been enrolled at another college or university and has earned college credit after high school graduation prior to attendance at UNT.

Applicants must submit records of all institutions attended, even if they do not wish to transfer the credit to UNT.

Transfer students with less than 15 transferable college credit hours must:

- submit an application for admission;
- meet the entrance requirements listed above for high school graduates;
- have a minimum 2.5 college GPA on a 4.0 scale;
- be eligible to return to any institution attended; and
- provide an official transcript from high school and each college or university attended.

Transfer students with at least 15 but no less than 30 transferable college credit hours must:

- submit an application for admission;
- have a minimum 2.5 college GPA on a 4.0 scale;
- be eligible to return to any institution attended; and
- provide an official transcript from each college or university attended.

Transfer students with 30-44 transferable college credit hours must:

- submit an application for admission;
- have a minimum 2.25 college GPA on a 4.0 scale;
- be eligible to return to any institution attended; and
- provide an official transcript from each college or university attended.

Transfer students with more than 44 transferable college credit hours must:

- submit an application for admission
- have a minimum 2.00 college GPA on a 4.0 scale;
- be eligible to return to any institutions attended; and
- provide an official transcript from each college or university attended.

Transfer applicants who do not meet the above requirements for regular transfer admission should refer to the section titled "Admission by Individual Review" in this section for more information. All transfer applicants admitted by individual review may be required to participate in success programs as recommended.

The University of North Texas is a selective university and does not guarantee admission of all applicants. It is recommended that students apply well in advance of stated application deadlines.

The Registrar's Office, Admissions, and Academic units determine acceptable transfer credit from other institutions. The student's academic dean determines applicability of the credit to a degree program.

If UNT does not accept lower-division course credit earned by a student at another Texas public institution of higher education, UNT shall give written notice to the student and the other institution that the transfer of the course credit is denied. UNT shall also provide written notice of the reason for denying credit for a particular course or set of courses at the request of the Texas Public institution.

A student may dispute the denial of credit by contacting a designated official at either UNT or the other institution.

The two institutions and the student shall attempt to resolve the transfer of the course credit in accordance with Texas Higher Education Coordinating Board rules and/or guidelines. If the transfer dispute is not resolved to the satisfaction of the student or the institution at which the credit was earned within 45 days after the date the student receives written notice of the denial, UNT shall notify the commissioner of the Texas Higher Education Coordinating Board of its denial and the reason for the denial.

The commissioner of higher education or the commissioner's designee shall make the final determination about a dispute concerning the transfer of course credit and give written notice of the determination to the involved student and institutions.

The Texas Higher Education Coordinating Board shall collect data on the types of transfer disputes that are reported and the disposition of each case that is considered by the commissioner or the commissioner's designee.

If UNT has cause to believe that a course being presented by a student for transfer from another school is not of an acceptable level of quality, UNT will first contact the other institution and attempt to resolve the problem. In the event that the two institutions are unable to come to a satisfactory resolution, UNT may notify the commissioner of higher education, who may investigate the course. If its quality is found to be unacceptable, the Texas Higher Education Coordinating Board may discontinue funding for the course.

Transfer credit is subject to audit during a student's academic career at UNT. Total hours accepted may be increased or decreased to reflect correction of prior evaluation or consideration of additional transfer work to ensure compliance with UNT academic policies.

Texas community college transfer students

Prior to transferring to UNT from a Texas community college, students should discuss the UNT Course Equivalency Guide and the degree audit information contained in the UNT *Undergraduate Catalog* with their community college academic advisor/counselor.

Students are encouraged to plan all course selections at the community college as far in advance as possible. Proper planning and use of the UNT Course Equivalency Guide and the UNT degree audit information will maximize the transfer of credit to UNT.

The university participates in the Texas Common Course Numbering System (TCCNS) to facilitate the transfer of credits, and lists most community college and area four-year institution course equivalency information in its Transferology System at www.transferology.com/school/unt. Transferology allows students to create user accounts to store completed course work and to run UNT major-specific planning guides. Transfer guides using the TCCNS courses are available for each major on the Registrar's web site at registrar.unt.edu/transfer-guides.

Transfer of the core curriculum

A student who successfully completes the common core curriculum at a state-assisted institution of higher education in Texas may transfer as "core complete" to UNT. The student will receive academic credit for each of the courses transferred. See also the UNT transfer articulation web page at registrar.unt.edu/transfer-guides, where you can find information on the online transfer course equivalency tool Transferology.

Choice of catalog

Any student transferring directly from a Texas public community college to UNT shall have the same choice of catalog designating degree requirements as the student would have had if the dates of attendance at the university had been the same as the dates of attendance at the community college. See "Graduation Under a Particular Catalog" in the Academic policies section of this catalog.

Advanced-hour credit

A lower-level course that is determined to be equivalent to a UNT upper-level course does not satisfy the requirement of advanced hours.

Texas Common Course Numbering System

The Texas Common Course Numbering System (TCCNS) has been designed for the purpose of aiding students in the transfer of general academic courses between colleges and universities through-out Texas. A link to the list of currently approved TCCNS numbers may be found in the left-hand navigation on this page. In course descriptions, TCCNS prefixes and/or numbers, when applicable, are indicated in parentheses immediately following the UNT course number. Information provided is subject to change without notice and does not constitute a contract between UNT and a student or applicant for admission. Prospective transfer students should contact the academic dean's advising office of their intended major for course work guidelines prior to enrollment.

Transfer hours

Students who complete work at another institution to be applied toward a bachelor's degree at the University of North Texas should make sure that the appropriate officer of the other institution furnishes to the Office of Admissions at the University of North Texas a complete official transcript of such work.

The Registrar's Office, Admissions and Academic units determine acceptable transfer credit from other institutions based on evaluation of course content as described in the catalogs of those institutions. Transfer credit may only be received for course work completed at an accredited institution of higher education unless circumstances warrant review of non-traditional, prior learning. Transfer credit from other accredited institutions will be converted to semester hours and a 4.0 grading system (that mimics UNT's current grading system) for evaluation purposes as appropriate. The student's academic dean determines applicability of the credit to a degree program. Students seeking the Bachelor of Applied Arts and Sciences (BAAS) should refer to the special provisions of the respective BAAS degree programs.

Students who have begun residence work at UNT and who have attained junior standing may, with only the prior written approval of their academic dean, enroll in and transfer hours from approved two-year colleges.

Transfer credit is subject to audit during a student's academic career at UNT. Total hours accepted may be increased or decreased to reflect correction of prior evaluation or consideration of additional transfer work to ensure compliance with UNT academic policies.

Admission by individual review

Any applicants who do not meet the requirements in either the freshman automatic or regular admissions categories, or transfer requirements, will have their applications reviewed by a UNT admissions officer and may be given the opportunity to provide additional information to justify their admission to the university.

Upon review of the application file, communication will be sent stating the options for possible admission to UNT. These options may include, but are not limited to, the following:

- submitting new entrance exam scores (SAT or ACT);
- attending a community college and completing 15 or more college level hours with a minimum 2.5 GPA;
- duplicating college-level work in which the student received a D or F to improve college GPA;
- submitting up to two letters of recommendation* and an essay (personal statement) addressing the student's education and career goals.

Students should carry out the suggested option for the best possibility of admission into UNT.

Appropriateness of experience in lieu of academic credentials (i.e., GED, home schooling, graduation from an unaccredited high school) will also be assessed on an individual review basis.

Factors that may assist in determining academic readiness under the individual review provision may include, but are not limited to, the following:

- high school attended
- first-generation college attendance

- employment experience
- special abilities such as bilingual proficiency and meeting family responsibilities
- individual achievements
- leadership activities
- public service
- extra-curricular activities

Consideration for admission by individual review can occur only if the applicant has submitted all required credentials, letters of recommendation*, essay, etc., and, if required, scheduled an interview with an admissions officer prior to the published deadline for admission application.

New UNT students who have fewer than 15 hours of transfer credit, excluding non-traditional credit, who are admitted via individual review and have less than a 2.0 grade point average will be placed on academic alert.

Other transfer students with 30 or more hours of transfer credit who are admitted via individual review are placed automatically on academic probation if their transfer cumulative grade point average is below 2.0. See "Transfer Student" in this section for a statement of the current minimum entrance requirements for transfer students. To avoid academic suspension, transfer students admitted on academic probation must make a grade point average equal or exceeding the minimum for the appropriate classification as shown in the Table of Minimum Academic Requirements. See the Academics section of this catalog.

A limited number of admissions may be granted to students who do not satisfy the admission standards but who have demonstrated some exceptional talent. These students must have the approval of the Vice President for Enrollment or a designee of the Vice President.

For more information, contact the Office of Admissions.

Letters of Recommendation: **Beginning freshmen who are pursuing admission by individual review should submit letters of recommendation from a high school counselor and a teacher. **Transfer students** who are pursuing admission by individual review should request letters of recommendation from a college instructor and their college academic advisor. All letters should address the student's academic ability and preparedness for university-level study.*

Non-degree seeking undergraduate students

Students who wish to take several courses at the undergraduate level without seeking a degree at UNT (including visiting and transient students from other institutions) may enroll as non-degree undergraduates. Students must apply to UNT as non-degree and are eligible to take up to 15 semester credit hours. After which time, students must apply to seek a degree. Under certain circumstances, exceptions may be made to take additional coursework. Non-degree seeking students may be required to submit official transcripts from other institutions to ensure they meet all university prerequisite requirements for courses they wish to take. Non-degree seeking students are eligible to register two weeks prior to the term start. Students can choose to audit a course or take a class for a grade. Students should refer to the information about auditing a course and related tuition and fees to make an appropriate decision. Please visit the Auditing a Course section of the catalog.

Non-degree seeking students are not eligible for financial aid.

Non-degree seeking students taking on campus courses will be required to meet the state of Texas meningitis requirement. Additional information regarding state required meningitis vaccination can be found at meningitis.unt.edu.

International visiting students

International students who are seeking degrees at institutions abroad with the intent to enroll at UNT for one to two semesters or a summer term, and return to their home institution, may only enroll at UNT for this period of time if their home institution has an agreement with UNT for such a collaboration. All agreements and programs of this nature are run through UNT–International, and international students at these UNT partner schools must apply through and be nominated by their home institution in order to participate in such a program.

Inactive continuing students (undergraduate students only)

Inactive students are undergraduates who have not been officially enrolled at UNT in the last 12 consecutive months and who have not received a degree during the same period.

Inactive students who have not attended another institution are required to complete the following requirements to re-enroll:

1. Complete the ApplyTexas Application for returning students;
2. If previous UNT enrollment was as a dual credit student, all academic credentials from all institutions attended are required prior to re-enrollment; international students should contact the Office of International Admissions.

Inactive students who have attended another institution are required to complete the following requirements to re-enroll:

1. Complete the ApplyTexas Application for transfer students;
2. Submit official transcripts from all colleges attended since leaving UNT.

Graduate students

Individuals who hold a bachelor's degree or its equivalent from a regionally accredited institution and who wish to be considered for admission at UNT for the first time should contact the Toulouse Graduate School. Applicants who hold a degree are considered graduate students, whether or not an additional degree is sought. General admission requirements to the Toulouse Graduate School (tgs.unt.edu), specific admission requirements to graduate degree programs and descriptions of graduate courses are available in the Graduate Catalog.

International students

Applicants who do not hold either U.S. citizenship or U.S. permanent resident status should apply as international students.

Application deadlines

Undergraduate: Submit all documents at least six months before enrollment date.

Check application deadlines with your department.

Three types of admission

1. **Direct UNT admission**
Students who meet all academic requirements and English Language Proficiency requirements, as well as submit official documents for admission will be considered for direct UNT admission.
2. **Conditional UNT admission**
Students who do not meet English Language Proficiency requirements for admission but are otherwise admissible may qualify for conditional admission in a future semester to UNT if they are enrolled at UNT's Intensive English Language Institute (IELI) and complete their IELI studies. Students seeking conditional admission should apply to both UNT and to IELI.
3. **English language study only at UNT's Intensive English Language Institute (IELI).**
Students who are interested in studying English as a second language should apply for admission to the Intensive English Language Institute (IELI). For more information about this program, please visit the UNT website at: international.unt.edu/ieli.

English language proficiency measure

UNT accepts any 1 of the following 4 measures as proof of English language proficiency:

1. Complete Level 6 at UNT's Intensive English Language Institute (IELI):

Citizenship of one of these approved English-speaking countries

Anguilla, Antigua/Barbuda, Australia, Bahamas, Barbados, Belize, Bermuda, Independent nation of Guyana, Canada (except Quebec), Cayman Islands, Dominica, Falkland Islands (Islas Malvinas), Grenada, Guam, Guyana, Ireland, Jamaica/other West Indies, Liberia, Montserrat, New Zealand, South Africa, St. Helena, St. Kitts & Nevis, St. Lucia, St. Vincent, Trinidad & Tobago, Turks & Caico Isle, United Kingdom, Virgin Islands

2. Degree or courses completed at an accredited institute in the U.S. or in one of the approved English-speaking countries

Submit official transcripts showing courses, graduation, and/or degree earned from:

- High school/Secondary school
 - Graduation + 3 years attendance (includes U.S. Department of Defense school)
- College/University
 - Completion of Associate's, Bachelor's, Master's, or Doctorate degree
 - Completion of two university-level, academic English courses (excludes English as a Second Language courses) for a total of 6 credit hours with a grade of C or higher in both courses
 - Completion of 30+ hours of university-level, academic coursework with an overall GPA of 2.25 or equivalent. Student must be enrolled at the time of application and must have maintained continuous enrollment prior to their transfer to UNT.

3. English Language/English Proficiency Exam

High school/Secondary school exams

EXAM	MINIMUM SCORE REQUIRED	DOCUMENTATION NEEDED
AP Advanced Placement	Score of 5 in English Language & Composition	Submit official score report
IB International Baccalaureate	Grade 5 on the Higher-Level English A1 subject	Submit official score report
Cambridge International Education (CIE) Exams GCE/GCSE/IGCSE (International) General Certificate of (Secondary) Education	C or higher in English Language or English First Language	Submit official score report
WAEC/WASSCE West Africa Examination Council/West African Senior School Certificate Examination	B (2,3) or higher in English Language	Submit official score report through the WAEC digital platform at WAEC

NECO National Examinations Council	B (2,3) or higher in English Language	Submit token with official score report
KCSE Kenya Certificate of Secondary Education	B (8,9,10) or higher in English Language	Submit official score report
SAT 1	560 or higher on both Critical Reading and Writing	Submit official score report from College Board, reporting code 6481
ACT	21 or higher in English	Submit official score report through ACT, reporting code 4136

English Proficiency Exams

- Test scores expire after 2 years. Tests must be taken within two years prior to applying.
- Expired scores are accepted for students who have been continuously enrolled at a college or university in the U.S. since before the scores expired. Students must submit official score reports.

EXAM	MINIMUM SCORE REQUIRED	DOCUMENTATION NEEDED
TOEFL iBT (excludes MyBest score)	79	Submit scores electronically through ETS; school code 6481
IELTS (Academic)	6.0 overall band	Submit scores electronically through the testing service
PTE Pearson Test of English	53	Submit scores electronically through Pearson
DET Duolingo English Test	100	Submit scores electronically through Duolingo
MET (4-skill exam) Michigan English Test	Section scores of 54	Submit scores electronically through the testing service
Cambridge C1 Advanced/C2 Proficiency	C1	Submit scores through the Cambridge Assessment Platform

4. UNT's Intensive English Language Institute (IELI)

- Completion of level 6
- See international.unt.edu/ieli for program information
- Coursework from other Intensive English Programs does not meet UNT's ELP requirement

Application

Applications are available online at www.applytexas.org or www.commonapp.org. Students have the option to complete either application and are not required to submit both.

Application fee

The non-refundable application fee must be received for the admission processing to begin.

International Undergraduate application fee \$85

Send all application forms and documents to:

UNT Admissions
University of North Texas
1155 Union Circle #311277
Eagle Student Services Center, Room 305
Denton, Texas 76203-5017 U.S.A.

E-mail: UnderGrad.Admissions@unt.edu
Telephone: 940-565-2681

Students who are interested in studying English as a second language should apply for admission to the Intensive English Language Institute (IELI). For more information about this program, please visit the UNT website at: international.unt.edu/ieli.

Students who do not meet English Language Proficiency requirements for admission but are otherwise admissible may qualify for conditional admission in a future semester to UNT if they are enrolled at IELI. Students seeking conditional admission should apply to both UNT and to IELI.

IELI Application Fee: \$75

Send application and all documents for IELI admission to ieli@unt.edu.

Texas Success Initiative requirement and remediation for non-native English speakers

The Texas Success Initiative (TSI) is a state statute requiring all undergraduate students entering a Texas public institution of higher education to demonstrate readiness for college-level English language arts and reading (ELAR) and mathematics before enrolling in college-level course work. Students may demonstrate college readiness by achieving the statutory threshold on the state-approved TSI Assessment unless they are exempt (see the Academics section of this catalog for exemption information). Students must satisfy all TSI requirements before receiving a baccalaureate degree.

The TSI Assessment minimum score threshold required to demonstrate college readiness in each subject is as follows:

	Math	ELAR
TSI Assessment	CRC 950	CRC 945 and Essay 5-8
January 11, 2021-Present	or CRC 910-949 and Diagnostic Level 6	or CRC 910-944 and Diagnostic Level 5-6 and Essay 5-8

	Reading	Math	Writing
TSI Assessment*	351	350	Placement Score of 340 and Essay Score of 4+

Prior to January 11, 2021		or	Placement Score of less than 340, ABE level of at least 4 and an Essay Score of at least 5
---------------------------	--	----	--

Students shall participate in a designated education plan for each semester of enrollment for those subjects where readiness has not been demonstrated. Students may demonstrate readiness by either passing the highest level of indicated course work or by scoring above statutory thresholds on the TSI Assessment.

The following procedures apply to TSI-related developmental course work.

1. All developmental education students must meet with an Office of Advising Services representative prior to registration.
2. Students must participate in a designated education plan each semester of enrollment until they are TSI complete. Courses not successfully completed will be repeated.
3. Regular attendance is required in all TSI related courses. Instructors will monitor course attendance, and advisors will follow up on absences.

International student admission requirements

All students who are not U.S. citizens or U.S. permanent residents are considered international students at the University of North Texas and must meet the following admission requirements, plus all additional departmental requirements.

Once fully admitted to UNT, international students who require an immigration form I-20 to study in the United States will need to request their initial I-20 by submitting required documents through iNorthTX. The International Student and Scholar Services Office assists students with the initial I-20 process. Please contact international.unt.edu/index.html with any questions.

Classification	Prerequisites	Official transcripts	Entrance and/or language proficiency exams
Intensive English Language Institute			
IELI student	Graduation from high school recognized by the home country ministry of education	Copy of diploma/certificate	Placement test at IELI to determine current English language proficiency
Freshman / first-year students			
Beginning freshman from an international high school	Graduation from a high school recognized by the home country ministry of education	Official transcripts in native language and English showing all courses and marks of final three years of secondary school plus graduation date	Show English language proficiency. For a complete list of ways to demonstrate proficiency, see our website at: https://admissions.unt.edu/international/english-language-requirements .
Beginning freshman from a U.S. high school	Minimum of three years and graduation from an	Official transcripts, showing grades and rank	U.S. high school graduates only: SAT or ACT scores are recommended but not required.

	accredited high school in the U.S.	in class or GPA through at least junior year	
Transfer students (Transfer credit may be audited with an increase/decrease in transferred credit.)			
Transfer freshman with less than 15 transferable college credit hours	Graduation from an accredited high school; minimum 2.5 college GPA on a 4.0 scale; must be eligible to return to all institutions previously attended	Official transcripts (in native language and English) from high school and each college or university attended	Show English language proficiency (as above)
Transfer freshman with at least 15 but less than 30 transferable college credit hours	Minimum 2.5 college GPA on a 4.0 scale; must be eligible to return to all institutions previously attended	Official transcripts (in native language and English) from each college or university attended	Show English language proficiency (as above)
Transfer student with 30–44 transferable college credit hours	Minimum 2.25 college GPA on a 4.0 scale; must be eligible to return to all institutions previously attended	Official transcripts (in native language and English) from each college or university attended	Show English language proficiency (as above)
Transfer student with more than 44 transferable college credit hours	Minimum 2.00 college GPA on a 4.0 scale; must be eligible to return to all institutions previously attended	Official transcripts (in native language and English) from each college or university attended	Show English language proficiency (as above)
Former UNT student	If not in good academic standing when leaving UNT, must have earned a higher GPA in all schools subsequently attended; must be eligible to return to UNT	Official transcripts (in native language and English) from each college or university attended since leaving UNT; must be eligible to return to all institutions attended	Show English language proficiency (as above)

Admission or re-enrollment as related to personal conduct and admission falsification

It is the responsibility of the Director of Admissions to refer to the Dean of Students any application for admission or re-enrollment that indicates possible ineligibility of the applicant on grounds involving admission falsification. The potential of the applicant to benefit from university attendance, will be carefully considered before permission to enroll will be granted.

Orientation

All accepted undergraduate students new to UNT are required to attend an orientation session prior to registration for classes.

New freshman students entering in the fall term/semester are invited to attend one of the Freshman Orientation sessions where they receive academic advising and assistance with class scheduling and have the opportunity to interact with their peers. These sessions are conducted throughout the summer. Orientation includes campus life sessions, a resource and organization fair, placement testing, academic advising and course registration for the upcoming semester. A fee is charged for room, meals and administrative costs.

Transfer students attend a one-day orientation program. Each session focuses on meeting with an advisor, registering for classes and learning about campus resources.

Orientations are also held each December and January for students beginning in the spring semester and throughout the summer for those students' beginning classes during a summer term.

All new undergraduate students receive orientation information following acceptance notification.

Questions regarding Orientation should be directed to the Orientation and Transition Programs office at 940-565-4198 in the University Union, Suite 377 or visit orientation.unt.edu.

In addition to New Student Orientation, new international students are required to complete an online orientation conducted by the International Welcome Center.

Advanced placement and credit by examination

UNT awards undergraduate college credit on the basis of local and national examinations, subject to general limitations. This also includes military service credit and classroom instruction offered through the non-academic institutions approved by the American Council on Education. Such credit is not included in determining grade point averages and has the following additional restrictions:

1. may not be used to reduce the general degree requirement of completing a minimum of 30 semester hours in residence on the UNT campus;
2. may not be used to reduce the general degree requirement of completing at least 24 semester hours of advanced work at UNT;
3. may not be used to reduce the general degree requirement of completing at least 12 advanced hours in the major at UNT;
4. may not be earned in any course the student has previously completed at any university; and
5. may not be earned in any course prerequisite to another course in the same subject for which the student has previously earned credit.

UNT recognizes exam credit in transfer from other accredited institutions within the limits outlined above. Scores from exam credits accepted in transfer are not re-evaluated by UNT. Credit by examination cannot be substituted for any grade, including an F earned for a course in high school, at UNT or at another college or university. The credit earned through examination will not be included in the grade point average at UNT, but it will be included in accepted semester credit hours and on the UNT transcript.

Credit and advanced placement may be granted only in accordance with policy and procedures in operation at UNT. Departments that honor the CLEP Subject Examinations, the College Board Advanced Placement Examinations, or other instruments for granting advanced placement set departmental standards for their use. Policies for awarding credit are reviewed periodically and are subject to change.

Advanced Placement (AP) Examinations

Students who have received college-level training in secondary school and who present applicable scores on the appropriate Advanced Placement Examination will be granted, on request, placement and credit for comparable courses at the university following enrollment.

Visit www.unt.edu/credit for updated information.

Psychology	3, 4 or 5	3	PSYC 1630

The College Board Advanced Placement Examinations are offered in May each year and are administered by The College Board in most school districts. Students typically complete an AP course offered by their high school before taking an AP examination in that subject. However, in consideration of homeschooled students and students whose schools do not offer AP courses, The College Board does not require a student to complete an AP course before taking an AP examination. All requests for information should be directed to the Advanced Placement Program of The College Board, <http://apstudent.collegeboard.org>.

AP credit evaluation and notification

Entering freshmen who took the Advanced Placement (AP) Exam for credit (and who designated that their scores be sent to the University of North Texas, code 6481) will have their AP credit applied automatically to their UNT academic record. Students should consult their academic advisor about the application of their AP credits. Students who have questions about the receipt of their AP scores should check with the Office of the Registrar.

Former, continuing and transfer students who wish to have their AP test results applied to their UNT transcript must initiate this process through the Office of the Registrar during their first term/semester enrolled at UNT. (**Note:** students who fail to initiate the process during their first term/semester at UNT may still be eligible to receive credit but may be subject to the standards in place at the time of initiation, rather than those that were current when the test was taken.)

College-Level Examination Program (CLEP)

UNT recognizes credit earned through College-Level Examinations of the College Board only if the credit is first certified by the Office of the Registrar. The dean of the student's college or school at UNT has the option of applying CLEP credit to the student's degree audit.

CLEP General Examinations

UNT does not grant credit on the basis of College Board CLEP General Examination scores.

CLEP Subject Examinations

CLEP Subject Exams are scheduled throughout the year at participating colleges and universities. UNT certifies CLEP credit if the score meets or exceeds the recommended credit-granting score for that subject. Policies for granting CLEP credit are subject to change.

Use of CLEP credit

A student may not earn examination credit for any course failed. All general regulations for credit by examination apply to CLEP credit.

CLEP Examination	CollegeBoard score	Semester credit hours	UNT course equivalent
World Languages			
French Language, Level 1 & 2	50	6	FREN 1010, FREN 1020

SAT Subject Tests

UNT does not grant college credit on the basis of The College Board SAT Subject Test scores.

Educational experience in the armed services

Credit may be given for formal service school courses completed in the armed services after evaluation of official documents by the Office of the Registrar. The student's academic dean decides if credit awarded for such courses will be applied toward requirements for the bachelor's degree.

International Baccalaureate (IB)

UNT awards a minimum of 24 semester hours of credit to students who have completed the International Baccalaureate Program and have received the International Baccalaureate Diploma. Students must earn a minimum score of 4 on tests that count toward the diploma. The Registrar's Office will certify the examination credit based on the qualifying scores.

A student who has completed a high school International Baccalaureate Program but has not earned the diploma and who has scored 5, 6 or 7 on the higher level IB examination will receive college credit at UNT. Credit is awarded as listed in the chart below.

Note: The minimum score requirements for awarding credit based upon International Baccalaureate examinations is under review and subject to change.

The IB institution code for UNT is 01800. Students should use this code when requesting to have IB scores sent to the UNT Admissions Office.

Academic policies

Academic standing

Academic status

This term is used as an indication of a student's academic standing with the university.

Academic standards

Students must achieve a minimum cumulative grade point average, referred to as the minimum UNT-CGPA requirement, to remain in good academic standing. At the end of the first term of enrollment at UNT, the minimum UNT-CGPA requirement is 1.8. In each subsequent term of enrollment, the minimum UNT-CGPA requirement is 2.0.

The UNT-CGPA upon which academic standards are based is calculated by dividing the total number of grade points earned in residence at UNT by the total number of semester credit hours (SCH) attempted in residence at UNT. Excluded in this calculation are all courses in which the student received grades of NP, NPR, P, PR, W, Z or I. The cumulative grade point average as defined here is used only for determining a student's academic status and is not necessarily related to the grade point average that governs eligibility for graduation.

In calculating grade points, grades count as follows: A = 4 points per semester credit hour, B = 3 points, C = 2 points, D = 1 point, F = 0 points.

Classification for the purpose of establishing the academic standing of the student is determined by the sum of all hours attempted in residence in regularly graded courses at UNT, hours passed in pass/no pass graded courses at UNT, and hours transferred from other institutions. Not included in the definition of student classification for academic standards are hours granted by the university for extension, service experience, advanced placement, credit by examination, CLEP or transfer hours attempted but not passed or accepted by the university for academic credit.

A student is placed on academic alert or academic probation at the end of any enrollment period in which the UNT-CGPA on work attempted in residence at this university does not equal or exceed the minimum UNT-CGPA requirement.

Minimum CGPA requirement

This term refers to the minimum cumulative grade point average a student must achieve to remain in good academic standing. At the end of the first term of enrollment at UNT, the minimum CGPA requirement is 1.8. In each subsequent term of enrollment, the minimum CGPA requirement is 2.0.

Good academic standing

This term refers to the academic status students maintain when achieving the minimum CGPA requirement after each term of enrollment at UNT.

Academic alert and the regulations governing students on academic alert

A freshman or first time in college (FTIC) in their first semester at UNT is placed on academic alert if the CGPA achieved for a term falls below the minimum CGPA requirement. To be removed from academic alert, the student must raise the CGPA to a minimum of 2.0 during the next period of enrollment. A student on academic alert who does not raise the CGPA to at least a minimum of 2.0 at the end of the next term/semester of enrollment is placed on academic probation.

Academic probation and the regulations governing students on academic probation

A student who is not classified as a freshman, first time in college (FTIC), or a student who is currently or has been on academic alert, is placed on academic probation at the end of any enrollment period in which the CGPA drops below the minimum CGPA requirement.

A student remains on academic probation at the end of any enrollment period in which the student earns at least a 2.25 GPA but does not achieve a 2.0 CGPA.

A student remains on academic probation during any summer enrollment in which the student fails to raise the CGPA to a 2.0.

A student who, during a probationary fall or spring term/semester, fails to raise the CGPA to a 2.0, or who fails to make at least a 2.25 GPA for the term/semester, is automatically suspended from UNT for one or more long terms/semesters. (See "Academic Suspension and the Regulations Governing Students Under Academic Suspension.")

The electronic grade report, available online at my.unt.edu at the end of each term/semester, includes a statement of academic status and a CGPA summary on which the status is based. Each student is responsible for knowing whether the minimum CGPA has been achieved and whether they are eligible to re-enroll or remain enrolled in the university. Any student enrolled when ineligible will be withdrawn by the Registrar, and no special consideration will be given to such student on a plea of ignorance of academic status. If the cumulative record is believed incorrect, the student should contact the Registrar's Office.

Academic suspension and the regulations governing students under academic suspension

A student who, during a probationary fall or spring term/semester, fails to raise the CGPA to a 2.0, or who fails to make at least a 2.25 for the term/semester, is automatically suspended from UNT for one or more long terms/semesters.

A student who is suspended from the university for failure to meet the standards prescribed in the "Academic Probation and the Regulations Governing Students on Academic Probation" is prohibited from re-enrolling for the following long term(s)/semester(s) as outlined below:

First suspension:	One long term/semester
Second suspension:	Two long terms/semesters
Third suspension:	Indefinite

A student who has been suspended for an indefinite period may request, at the end of two calendar years from the time of the suspension, a review of the case by the appropriate academic dean.

Each student is responsible for knowing the minimum CGPA requirements and the standards for academic standing. Any ineligible student who enrolls during a long term/semester will be withdrawn by the Registrar, regardless of whether the student has registered or pre-registered and paid fees. The student should be aware that course work taken at another institution while the student is suspended from the University of North Texas may not apply to a degree.

A student who has been suspended from the University of North Texas re-enters on academic probation. A student under academic suspension may attend the UNT summer enrollment periods with the approval of their college or school. Students should contact the academic advising office to request approval for summer enrollment. If, at the end of the summer enrollment period, a student raises the CGPA to a minimum of 2.0, the student will be reinstated in good academic standing.

Academic standards for transfer students

Transfer students admitted to UNT are subject to minimum academic requirements. Thus, if at the end of the first enrollment period a transfer student's grade point average on all work attempted at UNT does not meet the minimum CGPA requirement, the student will be placed on academic alert or academic probation for the next period of enrollment and the Regulations Governing Students on Academic Alert or Academic Probation will apply.

Additional information concerning academic status is available from the offices of the academic deans or the Registrar's Office.

Effects of withdrawal on academic status

Any student who withdraws from UNT at least two weeks before the first day of final exams for long terms/semesters or the equivalent dates for 8 week and summer sessions is given grades of W and is not penalized with a reduced CGPA. A student who does not officially withdraw from the university is held responsible for grades of F and is placed on alert, probation, or suspended from the university if the grades of F bring the CGPA below the minimum required. For official dates and deadlines for withdrawal, visit the Academic Calendar.

Dean's list and president's list

Undergraduate students (excluding post-baccalaureate students) who complete at least 12 hours of regularly graded course work in residence during the long session with a UNT term grade point average of 4.0 are eligible for recognition on the president's list. Students with a UNT term grade point average of 3.5 or above are eligible for recognition on the dean's list. Students are notified of this recognition by the president or the appropriate academic dean.

Classification of students

Students are classified on the basis of term/semester hours passed. Semester hours passed are computed by adding transfer hours accepted, pass/no pass hours passed, graded hours passed and non-traditional credit accepted at UNT.

Undergraduate classifications are freshmen, those who have completed less than 30 semester hours of college credit; sophomores, 30 to 59 hours completed; juniors, 60 to 89 hours completed; seniors, 90 or more hours completed but who have not received a bachelor's degree. Graduate students are those who have graduated with a baccalaureate degree from an accredited college or university.

Grades and grading policies

Grading system

UNT's grading system uses the letters A, B, C, D, F, P, NP, I, and W. The letter Z is used to indicate that a grade was not properly received and/or recorded for a course.

A — excellent work, four grade points for each semester hour.

B — good work, three grade points for each semester hour.

C — fair work, two grade points for each semester hour.

D — passing work, one grade point for each semester hour.

F — failure; given when a student (1) has failed the course while still officially enrolled at the end of the term/semester; (2) is failing a course and misses the final examination without satisfactory explanation; or (3) stops attending class without processing an official drop or withdrawal.

P — passed; a credit grade (1) on pass/no pass option, (2) on student teaching, and (3) in selected undergraduate and graduate individual problems, research, thesis and dissertation courses.

NP — not passed; a failing grade on the pass/no pass option; non-punitive.

I — I is a non-punitive grade given only during the last one-fourth of a term/semester and only if a student (1) is passing the course and (2) has justifiable and documented reason, beyond the control of the student (such as serious illness or military service), for not completing the work on schedule. The student must arrange with the instructor to finish the course at a later date by completing specific requirements. These requirements must be listed on a Request for Grade of Incomplete form signed by the instructor, student and department chair and must be entered on the grade roster by the instructor. Grades of I assigned to an undergraduate course at the end of the Fall 2007 semester and later will default to F unless the instructor has designated a different automatic grade. See also "Removal of I" policy in the Academics section of this catalog.

W — drop or withdrawal without penalty. Given when a student drops or withdraws from the university prior to the designated day of a given semester's 10th week of class for the long terms/semesters or corresponding dates for 8 week and summer sessions (specific dates are published in the online Academic Calendar). See regulations for dropping and withdrawing.

Note: No grade points are allowed for grades F, I, NP, P, W, or Z. (Use of WF grade was discontinued fall 2018.)

A complete record of all previously used grades and grading systems is detailed on the official transcript.

Pass/no pass option

Undergraduate Students

An incoming freshman or any undergraduate in good standing with a C average or better on all work attempted in residence at UNT may schedule one course a term/semester on the pass/no pass option. Seniors may elect more than one pass/no pass course during their final term/semester.

A maximum of 18 semester hours of credit under the pass/no pass option may be applied toward the bachelor's degree. Only courses counted as electives on the student's degree plan may be scheduled under the pass/no pass option. These hours are not used in calculating the grade point average, but count as full credit.

A grade of D or better will be shown as a P. If the course is not passed, the record will show NP and the hours attempted will not be used in calculating the grade point average.

A student may change to the pass/no pass option in the office of their academic dean/advisor any time before the end of the sixth week of class, or the corresponding point of an 8-week session, summer session, provided eligibility requirements above are met.

Courses taken under the regular grading system may not be repeated as pass/no pass courses unless a grade of W was previously received.

A student who changes majors is not automatically denied credit for a pass/no pass course that becomes a degree audit requirement for the new major. The decision is made by the academic dean of the new department. **However, under no circumstances is a grade of P changed to a letter grade.**

Transfer students have the same pass/no pass privileges and restrictions, but they must pass 30 semester hours of regularly graded courses at UNT to be eligible for graduation.

Graduate students

Graduate students may enroll under the pass/no pass option only for undergraduate courses that are not required as a deficiency makeup or as a graduate degree requirement.

Courses automatically graded pass/no pass

Certain graduate-level individual instruction courses will be graded pass/no pass when classes are taught on campus in those departments whose faculty have voted for the use of this grading system for individual instruction.

Grade point averages

Overall Grade Point Average (OGPA)

Includes transfer and University of North Texas attempted hours.

University of North Texas Cumulative GPA (UNT-CGPA)

Includes attempted hours at the University of North Texas.

The overall grade point average (OGPA) is used to determine student class loads, eligibility for admission to the university and certain programs, eligibility for graduation, and for calculating honors for graduation. All GPA calculations are subject to post-audit and correction by the Registrar's Office.

The GPA is calculated by dividing the total number of grade points by the total number of semester hours attempted. The number of semester hours attempted includes all courses with grades of A, B, C, D, and F unless replaced by a later grade. Courses with grades of I, NP, P, W or Z are not counted as courses attempted.

Cumulative grade point average

The cumulative grade point average (CGPA) upon which academic standards are based is calculated by dividing the total number of grade points earned in residence at UNT by the total number of semester credit hours (SCH) attempted in residence at UNT.

Not included in the definition of student classification for academic standards hours are granted by this university for extension courses, service experience, advanced placement, credit by examination, CLEP or transfer hours attempted but not passed.

Excluded from the calculation of the CGPA are all courses in which the student received grades of I, NP, P, W or Z.

The cumulative grade point average as defined here is used only for determining a student's academic status and is not necessarily related to the grade point average that governs eligibility for graduation or graduating with honors.

Course duplications

A student may take a course a second or subsequent time. The Registrar's Office will post duplications at the request of the student, at the request of an academic advisor or upon review of the student's record. Once a duplication of a UNT course is posted by the Registrar's Office, the first instance of the UNT course will be excluded from the student's UNT-CGPA, cumulative record of hours attempted and grade points earned. The Registrar includes without exception any course repeated *more than once* in the student's UNT cumulative record of hours attempted and grade points earned. Departments may count the highest grade for departmental GPA requirements; however, the academic dean uses only the last grade recorded in certifying the student's eligibility for graduation.

Undergraduate students who enroll in the same course more than twice may be charged additional tuition amounts.

Academic status changes due to course duplications

A student request for the recording of a course duplication made before or on the last class day of any term or session will be reflected in the hours attempted and grade points earned at the beginning of the term/semester or session.

If a student who is on academic alert or academic probation requests the recording of course duplications, and the resulting adjusted CGPA equals or exceeds the minimum CGPA requirement, the academic alert or probation status will be removed if the student notifies the Registrar's Office on or before the last class day for that term/semester or session. Otherwise, the student will remain on academic alert or probation for that enrollment period and be subject to attendant penalties.

If a student is suspended at the end of a term/semester during which the student has repeated a course and the posting of that duplication will result in a CGPA that would have been sufficient to be continued on probation at the end of that term/semester (or to be cleared), the student will be reinstated if the student requests the duplication and applies for reinstatement at the Registrar's Office. The delayed posting of course duplications completed during prior enrollment periods cannot be used as a basis for altering suspension history or reinstating lost registration schedules.

Courses duplicated Fall 2005 and later will result in a re-evaluation of a student's suspension history beginning with the term that the duplication was completed. The delayed processing of course duplications and updating of suspension history cannot be used as justification for reinstating lost registration schedules.

Grade reports

The electronic grade report and academic standing are available online at my.unt.edu at the close of each term/semester. If the grade report or the academic standing is believed to be in error, the student should contact the Registrar's Office within 30 days following the first class day of the succeeding term/semester.

At mid-term/semester in the long session, instructors may provide individual written warnings to students who are doing unsatisfactory class work.

Grade books

University policy requires that grade books be retained by the departmental chair for five years.

Grade changes

No grade except I may be removed from a student's record once properly recorded. Changes are not permitted after grades have been filed except to correct clerical errors.

Requests for error correction must be initiated immediately after the close of the term/semester for which the grade was recorded.

A faculty member who believes an error has been made in calculating or recording a grade may submit a change through the UNT Grade Change workflow.

Removal of I

A student may remove a grade of I within one year by completing the stipulated work. After the student completes the stipulated work, the instructor submits a grade change through the UNT Grade Change workflow. The instructor's academic dean completes processing with the Registrar's Office, where the grade point average is adjusted accordingly. For undergraduate courses taken Fall 2007 or later, if a student does not complete the stipulated work within the time specified, the grade of I will default to F unless the instructor has designated a different automatic grade. The GPA is adjusted accordingly, and the student will be subject to academic penalty should any exist.

Grade appeals procedure

Students are responsible for meeting the standards of academic performance established for each course in which they are enrolled as well as requirements for completion of their academic programs. Faculty members are responsible for establishing

standards of academic performance and for evaluating student performance in an equitable manner. Faculty decisions in such matters are considered authoritative and can be overturned only when it has been determined that a grade was assigned in an inequitable, arbitrary, or erroneous manner. This policy outlines the grounds for a student grade appeal and the process by which it must be carried out. The grade appeal policy can be found at <https://policy.unt.edu/policy/06-040>.

Grounds for appeal

A student may appeal a grade when the student believes the:

1. grade was based on unfair treatment;
2. instructor departed from standards set out in the course syllabus without a rational academic reason; or
3. an error was made in calculating the grade, including failure to factor an assignment, project, quiz or examination.

If the student believes that the grade was assigned due to discrimination or sexual harassment, the student must report this belief to the Office of Equal Opportunity. That allegation must be resolved through the UNT Resolution Procedures for Complaints of Discrimination, Harassment, or Retaliation, before the appeal can proceed. Change of a grade due to violations of academic integrity cannot be appealed through this process.

Time limits and procedures for appeal and resolution

The grade appeal should be resolved within a maximum of 13 weeks after the semester in which the grade was officially posted. Under extraordinary circumstances, the unit administrator may grant an extension of any time limits identified in this policy. In cases where the student alleges that the final grade was assigned due to discrimination or sexual harassment, the initiation of the appeal process described herein will be delayed until the conclusion of investigative processes in the Office of Equal Opportunity.

1. **Consultation with the instructor:** The student must consult with the instructor as soon as possible and no later than 10 calendar days after the start of the following academic term, inclusive of fall, spring, summer, and intersession terms. The purpose of the meeting is to discuss the ground of the grade appeal and seek resolution. If the appeal is based on allegations of discrimination or sexual harassment, this meeting will be delayed until the discrimination or sexual harassment complaint is resolved. In the event of a finding of discrimination or sexual harassment, the student will meet with the unit administrator instead of the faculty member.
2. **Appeal to the unit administrator:** After consultation with the instructor, the student must initiate a grade appeal in writing, based on at least one of the three grounds mentioned above, to the unit administrator within five weeks (35 calendar days) of the date the grade was officially posted in the university system. If the unit administrator determines that the appeal is not based on one of the three criteria, the unit administrator shall dismiss the appeal, and the matter will be resolved.

If the unit administrator determines that the appeal is based on at least one of the three grounds mentioned above, the unit administrator shall provide the instructor with a copy of the written appeal within three (3) calendar days of its receipt.

The unit administrator may consult with the instructor and student to resolve the appeal. If the unit administrator is unable to resolve the appeal in consultation with the student and instructor, the unit administrator must forward the appeal to a faculty committee within seven (7) calendar days of its receipt.
3. **Committee review:** The committee that reviews the grade appeal may be a standing appeal committee comprised of and elected by faculty. If no such committee exists, an ad hoc grade appeal committee of three faculty members shall be constructed as follows: one is selected by the student, one selected by the instructor. The two selectees then agree upon and select a third committee member who chairs the committee. Committee members may include any person holding a full-time faculty appointment in the department, college, or university. The unit administrator is responsible for distributing this policy to the committee members.
 - a. The faculty member shall submit a written response to the appeal to the committee. The committee may request additional information and may meet with the student, the instructor, and/or others, as it sees fit.
 - b. After reviewing the students' statement, the instructor's response, and any additional information requested and provided by the student or the instructor, the committee issues one of the following recommendations to the instructor and unit administrator:

- i. The grade should remain unchanged, as it was not assigned as the result of unfair treatment, a departure from standards set out in the course syllabus without a rational academic reason, or an error in calculating the grade.
 - ii. The grade should be changed, in which instance the committee must provide a written explanation of this finding to the instructor.
 - c. If the committee recommends a grade change and the instructor disagrees, the instructor must provide a written explanation of the disagreement to the committee. The committee then makes a final recommendation to the unit administrator, taking into consideration the instructor's response.
 - d. Upon the conclusion of steps a., b., and, if applicable, c., directly above, the committee submits its final recommendation in writing to the unit administrator.
4. **Unit administrator decision:** The unit administrator shall review the appeal committee recommendation, as well as all information gathered during the appeal process, make a determination, and notify the instructor and student. If the unit administrator determines that grade should be changed, the unit administrator shall initiate an administrative grade change.
5. **Dean's review:** The student and/or the instructor may appeal the unit administrator's determination to the academic dean (or the dean's designee) by a written request for review to the dean within seven (7) calendar days of having received notice of the unit administrator's determination. This request must specifically state grounds for requesting the reconsideration. The dean shall provide notice of the appeal to the student, the instructor, and the unit administrator. The unit administrator shall forward all materials related to the appeal to the dean. An appeal to the dean may extend the time limit on resolution of the grade appeal by no more than three weeks (21 calendar days). The grade issued by the instructor remains in effect during the appeal process.
- a. **Appeal for procedural error:** In the case of appeal based on a procedural error, if the dean determines that there were no procedural errors, the dean responds in writing that the unit administrator's determination is upheld. If the dean determines that there were procedural errors, the appeal will be considered anew. The dean will appoint an ad hoc grade appeal committee comprised of individuals holding a full-time faculty appointment within the university. That committee reviews the grade appeal as described in steps 3.a, 3.b, and 3.c, above, and collects additional information as it determines appropriate. Upon the conclusion of the processes the committee submits its recommendation in writing to the dean.
 - b. **Appeal for unfair treatment, deviation from syllabus, or grade calculation error:** In the case of an appeal based on the grounds listed in section A (1, 2, and 3), the dean (or the dean's designee) will review the grade appeal as described in steps 3.a, 3.b, and 3.c, and collect additional information as the dean determines appropriate.
 - c. **Dean's determination:** Based on provisions a. and b. directly above, the dean makes a final determination whether to uphold the unit administrator's determination. The dean shall provide notice of the final resolution to the student, instructor, and unit administrator. The resolution must be described in writing. The dean's decision is final.
6. **Failure of response:** If any person, whether student, faculty, or administrator, fails to respond to requests made as part of the grade appeal process within seven (7) calendar days of the request, the requester may move forward without that response.

Records retention

Documentation of all formal grade appeals, including procedural appeals, must be maintained by the department for a period of time designated in the university records retention policy.

Additional grade appeal information

More information about the grade appeal procedure may be found on the UNT policy page at <https://policy.unt.edu/policy/06-040>.

Tests

University policy requires that departments retain tests for one year after the term/semester has been completed or return tests to students. If the tests are returned, students are responsible for producing the tests should a grade appeal be necessary.

Transcripts

Transcript request information can also be found on the Registrar web page: (registrar.unt.edu/transcripts-and-records/order-transcript).

Before an official transcript can be released, applicable obligations to the university must be resolved. UNT transcripts can be ordered for electronic or mail delivery online. Paper copies can be requested in person at the Registrar's Office.

If you have any questions concerning transcripts, please contact the Registrar's Office in person or call the Registrar's Office at 940-565-2111.

Academic records policies

State privacy policy

State law, with few exceptions, gives individuals the right to be informed about the information UNT collects about them. It also gives individuals the right to receive and review collected information and the opportunity to have UNT change any incorrect information. UNT's privacy policy (no. 14.009) is available at policy.unt.edu/policy-manual.

Student education records (FERPA)

Pursuant to the Family Educational Rights and Privacy Act (FERPA), the university has established policies relating to the accessibility of student information in the custody of the University of North Texas. The UNT FERPA policy statement appears in its entirety in the UNT Policy Manual, policy number 07.018. Information not covered by FERPA will be released only in accordance with the policy on public information found in policy number 04.002 of the UNT Policy Manual. Requests for public information not subject to FERPA must be submitted to the university Public Information Officer in writing. The UNT Policy manual with the complete FERPA policy (07.018) can be found at policy.unt.edu/policy-manual.

FERPA affords students certain rights with respect to their education records. Students have the right to:

1. Inspect, review and receive copies of their own education record upon request to the appropriate records custodian (i.e.- Registrar, Dean, Department Head, or other appropriate official). The request must be provided in writing and must specifically identify the requested education records. The university will comply with all requests within forty-five (45) calendar days from the date the request was received.
The university official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the university official to whom the request was submitted, that official shall advise the student of the correct official to whom the request should be addressed.
2. Request the amendment of personal education records the student believes are inaccurate, misleading or a violation of privacy.
The student should write to the Dean of Students Office, clearly identify the part of the record he or she wants changed, and specify why it is inaccurate or misleading. Students may request a hearing to review a denial of a request to amend educational records. Additional information regarding the hearing procedures will be provided to the student when notified of the decision to deny a request to amend. The right to amend education records does not apply to grade appeals.
3. Generally, FERPA requires written consent before personally identifiable information contained in a student's education records may be disclosed to a third party. However, FERPA authorizes disclosure of personally identifiable information without the student's consent under certain circumstances. One such exception is directory information.

Directory information consists of a student's name; address; major field of study; participation in officially recognized activities and sports; weight and height of members of athletic teams; dates of attendance; enrollment status (e.g., undergraduate or graduate; full-time or part-time); classification; degrees, awards and honors received (including selection criteria); expected graduation date; dissertation and thesis titles; most recent previous school attended; and photograph.

Directory information will be provided without a student's consent upon request unless the student files a request in the Registrar's Office asking that their directory information not be disclosed without specific authorization. The request should be submitted prior to the 12th class day in the fall and spring terms, the 2nd class day of a three-week session, or the 4th class day of a five-week summer session. A request to withhold information may be submitted after the stated deadline for a term or session, but information may be released between the deadline and receipt of the request. The university will comply with a student's request to have their information excluded from available directory information until the request is amended in writing.

The University of North Texas will disclose information from a student's education records without the written consent of the student to the following individuals or under the following conditions:

1. School officials who have a legitimate educational interest.
2. Parents when:
 - a. the student is a dependent of the parent for tax purposes as evidenced by appropriate documentation, including the parent's most recent tax return or a student financial aid application;
 - b. a health or safety emergency necessitates disclosure to protect the health or safety of the student or another individual; or
 - c. the student is under 21 years of age at the time of the disclosure and the student has violated a federal, state, or local law or any rule or UNT policy governing the use or possession of alcohol or a controlled substance and UNT has found the student in violation of the Code of Student's Rights, Responsibilities and Conduct.
3. Officials of another school to which a student seeks or intends to enroll or has already enrolled, upon written request, if the disclosure is for purposes related to the student's enrollment or transfer.
4. Certain officials of the U.S. Department of Education, the Comptroller General, the Attorney General of the United States, the U.S. Department of Veteran Affairs, and state and local educational authorities in connection with an audit or evaluation of federal or state supported education programs, or for the enforcement of or compliance with federal legal requirements that relate to those programs.
5. Financial aid personnel in conjunction with an application for or receipt of financial assistance, provided the disclosure is needed: (i) to determine the eligibility of the student for financial aid, (ii) to determine the amount of financial aid, (iii) to determine the conditions that will be imposed, or (iv) to enforce the terms or conditions of the financial aid.
6. Individuals delivering a judicial order or lawfully issued subpoena. The university will make reasonable efforts to notify the student before disclosing records in advance of compliance with the order or subpoena, except when directed not to do so by the court order or subpoena or when otherwise required by law.
7. Organizations conducting studies for or on behalf of UNT pursuant to a written agreement to develop, validate or administer predictive tests or student aid programs, or to improve instruction. Information from education records may only be used to meet the purposes of the study stated in the written agreement between the university and the organization(s) and must contain the current restrictions on re disclosure and destruction of information requirements applicable to information disclosed under this exception.
8. Accrediting organizations to carry out their accrediting functions.
9. To appropriate parties in a health or safety emergency. Appropriate parties include, but are not limited to, school officials, law enforcement officials, parents, and emergency/medical personnel.
10. To victims of an alleged perpetrator of a crime of violence or a non-forcible sex offense, limited only to the final results of a UNT disciplinary proceeding regardless of whether UNT determines through its own investigation that a violation was committed.
11. To any member of the public in matters relating to sex offenders and information provided to UNT under relevant federal law.
12. To a court in which the university is defending itself against legal action initiated by a parent or eligible student.

13. To the originating party identified as the party that provided or created the record. This allows for returning documents, such as official transcripts, that appear to have been falsified back to the institution or school official identified as the creator or sender of the record for confirmation of its status as an authentic record.

14. Individuals requesting records for students who are deceased.

Individuals may file a complaint with the U.S. Department of Education if they believe the University of North Texas has failed to comply with the requirements of FERPA. The complaint should be sent to:

Family Policy Compliance Office
U.S. Department of Education
400 Maryland Avenue, SW
Washington, DC 20202

For information regarding the university's policy on access to student education records contact the university Registrar. For information regarding access to public information contact the UNT System Office of General Counsel.

Chosen name policy

Policy statement

The University of North Texas recognizes that students may wish to identify themselves within the University community with a chosen first name and middle name that differs from their legal first and middle name.

Application of policy

The election for a chosen name is for currently enrolled students.

Definitions

Legal name—The name that appears on government-issued identification. It is the primary name in the EIS student record system.

Chosen first and middle name— A name a person uses to identify themselves other than the legal name; students may not declare a chosen name for an inappropriate purpose, including, but not limited to misrepresentation, use of derogatory terms, or avoiding legal or financial obligation.

Procedures and responsibilities

I. Currently enrolled students may request a chosen first name and/or middle name they want to be known by, regardless of whether they have legally changed their name.

II. The University reserves the right to remove a chosen first and middle name if it is inappropriate, as defined above. Chosen names may not include symbols or numbers.

III. The legal name will continue to appear in university-related systems, business processes, and documents for reporting, for financial aid, on transcripts, for payroll and tax documents, and other records where use of legal first name is required by law or University policy.

- a. The University will make every attempt possible to use a student's chosen name.

A. Legal name must appear on/in the following places:

1. Official Transcripts
2. Enrollment verification forms

3. International systems and documents
4. Financial Aid systems and documents
5. Tuition/fees, billing and refund systems and documents
6. Human Resource, Employment Records
7. State and Federal Reporting

B. In addition, the legal name will appear in most external-facing University documents, publications and communications. There are several exceptions to this policy:

1. List of candidates for degree conferral; for publication on university websites, in the Commencement program, senior and honors events, and the graduation list (student may have the chosen first and middle name appear as opposed to legal first and middle name);
2. The University-issued diploma (student may have the chosen first and middle name printed on the diploma by contacting the Registrar's Office at the time to apply for graduation);
3. Most athletic promotional materials such as event programs, announcements during competition, and press releases;
4. University marketing materials where a student has consented to have their name identified.

IV. The chosen name will appear in university systems including but not limited to the following, where use of legal name is NOT required by law or University policy.

A. Chosen first and middle name may appear in the following places:

1. Student Portal (including class rosters)
2. Enterprise Information Systems (EIS)
3. Student Learning Management System
4. Degree Audits
5. Student Evaluations
6. Case Management Systems
7. Student ID Card
8. Dining
9. Library
10. Computer Labs
11. Housing
12. Student email address- Eagle Alert
13. Thesis/Dissertations Initial Submission

Degree requirements and graduation

Degree requirements

General degree requirements

Writing proficiency

UNT is committed to the discovery, acquisition, development, preservation and dissemination of knowledge and the enhancement of the intellectual, cultural and proficiency levels of all who enter its programs. Fulfilling this commitment will contribute to both a better society and a more rewarding pattern of individual life. As students endeavor to complete their academic studies, they are expected to exhibit good written English skills in all university course work as a consideration in grading.

Requirements of this catalog

1. A minimum of 120 semester hours.
2. Completion of all requirements in the university core curriculum (42-hour minimum) (See "University Core Curriculum").
3. A major of at least 24 semester hours. At least 12 hours of advanced work (3000/4000 level) in the major must be earned at UNT (except for the BAAS degree). See "Major" in the Academics section of this catalog.
4. A minor, if required for a particular undergraduate degree, of a minimum of 18 semester hours, including at least 6 hours of advanced work (3000/4000 level). For details, see the individual requirements under specific degree programs in this catalog.
5. A minimum of 36 semester hours of advanced work, 24 of which must be completed at UNT. A lower level course that, when transferred, is determined to be equivalent to a UNT upper-level course does not satisfy the requirement of advanced hours.
6. An official degree plan prepared by the academic dean. It is recommended that the degree plan be made no later than the beginning of the junior year.
7. A minimum grade point average of 2.000 (C) on all work attempted, including all transfer, correspondence, extension and residence work. It should be noted that the GPA that appears on grade reports and is used to determine the student's academic status does not include correspondence, extension and transfer work. Thus, a 2.000 GPA on the grade report does not necessarily imply eligibility for graduation.
8. A minimum GPA of 2.000 (C) on all work at UNT. Transferred work may not be used to raise the GPA of work done at UNT.
9. At least twenty-five percent of the total number of hours for the degree (e.g., 30 hours for a 120-hour degree) must be earned in residence.
10. A proficiency in English composition. Students must show competence in written expression by receiving credit for or earning a grade of C or better in two general education English courses that have a strong writing component (Group 1: ENGL 1310, ENGL 1311, ENGL 1315, LING 1312, LING 1322, TECM 1700; Group 2: ENGL 1320, ENGL 1321, ENGL 1325, LING 1322, TECM 2700). Students who have earned a D in one or more of these two required courses must repeat the course and raise the grade to a C or better.
Students who are transferring to UNT with more than 90 hours and who have earned a D in any of the basic English writing courses must retake the course during their first term/semester in residence.

University Core Curriculum

The state of Texas established the Texas Core Curriculum for state-assisted institutions in 1997 to ensure that students graduate with breadth of knowledge gained through general education classes as well as depth of knowledge gained from courses in a major area of study.

Through the Texas Core Curriculum, students will gain a foundation of knowledge of human cultures and the physical and natural world, develop principles of personal and social responsibility for living in a diverse world, and advance intellectual and practical skills that are essential for all learning.

The core curriculum at UNT complies with the mandates of the 1997 Texas Legislature regarding requirements for state-assisted institutions.

More information and the list of UNT core curriculum courses may be found on the University Core Curriculum page.

Transfer of the core curriculum

A student may transfer in core courses using the Texas Common Course Numbering System (TCCNS) numbers, when applicable, or other equivalents. Additional information about the TCCNS can be found in the Admission section of this catalog. The student will need to work with an academic advisor in the appropriate college or school academic advising office to determine if additional requirements will be necessary to satisfy the 42-hour UNT Core. Additional information regarding transfer of coursework including the online transfer course equivalency tool Transferology can be found on the transfer articulation web page at registrar.unt.edu/faculty/transfer-articulation.

A student who successfully completes the common core curriculum at a state-assisted institution of higher education in Texas may transfer to UNT as "core complete" and will have satisfied the UNT Core Curriculum requirement. The student will receive academic credit for each of the courses transferred.

College or school requirements

Students must satisfactorily complete all degree requirements specified by the school or college in which the degree is offered. In many instances, the college/school/department academic program requirements may exceed the university core requirements.

Individual academic programs may require courses contained in part of the University Core Curriculum to satisfy specific degree requirements. Students may be required to take additional courses if they do not select these courses.

Graduation under a particular catalog

A student may meet the graduation requirements noted in the catalog in effect at the time of admission to UNT or the requirements in any later catalog published before the student's graduation.

Any student transferring directly from a Texas public community college to UNT shall have the same choice of catalog designating degree requirements as the student would have had if the dates of attendance at the university had been the same as the dates of attendance at the community college. Transfer students from senior institutions or out-of-state community colleges will use the catalog in effect at their date of enrollment at UNT.

All requirements of the chosen catalog must be met within eight years of that catalog's publication. This catalog will expire at the close of the 2033 summer semester/term.

Changes in either major or non-major requirements made necessary by altered or discontinued courses or by requirements imposed by external accrediting or certification agencies become effective for degree audit purposes at the beginning of the academic year immediately following the academic year in which the changes are published in the university catalog. The changes may include additions, deletions and other changes in prerequisite requirements for existing courses. Whenever possible, new requirements are implemented with a beginning class or upon the expiration of the appropriate time limit.

Course sequencing

For a listing of recommended courses in sequence for timely degree completion and to assess transfer course applicability, including Texas Common Core, please refer to "Undergraduate Major and Certificate Course Sequencing Maps and Transfer Guides" (registrar.unt.edu/transfer-guides).

Transfer hours from another institution

Students who complete work at another institution, to be applied toward a bachelor's degree at the University of North Texas, should make sure that the appropriate officer of the other institution furnishes to the Office of Admissions or the Registrar's Office at the University of North Texas a complete official transcript of such work.

The Registrar's Office, Admissions and Academic units determine acceptable transfer credit from other institutions based on evaluation of course content as described in the catalogs of those institutions. Transfer credit may only be received for course work completed at an accredited institution of higher education unless circumstances warrant review of non-traditional, prior learning. Transfer credit from other accredited institutions will be converted to semester hours and a 4.0 grading system for evaluation purposes as appropriate. The student's academic dean determines applicability of the credit to a degree program. Students seeking a Bachelor of Applied Arts and Sciences (BAAS) degree should refer to the special provisions of the respective degree programs.

Students who have begun residence work at UNT and who have attained junior standing may, only with the *prior written consent* of their academic dean, enroll in and transfer hours from approved two-year colleges.

Grade points earned at other institutions are excluded in the computations of the UNT-CGPA, but transfer hours accepted are included in determining the classification and minimum required level of performance.

Additional information concerning academic status is available from the advising offices of the academic deans or the Registrar's Office.

Because of the time required for receipt of transcripts, students otherwise eligible for graduation who complete their last course or courses elsewhere do not graduate at the end of the term/semester or summer session in which the work is completed, but receive their degrees at the close of a subsequent UNT term/semester or summer session.

At least twenty-five percent of the total number of hours for the degree (e.g., 30 hours for a 120-hour degree) must be earned in residence. Transfer hours from another institution are included in the overall GPA when determining honors for graduation.

Correspondence courses

Regulations governing correspondence courses

1. A student in residence who wishes to enroll concurrently in correspondence courses at another accredited institution must first secure the *written permission* of the student's academic dean at UNT. Failure to obtain advance approval may result in the refusal of the university to accept such work in transfer.
2. Not more than 18 hours of correspondence courses from an accredited institution may be transferred to UNT and used toward a degree program. No more than 30 hours of the total number required for any degree may be earned by a combination of correspondence and extension.
3. A maximum of 6 hours of upper-level correspondence work completed in transfer will be accepted toward a degree program at UNT.
4. Graduate credit is not accepted in transfer through correspondence study.

Advanced-hour credit

A lower-level course that is substituted for a UNT upper-level course may not be used to satisfy advanced-hour requirements.

Graduation

Application for graduation

Students who may be eligible to graduate must submit their application through the MyUNT student portal. (Visit registrar.unt.edu for additional information about degree application deadlines.)

Degree applications are accepted only from undergraduate students who have a minimum overall C average. See "Grade point average" for grade point calculation details. Before applying, the student also must remove grades of I in required courses necessary for graduation if these courses increase the term/semester load beyond the maximum permitted.

Students otherwise eligible for graduation who complete their final course or courses elsewhere will not graduate at the end of the term/semester or summer session/term in which the work is completed because of the time required for obtaining transcripts; such students will have their degrees conferred at the close of a subsequent UNT term/semester.

August graduates may file for graduation before the end of the spring term/semester.

Graduation with honors

Candidates for graduation whose overall grade point average (OGPA), based on grades earned in University of North Texas resident credit courses and transferred resident credit courses, is at least 3.500 but less than 3.700 are eligible to graduate *cum laude*; those whose OGPA, as defined above, is at least 3.700 but less than 3.900 are eligible to graduate *magna cum laude*; and those whose OGPA, as defined above, is 3.900 to 4.000 are eligible to graduate *summa cum laude*.

Hours earned through correspondence and extension courses, or pass/no pass courses, may not be counted in calculating the GPA for determination of eligibility for graduation with honors. Candidates for a second bachelor's degree are not eligible for graduation with honors.

Commencement exercises

Commencement exercises are held in December and May. Diplomas are mailed to candidates approximately eight weeks after graduation has been verified.

Degrees and programs offered

Colleges and schools

The University of North Texas is organized into the following colleges and schools.

- Honors College
- College of Applied and Collaborative Studies
- G. Brint Ryan College of Business
- College of Education
- College of Engineering
- College of Information
- College of Health and Public Service
- Frank W. and Sue Mayborn School of Journalism
- College of Liberal Arts and Social Sciences
- College of Merchandising, Hospitality and Tourism
- College of Music
- College of Science
- College of Visual Arts and Design
- Toulouse Graduate School

These schools and colleges offer the degrees, majors, concentrations under majors, minors, certifications, and preprofessional programs listed under Majors, minors, certificates. See individual areas in this catalog for information about undergraduate offerings. Information about advanced offerings may be found in the *Graduate Catalog*.

Degrees offered

Bachelor of Applied Arts and Sciences (**BAAS**)
Bachelor of Applied Science (**BAS**)
Bachelor of Arts (**BA**)
Bachelor of Business Administration (**BBA**)
Bachelor of Fine Arts (**BFA**)
Bachelor of Music (**BM**)
Bachelor of Science (**BS**)
Bachelor of Science in Biochemistry (**BSBC**)
Bachelor of Science in Biology (**BSBIO**)
Bachelor of Science in Chemistry (**BSCHM**)
Bachelor of Science in Economics (**BSECO**)
Bachelor of Science in Engineering Technology (**BSET**)
Bachelor of Science in Mathematics (**BSMTH**)
Bachelor of Science in Medical Laboratory Sciences (**BSMLS**)
Bachelor of Science in Physics (**BSPHY**)
Bachelor of Social Work (**BSW**)

Undergraduate academic certificates

The University of North Texas offers upper-division undergraduate academic certificates to meet workforce needs or to provide students with life/career skills and knowledge and to allow for specialization in academic disciplines. Undergraduate academic certificates require 12–20 hours, the majority of which must be advanced. See "Undergraduate Academic Certificate Programs" for additional details.

Admission

All students pursuing an undergraduate academic certificate must meet regular UNT admission requirements. Candidates for admission to the undergraduate academic certificate program must meet the minimum academic standards for the academic discipline. Post-baccalaureate students are eligible to pursue an undergraduate academic certificate.

Requirements

Undergraduate academic certificates require 12–20 semester credit hours, the majority of which must be advanced.

Students are responsible for all prerequisites specified in course requirements.

Students are expected to complete all hours for the undergraduate academic certificate requirements at UNT.

Upon completion of the requirement for an undergraduate academic certificate program, a student should apply to the academic dean of his or her college or school. Application forms are sent to the Registrar's Office at the end of each term.

The Registrar's Office posts undergraduate academic certificates to students' transcripts at the end of the semester earned. The office prints and mails the certificates to the students.

Note: Hours used for attaining an undergraduate academic certificate could potentially exclude a student from consideration for the \$1,000 Tuition Rebate since all hours earned for the undergraduate academic certificate are counted in the total hours earned toward a degree.

Requirements for a second bachelor's degree

Students who wish to obtain a second bachelor's degree, after the conferral of a bachelor's degree from an institution with the Texas Higher Education Coordinating Board recognized accreditation or an equivalent credential from a foreign institution recognized by UNT. To be eligible to receive a second bachelor's degree, the student must meet all of the current graduation and program specific requirements, including at least 24 new hours, 12 of which must be advanced in a field different from the major of the first bachelor's degree, completed once you declared the second bachelor's degree. Advising is provided by the college in which the second bachelor's degree is sought. Contact the Toulouse Graduate School for a second bachelor's application.

Degree terminology

Major

A major requires a minimum of 24 semester hours in a given subject, including 12 hours of advanced work.

Double major

A student who fulfills the specified requirements for two different majors under a single degree completes a double major. A double major consists of two majors with the same degree type (e.g. Bachelor of Science). Each major consists of a minimum of 24 unique major requirement semester credit hours including 12 hours of advanced work. A second major is not considered a concentration (see concentrations).

Double degree

A student who fulfills the specified requirements for two different degree types (e.g. Bachelor of Science, Bachelor of Arts) at UNT. To be eligible to earn double degrees, the student must meet all of the current graduation and program specific requirements, including the major requirement (in both degrees) of a minimum of 24 hours including 12 hours of advanced work. Major courses beyond the minimum requirement of 24 hours, may apply toward both degrees, if applicable. A student must graduate with both degrees simultaneously. If one degree is completed before the other, then the second degree would require post-baccalaureate status.

Dual degree

A dual degree allows a student to study at two or more institutions and earn a degree from both institutions. Dual degrees are established programs as shown in the catalog.

Concentration

A concentration is a minimum of 18 semester credit hours of coursework in a recognized area of study within the academic discipline. Concentrations are placed on the UNT transcript and diploma.

Specialization

A specialization is a minimum of 12 semester credit hours of coursework in a focused area of study within an academic discipline, specializations are not on the UNT transcript or diploma.

Emphasis

An emphasis is less than 12 semester credit hours of coursework in a focused area of study within an academic discipline, emphasis do not appear on the UNT transcript or diploma.

Grad Track

Grad Track programs allow exceptional undergraduate students to apply up to 12 credit hours of approved graduate level courses to complete the requirements of an undergraduate degree and apply toward the graduate degree. Applications for Grad Track programs are submitted through the major department after the student has completed at least 75 credit hours with a minimum cumulative GPA of 3.5. Grad Track students may begin taking graduate-level courses after completing 90 credit hours and must complete the bachelor's degree within one academic year after beginning their first pathway course. Students in the Grad Track must apply for admission to the graduate program, generally by the end of their first term in the Grad Track program. See grad track options in undergraduate catalog.

Second bachelor's degree

Students who wish to obtain a second bachelor's degree, after the conferral of a bachelor's degree from an institution with the Texas Higher Education Coordinating Board recognized accreditation or an equivalent credential from a foreign institution recognized by UNT. To be eligible to receive a second bachelor's degree, the student must meet all of the current graduation and program specific requirements, including at least 24 new hours, 12 of which must be advanced in a field different from the major of the first bachelor's degree, completed once you declared the second bachelor's degree. Advising is provided by the college in which the second bachelor's degree is sought.

Degree plan

The degree plan is an official document prepared in the office of the student's academic dean. It lists all courses completed, courses not completed, proficiency examinations and all other requirements for a particular degree sought. A student should have a degree plan prepared no later than the beginning of the junior year. See also the entries for "Major," "Double Major" and "Minor," all in this section.

Degree audit

The degree audit is an official document prepared in the office of the student's academic dean that lists courses completed, courses to be completed, proficiency examinations and all other requirements for a particular degree program. A student should have a degree audit prepared no later than the beginning of the junior year.

Minor

A minor requires at least 18 semester hours in a given subject, including 6 hours of advanced work. Specific course sequences for a minor are determined by the department offering the minor. Not all degrees require a minor.

University Core Curriculum

University Core Curriculum requirements

The state of Texas established the Texas Core Curriculum for state-assisted institutions in 1997 to ensure that students graduate with breadth of knowledge gained through general education classes as well as depth of knowledge gained from courses in a major area of study.

Through the Texas Core Curriculum, students will gain a foundation of knowledge of human cultures and the physical and natural world, develop principles of personal and social responsibility for living in a diverse world, and advance intellectual and practical skills that are essential for all learning.

The core curriculum at UNT complies with the mandates of the 1997 Texas Legislature regarding requirements for state-assisted institutions.

The 42-hour UNT Core Curriculum requires that students complete 36 semester credit hours in each of these state-specified foundational component areas:

- Communication - 6 hours
- Mathematics - 3 hours
- Life and Physical Sciences - 6 hours
- American History - 6 hours
- Government/Political Science - 6 hours
- Creative Arts - 3 hours
- Language, Philosophy and Culture - 3 hours
- Social and Behavioral Sciences - 3 hours

An additional 6 semester credit hours of core option courses are also required to complete the UNT Core Curriculum requirements.

The state has aligned each of the core component/option areas core objectives, which delineate the skills developed in each core course.

- **Critical Thinking Skills**, including creative thinking, innovation, inquiry, and analysis, evaluation and synthesis of information
- **Communication Skills**, including effective development, interpretation and expression of ideas through written, oral and visual communication
- **Empirical and Quantitative Skills**, including the manipulation and analysis of numerical data or observable facts resulting in informed conclusions
- **Teamwork**, including the ability to consider different points of view and to work effectively with others to support a shared purpose or goal
- **Personal Responsibility**, including the ability to connect choices, actions and consequences to ethical decision-making
- **Social Responsibility**, including intercultural competence, knowledge of civic responsibility, and the ability to engage effectively in regional, national, and global communities

Individual academic programs may require specific courses from within the UNT Core Curriculum. Students who wish to take courses that will fulfill both core and major requirements simultaneously should check with academic advisors for assistance in selecting core courses.

Students may also choose to use core courses to meet the minimum number of advanced hours required by their degree.

Note: Additional courses are under review for inclusion in the University Core Curriculum.

UNT Core Requirements

Communication, 6 hours

Developing Critical Thinking, Communication Skills, Teamwork, and Personal Responsibility

Courses in this category focus on developing ideas and expressing them clearly, considering the effect of the message, fostering understanding and building the skills needed to communicate persuasively. Courses involve the command of oral, aural, written and visual literacy skills that enable people to exchange messages appropriate to the subject, occasion, and audience.

The student may choose from the following courses, usually taken in sequence (ENGL 1310 followed by ENGL 1320, for example):

Group 1

One course from the following, usually taken first in the sequence:

- ENGL 1310 - First-Year Writing I
- ENGL 1311 - Honors First-Year Writing I *
- ENGL 1315 - Writing About Literature I
- TECM 1700 - Introduction to Professional, Science, and Technical Writing

Group 2

One course from the following, usually taken second in the sequence:

- ENGL 1320 - First-Year Writing II
- ENGL 1321 - Honors First-Year Writing II *
- ENGL 1325 - Writing About Literature II
- TECM 2700 - Technical Writing

Note

TECM 2700 (ENGL 2311) may be substituted for ENGL 1320 upon approval of the school/college.

A grade of C or better is required for courses applied toward this requirement. See your advisor for assistance.

Mathematics, 3 hours

Developing Critical Thinking, Communication Skills, and Empirical and Quantitative Skills

Courses in this category focus on quantitative literacy in logic, patterns and relationships. Courses involve the understanding of key mathematical concepts and the application of appropriate quantitative tools to everyday experience.

The student may choose from the following courses:

- DSCI 2710 - Data Analysis with Spreadsheets
- MATH 1180 - College Math for Business, Economics and Related Fields
- MATH 1190 - Business Calculus
- MATH 1580 - Survey of Mathematics with Applications
- MATH 1650 - Pre-Calculus
- MATH 1680 - Elementary Probability and Statistics
- MATH 1710 - Calculus I

- MATH 1810 - Calculus for Science and Engineering I

Note

The following courses have college-level prerequisites: MATH 1190, MATH 1650 and MATH 1710.

Life and physical sciences, 6 hours

Developing Critical Thinking, Communication Skills, Empirical and Quantitative Skills, and Teamwork

Courses in this category focus on describing, explaining and predicting natural phenomena using the scientific method. Courses involve the understanding of interactions among natural phenomena and the implications of scientific principles on the physical world and on human experiences.

This requirement may be satisfied by earning 6 semester hours in two laboratory sciences that meet the science requirement of the student's degree program. The student may choose from the following courses:

- ANTH 2700 - Introduction to Physical Anthropology
- ARCH 2800 - Archaeological Science
- BIOL 1082 - Biology for Educators
- BIOL 1112 - Contemporary Biology
- BIOL 1132 - Environmental Science
- BIOL 1142 - Microbes and Society
- BIOL 1710 - Biology for Science Majors I
- BIOL 1711 - Honors Biology for Science Majors I *
- BIOL 1720 - Biology for Science Majors II
- BIOL 1722 - Honors Biology for Science Majors II *
- BIOL 2301 - Human Anatomy and Physiology I
- BIOL 2302 - Human Anatomy and Physiology II
- BIOL 2700 - Human Evolution and Physical Anthropology
- CHEM 1360 - Context of Chemistry
- CHEM 1410 - General Chemistry I for Science Majors
- CHEM 1412 - General Chemistry I for the Honors College *
- CHEM 1413 - Honors General Chemistry I *
- CHEM 1420 - General Chemistry II for Science Majors
- CHEM 1422 - General Chemistry II for the Honors College *
- CHEM 1423 - Honors General Chemistry II *
- GEOG 1710 - Earth Science
- GEOL 1610 - Introduction to Geology
- HMGH 2460 - Introduction to Nutrition Science
- PHYS 1052 - The Solar System
- PHYS 1062 - Stars and the Universe
- PHYS 1210 - Conceptual Physics
- PHYS 1270 - Science and Technology of Musical Sound
- PHYS 1315 - Introduction to the World of Physics
- PHYS 1410 - General Physics I
- PHYS 1420 - General Physics II
- PHYS 1510 - General Physics I with Calculus
- PHYS 1520 - General Physics II with Calculus

- PHYS 1710 - Mechanics
- PHYS 2220 - Electricity and Magnetism

American History, 6 hours

Developing Critical Thinking, Communication Skills, Social Responsibility, and Personal Responsibility

Courses in this category focus on the consideration of past events and ideas relative to the United States, with the option of including Texas History for a portion of this component area. Courses involve the interaction among individuals, communities, states, the nation, and the world, considering how these interactions have contributed to the development of the United States and its global role.

Texas state law requires that the university may not award a baccalaureate degree or a lesser degree or academic certificate unless the student has credit for 6 semester hours in American History. A student is entitled to submit as much as 3 hours of credit, or its equivalent, in Texas History in partial satisfaction of this requirement. The university may determine that a student has met the requirement by work transferred from another accredited college or upon successful completion of an advanced standing examination. The student may satisfy the entire 6-hour American/Texas history requirement by advanced standing examination.

This requirement may be satisfied by earning 6 hours credit from the following courses:

- HIST 2610 - United States History to 1865
- HIST 2620 - United States History Since 1865
- HIST 2675 - Honors United States History to 1865 *
- HIST 2685 - Honors United States History Since 1865 *

Government/Political Science, 6 hours

Developing Critical Thinking, Communication Skills, Social Responsibility, and Personal Responsibility

Courses in this category focus on consideration of the Constitution of the United States and the constitutions of the states, with special emphasis on that of Texas. Courses involve the analysis of governmental institutions, political behavior, civic engagement, and their political and philosophical foundations.

Texas state law requires that the university not award a baccalaureate degree or a lesser degree or academic certificate unless the student has completed 6 hours of credit in American Government to include consideration of the constitutions of the United States and Texas. The university may determine that a student has met the requirement in whole or in part on the basis of credit transferred from another accredited college or upon successful completion of an advanced standing examination. The university may grant as much as 3 hours of credit toward satisfaction of this requirement for substantially equivalent work in an approved senior ROTC unit. The student may satisfy the entire 6-hour political science requirement by advanced standing examination. Transfer students who have completed both GOVT 2305 and 2306 or their equivalents have satisfied this requirement. Transfer students who have only completed one of these two courses, GOVT 2305 or 2306, should consult with their academic advisor to determine which course is required to complete this requirement.

This requirement may be satisfied by earning 6 hours credit from the following courses:

- PSCI 2305 - US Political Behavior and Policy
- PSCI 2315 - Honors US Political Behavior and Policy *
- PSCI 2306 - US and Texas Constitutions and Institutions
- PSCI 2316 - Honors U.S. and Texas Constitutions and Institutions *

Creative Arts, 3 hours

Developing Critical Thinking, Communication Skills, Teamwork, and Social Responsibility

Courses in this category focus on the appreciation and analysis of creative artifacts and works of the human imagination. Courses involve the synthesis and interpretation of artistic expression and enable critical, creative, and innovative communication about works of art.

This requirement may be satisfied by 3 hours credit in any of the following:

- ANTH 2400 - AnthroPop: Symbolic Anthropology and the Artistry of Popular Culture
- ART 1300 - Art Appreciation for Non-Art Majors
- ART 1301 - Honors Art Appreciation *
- ART 2360 - Art History Survey II
- ART 2370 - Art History Survey III
- COMM 2060 - Performance of Literature
- DANC 1200 - Appreciation of Dance as a Contemporary Art Form
- DANC 2800 - Survey of Dance
- MUCO 1200 - Analysis and Critical Listening in Commercial Music and Music Production
- MUCO 3500 - Cultures of Hip Hop
- MUET 3060 - African-American Music
- MUJS 3400 - Understanding and Appreciating Jazz in U.S. and World History and Culture
- MUMH 1610 - Music as Communication
- MUMH 2040 - Music Appreciation
- MUMH 2050 - Sounds and Cinema
- MUMH 2060 - History of Rock
- MUMH 3000 - Nineteenth-Century Music
- MUMH 3010 - Twentieth-Century Music
- MUMH 3100 - Music, Gender, Sexuality
- MUMH 3200 - Music as Politics
- MUMH 3520 - Issues in Western Music History
- PHIL 1900 - Philosophy of Art
- THEA 1340 - Aesthetics of the Theatre Throughout the World
- THEA 2340 - Theatre Appreciation
- THEA 3030 - World Theatre to 1700
- THEA 3040 - World Theatre After 1700

Language, Philosophy and Culture, 3 hours

Developing Critical Thinking, Communication Skills, Social Responsibility, and Personal Responsibility

Courses in this category focus on how ideas, values, beliefs and other aspects of culture express and affect human experience. Courses involve the exploration of ideas that foster aesthetic and intellectual creation in order to understand the human condition across cultures.

This requirement may be satisfied by 3 hours credit in any of the following:

- AGER 2250 - Images of Aging in Film and Literature
- ANTH 3101 - Issues in Contemporary American Culture and Society
- ANTH 3110 - Indigenous Peoples of North America
- ANTH 3120 - Indigenous Cultures of the Southwest
- ANTH 3130 - African-American Anthropology
- ANTH 3140 - Latinos in the U.S.
- ANTH 3200 - Latin America

- ANTH 3210 - Meso America
- ANTH 3220 - Mayan Culture
- ANTH 3300 - Peoples and Cultures of the Pacific
- ANTH 3400 - Peoples and Cultures of Africa
- ANTH 3500 - Cultures and Civilizations of the Middle East
- ANTH 3700 - Peoples and Cultures of South Asia
- ANTH 3710 - Peoples and Cultures of East Asia
- ART 2350 - Art History Survey I
- ENGL 2321 - British Literature
- ENGL 2326 - American Literature
- ENGL 2331 - World Literature
- ENGL 2341 - Forms of Literature
- ENGL 2351 - Mexican American Literature
- ENGL 3450 - Short Story
- GEOG 1000 - National Parks: America's Best Idea
- HDFS 2313 - Courtship and Marriage
- HIST 1050 - World History to the Sixteenth Century
- HIST 1060 - World History from the Sixteenth Century
- KINE 2050 - Sociology of Sport
- LING 2050 - The Language of Now: Pop Culture, Technology and Society
- MUET 2000 - Global Pop: Music, Media, and Society
- MUET 3030 - Music Cultures of the World
- PHIL 1050 - Introduction to Philosophy
- PHIL 1400 - Ethics and Society
- PHIL 2050 - Logic and Critical Thinking
- PHIL 2070 - World Religions
- PHIL 2600 - Ethics in Science

Social and Behavioral Sciences, 3 hours

Developing Critical Thinking, Communication Skills, Empirical and Quantitative Skills, and Social Responsibility

Courses in this category focus on the application of empirical and scientific methods that contribute to the understanding of what makes us human. Courses involve the exploration of behavior and interactions among individuals, groups, institutions and events, examining their impact on the individual, society and culture.

This requirement may be satisfied by 3 hours credit in any of the following:

- AGER 4560 - Minority Aging
- AGER 4800 - The Social Context of Aging: Global Perspectives
- ANTH 1010 - Introduction to Anthropology
- ANTH 2300 - Culture and Society
- BEHV 2300 - Behavior Principles I
- CJUS 2100 - Crime and Justice in the United States
- COMM 2020 - Interpersonal Communication
- EADP 1010 - Exploring Disasters
- EADP 4050 - Social Vulnerability in Disasters
- ECON 1100 - Principles of Microeconomics
- ECON 1110 - Principles of Macroeconomics

- FIPL 2770 - Show Me the Money - Lessons in Money Education
- GEOG 1200 - Global Societies
- GEOG 1500 - Geospatial Technology and Urban Environments
- HDFS 1013 - Human Development
- HLTH 2200 - Family Life and Human Sexuality
- JOUR 1210 - Mass Communication and Society
- LING 3060 - Principles of Language Study
- MDSE 2750 - Consumers in a Global Market
- PADM 2100 - Cultural Competency in Urban Governance
- PSYC 1630 - General Psychology I
- RESM 3450 - Social Issues in Recreation, Event, and Sport Organizations
- RHAB 3100 - Disability and Society
- SOCI 1510 - Introduction to Sociology
- SOWK 1450 - Introduction to Social Work

Core Option Courses, 6 hours

Developing Critical Thinking, Communication Skills, and other core objectives related to an associated foundational component area

Core Option courses are designed to help students further develop the tools necessary for full engagement in the undergraduate experience. Students must complete an additional six hours of coursework from the courses above or from Core Option A or Core Option B courses listed below. Please note that only three hours of this requirement may be satisfied by courses designated as Core Option B. Students should consult with their academic advisor to determine whether specific Core Option courses are necessary to make timely degree progression in their chosen field of study.

Component Area Option A

- ANTH 1150 - World Cultures Through Film
- BIOL 1750 - Introductory Biology Research Laboratory I and
- BIOL 1755 - Introductory Biology Research Laboratory II
-
- COMM 2040 - Public Speaking
- COMM 2140 - Advocating in Public
- COUN 2620 - Diversity and Cultural Awareness
- ENGR 1030 - Technological Systems
- HDFS 3423 - Family, School and Community
- HMGH 1450 - Principles of Nutrition
- JOUR 2250 - Media Literacy
- MATH 1720 - Calculus II
- MDSE 3370 - Social Psychology of Dress and Appearance
- MKTG 3010 - Foundations of Selling and Communication
- MTSE 1100 - Discover How and Why Materials "Matter"
- MUJS 3070 - History of Jazz
- MUMH 3500 - Music History and Literature to 1750
- MUMH 3510 - Music History and Literature Since 1750
- PHIL 1800 - Philosophy of Self
- PHIL 2500 - Environment and Society

- PHIL 3900 - Philosophy of Food
- PHIL 4150 - Feminism
- PHIL 4200 - Science, Technology and Society
- SOCI 2070 - Introduction to Race and Ethnic Relations
- SOWK 4540 - Human Diversity for the Helping Professions
- TECM 1600 - AI in Professional Settings

Component Area Option B

- COMM 1010 - Introduction to Communication
- COMM 1440 - Honors Classical Argument *
- CSCE 1010 - Discovering Computer Science
- HDFS 2033 - Parenting
- INST 2100 - Introduction to International Studies
- JOUR 2300 - Principles of News
- LING 2070 - Language and Discrimination
- MKTG 2650 - Culture and Consumption
- PHED 1000 - Scientific Principles and Practices of Health-Related Fitness
- RHAB 3000 - Active Listening in the Helping Professions
- TECM 1500 - New Media Experience
- WGST 2100 - Introduction to Women's and Gender Studies

Notes

** Course offered for Honors College students only.*

Enrollment

Types of students

Continuing students

Continuing students are those who have been officially enrolled at UNT at least once during the 12 consecutive months **prior** to the term/semester of planned enrollment and/or have not received a degree during the same period. Students who receive a degree and reapply to the university are considered new graduate students.

Inactive continuing students (undergraduate students only)

Inactive students are undergraduates who have not been officially enrolled at UNT in the last 12 consecutive months and who have not received a degree during the same period.

Inactive students who have not attended another institution are required to complete the following requirements to re-enroll:

1. Complete the ApplyTexas Application for returning students;
2. If previous UNT enrollment was as a dual credit student, all academic credentials from all institutions attended are required prior to re-enrollment; international students should contact the Office of International Admissions.

Inactive students who have attended another institution are required to complete the following requirements to re-enroll:

1. Complete the ApplyTexas Application for transfer students;
2. Submit official transcripts from all colleges attended since leaving UNT.

Former students (graduated students only)

Former students are those graduated students who have not been enrolled at least once during the 12 consecutive months **prior** to planned enrollment and/or those who have received a degree.

Non-Degree seeking

A non-degree student is an undergraduate student who wishes to take several courses at the undergraduate level without seeking a degree at UNT. Non-degree students are eligible to take up to 15 semester credit hours at which time students must apply to be degree seeking.

Registration and class attendance

Student load

Fall and spring

Undergraduate

The normal load for full-time undergraduate students is 15 semester hours for each fall or spring term/semester, or 30 hours for the nine-month academic year. Note: For information pertaining to the required semester hours for enrollment verification purposes, refer to "Enrollment Certification" below.

During the fall/spring terms, a full-time undergraduate student with a GPA of less than 3.000 may select multiple sessions for a maximum of 19 semester hours.

An undergraduate student with a GPA of at least 3.000 may enroll for a maximum of 21 hours for the fall or spring term/semester by meeting the following conditions:

1. at least a 3.000 GPA on a minimum 15-hour residence load for the term/semester just completed
2. at least a 3.000 GPA on a minimum 12-hour residence load for the summer term/semester just completed, or
3. at least a 3.000 GPA on all work completed at UNT and a minimum 24 hours of credit in residence.

Note: For 3W1 (three week one) the normal load for full-time students is 3 hours. Undergraduate students may schedule a maximum of 4 hours in 3W1 session.

Undergraduate students may schedule a maximum of 9 hours in 8W1 session, and a maximum of 9 hours in 8W2 session. During the spring term, students may schedule a maximum of 4 hours in the Winter Session.

Graduate

Graduate students may schedule a maximum of 16 hours during any fall or spring term/semester.

Note: For 3W1 (three week one) the normal load for full-time students is 3 hours. Graduate students may schedule a maximum of 4 hours in 3W1 session.

Summer

Undergraduate

The normal load for full-time students is 12 hours for the summer term/semester.

During the summer term/semester, a full-time undergraduate student with a GPA of more than 3.000 may select multiple sessions for a maximum of 18 semester hours.

Undergraduate students may schedule a maximum of 4 hours in 3W1 session, a maximum of 9 hours in 8W1 session, a maximum of 8 hours in 5W1 session, a maximum of 7 hours in 5W2 session, and a maximum of 15 hours in 10W session.

Note: For 3W1 (three week one) the normal load for full-time students is 3 hours. Undergraduate students may schedule a maximum of 4 hours in 3W1 session.

Graduate

A full-time graduate student with a GPA of at least 3.000 may select multiple sessions for a maximum of 18 hours.

Constraints apply to graduate course enrollment. Graduate students may schedule a maximum of 4 hours in a three week session (3W1), a maximum of 7 hours in a five week session (5W1, 5W2), a maximum of 9 hours in a ten week session (10W), or a maximum of 9 hours in an eight week session (8W1). At no time during concurrently running summer sessions can graduate students' enrollment exceed 10 hours. For purposes of fulfilling the graduate residence requirements, a load of 9 semester hours is considered a full load. Graduate students enrolled only in undergraduate courses, for undergraduate credit, may request special consideration of the graduate dean.

Note: For 3W1 (three week one) the normal load for full-time students is 3 hours. Graduate students may schedule a maximum of 4 hours in 3W1 session.

Academic information and planning

Semester hour

A semester hour is the unit of credit at UNT; the credit allows for 1 lecture hour a week for 15 weeks or the equivalent. In course listings, figures in parentheses following the course credit hours indicate the number of clock hours per week devoted to lecture and laboratory. When it appears, the third and final number in these parentheses indicates the number of recitation hours per week.

Term/semester/session

The academic year includes three terms/semesters: fall, spring and summer. Fall and spring include a full-term session, 8W1 (eight week one) and 8W2 (eight week two). Spring also includes a 3W1 session. During the summer term, a number of sessions are scheduled. Presently the options include 3W1 (three week one), 5W1 and 5W2 (five week one and two), 8W1 (eight week one), and 10W (ten week).

Course numbering system

Developmental courses, 100-999.
Freshman courses, 1000-1999.
Sophomore courses, 2000-2999.
Junior courses, 3000-3999.
Senior courses, 4000-4999.
Graduate courses, 5000 and above.

The graduate student enrolled in a 5000-level course that meets with a senior-level undergraduate course will be expected to complete additional requirements beyond those expected of undergraduates in the same course.

Courses 2900, 2910, 4900 and 4910, **Special Problems**, are used upon approval of the department chair or dean for individual instruction in any department to cover course content in special circumstances. Courses 5900, 5910, 5920 and 5930 are used in any department that offers graduate work; courses 6900 and 6910 are used in any department that offers doctoral work.

Experimental Courses (1980, 2980 and 4980) are new courses offered on a trial basis for 1–4 hours credit each. Registration is permitted only upon approval of the department chair.

Honors College Capstone Thesis, 4951, allows a student in the Honors College to complete an honors thesis as a course within the student's major. The Honors College Capstone Thesis is a major research project prepared by the student with the mentorship of a faculty member in the student's major department. An oral defense is required for successful completion of the thesis.

Advanced Courses (or upper-level or upper-division courses), numbered 3000 to 4999, are open to students who have 12 semester hours of credit in a given subject or who have the indicated prerequisites, and to those without the prerequisites who have the consent of the department. College/school/departmental requirements may vary. Students should consult individual areas prior to enrolling in advanced courses.

Developmental Courses are included in student enrolled hours but are not counted toward GPA or academic standing.

Prerequisite

A prerequisite is a course or other preparation that must be completed before enrollment in another course. All prerequisites are included in catalog course descriptions.

Texas Success Initiative

The Texas Success Initiative (TSI) is a state statute requiring all undergraduate students who enter a Texas public institution of higher education to either demonstrate readiness for college-level English language arts and reading (ELAR) and mathematics before enrolling in college-level academic course work by achieving the statutory threshold on the state-approved TSI Assessment **or** meet one of the conditions for exemption from the testing requirement. Students must satisfy all TSI requirements before receiving a baccalaureate degree.

Exemption	English Language Arts and Reading (ELAR)	Math	Documentation Needed
ACT (prior to 2/15/2023) (Score good for 5 years from date taken)	Composite 23 <u>AND</u> English 19	Composite 23 AND Math 19	Copy of Test Scores
ACT (on or after 2/15/2023)	Combined score of 40 on English and Reading	Math 22	Copy of Test Scores
SAT (Score good for 5 years from date taken)	Evidence Based Reading/Writing 480	Math 530	Copy of Test Scores
STAAR	End-of-course score of level 2 on English III	End-of-course score of level 2 Math II	Copy of Test Scores
AP	3-English Lang & Comp 3-History 3-Govt. and Politics	3-Calculus 3-Statistics	Copy of Test Scores
	There are many AP exam possibilities with the most commonly accepted listed here. If you have successfully completed a different AP exam and would like for us to review your score for TSI exemption purposes, please send us your score report.		
GED (Score good for 5 years from date taken)	Reasoning Through Language Arts (RLA) 165	Mathematical Reasoning 165	Copy of Test Scores
HiSET (Score good for 5 years from date taken)	Reading/Writing 15 Essay 4	Mathematics 15	Copy of Test Scores
Dual Credit/Previous College Credit	Depending on what college-level course(s) you have already successfully completed, you may be exempt from taking the TSI Assessment in one or more areas. A TSI Coordinator will evaluate your COLLEGE/UNIVERSITY transcript(s) to determine if the courses you		Copy of Transcript documenting course(s) completed and grades

Exemption	English Language Arts and Reading (ELAR)	Math	Documentation Needed
	have successfully completed will qualify. <i>Straighterline and ALEKS are not accepted for TSI purposes.</i>		
Degree Holder	You are exempt in all areas if you hold a domestic associate or baccalaureate degree from an accredited institution of higher education.		Copy of Transcript indicating degree was conferred
Military	<ul style="list-style-type: none"> You may be exempt if you are serving on active duty as a member of the armed forces of the US, the Texas National Guard, or as a member of a reserve component of the armed forces of the US and have been serving for at least 3 years preceding enrollment. You may be exempt if you were honorably discharged, retired, or released from active duty as a member of the armed forces of the US or the Texas National Guard or served as a member of the armed forces of the US 		Copy of DD-214
Previous TSI Exemption	Often times, if you attended a previous college/university that has already determined you TSI complete, your transcripts from that previous institution may indicate the same.		Copy of Transcript documenting approved test scores or college readiness
None of These Apply	You must take the TSI Assessment before attending orientation.		

Exemption documentation should be submitted in one of the following ways

- in person to Office of Advising Services, Sage Hall, Room 110;
- mailed to
 - UNT Advising Service
Attn: TSI Evaluation
1155 Union Circle #311190
Denton, TX 76203-5017
- sent via e-mail to TSI@unt.edu

Readiness assessment and course placement

UNT only accepts scores on the TSI Assessment for assessment purposes. This state-approved test measures college-level readiness in English language arts and reading (ELAR) and mathematics. Minimum score thresholds required to demonstrate college readiness in each subject area as follows:

	Math	ELAR
TSI Assessment	CRC 940	CRC 945 and Essay 5-8
January 11, 2021-Present	or CRC 910-949 and Diagnostic Level 6	or CRC 910-944 and Diagnostic Level 5-6 and Essay 5-8

	Reading	Math	Writing
TSI Assessment	351	350	Placement Score of 340 and Essay Score of 4+
Prior to January 11, 2021			or Placement Score of less than 340, ABE level of at least 4 and an Essay Score of at least 5

Students may demonstrate readiness by either passing the highest level of indicated TSI course work or by scoring above the statutory threshold on the TSI Assessment.

Students are individually advised into the appropriate TSI course work according to their individual needs. UNT offers course-based and non-course-based TSI related courses. The courses offered at UNT include:

English Language Arts and Reading

- ENGL 1310 with co-requisite tutorial requirement

Math

- Math for major with co-requisite lab
- MATH 340 - Integrated Pre and Beginning Algebra
- MATH 350 - Beginning Algebra

Demonstrating college readiness

Students may demonstrate college readiness or otherwise satisfy TSI requirements by any of the following:

1. Successfully completing all required coursework needed to prove readiness.
2. Achieving a score above the statutory threshold on the TSI Assessment.

Class attendance

Regular and punctual class attendance is expected. Although in general students are graded on intellectual effort and performance rather than attendance, absences may lower the student's grade where class attendance and class participation are deemed essential by the faculty member. In those classes where attendance is considered part of the grade, the instructor should inform students at the semester's beginning by a written notice. Departments and similar academic units have authority to establish a department or course attendance policy, so long as the policy is in accord with the above stipulations.

Authorized absences

Absences will be approved by the university for:

- Religious holy days, including travel for that purpose;
- Participation in an official university function;
- Required military service, including travel for that purpose;
- Pregnancy and parenting under Title IX.

Absences due to participation in an official university function must be approved in advance by the Dean of Students Office. Athletic team member absences must be approved by the athletic director or designee. Excused students will be permitted to make up missed work when practicable or will be given special consideration so they are not penalized for their absence. The academic dean/athletic director or designee must notify the Dean of Students' office regarding the excused absences. Within three

business days of receipt of the absence notice, the Dean of Students will provide absence documentation to the student for them to present to all instructors.

Absence for religious holidays

In accordance with state law, a student absent due to the observance of a religious holiday may take examinations or complete assignments scheduled for the day(s) missed, including those missed for travel, within a reasonable time after the absence. The student should notify the instructor of each class of the date of the anticipated absence as early in the semester as possible.

Only holidays or holy days observed by a religion whose place of worship is exempt from property taxation under Section 11.20 of the Tax Code may be included. A student who is excused under this provision may not be penalized for the absence, but the instructor may respond appropriately if the student fails to complete the assignment or examination.

Pre-finals days

So that students can more adequately prepare for their final examinations, the University of North Texas (UNT) sets aside days preceding final examinations during which no new material may be disseminated, and extracurricular and organizational activities are suspended.

Any deviation from these requirements must be approved in advance by the appropriate dean or director.

On the Friday of the week immediately preceding final exams (reading day), no classes are held.

Final examinations

Faculty members are required to administer final exams at the designated times during the exam week of each long semester and during the specified day of each summer term if a final examination for the course is required. Any deviation from the published schedule must be approved in advance by the appropriate academic dean.

Students who have more than two final examinations scheduled on one day may request to reschedule one of the examinations on another day during the final examination period.

Disability Accommodation

In accordance with university policies, and state and federal regulations [especially Section 504 of the Rehabilitation Act and the Americans with Disabilities Act as Amended], the University of North Texas endeavors to make reasonable academic adjustments for qualified students with disabilities who require accommodation to fulfill the requirements for a degree.

A student who encounters access barriers in a campus instructional facility or who wishes to request accommodation in a course because of a disability (i.e., sign language interpreters, material in alternate format, accommodated testing) should follow the procedures listed below:

1. Students must be registered with the Office of Disability Access (ODA) to request a letter of accommodation be sent to their instructor. This document will contain information relative to the reasonable accommodations approved for the student. If faculty are advised by a student that they have a disability and need accommodations, they should be referred to the ODA for assistance.
2. Preferably within the first week of class, qualified students must notify the instructor of the need for academic adjustments and confirm receipt of the letter of accommodation from the ODA. However, students may request their letters of recommendation at any point in the semester (with the exception of during finals). Accommodations are not retroactive.
3. The qualified student should confer with the instructor (in private, by email, or during office hours) to reach mutual agreement on accommodation provision.

4. If a student does not feel the accommodations are effective, or if they are not provided, the student should contact his/her ODA Coordinator to help facilitate a solution. If the student is not satisfied with the resolution, a formal appeal may be filed in accordance with the procedures described here: studentaffairs.unt.edu/office-disability-access/grievance.

UNT internships

Many employers prefer to hire graduates with hands-on experience in their majors. Students can gain practical experience and enhance their classroom learning through an internship opportunity.

In addition to providing insight into future careers, working as an intern provides a competitive advantage in the job market because of the skills developed while in the position.

The Career Center helps students obtain high-quality internships prior to graduation by working closely with potential and existing employers to promote internships within their organizations.

The Career Center hosts a number of career and internship-related career fairs, networking events, and workshops open to all enrolled students. For more details, students can visit Handshake.

Internships

Internships are work experiences (typically one semester) related to a student's field of study and may provide a competitive advantage in the job market by:

- providing transferable skills through work in a professional environment,
- creating professional contacts within an industry or occupational area, and
- teaching more about major and career path.

The Career Center works with thousands of employers who offer internship programs as well as full-time job opportunities at companies such as Toyota, H-E-B, DACTU, Omni Hotels, PGA, Walt Disney Company/ESPN, Goldman Sachs, American Airlines, Schwab, Texas Instruments, Enterprise, NTT Data, Peterbilt, GM Financial, Baylor, Scott & White and many others.

Internships can be part-time or full-time and are available throughout the year. The summer is the most popular season for obtaining them. Depending on a student's major, academic credit may be received for completing an internship. Completing an internship is mandatory in some degree programs.

The Career Center strongly promotes paid internships; however, in some cases, depending on the organization, industry and specific job, internships may be unpaid. If a student accepts an unpaid internship, there may be a small stipend available to the student by contacting the Career Center.

Some degree programs require students to fulfill an internship as part of their course work and in some cases a paid internship is mandatory to meet curriculum requirements.

Earning academic credit

Depending on the chosen major, students may be eligible to receive academic credit for an internship. Department policies vary based on these opportunities but often they are evaluated based on how the work relates to the student's field of study, the length of the internship, what learning opportunities are available and whether supervision or mentoring is provided by a professional in the field. Students are encouraged to work with their academic departments to identify major-related internship requirements and options. Academic Department internship information is also housed on the Career Center website.

The Career Center Internship team works closely with Career Coaches, faculty members, and employers to promote the internship academic credit process and document student internship outcomes.

For further information, contact the Career Center in Sage Hall, Suite 202; by phone, 940-565-2105; or visit the web site at careercenter.unt.edu.

Registration

All registration and student-requested schedule changes are conducted via web registration at my.unt.edu. Specific information and instructions as well as dates are found online at registrar.unt.edu/registration/ and at my.unt.edu.

Priority registration

Class registration start dates are determined by your current classification. Classification is based on your cumulative earned credit hours, which includes your UNT credit, transfer credit and test credit.

Late registration

Students who did not enroll during the official registration periods must pay an additional fee to enroll late. Refer to Academic Calendars at registrar.unt.edu for additional information.

Schedule changes

For information concerning adding or dropping courses, consult the online Schedule of Classes at registrar.unt.edu/registration/schedule-of-classes.html?mn=1b or my.unt.edu.

Schedule change (add, drop and withdrawal)

Students may adjust their schedule by adding and/or dropping classes or by withdrawing from the university. Specific procedures and deadlines must be followed in making these changes. Dropping all courses during a term/semester constitutes withdrawing from the university for that term/semester. Students must notify the Dean of Students Office of their intent to withdraw from the university. Procedures and deadlines for withdrawing are available in the Dean of Students Office or online at Studentaffairs.unt.edu/dean-of-students/policies/withdrawals.

Dropping courses

Students who wish to drop a course before the 12th class day of fall or spring terms/semesters or before the equivalent dates for 8 week or summer sessions, may do so at my.unt.edu. Students applying for financial aid are required to notify Financial Aid and Scholarships before dropping any class to learn how it will affect current or future financial aid eligibility.

Students will continue to be able to drop a course on their my.unt.edu between the 12th day of class and the designated day of a given semester's 10th week for fall or spring terms/semesters or the equivalent dates for 8 week and summer sessions. They will receive a grade of W.

If a student fails to drop a course, even if the student does not attend the course, a grade of F will be recorded.

Faculty and staff will not drop a student from a course automatically for nonattendance; the student must initiate the process and complete the necessary steps to ensure the class is dropped.

Drop procedures must be completed by 5 p.m. on the deadline dates specified in the online Academic Calendar. After these dates, a student may not drop a course.

For drop procedures and instructions, please visit the Registrar's webpage at registrar.unt.edu/registration-guide.html?mn=1d.

Limitation of drops

Students enrolling in higher education *for the first time* during the fall 2007 academic term or any term subsequent to the fall 2007 term may drop a total of six courses. This total includes any course a transfer student has dropped at another Texas public institution of higher education. This does not apply to courses dropped prior to the census date or to courses dropped with a grade of WF and does not apply if the student withdraws from the term or session.

Certain exceptions may be made to the six drop limit. Reasonable cause for exception could include the following:

- a severe illness or other debilitating condition that affects the student's ability to satisfactorily complete the course;
- the student's responsibility for the care of a sick, injured or needy person if the provision of that care affects the student's ability to satisfactorily complete the course;
- the death of a person who is considered to be a member of the student's family or who is otherwise considered to have a sufficiently close relationship to the student that the person's death is considered to be a showing of good cause;
- active duty service as a member of the Texas National Guard or the armed forces of the United States of either the student or a person who is considered to be a member of the student's family or who is otherwise considered to have a sufficiently close relationship to the student that the person's active military service is considered to be a showing of good cause;
- the change of the student's work schedule that is beyond the control of the student and that affects the student's ability to satisfactorily complete the course.

Requests for exception to the drop limitation must be made in writing to the student's academic dean and must occur during the semester that the dropped course was taken.

Withdrawal from UNT

A student may withdraw from UNT at any time prior to two weeks before the first day of final examinations for fall or spring terms/semesters or the equivalent dates for 8 week or summer sessions by making a request with the Dean of Student Office or visit their webpage at studentaffairs.unt.edu/dean-of-students/policies/withdrawals. The grade of W is recorded for each course in which a withdrawn student was enrolled.

Official dates and deadlines for withdrawing are specified in the online Academic Calendar.

To receive a refund for a parking permit, a student must return the permit to Parking Services located in the Highland Parking Garage.

Students called to active duty

Texas Education Code 54.006 (f) indicates, "Beginning with the summer semester of 1990, if a student withdraws from an institution of higher education because the student is called to active military service, the institution, at the student's option, shall: (1) refund the tuition and fees paid by the student for the semester in which the student withdraws; (2) grant a student, who is eligible under the institution's guidelines, an incomplete grade in all courses by designating 'withdrawn-military' on the student's transcript; or (3) as determined by the instructor, assign an appropriate final grade or credit to a student who has satisfactorily completed a substantial amount of course work and who has demonstrated sufficient mastery of the course material." Students should contact the Dean of Students to determine their options.

In order to be eligible for options under this law a UNT student must produce a copy of his or her orders to the Dean of Students Office. Withdrawal may or may not require that the student talk with each instructor depending on timing in the semester; however, the latter two options do require that the student talk with his or her instructors and come to a decision as to which solution is best for each class given timing and circumstances. A student called to active duty may consider the following options:

1. withdrawal with a full refund of appropriate tuition/fees;

2. incomplete grades with the one-year I (Incomplete) removal time limit starting with the end of active duty; or
3. a final grade if the course is essentially over and the course material has been sufficiently mastered (determined by the instructor).

Auditing

Admitted students may elect to audit a course for no academic credit.

- Students elect to audit a course in consultation with their academic advisor. Election must occur by the census date for the term/session. Once the election is made a change cannot be made after the census date.
- If the course enrollment reaches the maximum capacity, students will not be allowed to audit the course.
- Auditors cannot claim credit based on attendance or petition to change the course to academic credit after census for that term.
- Auditors will be included on the class roll; however, the instructor will not require or accept any papers, tests, or examinations.
- Auditors pay a fee per semester, regardless of the number of courses audited. Tuition and fee information is available online at studentaccounting.unt.edu.
- Auditing a credit-bearing course does not change the status of the course from being an academic credit course to a noncredit credit course.
- Auditors are expected to abide by all class policies and procedures including regular and timely attendance.
- A grade of AU is assigned to students and will appear on their academic transcript.
- A person 65 years of age or older may enroll as an auditor and observer without credit and without payment of a fee, if space is available and if approved by the department chair and the appropriate dean. Such enrollment entitles the person to library privileges, but not to instruction in applied music or physical education, the use of laboratory equipment and supplies, or admission to university-sponsored fine arts events. (Texas Education Code, Subchapter 54, Section 54.210 as added in 1975)

Enrollment certification

Enrollment verification for loan deferments is completed in the Registrar's Office and is based upon a student's having registered and paid tuition and fees according to the following criteria. See "Special Conditions for Financial Aid Applicants" in the Financial Information section of this catalog for loan deferment requirements.

Undergraduate

Full Time: fall, spring or summer term/semester, 12 or more hours.

Three-Quarter Time: fall, spring or summer term/semester, 9 to 11 hours.

Half Time: fall, spring or summer term/semester, 6 to 8 hours.

Graduate

Full Time: fall, spring or summer term/semester, 9 or more hours. Doctoral and master's students enrolled in 3 or more hours of dissertation or thesis (courses numbered 5950/6950/6954) are considered full time. Students who receive Veteran's benefits should work with the Veteran Benefits office (940-369-8021) to ensure benefits are applied correctly.

Three-Quarter Time: fall, spring or summer term/semester, 6 to 8 hours.

Half Time: fall, spring or summer term/semester, 5 hours.

Extension courses are considered nontraditional credit and are excluded for certification purposes.

International students also may request International Advising to issue letters of enrollment for the use of foreign governments, embassies, scholarship agencies and banks. International Advising is located on the second floor of Sycamore Hall.

Verification of enrollment/enrollment certificate

UNT student enrollment verifications are supplied by the National Student Clearinghouse (NSC). Third parties such as health care companies, prospective employers, or insurance agencies seeking verification of enrollment may contact the NSC online by going to <https://secure.studentclearinghouse.org/vs/Index>.

Student enrollment verification self-service

Current and former UNT students may request their own enrollment verification/certification through a direct link in MyUNT. Enrollment verification certificates printed via the National Student Clearinghouse (NSC) should be accepted as official and can be used for insurance companies, scholarships, military IDs, employment and all other services that require proof of enrollment at the University of North Texas. For more information, please see the Enrollment Verification/Certification page of the Registrar's web site.

Other learning opportunities

Concurrent registration

A student in residence who wishes to enroll concurrently at another college should consult with their academic advisor.

Students who earn transfer hours from other institutions while attending UNT must submit official transcript to the Registrar's Office at the end of each term. If the official transcripts are not received, then an academic hold may be placed on the student's account preventing future registration and receipt of an official UNT transcript.

Special provisions for avoiding more than one minimum tuition charge are available for students enrolling concurrently in more than one state-supported institution of higher education. Students planning concurrent enrollment are cautioned to check these provisions prior to enrollment in any state institution.

Alternative class offerings

In addition to regular daytime classes, UNT offers evening and weekend on-campus and off-campus residence credit courses and courses at the Universities Center at Dallas and UNT at Frisco, as well as other distance education and web-based courses. See "Distance Education (web-based and digital communication)" in the Campus Resources section of this catalog.

Enrollment at the Universities Center at Dallas

Students may enroll for undergraduate courses offered by UNT at the Universities Center at Dallas (UCD), a Multi-Institutional Teaching Center (MITC) located at 1901 Main Street in downtown Dallas. The University of North Texas and The University of North Texas Dallas cooperate in offering upper-division undergraduate courses and graduate courses at UCD. For more information, call 214-752-5533.

Enrollment at the Collin Higher Education Center

In 2009 the Texas Higher Education Coordinating Board approved the Collin Higher Education Center (CHEC), where UNT cooperates with Collin College and other universities in the offering of undergraduate and graduate courses and degrees. Enrollment is open to all UNT students.

The CHEC is located at 3452 Spur 399, McKinney, Texas 75059. For current information about the CHEC, call 972-599-3126, visit the CHEC web site at www.collin.edu/infopropective or call the UNT Office of Admissions at 940-565-2681.

Financial information

Tuition and mandatory fees

Tuition, fees, room and board are subject to increase or decrease without notice by action of the Texas Legislature and/or the UNT Board of Regents. Students are responsible for any additional tuition and/or fee amounts resulting from post audits and corrections (i.e., registration assessing errors, changing from off-campus to on-campus classes, invalid employment waivers, etc.).

For current information on tuition and fees, visit the Student Accounting website (studentaccounting.unt.edu).

Tuition plans

The two tuition plan options available for first-time Undergraduate students at UNT are the Save and Soar Tuition Plan and the Tradition Tuition Plan.

For additional information concerning UNT's Tuition Plans, go to studentaccounting.unt.edu.

Undergraduate tuition rates

(Tuition rates are subject to change)

Undergraduate students who attempt 30 or more semester credit hours beyond the minimum number of hours required for completion of their degree program will be charged additional tuition amounts. Students initially enrolled as undergraduates prior to 1999 Fall Semester are exempt. Please refer to registrar.unt.edu/registration/excessive-hours.html for specific information.

Undergraduate students who enroll in certain courses more than twice will be charged additional tuition amounts. Please refer to registrar.unt.edu/registration/repeating-courses.html for specific information.

Graduate tuition rates

(Tuition rates are subject to change)

Please visit the Student Accounting website (studentaccounting.unt.edu) for the most current tuition and fee rates.

Explanation of fees

(Fees are subject to change)

Visit the Student Accounting website (studentaccounting.unt.edu) for current fees.

Distance education fee

A distance education fee is assessed to all distance education courses to support and enhance instructional design, management, delivery, maintenance, coaching and technology for distance education courses.

Student service fees

Student service fees are assessed per semester credit hours for which a student registers to cover the cost of student services that directly involve or benefit students, including, but not limited to, recreational activities, artist and lecture series, cultural entertainment series, debating and oratorical activities and student government.

Student union fee

A fixed student union fee is collected from each enrolled student for the purpose of operating, maintaining, improving and equipping the University Union. Activities financed by the student union fee are limited to those in which the entire student body is eligible to participate. Prorated in Summer sessions.

Learning support fee

The learning support fee is collected in proportion to the number of credit hours for which a student registers to defray costs associated with technology, library, academic advising, as well as university printed and electronic communications. This fee also provides critical resources which enable student success as well as enhance research and learning outcomes.

Medical services fee

The fixed medical services fee is collected from each enrolled student to operate, maintain, improve, and equip the Student Health and Wellness Center. Prorated in Summer sessions.

International education fee

A fixed international education fee is collected from each enrolled student to be used in support of an international education financial aid fund. This fund allows an equal opportunity for all students to participate in student exchange and study abroad programs. Prorated in Summer sessions.

Recreational Facility fee

A fixed recreational facility fee is collected from each enrolled student for the purpose of operating the Pohl Recreation Center. Prorated in Summer sessions.

Transportation fee

The transportation fee supports the shuttle bus system that transports students to, and around, various locations on campus.

Master's advising fee

This fee is assessed each semester to students in the Colleges of Engineering; Health and Public Service; Merchandising, Hospitality and Tourism; Education; Information; as well as programs offered by the Toulouse Graduate School (Advanced Data Analytics, Interdisciplinary Studies, graduate non-degree seeking and graduate preparation programs).

International Student Fee

A fixed international student fee is charged to all non-immigrant visa students for each term in which they enroll in UNT.

Intercollegiate athletics fee

This fee is assessed in proportion to the number of semester credit hours for which a student registers to cover the cost of UNT athletics programs, capped at 15 hours.

Environmental services fee

The Environmental Services Fee is used to fund environmentally related projects/activities on campus such as energy and water conservation, waste reduction and recycling, sustainable campus dining, and student projects. The fee is applied for students enrolled in courses on the Denton and/or Frisco Landing campus. The fee is waived for students taking all their courses online and are not charged in summer sessions.

Property deposit

All students, except those enrolled in only off-campus courses or covered by other specific waivers, must pay a \$10.00 General Property Deposit at the time of first registering at the university. The deposit may be forfeited to cover any outstanding financial obligation at the university. The fee will otherwise be refunded to the student upon withdrawal or graduation from the university. If the deposit has not been refunded to the student within 4 years of the last enrollment, it will be forfeited as specified by state law.

Instructional fees

Instructional fees vary by course and fall into the following two fee categories. Please note that for billing purposes, these fee categories are grouped together and billed as one instructional fee.

Instructional fees will be due at the time of registration or the payment deadline for early registered students. These fees are refundable according to the university refund policy. If a student desires to know what portion of an instructional fee falls into each category listed below, they may contact Student Accounting at 940-565-3225.

Academic fees

Academic Fees are assessed at the college/school level based on the estimated costs of goods and services related to instruction. Academic fees are charged to cover consumable supplies, syllabi, tests, classroom guest lecturers, salaries and wages of employees who assist in the preparation, distribution, and supply of classroom materials and some equipment purchases related directly to student participation in the classroom.

Laboratory fees

Laboratory fees are only applicable to courses that require students to register for a laboratory section. Laboratory fees are collected to cover the cost of materials and supplies used by students in the laboratory. The laboratory fee may not be less than \$2 nor more than \$30 for any one term/semester or summer session.

Admission application fee

All undergraduate applicants to the University of North Texas must pay a non-refundable admission application fee.

Late application fee

Undergraduate students applying after the application deadline must submit a \$90 application fee.

Credit by exam fee

UNT awards undergraduate college credit on the basis of local and national examinations, subject to general limitations. Examinations are offered by several UNT departments. A fee is collected from those students who take credit by examination at UNT.

Universities Center at Dallas fee

Students enrolling for upper-division undergraduate courses or graduate courses offered by the partner universities of the Universities Center at Dallas may enroll at their home institution for courses offered by the other UCD universities. UCD is located in downtown Dallas. Please visit studentaccounting.unt.edu/explanation-fees for current per credit fee.

Collin Higher Education Center fee

Students enrolling in undergraduate or graduate courses offered at the Collin Higher Education Center (CHEC) are assessed a Collin Higher Education Fee. The CHEC, a partnership with Collin County Community College, is located at 3452 Spur 399, McKinney, Texas. Please visit studentaccounting.unt.edu/explanation-fees for current per credit fee.

International Student Health Insurance fee

Health insurance is required for international students and will be assessed automatically at the time of registration for classes. For further information, please contact the UNT Student Health and Wellness Center.

Optional Practical Training fee

All F-1 international students who choose to apply for Optional Practical Training (OPT), will be required to pay the OPT Case Management Fee. This fee is separate from the USCIS application fee. This fee will be used to subsidize the costs associated with the mandatory case management for students on Optional Practical Training after graduation.

G. Brint Ryan College of Business Graduate Program Fee – Master's

G. Brint Ryan College of Business master's students are charged a Master's Program Fee. The purpose of the fee is to provide enhanced support services to G. Brint Ryan College of Business master's students.

College of Information PhD Learning Technology online distance delivered students

This program is a cohort-based program consisting of up to seven semesters (including summer). The purpose of the fee is to provide enhanced support services.

Executive MS in Computer Science – New College at Frisco

Students enrolled in the Executive MS in Computer Science at the New College at Frisco are charged a program fee per semester credit hour. The purpose of the fee is to provide specialized program costs and support services for the Executive Master's students at the Frisco Campus.

Out-Of-State-Teaching Fee (OSTF)

Non-resident students living outside of Texas while taking UNT courses (typically online) are charged an Out-of-State Teaching Fee in lieu of tuition and instructional fees. This fee must cover the cost of instruction and is set by each academic department annually. The OSTF rates (per semester credit hour) can be found at studentaccounting.unt.edu/explanation-fees for current per credit fee.

** The following fees are waived if students are only enrolled in courses at locations other than the Denton or Discovery Park campus: Property Deposit, Medical Service Fee, Student Union Fee, Recreational Facility Fee, Transportation Fee, Environmental Services Fee and Intercollegiate Athletics Fee.*

Option to pay tuition by payment plan

UNT provides for the payment of tuition and fees during the fall, spring, and summer terms/semesters through the following alternatives:

1. Full payment of tuition and fees upon registration or by the payment deadline for early registration; or
2. Selection of the payment plan. By selecting the installment plan, the student understands that it is a contractual agreement and agrees to make the installment payments by the due dates indicated.

The Texas Legislature has the authority to modify or eliminate installment payment of tuition at each regular or called legislative session.

Non-refundable fee for tuition by installment

Administrative fee: \$35.00

Note: A \$35.00 non-refundable administrative fee will be charged each semester when the payment plan is selected. Students who choose the payment plan option recognize they are in a contractual relationship and accept the terms of the payment plan contract.

A student who fails to make payment of tuition and fees (including any incidental fees) by the due date may be prohibited from registering for classes until full payment is made. A student who fails to make payment prior to the end of the term/semester may be denied credit for the work done that term/semester.

See Student Accounting at studentaccounting.unt.edu for payment plan information.

Tuition and fee payments

Credit card payments (MasterCard, Visa, American Express and Discover) and check payments may be made through self-service at my.unt.edu. Credit and debit card payments are assessed an additional 2.79% service fee to cover the processing cost for the payment. Electronic checks are accepted with no additional fee.

Tuition and fee payments also may be made by personal check, money order, cashier's check, or cash at the Student Accounting Office in the Eagle Student Services Center. Student Accounting requires the student identification number to be recorded on all check and money order payments made in person.

Account balances and schedule information may be obtained through self-service at my.unt.edu.

Cash payments

Cash payments are accepted at Student Accounting in the Eagle Student Services Center. Please do not mail cash payments.

Tuition and fee policies

Tuition covers undergraduate and graduate work. Tuition and the various fees provide limited health services and admission to university-sponsored fine arts and athletic events. Instructional fees, materials fees and private instruction fees are additional. Students must purchase their own textbooks and supplies.

Fees charged for late registration, graduation and regalia, late filing for graduation and miscellaneous items are noted at studentaccounting.unt.edu.

Full-time tuition rate information

(Timely graduation tuition program)

At UNT, **full-time undergraduate** students **pay the same amount** for university tuition and most fees in a fall or spring semester **regardless of how many hours they take**. Students are considered full-time once they register for 12 hours or more. More information is available at studentaccounting.unt.edu.

Student financial obligation agreement

Each semester, prior to registering for classes, a student is required to accept the Student Financial Obligation Agreement. For additional information, visit studentaccounting.unt.edu.

Tuition charged for excess and repeated credit hours

Undergraduate students who attempt 30 or more semester credit hours beyond the minimum number of hours required for completion of their degree program will be charged additional tuition amounts. Students initially enrolled prior to the 1999 Fall Semester are exempt. Please refer to registrar.unt.edu/registration/excessive-hours.html for specific information.

Undergraduate students who enroll in the same course more than twice will be charged additional tuition amounts. Please refer to registrar.unt.edu/registration/repeating-courses.html for specific information.

Residency regulations for tuition purposes

A student's state of residency is determined prior to first enrollment in accordance with rules and regulations established by the Texas Higher Education Coordinating Board. Detailed information on residency is available at the state website mytexasfuture.org/middle-high-school/explore-financial-aid/apply-for-financial-aid/residency-information/. New students may contact the Office of Admissions for detailed residency information. Current UNT students should contact the Registrar's Office. Students who are not legal residents of Texas must pay nonresident tuition, including the statutory tuition charges and standard university fees approved by the Board of Regents. Effective Fall 2015, undergraduate Oklahoma residents will pay a decreased rate for nonresident tuition.

Certain residency exceptions do not affect actual residency status but do allow for a nonresident tuition exemption. Refer to "Tuition and Fee Waivers" in this section for further information.

Responsibility of the student

Once admitted to UNT, students are notified of their residency classification. Students are responsible for providing accurate residency information to the Office of the Registrar. Any questions concerning residence must be discussed with residency determination officials in the Office of Admissions and/or Registrar's Office prior to registration.

Any student incorrectly classified as a resident will be reclassified and required to pay all out-of-state tuition due. Attempts to evade nonresident fees may subject the student to the statute penalty and to possible disciplinary action.

Change of status nonresident to resident

A student who is at any time classified as a nonresident retains nonresident status until the student applies for reclassification with the Office of the Registrar and the application approved.

Change of status resident to nonresident

Students who are classified as residents but become nonresidents by virtue of any address change must notify the Registrar of such change immediately. Students who believe they have been erroneously classified have the opportunity for appeal to the office that classified the residency: the Office of Admissions or the Office of the Registrar.

Tuition and fee waivers/exemptions

Several exemptions and waivers are available to qualifying students who meet the specific state requirements for each individual waiver or exemption. Waiver/exemptions refunds must be requested during the term/semester application is made. Such requests must be made prior to the 12th class day in long terms/semesters, the 4th class day in the summer sessions (except 3W1), and 2nd class day in 3W1. Requests for retroactive refunds are not honored. Information regarding waivers and exemptions is available at Student Accounting or at studentaccounting.unt.edu. Posted waivers/exemptions are subject to post audit and correction.

Exemptions and waivers

For a complete list, please see: studentaccounting.unt.edu/waivers-and-exemptions.

Tuition and fee adjustments

A student who drops a course or withdraws from the university within certain time periods may be entitled to a tuition adjustment. These adjustments are calculated according to the category (drop or withdrawal) and time schedule listed at Tuition Adjustments | Student Accounting. Tuition Adjustment periods and rates are subject to change by the state legislature. Delinquent payment fees, late registration charges, publication fees and installment handling fees are non-refundable. Any financial obligation to UNT must be resolved before any adjustments will be made.

Class drop adjustments

Tuition Adjustments are made for any course dropped through the 12th class day for the long term/semester; corresponding dates are set for 8 week and summer terms/sessions. See the 2025-26 Academic calendar specific dates. The semester's first class day is always the first official university day of classes and not the first day of an individual's class.

Note: If all classes for the semester/term are dropped, see "Schedule of Withdrawal Refunds."

Students applying for financial aid are required to notify Financial Aid and Scholarships before dropping any class to learn how it will affect current or future financial aid eligibility.

Withdrawal from the university

Withdrawal refunds are determined by when the student withdrew and the number of credit hours withdrawn from. Withdrawal percentages are applied to the total amount of tuition and fees as prescribed by state law, not the amount paid. The withdrawal schedule and proration of tuition and fees are mandated by Texas Education Code 54.006. Prorated withdrawals from the term or session are calculated based on the first day of class up to the date of the withdrawal.

Additional information may be found at studentaccounting.unt.edu or by contacting Student Accounting.

The withdrawal schedule and percentage of a pro-rata refund pertain to total withdrawal from the term/semester and are mandated by federal law. Please contact Financial Aid and Scholarships regarding pro-rata refund schedules and percentages.

Schedule of withdrawal refunds

Please see studentaccounting.unt.edu for additional information about class drop and withdrawal tuition adjustments.

***Note: Some fees are non-refundable.**

Delinquent payment fees, late registration charges, publication fees and installment handling fee are non-refundable.

Refund of property deposit

Each student pays a property deposit during initial enrollment. If no money is owed to the University by graduation or withdrawal, this deposit is refundable.

Tuition rebates for certain undergraduates

Section 54.0065 of the Texas Education Code provides up to a \$1,000 tuition rebate to students. To be eligible for a rebate under this program, a student must:

1. have enrolled for the first time in an institution of higher education in the Fall 1997 semester or later;
2. request a rebate for course work related to a first baccalaureate degree received from a general academic teaching institution;
3. have been a resident of Texas and have been entitled to pay resident tuition at all times while pursuing the degree;
4. if enrolled for the first time in Fall 2005 or later, graduate within four calendar years for a four-year degree or within five calendar years for a five-year degree if the degree is in a program determined by the Texas Higher Education Coordinating Board to require more than four years to complete; and
5. have attempted no more than 3 hours in excess of the minimum number of semester credit hours required to complete the degree under the catalog under which the student will graduate.

Hours attempted include transfer credits, course credit earned exclusively by examination (except that, for the purpose of this program, only the credit hours in excess of 9 semester credit hours earned exclusively by examination will be included as hours attempted), courses dropped after the official census date, for-credit developmental courses, optional internship and cooperative education courses and repeated courses. Courses earned prior to high school graduation as well as courses dropped for reasons that are determined by the institution to be totally beyond the control of the student shall not be counted.

For students concurrently earning a baccalaureate degree and a Texas teaching certificate, required teacher education courses shall not be counted to the extent that they are over and above the free electives allowed in the baccalaureate degree program.

Effective for students who enroll for the first time in Fall 2005 or later, an otherwise eligible student may be eligible for a tuition rebate without satisfying the requirements of item 4 above if the student is awarded a baccalaureate degree and the institution determines that the student's failure to comply was caused by a demonstrated hardship condition.

For additional information concerning tuition rebates, contact the Registrar's Office or your academic advisor.

General financial policies

As a public institution within the State of Texas, UNT is subject to state laws and regulations regarding the assessment and collection of tuition and fees. Extension of credit is prohibited and all financial obligations to the university must be paid by the established due dates.

UNT will not withhold a transcript if a student has a past-due balance on their student account and has received a Title IV federal student financial aid disbursement during their career at UNT. Examples of Title IV aid may include federal grants (examples: Pell, SEOG, TEACH) and federal loans. UNT has implemented these actions to comply with regulations published by the U.S. Department of Education related to withholding official transcripts for students who have outstanding financial obligations to the university. Past-due balances will remain in effect until they are paid in full or otherwise resolved. For more information regarding resolution of past-due balances, visit studentaccounting.unt.edu.

Correction of errors

Students are responsible for any additional amounts due UNT resulting from auditing and correction of records, including all registration assessment errors, change from off-campus to on-campus classes, invalid employment waivers, etc.

Payments by third party

Checks issued by a third party in payment of a student's tuition, fees or other charges made by UNT should be made payable to UNT. The student's name and/or student ID number should be included on the payment.

Returned checks

A returned check is defined as any check, similar sight order, or electronic bank draft returned to the university unpaid due to no fault of the bank or university.

Upon receipt of a returned check, notification is sent to the student or the individual in whose behalf the check was issued. The address on the check and/or the address in the official university records is used. The check is payable once the returned payment and returned payment fee is charged to the student account. Only cash, cashier's check or money order is accepted for payment of the returned check and service charge (\$25 per check).

Refund issuing and online payment options are suspended while any returned checks and/or service charges are outstanding.

If the university receives three or more returned checks during an academic year, the check-issuing privileges of the individual will be revoked.

If all attempts to collect a returned check have failed, a student may be dismissed from UNT and civil or criminal legal action may be taken in accordance with Texas state law (Sections 31.06 and 32.41 if the Texas Penal Code).

Hazlewood Act for Texas Veterans

Information on tuition exemptions and other veterans' educational benefits is available online at sfs.unt.edustudentaccounting.unt.edu/va-education-benefits.html and studentaccounting.unt.edu/military-tuition-assistance.html.

Financial Assistance

Financial Aid & Scholarships (FAS) at the University of North Texas offers a variety of options to assist students in financing their education. For more information on Financial Aid & Scholarships at UNT, please visit financialaid.unt.edu, visit the UNT One Stop on the 2nd floor of the Eagle Student Services Center, call 940-565-2302, or contact us via ScrappySays.unt.edu.

Aid application period and priority dates

The Free Application for Federal Student Aid (FAFSA) is available each October 1 for the upcoming UNT academic year (fall, spring, summer). Students whose Financial aid application is completed by the applicable priority date are ensured first consideration for awards. A complete financial aid application means the university has received the results of your FAFSA and any additional documents requested by Financial Aid & Scholarships (FAS). Students are encouraged to apply online at www.fafsa.gov at least two weeks before the priority dates to ensure students have had time to provide any additional information requested.

UNT's Priority Dates:

Financial Aid priority dates are posted annually on the Financial Aid & Scholarships websites.

A separate UNT summer aid interest form must be completed for summer financial aid. This form is available online (my.unt.edu) early in the spring term/semester for the following summer term/semester. The FAFSA for the year preceding the summer is also required.

General federal aid eligibility requirements

Before any federal aid is offered, general eligibility and program requirements must be met. To be eligible for federal financial aid students must:

- establish eligibility by completing and submitting the Free Application for Federal Student Aid (FAFSA);
- be a U.S. citizen or eligible noncitizen*;
- have a valid Social Security Number (unless you are from the Republic of the Marshall Islands, Federated States of Micronesia, or the Republic of Palau);
- have a high school diploma, GED (general equivalency diploma), or the equivalent;
- be accepted as a regular student for admission by the university and enrolled in an eligible degree or certification program;
- not be in default on any federal student loan or owe a refund or repayment of educational funds received at any institution;
- enroll in and maintain at least a half-time class load (with the exception of the Federal Pell Grant program);
- be making Satisfactory Academic Progress (SAP);
- use all funds received through financial aid for educational purposes.

Note: Non-degree students are not eligible for financial aid.

*Non-documented students who are residents of Texas may qualify for state assistance under Texas Senate Bill 1528. Students should visit financialaid.unt.edu for more information.

Special conditions for financial aid applicants

Enrollment

With the exception of the Federal Pell Grant program, students in an academic program under the undergraduate career (major or concentration) are required to enroll in at least 6 undergraduate hours per term/semester to be considered for financial aid programs.

Please review the Financial Aid Terms and Conditions relating to enrollment for further information: [Financial Aid & Scholarships](#).

Courses must be required for a student's program of study in order to be considered for financial aid eligibility. Therefore, enrollment hours for financial aid eligibility and loan deferment may differ. Students needing certification of enrollment for loan deferment purposes should visit the UNT Registrar's Office. Also see "Enrollment Certification" in the Enrollment section of this catalog.

Official withdrawal from UNT

If a financial aid recipient has registered for classes and decides not to attend UNT, please review information on withdrawing and associated financial aid impacts. If circumstances require that the student withdraw from all classes, FAS strongly encourages the student to contact his or her academic advisor before making the final decision.

If the student has already made the decision to withdraw, he or she must begin the withdrawal process with UNT's Dean of Students Office. For online information on how to drop a course or withdraw from UNT, including official dates and deadlines, please visit the Academic Calendar.

If a student officially withdraws, ceases attendance, or is administratively withdrawn from UNT, federal regulations require post-secondary institutions to calculate the amount of Federal Title IV funds (aid) earned during the term from which the student withdrew. Students enrolled in sessions (i.e., 8W1, 8W2) who have successfully completed the equivalent of half-time enrollment and/or a session or combination of sessions comprising at least 49% of the total term length are not considered to have withdrawn for Return of Title IV Funds purposes. Factors considered in this federally mandated calculation include number of days in the payment period, date of withdrawal/number of calendar days the student attends before total withdrawal as determined by FAS (excluding scheduled breaks of at least 5 days in length), the total amount of Title IV aid eligibility, tuition and fee charges, on-campus room and board charges (if applicable), and class attendance.

The percentage of time spent in attendance is the percentage of federal funds the student has earned. Other funds received are unearned.

After Financial Aid & Scholarships personnel apply the federally mandated calculation, unearned Federal Title IV funds (aid) will be returned to the programs from which the money was paid to the student (or parent) in the following order:

- Federal Direct Unsubsidized Loans
- Federal Direct Subsidized Loans
- Federal Direct Grad PLUS Loans
- Federal Direct Parent (PLUS) Loans
- Federal Pell Grants
- Iraq Afghanistan Service Grants
- Federal Supplemental Educational Opportunity Grants (FSEOG)
- Teacher Education Assistance for College and Higher Education (TEACH) Grant

It is possible the student will owe a repayment of unearned financial aid funds to the university if he or she ceases attendance prior to the sixty percent (60%) completion point of any payment period for which the student has received financial aid funds. The completion point is based on the total number of class days in a payment period. If it is determined that the student owes a repayment of funds, he or she will receive notification from FAS. The student can also check the balance owed through the myUNT student portal.

Summer term official withdrawal from UNT

For Title IV (Federal Aid) purposes, a student who has enrolled in a session(s) offered in the summer term/semester and does not complete the session(s) in which the student was enrolled is considered to have withdrawn and a Return to Title IV calculation (R2T4) will be completed. Students will not be considered to have withdrawn for the summer term/semester if the student successfully completes (receives a passing grade):

- The student gives the Financial Aid & Scholarships office at UNT written confirmation that they will attend a session in the summer term/semester that begins within 45 days from the date of withdrawal. The written confirmation must be provided at the time that would otherwise have been a withdrawal.
- All requirements for graduation from his or her program before completing the days or hours in the period that the student was scheduled to complete.
- Title IV-eligible coursework in one session or a combination of sessions that includes 49% or more of the number of countable days in the payment period; or
- The student successfully completes Title IV-eligible coursework equal to or greater than what the school considers to be half-time enrollment for the payment period or period of enrollment.

That student may change the date of their attendance in a later session than originally indicated, provided that:

- The later session begins in the summer term/semester;
- The student makes the change in writing prior to the date they had previously confirmed.

If the student does not attend the later session(s), the date of withdrawal from the previous session will be used as the official withdrawal date to determine the amount of Title IV (Federal Aid) to be returned to the U.S. Department of Education (R2T4 calculation).

Basic calculation example

- Payment period is 113 calendar days. Student attends and participates in academically related activities for 54 days and then withdraws.
- Student stayed 47.8 percent of the number of payment period days. 52.2 percent was unearned.
- Student tuition and fees for payment period totaled \$547.20.
- Federal Title IV funds (aid) disbursed to the student during payment period
 - \$1,312.00 Federal Direct Subsidized Loan
 - \$1,562.00 Federal Pell Grant
 - \$2,874 total
 - 47.8 percent of the \$2,874 total equals \$1,373.77 earned aid.
- Since earned aid is less than disbursed aid, funds must be returned to the programs from which they were paid to the student (or parent).
- \$2,874 disbursed aid minus \$1,373.77 earned aid equals \$1,500.23 unearned aid.
- It is assumed by regulations that Federal Title IV funds (aid) paid for institutional charges (tuition/fees and room/board if applicable).
- The school returns the **lesser** of the total unearned aid (\$1,500.23) **or** the unearned institutional charges (\$547.20) multiplied by the unearned portion of the aid (52.2 percent) which equals \$285.64.
- In this example, the college must return \$285.64 to the loan lender since the loan funds are returned before grant funds and the school pays its share first.
- Once the school repays its unearned share (\$285.64), the remaining unearned share (\$1,214.59) must be returned (repaid) by the student.
- Of the remaining loan amount to be paid (\$1,026.36), the student by regulation will repay the usual monthly repayment by the terms of the loan promissory note. Therefore, there is no immediate repayment of loan funds to the lender.
- The remaining amount of the student's unearned share (\$1,214.59 minus \$1,026.36) is \$188.23; however, by regulation, 50 percent of all Federal Title IV grant aid disbursed plus Federal Title IV grant aid awarded that could have been disbursed is protected. In this example, the Federal Title IV grant aid awarded was \$1,562 in Federal Pell Grant and it was all disbursed. Therefore, \$1,562 multiplied by 50 percent equals \$781 and this amount is protected.

No calculations are required for students who attend past the 60 percent completion point. However, there are other consequences to consider. Withdrawing from classes will affect future eligibility for financial aid and possibly affect future scholarship disbursements. Students must meet Satisfactory Academic Progress (SAP) requirements to maintain eligibility for financial aid as defined by Financial Aid & Scholarships. Loan repayment grace period will begin and repayment of loan funds begins six months after graduation or the last day of at least half-time enrollment.

Students who do not officially withdraw through the UNT Dean of Students Office/cease attending class are also subject to the federally mandated calculation described above. If the student's last date of attendance in an academically related activity is unknown to the school, then the student's last date of attendance used in the federally mandated calculation will be the midpoint of the payment period.

For full policy information, please view consumer information for Return of Title IV funds.

Unofficial withdrawal from UNT

Financial aid is awarded to students with the expectation that they will attend classes for the entire payment period and that they will make progress toward a degree. If the student fails to earn a passing grade in all their classes, the student is considered an Unofficial Withdrawal. Financial Aid & Scholarships (FAS) is required to calculate the amount of Federal Title IV funds (aid) earned during the term in which the student did not earn at least one passing grade. The student will be required to have at least one of the student's instructors indicate the student's last date of attendance in an academically related activity. If the instructor

provides FAS with the student's last date of attendance by the prescribed deadline, then FAS will use this date as the student's withdrawal date in the federally mandated calculation described above. If the student's last date of attendance in an academically related activity is unknown to the school by the prescribed deadline, then the student's last date of attendance used in the federally mandated calculation will be the midpoint of the payment period or the equivalent date for summer sessions of enrollment.

If it is determined that the student never attended any of the classes for which the student (or parent) was paid, then the funds (aid) are considered to have not been earned. As a result, all funds (aid) will be canceled and returned to the programs from which they were awarded. The student will then owe a complete repayment to the university.

If a student who began attendance, does not officially withdraw, and subsequently fails to earn a passing grade in at least one course offered over an entire period, the institution must assume, for Title IV purposes, that the student has unofficially withdrawn, unless the institution can document that the student completed the enrollment.

If a student receives Title IV (Federal) grant or loan assistance and does not begin attendance in a payment period or period of enrollment, the student is ineligible for any Title IV aid.

Unofficially withdrawing from classes, not beginning attendance or failing to complete and pass registered hours may affect future eligibility for financial aid. Satisfactory Academic Progress requirements must be met to maintain eligibility for financial aid as defined by FAS.

Satisfactory Academic Progress (SAP)

Federal and state regulations require that each student maintain Satisfactory Academic Progress (SAP) to be eligible for financial aid programs. Minimum standards must be achieved by the end of any given enrollment period at UNT. Satisfactory Academic Progress (SAP) is defined using the following quantitative and qualitative standards:

- Students must successfully complete a specific percentage of their cumulative attempted credit hours to be meeting the course completion rate requirement and maintain satisfactory academic progress. Course completion rate is measured by dividing the cumulative number of hours successfully completed by the cumulative number of hours attempted. The minimum required Course Completion Rate for undergraduate students is based on the number of attempted hours reflected in the below table.

Attempted Hours	Required Completion Rate
0-89	50%
90-119	60%
120+	66.67%

- Undergraduate students cannot exceed hours above 150 percent of their required degree plan. The maximum includes all hours attempted at UNT and all transfer hours for which credit was earned. Attempted hours include all graded hours, withdrawn courses, failed courses, repeated courses, and incomplete courses. It also includes college credit earned while in high school, the Armed Forces, or via test credit.
- Undergraduate students must earn a minimum 2.0 cumulative UNT grade point average to maintain satisfactory academic progress.

Information on Satisfactory Academic Progress (SAP) can be found online at <https://financialaid.unt.edu/sap>.

Minimum hour requirement

Except for the Federal Pell grant program, students in an academic program under the undergraduate career (major or concentration) are required to enroll in at least 6 undergraduate hours per term/semester to be considered for financial aid programs.

Failing grades

If a student fails to earn a passing grade in any of the students' classes within a term, attendance in all classes within that term will be reviewed. If attendance cannot be confirmed via official UNT records, or the last date the student participated in an academically related activity cannot be documented, Financial Aid & Scholarships (FAS) personnel will apply the federally mandated calculation for the return of financial aid funds. Unearned Title IV funds (aid) will be returned to the programs from which the money was paid to the student (or parent), and it is possible that the student will owe a repayment to the university.

Grant programs

A grant is a type of need-based aid that does not require repayment. Eligibility for grant aid is determined through the Free Application for Federal Student Aid (FAFSA) process. Residents of Texas who are not eligible for federal aid should visit financialaid.unt.edu to determine if they are eligible to submit a Texas Application for State Financial Aid (TASFA) for consideration of state financial aid.

The FAFSA (or TASFA, if applicable) is needed annually to be considered for federal, state, and institutional. However, eligibility for a grant program does not guarantee an award. Applicants are considered based on the date of their application while considering the FAFSA-determined Student Aid Index (SAI). The earliest applicants with a completed award file have the best opportunity to be considered for available grant funding. We encourage students to apply early, making sure to complete any requests for additional information so awards can be finalized.

For descriptions, amounts and eligibility requirements of federal, state and institutional grants offered at UNT, please visit financialaid.unt.edu.

Emerald Eagle Scholars

The Emerald Eagle Scholars program provides access to higher education for academically talented students with high financial need and connects them to campus resources while engaging them in activities that facilitate their intellectual engagement, academic success and, ultimately, the timely completion of their bachelor's degrees.

There are three program pillars that make the Emerald Eagle Scholars program a great benefit to new students. The Financial Support Pillar enables all Emerald Eagle Scholars to have the average cost of tuition and fees for 15 semester credit hours paid for through a combination of federal, state, and institutional aid for a period of up to eight consecutive long semesters (or four years). The Academic Success Pillar sets high expectations for all Emerald Eagle Scholars requiring that all students maintain full-time enrollment and maintain a 2.5 cumulative UNT GPA per academic year, all while being supported by various academic readiness programs on campus. The Campus Connection Pillar allows students to connect and take part in the richness of university life, while being guided by both peer and faculty/staff mentors and advisors.

To be eligible for the Emerald Eagle Scholars program, a student must be a Texas resident and an incoming freshman from a household with an adjusted family income that does not exceed \$65,000 per year. Continued eligibility is contingent on maintaining all of the below requirements.

- Maintain at least a 2.5 UNT cumulative GPA.
- Successfully complete at least 24 credit hours by the end of each academic year.
- Enroll as a full-time student each semester (we highly recommend enrolling in 15 credit hours each semester to ensure you graduate in 4 years).
- Maintain TEXAS Grant eligibility each year.
- Complete at least one campus engagement per semester.
- All first-year students will be auto-enrolled in Access Mentoring.

For additional information, please visit the Emerald Eagle Scholars website at <https://emeraldeagles.unt.edu> or visit the Emerald Eagle Suite located in University Union 376.

Benefits for veterans

Students who have served in the military or who are currently serving, or dependents/spouses of our veterans may be eligible to receive benefits from the federal Department of Veteran Affairs (VA). To find out what you may be entitled to receive, veterans will want to fill out and submit the VA online application at www.gibill.va.gov.

Current Educational Programs:

- Selected Reserves (Chapter 1606)
- Montgomery GI Bill® (Chapter 30)
- Post 9/11 GI Bill® (Chapter 33)
- Survivors and Dependents Assistance Program (Chapter 35)

VA Certifying Officials at UNT are located in Sage Hall, Suite 236 and can be reached at 940-369-8021. Veterans or dependents/spouses who have questions concerning the administration of benefits should contact the Regional VA Office at 1-888-442-4551.

Pending Payment Compliance

In accordance with Title 38 US Code 3679(e), University of North Texas adopts the following additional provisions for any students using U.S. Department of Veterans Affairs (VA) Post-9/11 G.I. Bill® (Ch. 33) or Veteran Readiness & Employment (Ch. 31) benefits, while payment to the institution is pending from VA. University of North Texas will not:

- Prevent the students' enrollment;
- Assess a late penalty fee to the student;
- Require the student to secure alternative or additional funding;
- Deny the student access to any resources (access to classes, libraries, or other institutional facilities) available to other students who have satisfied their tuition and fee bills to the institution.

However, to qualify for this provision, such students may be required to:

- Produce the VA Certificate of Eligibility (COE) by the first day of class;
- Request to be certified; and
- Provide additional information needed to properly certify the enrollment as described in other institutional policies.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs (VA). More information about education benefits offered by VA is available at the official U.S. government website at <https://www.benefits.va.gov/gibill>.

Hazlewood Act for Texas veterans

Information on tuition exemptions and other veterans' educational benefits are available online at studentaccounting.unt.edu.

Employment

Federal Work-Study Program

Eligibility for the Federal Work-Study Program is determined by established financial need, availability of monies to make awards, at least half-time enrollment and maintaining Satisfactory Academic Progress (SAP) standards as defined by Financial Aid & Scholarships. Students awarded Federal Work-Study are eligible to earn the financial aid amount through a work-study job. Students may begin the job search process by visiting the Career Center web site at careercenter.unt.edu. Most positions require 15–25 hours of work per week. Students apply directly to the department with the open position listed on the web site. The employing department will select students for interviews based on availability of funds, applicants' skills, educational background and interest. Eligibility must be confirmed each term/semester to continue in the Federal Work-Study Program.

Career Center

The Career Center, located in Room 202 of Sage Hall, provides a variety of employment opportunities on and off campus to currently enrolled students to help them develop skills, offset their college expenses and provide experiences to support their long-term career planning efforts. Students are encouraged to set-up an appointment in Navigate with their designated Career Coach to support their career development plans. For information, call 940-565-2105 or e-mail careercenter@unt.edu and find major designated Career Coaches on the Career Center website. Information regarding on- and off-campus jobs can be accessed on each student's my.unt.edu web site. Simply log into Handshake for more information.

Loan programs

Federal Direct Loans

Federal Direct Loans are available to federal aid eligible students who have completed the Free Application for Federal Student Aid (FAFSA) process, are enrolled at least halftime in an eligible degree or certificate program, have remaining loan eligibility, are not in default or owe a repayment to a federal aid program, and are meeting Satisfactory Academic Progress (SAP) standards. Federal Direct Subsidized Loans may be offered to undergraduate students with federal need. Federal Direct Unsubsidized Loans may be offered to undergraduate and graduate students, regardless of federal need. The Federal Direct Parent PLUS Loan is a credit-based loan the parent or a legal guardian of dependent student may borrow for the student's educational expenses. The Graduate PLUS Loan is a credit-based loan available for graduate students for education expenses. The Free Application for Federal Student Aid (FAFSA) must be completed before an award will be determined. Maximum annual, lifetime, and Cost of Attendance (COA) limits will be imposed based upon loan type, classification, dependency status, and enrollment level.

Repayment begins six months after graduation or the last day of at least half-time enrollment.

Scholarships

The University of North Texas offers competitive academic scholarships to entering freshmen, transfer and continuing students to assist with educational related expenses. Many students compete for scholarships, which are awarded on merit and on a first-come, first-served basis to students enrolling in the fall and spring term. We recommend students apply and complete admission to UNT as early as possible to compete for available scholarship opportunities.

The availability of all scholarship funding is affected by many factors such as the state's economy and the stock market's performance. The office of Financial Aid & Scholarships (FAS) coordinates all scholarship awards once they have been submitted for processing.

Incoming student scholarships

Most UNT scholarships for incoming students (entering freshmen and transfer students) are administered by Financial Aid & Scholarships (FAS), with students competing for a limited number of renewable scholarships. These scholarships are awarded based on a student's academic performance in high school or previous college/university using academic information from their Application for Admission.

Scholarships available for incoming students include:

- UNT Meritorious Scholarships for National Merit Finalists
- UNT Excellence Scholarship
- UNT Transfer Excellence Scholarships (including Phi Theta Kappa members)

In the case of the UNT Meritorious Scholarship for National Merit Finalists, National Merit Scholarship Corporation notification indicating UNT as the school of choice is required to be considered.

Please see the following webpage for additional details: <https://financialaid.unt.edu/scholarships>.

Continuing student scholarships

The majority of scholarships for continuing students are awarded in academic departments. Students should check with specific departments for additional details.

Entering and continuing students may complete a scholarship profile by accessing the Eagle Scholarship Portal (unt.academicworks.com) to be considered for several scholarship opportunities. The portal becomes available annually in late fall for the following academic year. Students are encouraged to complete their scholarship profile as early as possible. Students must use their campus credentials assigned during the admission process (active EUID and password) to access the portal.

We encourage students to visit the UNT Financial Aid & Scholarships website for additional details at financialaid.unt.edu/scholarships.

Room and board

Room and board fees are subject to increase and decrease by action of the Texas Legislature and/or the Board of Regents of the University of North Texas. During 2024-2025, room and board based upon a double occupancy room with a seven-day meal plan cost \$11,220.98 per year. Rates for triple occupancy, single occupancy and private single occupancy rooms vary the room rate for the 2024-2025 academic year

For information concerning room and board charges, consult the Housing web site at housing.unt.edu.

Campus resources

Division of Student Affairs

The Division of Student Affairs (DSA) creates a student experience that supports academic success, social engagement, and personal and professional growth. We enhance the student experience through a wide array of intentional programs, services, and activities that support the life cycle of our students.

In addition, the division champions the overarching goals of the university by implementing programs essential to realizing UNT's mission and goals.

Departments and programs within the DSA include: Career Center, Center for Belonging & Engagement, Center for Fraternity and Sorority Life, Center for Leadership and Service, Center for Student Affairs at Discovery Park, Coliseum and Gateway Center, Counseling and Testing Services, Dean of Students Office, Dining Services, Distinguished Lecture Series, Emerald Eagle Scholars, First Generation Success Center, Green Jackets, Housing and Residence Life, North Texas in D.C., Off-Campus Student Services, Office of Disability Access, Orientation and Transition Programs, Recreational Sports, Recovery and Intervention Support and Education Program (RISE), Student Activities, Student Government Association, Student Health and Wellness Center, Student Legal Services, Student Veteran Services, Survivor Advocacy, TRIO Programs, University Union, UNT Food Pantry presented by Kroger, and We Mean Green Fund.

For more information, call 940-565-4909 or visit studentaffairs.unt.edu.

International Affairs

International Affairs is a guide and champion for campus internationalization at the University of North Texas. International Affairs supports international teaching, research, and service. We strive to enrich campus life by welcoming international students and scholars, cultivating global citizens among students, and fostering global connections between UNT and institutions, communities and people around the world.

International Affairs functions in a leadership and facilitation role to support the university's global endeavors and international initiatives. We provide expertise, assistance, and support to faculty, staff, students, and administration in all international activities.

All units are located in Marquis Hall (international.unt.edu).

The **Global Engagement Office** supports global engagement activities and international initiatives. Global Engagement advises colleges on the development of global programs, manages UNT's international agreements and contracts, and oversees the data and information about UNT's global engagement activities. Global Engagement acts as steward for campus internationalization by encouraging global scholarship, managing Fulbright and intramural grants, and promoting other global opportunities for faculty and students. Contact 940-565-2197 or international.unt.edu.

The **International Programs & Communication Office** provides UNT students opportunities for cross-cultural learning and engagement via a full schedule of international events and activities, provides international student support programs to help new students adjust to life in the U.S., and manages and awards International Affairs scholarships and grants. Contact 940-369-7795 or international.unt.edu.

The **Intensive English Language Institute, established in 1977**, is the longest-standing program of its kind in North Texas and one of the most prestigious programs for learning academic English in the United States. IELI also conducts the International Teaching Assistants testing and training program for UNT. Contact 940-565-2003 or Marquis Hall, Room 223 or visit international.unt.edu/ieli.

The **International Recruitment Office** recruits well-qualified and diverse international students to UNT colleges and schools. Its core activities include converting international prospects to applicants via digital outreach and recruitment at feeder

institutions both abroad and in the U.S. Office staff work regularly with high school counselors, foreign faculty, U.S. higher education advisors and UNT alumni. Contact 940-369-7624 or Marquis Hall, Room 290 or visit international.unt.edu/content.

The **International Student and Scholar Services Office** provides culturally sensitive immigration advising and support to international students and scholars engaged in academic activities at the University of North Texas. The office serves as the primary campus and system resource on immigration matters pertaining to all non-immigrant visa types. Contact 940-565-2195 or Marquis Hall, Room 110 or visit international.unt.edu/immigration.

The **Study Abroad Office** coordinates affiliate, exchange and faculty led programs for UNT students in collaboration with the university's colleges and schools. The office works to create programs that inspire global citizenship, enhance curriculum, and support the academic and personal goals of UNT students from all majors and backgrounds. The office also serves as a U.S. Passport Acceptance Facility and is open to the UNT and North Texas communities. Contact 940-565-2207 or Marquis Hall, Room 145 or visit studyabroad.unt.edu.

International student health insurance requirement

Since 1982, UNT has required all international students to have medical insurance. Consequently, international students are automatically charged a student health insurance fee to cover the premium for the UNT-sponsored health plan each semester after registration.

There are only three instances when a student may receive a waiver from the UNT-sponsored health care plan:

1. an international student has a government-sponsored plan (these waivers are processed in the Office of International Student and Scholar Services,
2. an international student has insurance through a U.S. employer group policy that meets the waiver requirements, or
3. an international student is a dependent on a parent or relative's U.S. employer group policy that meets the waiver requirements.

Students will be required to go to <https://unt.myahpcare.com> to waive out of the Plan, underwritten by United Healthcare Student Resources. For students requesting an insurance waiver, supplemental insurance to cover medical evacuation and repatriation will also be required. This coverage may also be purchased from United Healthcare. A waiver will not be granted until proof of acceptable insurance and medical evacuation and repatriation coverage is provided. Waiver requests are processed up until the official 12th class day.

Questions about the UNT-sponsored health plan or about a waiver from the plan may be addressed to SHWCinsurance@unt.edu.

Tuberculosis (TB) screening requirement

UNT requires all incoming international and IELI students from high-risk tubercular disease countries to be screened for TB. These students must be screened and, if required, tested for TB their first term of study on the UNT campus or provide documentation of a previous TB test with results done in the United States within the past six months. Failure to complete the TB screening requirement will prevent students from registering for future semesters. For more information, please read the TB screening section at studentaffairs.unt.edu/student-health-and-wellness-center/services/international-students.

Student services, activities and information

Athletic organizations and activities

Intercollegiate Athletics and Recreational Sports at UNT offer a wide range of opportunities for recreation. Accessible sports facilities include the Pohl Recreation Center with two swimming pools, four gymnasiums, an indoor soccer court, 45-foot tall

climbing wall, weight room and cardio area, 1/8 mile indoor track, group fitness rooms, Smoothie King and lounge area. The Waranch Tennis Complex has 12 lighted tennis courts.

North Texas Athletics

North Texas Athletics is a vital component of university life. The Mean Green athletics programs provide a rallying point for fans, friends and, most importantly, students of the University of North Texas. A student's collegiate experience would not be complete without having enjoyed the opportunity to: tailgate with friends and family; stand and cheer on the Mean Green as they take the field or court prior to competition; and sing "Glory to the Green" immediately following the conclusion of an athletic event.

Mean Green Athletics strives to be a university partner and works diligently with multiple aspects of the university in order to enhance students' participation and enjoyment of the collegiate experience. Students are admitted free to all athletic events with a valid student ID.

The University of North Texas competes at the Division 1 level of the National Collegiate Athletic Association and is a member of the American Athletic Conference. The university is represented by athletic teams in the following sports: men's and women's basketball, men's and women's cross country and track and field, football, men's and women's golf, women's soccer, softball, women's swimming and diving, women's tennis, and women's volleyball. North Texas Athletics resides in the 46,000-square-foot Athletics Center, which houses administrative offices, a football locker room, team meeting rooms, strength and conditioning facilities, and sports medicine facilities.

DATCU Stadium provides amenities that attract today's fans looking for the ultimate game-day experience, including 21 luxury suites, club level with chair back seating, giant video screens, unique concessions options and generous tailgating and staging areas. And in accordance with UNT's commitment to create a sustainable campus, strict Leadership in Energy and Environmental Design (LEED) standards were followed in making this the nation's first collegiate football stadium to earn platinum certification from the U.S. Green Building Council.

Mean Green athletics teams have captured numerous Conference championships as well as receiving national recognition by making recent appearances in postseason football bowl games and NCAA postseason championship tournaments for basketball, golf, soccer, softball and track and field. The 2020-21 men's basketball team became the first team in the history of the school to win an NCAA tournament game when it defeated Purdue in the first round of March Madness.

Career Center

Within the Career Center, **Student Employment (SE)** assists students in their job search by providing employment opportunities both on- and off-campus year-round. Degree-seeking students who have been accepted to UNT and are currently enrolled or who have been enrolled within the previous year are eligible to access student employment services. The Career Center assists students in identifying local jobs on or off campus. Students with a preference working off-campus will find numerous opportunities in the Dallas–Fort Worth region posted through the Career Center. Some on-campus jobs may include:

- Food Services Worker, Barista, or Delivery Driver
- Rec Sports – Referee, Lifeguard or Coordinator
- Computer Lab Assistant, Tech Support or Library Assistant
- Office Assistant
- Research Assistant
- Graphic Designer
- Tutor, Grader or Academic Assistant
- Resident Assistant
- Intern

If students choose to work on campus, we recommend scheduling classes to have three to four hours available during the day. This allows students to work up to 20 hours a week for international students and 25 hours for students with US citizenship per week. Some departments are flexible with schedules, but others may prefer a set schedule.

On- and off-campus job openings are advertised on Handshake, which is available to all students, or by visiting careercenter.unt.edu. Once a student is hired for an on-campus position, the student is required to complete an online student employment orientation. The student's supervisor may also request the student to attend a training offered through the Career Center.

The Student Employment is also available to support student workers and supervisors with customer service training, student employment policies, and communications and conflict assistance.

Students may receive more information about Student Employment, as well as learn how to log into Handshake by calling 940-565-2105 Monday through Friday, between 8 a.m. and 5 p.m. or by visiting the Career Center in Sage Hall, Suite 202. Drop-In hours for I-9 appointments are held 11 a.m.-4 a.m. Monday-Friday in Sage Hall, Suite 202.

The **Career Center** provides the following services to students in all degree programs and at every degree level: undergraduate, master's and doctoral. UNT graduates also have free lifetime access to career services.

In-class presentations and guest lectures are offered on career-related topics, including "Internship and Job Search Strategies" "Cover Letter and Resume Writing," "Interviewing Skills," "Using Social Media in Your Job Search," "Networking and Pitches," and "What Can I Do with a Major In ...?"

Career planning and job search resources can be found at careercenter.unt.edu. These resources assist students and alumni in assessing their career interests, exploring career options, and accessing relevant information for making career, internship, and graduate school planning-related decisions.

Career Coaches are assigned by major and assist students and alumni in career exploration and research, resume writing, interview preparations, career transitions and general job and internship search strategies through individual advising.

A web-based career service contains current job, internship, and student employment vacancy announcements from UNT-friendly employers. Students and alumni must formally register on Handshake to utilize this service.

More than 1330 employers come to UNT each year to conduct on-campus employee recruiting and on-campus interviews. The Career Center links student and alumni job seekers with hiring professionals. Registration for on-campus interviewing is required through Handshake.

All services and resources the Career Center offers are provided at no cost to students and alumni.

Visit the Career Center in Sage Hall, Suite 202 and connect with your College Career Coach through Navigate.

The Center for Leadership and Service

The Center for Leadership and Service provides opportunities and programs to assist students in becoming engaged leaders in the community. Programs include leadership workshops and conferences, short-and long-term service programs, and opportunities for students to engage in leadership positions on campus. The Center for Leadership and Service is located in the Union, Third Floor. For more information call 940-565-3021.

The Coliseum

The Coliseum is a multipurpose facility with accommodations for center arena events (9,797), theater presentations (3,400–5,200), banquets (1,100), concerts (3,400–8,200), commencements, athletic events, workshops, dances, camps and competitions. For information regarding Coliseum reservations, contact the Coliseum/Gateway Center scheduling office at 940-565-2557.

Counseling and Testing Services

The center provides short-term, confidential, professional psychological services to currently enrolled students. Individual counseling related to personal, social and emotional concerns and vocational counseling for help with selection of a major field of

study or career plan, are offered at the center. Outreach programs and consultation are available for faculty/staff and student groups.

Counseling and Testing's group program includes both workshops as well as group therapy. Daily workshops are designed to increase students' coping skills in a safe space, and a student can drop into any of our workshops that fit their needs. Additionally, therapy groups provide students an opportunity to obtain support from both clinicians and other students, regarding a variety of mental health topics. In order to join a group, students must contact CTS for an individual appointment.

Counseling and Testing Services also includes a national testing center, where various professional and academic tests are administered (e.g., TSI, CLEP, Pearson Vue exams, Measure Learning exams, TCFP/FIDO, and other proctored, paper-based and computer-based exams).

The Counseling center is in Chestnut Hall, Room 313, or call 940-565-2741; or email studentaffairs.unt.edu/counseling-and-testing-services/student-counseling/index.html.

Professional and Academic Testing is located in Gateway Center, Room 140, or call 940-369-7617; or visit studentaffairs.unt.edu/testing-services.

Dean of Students

deanofstudents.unt.edu

The Dean of Students Office fosters the development of leadership, civility, accountability, and responsibility in the University of North Texas student; builds community through service and involvement; and serves as an advocate for all students. This office is dedicated to supporting the UNT student who may need assistance in resolving complex social, personal, financial and academic matters. We strive to help all students achieve their academic and personal goals and enhance the UNT student experience.

One of the primary aspects of the Dean of Students Office is to help students resolve complex personal issues that may impact them in the classroom. We can assist students with pregnancy and parenting accommodations, military activation of enrolled students, absences due to temporary disabilities and a variety of other issues that may arise that impact a student's ability to be successful in the classroom.

Student Conduct: The Dean of Students (DOS) is responsible for addressing student conduct, enforcing university policies and procedures, and providing students with the resources necessary to resolve their own personal disputes. DOS administers student disciplinary procedures in accordance with the Code of Student Conduct and maintains official disciplinary records. However, emphasis is placed on educating students about their rights and responsibilities as members of the University of North Texas community. In addition, DOS seeks to educate the campus community through literature and training about the services it offers. The office provides policy interpretation and rights adjustment as well as handling complaints against students. DOS is committed to enhancing students' competencies as productive citizens and promoting life-long learning and community standards. Any member of the UNT Community can report alleged student misconduct at report.unt.edu.

The University of North Texas is committed to providing a safe environment for all community members. Dating violence, domestic violence, sexual harassment, sexual coercion, sexual exploitation, sexual violence, and stalking are prohibited. Please see studentaffairs.unt.edu/dean-of-students/policies/sexual-misconduct.html.

By Texas law UNT employees are mandated to report sexual misconduct, sexual assault, dating violence and stalking to the Title IX Coordinator or the Deputy Title IX Coordinator if they witnessed or information received while in the course and scope of their employment; that the employee reasonably believes constitutes an incident of sexual harassment, sexual assault, dating violence, or stalking; committed by or against a student who was enrolled at the institution at the time of the incident; an employee employed by the institution at the time of the incident. Reports can be made to report.unt.edu or to TitleIX@unt.edu.

The UNT Title IX office is located in Hurley Administration Building, Suite 175. The Title IX Coordinator is LaToya Haynes, available at LaToya.Haynes@unt.edu or 940-565-2759.

Survivor Advocacy: The UNT Survivor Advocate's role is to connect students who have been impacted by violence to resources (counseling, health, safety, academics, legal, etc.), and act as their advocate. The Survivor Advocate can assist a student by filing protective orders, completing crime victim's compensation applications, contacting professors for absences, working with housing to facilitate a room change (if needed), and connecting students to the many other resources that are available, both on and off campus. You can contact them at survivoradvocate@unt.edu, at 940-565-2648 or by visiting Union 409.

Student Withdrawals: The Dean of Students Office is committed to helping students when they intend to withdraw for the semester. Students wishing to withdraw connect with the Dean of Students Office during office hours. During their interaction with a staff member, students will be asked to complete the official University Withdrawal paperwork as well receive information regarding implications related to their withdrawal. Students will also be informed of any obligations they may have with the university and items they may need to fulfill prior to withdrawing and/or upon returning to UNT.

Students may only withdraw from the first class day until the official last day to withdraw as indicated in the 2025-26 Academic calendar. Please note that a withdrawal implies dropping ALL courses. Students wishing to drop classes but who will remain enrolled in at least one course can obtain the Request to Drop Class form from the Registrar's Office or do so through their my.unt.edu portal.

If by chance a student is incapacitated and the student cannot make the request on their own, the Dean of Students Office will assist. Verified documentation related to their condition will be required. For more information, please contact the Dean of Students Office directly.

Student Complaints: The Student Standard Complaint Policy of the University of North Texas provides students with a procedure for resolving complaints against UNT faculty, staff, and agents of the university. Students with questions concerning discrimination, grade appeal, academic integrity, disability, financial aid, accommodations, or the Code of Student Conduct must contact the appropriate academic personnel or compliance officer and refer to the appropriate policies. Students can file complaints at report.unt.edu.

The Dean of Students Office will assist the student throughout the complaint process. UNT believes that most complaints can be resolved informally. All university contacts with the aggrieved student will stress the preferred mechanism of an informal resolution. A complaint filed, either formally or informally, will not be considered unless it is filed no later than 120 days after the event or occurrence giving rise to the complaint or knowledge of the event or occurrence. A student's complaint may be withdrawn at any point by the student, thereby halting the complaint.

Academic Advocacy: Students are expected to attend classes regularly and to abide by the attendance policy established by the professor. However, the university is aware that there will be times when a student is unable to attend class due to emergency situations, health, or the death of a loved one. The Dean of Students Office is also available to assist you by providing academic advocacy. Students must provide the Dean of Students with official and verifiable documentation related to the reason for absence. Ultimately, attendance is a matter between the student and the professor.

Authorized Class Absences/ Field Trips: All travel by students off the campus for the purpose of participation in athletics, music groups, AFROTC activity, dramatics, exhibitions, debate, student government, conventions and field trips must be authorized by the dean of the school or college of the sponsoring department. Absence lists must be approved by the department chair and sent to the office of the dean in advance of the travel date. Sponsors must report to the Dean of Students Office all students listed who did not make the trip.

Within three days after the absence, students must obtain authorized absence cards from the Dean of Students Office for presentation to instructors of classes missed. Students with authorized absence cards may make up the work missed when practicable or be given special allowance so that they are not penalized for the absence. Additional information regarding Authorized Class Absences may be found in the Faculty Handbook.

Military Activation of Enrolled Students: The University of North Texas is deeply committed to supporting students who serve in the military. A student who is a member of the National Guard, Reserve or other branch of the United States Armed Forces and is unable to complete classes because of military activation or required military training may request course withdrawals, incompletes, or grades, depending on the timing of the activation and the individual needs of the students. This will ensure understanding and standardized guidelines for awarding grades to students called to active military duty or training during an academic semester.

The student will be required to provide documentation of military orders to the Dean of Students Office and follow procedures for withdrawal. This will ensure understanding and standardized guidelines for awarding grades to students called to active military duty during an academic semester. Dean of Students will meet with the student to discuss options and consider all areas that affect the student upon withdrawal. If incompletes or grades are requested, the student will be referred to the faculty member or academic department for assistance. The Dean of Students will send notification to faculty, academic department, and Associate Dean of the verification of military orders and student's preference for incomplete or grade assigned.

Per Texas Education Code 54.0006 (f) 3, either grades are assigned or incompletes granted. If a student receives an incomplete, they will have one year from the end of their active duty to complete the course. The Dean of Students office will complete the official withdrawal of the student and full refund of appropriate tuition and fees. If student opts for an incomplete or grades are assigned, no refund will be given.

Pregnant and Parenting Students: Title IX of the Education Amendments of 1972 ("Title IX"), 20 U.S.C. §1681 *et seq.*, is a Federal civil rights law that prohibits discrimination on the basis of sex—including pregnancy and parental status—in educational programs and activities. All public and private schools, school districts, colleges, and universities receiving any Federal funds ("schools") must comply with Title IX. Students can request pregnancy and/or parenting accommodations at report.unt.edu

The requirements and suggestions include:

Schools must excuse student's absences because of pregnancy or childbirth for as long as the student's doctor deems the absences medically necessary.

Absence policies in classes must accommodate pregnancy or childbirth related absences and allow for make-up work. "A teacher may not refuse to allow a student to submit work after a deadline that she missed because of absences due to pregnancy or childbirth. Additionally, if a teacher's grading is based in part on class attendance or participation, the student should be allowed to earn the credits she missed so that she can be reinstated to the status she had before the leave."

"A school may offer the student alternatives to making up missed work, such as retaking a semester, taking part in an online course credit recovery program, or allowing the student additional time in a program to continue at the same pace and finish at a later date, especially after longer periods of leave. The student should be allowed to choose how to make up the work."

Professors must accommodate these absences and allow for makeup work. Students needing assistance with accommodations related to pregnancy and parenting should contact the Dean of Students Office.

Temporary Disabilities: Temporary disabilities are not afforded the same consideration for accommodation and/or waivers that is provided under federal law for permanent disabilities. However, the Dean of Students Office can act as an advocate for students dealing with temporary disabilities. If a student has a temporary disability (i.e., broken leg, broken arm, etc.) and needs accommodation, they may contact the Dean of Students Office and request we advocate on their behalf. Student must submit proper documentation to the office. Upon receipt and verification, DOS will contact the student's professors confirming that the temporary disability exists. Ultimately, it is up to each individual instructor to make any accommodations pertaining to temporary disabilities.

CARE Team: The University of North Texas cares about our students' success, not only academically, but emotionally and physically as well. This commitment to the holistic development and well-being of our students is the fuel behind the hundreds of departments, services and resources across campus that seek to respond to their unique needs. Nevertheless, students do not always ask for help when they need it. In an effort to identify those students proactively, UNT has created a campus wide network of professionals who are committed to caring and responding to the unspoken needs of students. The CARE Team ensures a confidential program of identification, intervention, and response in order to provide our students with the greatest chance of success and our community with the greatest level of protection.

Questions or concerns for the CARE Team regarding a student or an incident can be directed to careteam@unt.edu or deanofstudents@unt.edu. Referrals for the CARE team can be made through our web site at report.unt.edu.

Student Death: The Dean of Students Office is the main point of contact in the case of a student death. The dean's staff will notify all appropriate people and departments on campus. Information needed is the student's full name and the contact name and number for the student's family. A staff member will be identified by the Dean of Students to make direct contact with the family

and serve as the university liaison to assist the family as needed. The names of the student's friends should be forwarded to the Dean of Students for the purpose of outreach to those affected by the death of their friend and fellow student.

The Dean of Students Office organizes an annual Fallen Eagles memorial, an event where we recognize the students who have passed away over the past year. All family members of those who will be honored are welcome and encouraged to attend the memorial. Please contact the Dean of Students at deanofstudents@unt.edu or by calling 940-565-2648; or visit us on the web at deanofstudents.unt.edu.

Free Speech

The University of North Texas (UNT) recognizes that freedom of expression and public assembly are fundamental rights of all persons and are essential components of the education process. These activities promote debate and the sharing of ideas, which are the foundation of educational institutions.

The responsibility of the University to operate and maintain an effective and efficient institution of higher education requires regulation of the time, place and manner of assembly, speech, and other expressive activities on the grounds of the University. In keeping with this responsibility, students, faculty, staff and visitors are free to exercise the rights to assemble and engage in expressive activity in a constitutionally-protected manner subject only to the content-neutral regulations necessary to fulfill the mission and obligations of the University; preserve the rights of others, coordinate multiple uses of limited space; assure preservation of the campus facilities and grounds; and assure financial accountability for any damage caused by these activities.

The UNT Free Speech policy can be found at policy.unt.edu/policy/07-006.

Annual Security and Fire Safety Report

The personal safety and security of every member of the university community is of paramount concern to all at the University of North Texas. In keeping with this concern, each year the university publishes the Annual Security and Fire Safety Report informing the campus about programs and services to enhance campus security, crime statistics, fire safety, fire statistics, and student disciplinary referrals for certain crime-related conduct. The Annual Security and Fire Safety Report is available at clery.unt.edu.

The following notification is mandated by Texas Education Code Sec. 51.219.

Notification of Penalty for False Alarm or Report

A person commits an offense if he knowingly initiates, communicates, or circulates a report of a present, past, or future bombing, fire, offense, or another emergency that he knows is false or baseless and that would ordinarily:

- (1) cause action by an official or volunteer agency organized to deal with emergencies;
- (2) place a person in fear of imminent serious bodily injury; or
- (3) prevent or interrupt the occupation of a building, room, place of assembly, place to which the public has access, or aircraft, automobile, or other mode of conveyance.

An offense under this section is a Class A misdemeanor unless the false report is of an emergency involving a public or private institution of higher education or involving a public primary or secondary school, public communication, public transportation, public water, gas or power supply or other public service, in which event the offense is a state jail felony.

A false threat can be communicated through any means (e-mail, phone, in writing, verbally, social media, etc.). An individual adjudged guilty of a state jail felony shall be punished by confinement in a state jail for any term of not more than two years or less than 180 days and, in addition to confinement, may be punished by a fine not to exceed \$10,000.

UNT students should be aware that the State of Texas takes these threats seriously, and the legal consequences, which are severe, go beyond anything that the University's Code of Student Conduct will address.

Hazing

The university wants to take this opportunity to inform the university community about the dangers and consequences of hazing.

Hazing is a criminal act under the state law of Texas.

By definition, hazing is any intentional, knowing, or reckless act by one person alone or acting with others, directed against a student, that endangers the mental or physical health or safety of a student for the purpose of pledging, being initiated into, affiliating with, holding office in or maintaining membership in an organization" whose members are or include UNT students.

Examples of hazing include but are not limited to:

- Any type of physical brutality, such as whipping, beating, striking, branding, electronic shocking, placing a harmful substance on the body, or similar activity.
- Any type of physical activity such as sleep deprivation, exposure to the elements, confinement in a small space, calisthenics or other activity that subjects the student to an unreasonable risk of harm or that adversely affects the mental or physical health or safety of the student.
- Any activity involving consumption of alcoholic beverages, liquor, drugs, food, liquid, or any other substance that exposes a student to unreasonable risk of harm or that adversely affects the mental or physical health or safety of the student.
- Any activity that intimidates or threatens a student with ostracism or that subjects the student to extreme mental stress, shame or humiliation that adversely affects the mental health or dignity of the student or discourages the student from entering or remaining registered at UNT, or that may reasonably be expected to cause the student to leave the organization or UNT rather than submit to hazing whether the act is committed in person or communicated by other media including social networking.
- Any activity that induces, causes, or requires a student to perform a duty or task that involves a violation of the Code of Student Conduct; other university policies; or local, state or federal laws.

Hazing occurs regardless of whether the act is committed on or off the university campus and regardless of whether the student victim may have consented to or acquiesced in the activity.

A person engages in hazing not only by directly engaging in hazing activity, but also by soliciting, directing, encouraging, directing, aiding or attempting to aid another in hazing; or by recklessly allowing hazing to occur; or by knowingly failing to report firsthand knowledge that a specific hazing incident is planned or has occurred; any person reporting a specific hazing incident involving a student to the dean of students or other appropriate university official is immune from civil or criminal liability that might otherwise be incurred as a result of the report.

Penalties for Hazing

UNT will discipline any student or student group found responsible for hazing. Sanctions for students found responsible for hazing can include probation, loss of privileges, suspension, or expulsion. Sanctions for student groups can include probation, loss of privilege, and suspension. Students and student groups can also be assigned educational sanction designed to change behavior and reduce the risk of future misconduct.

When hazing happens within a student group, UNT may find both the student group and individual students responsible. A student group can be found responsible if it condones or encourages hazing, or if its officers, members, or alumni commit or assist in the commission of hazing. Those found responsible for hazing will be listed on the UNT Hazing Violations website in accordance with the Texas Education Code, sections 37.151 (5) and (6).

Students may be prosecuted for committing an act of hazing or for failing to report first-hand knowledge of hazing.

Incidents or planned incidents of hazing must be reported in writing to any one of the following:

- Dean of Students Office, 940-565-2648 or 940-565-2039
- UNT Police Department, 940-565-3000
- UNT Hazing Hotline, 940-369-STOP (7867)
- Report.unt.edu

Amnesty: The university may elect not to pursue disciplinary sanctions for a violation of this policy against persons who voluntarily and in good faith provide information to the Dean of Students or an appropriate university official related to hazing.

The UNT Hazing policy can be found at policy.unt.edu/policy/07-013.

Dining Services

It's About the Food. UNT Dining Services serves up affordable great-tasting food, made fresh daily from whole ingredients in our on-campus kitchens. With our 20+ Retail Restaurants, five all-you-care-to-eat Dining Halls, upscale restaurant Avesta, Clark Bakery, hydroponic garden and Catering, you're never far from a great meal. Our award-winning food service program has been ranked No. 1 in Texas by Niche.com for the past three years. We are also a part of the health and sustainability-focused Menus of Change University Research Collaborative. Learn more and find hours of operation — including late-night and weekend options — at dining.unt.edu, 940-565-2462 or dining@unt.edu.

Interested in a job with delicious food and flexible scheduling? Dining Services provides résumé-building job opportunities to more than 1,000 student employees, and no experience is required. Apply today at dining.unt.edu/jobs.

Meal Plans for On-campus Living

All freshman residence hall rooms and select upperclassman rooms are bundled with an Everyday Unlimited or Weekday Unlimited Meal Plan. These Plans include unlimited meals in any of our five Dining Halls as well as Flex to use at your favorite on-campus retail locations, including The Market at Eagle Landing, Chick-fil-A, Einstein Bros. Bagels, The Campus Chat Food Court and more. Choose your Plan when you apply for housing or purchase online at dining.unt.edu/plans.

Meal Plans for Off-campus Living

Students living off campus can save big by purchasing a Meal Plan designed specifically for your commuter lifestyle. Preparing your own hearty meals can be costly in time and money. Our Plans allow you to supplement or completely replace your home cooking with convenient, freshly-prepared meals on campus. We do the hard work of cooking and cleaning so you can focus on your university experience.

There's a Plan for every appetite and budget, whether you want to enjoy our Dining Halls, retail locations or both. Meal Plan purchases are routed through your MyUNT account for payment with financial aid, scholarships, installments and other methods. Pay all at once, or break it into several payments through the semester. Find the right Meal Plan for you at dining.unt.edu/plans.

Office of Disability Access

The Office of Disability Access (ODA) is the campus resource for students who qualify for disability accommodations as defined by the Rehabilitation Act of 1973 and the Americans with Disabilities Act (ADA) of 1990 as Amended. Part of the mission of the ODA is to provide reasonable accommodations and auxiliary aids to eligible students and assist with the resolution of student disability-related access barriers. In order to reduce or remove disability-related barriers on campus, ODA works with faculty and campus partners to facilitate accommodations and services. Students who are approved for accommodations are responsible for requesting a Letter of Accommodation, which is generated on ODA letter-head, be sent to their instructor by the ODA.

ODA staff members are available to counsel and advise students regarding disability related matters and can assist in devising academic success strategies, including referral to other campus and community services. ODA arranges classroom auxiliary aids such as sign language interpreters, Computer Aided Real Time Transcriptionists (CART), textbooks in alternative accessible formats, and various forms of adaptive equipment and technologies. ODA also houses an accommodating Testing Center for the administration of accommodated course examinations and works closely with academic departments and course instructors in making such arrangements.

The Office of Disability Access also works with campus partners to support students with disabilities in having access to all services and programs at UNT.

For more information, call 940-565-4323, visit Chestnut Hall, Suite 102; or go to studentaffairs.unt.edu/office-disability-access.

Distance Education (web-based and digital communication)

The University of North Texas offers a selection of undergraduate and graduate courses, degree programs, and certificate programs via distance education, primarily through the web. Most 100% web-based courses can be taken from any location worldwide that has Internet access and the appropriate computer equipment available. Visit online.unt.edu to see current 100% Online and Hybrid programs.

Distinguished Lecture Series

The UNT Distinguished Lecture Series was organized and chartered as a university wide program in 2004 with the assistance of the UNT Student Government Association and the Division of Student Affairs. The series is administered by a committee composed of students, faculty and staff, with a student member serving as chairperson. The objective of the series is to provide the university and greater communities with a variety of distinguished, world-class lecturers and speakers who will bring significant interest, visibility and added prestige to UNT. The series is dedicated to complement the educational process and to add significantly to the quality of life for the university community and communities of the Dallas–Fort Worth region. Programs have featured President George W. Bush, anthropologist and author Jane Goodall, former Secretary of State Condoleezza Rice, financial planner Suze Orman, activist Cornel West, former Mexican President Vicente Fox, TV scientist Bill Nye, environmentalist Robert F. Kennedy Jr., actress Keke Palmer and Jennette McCurdy, and more. For more information, visit studentaffairs.unt.edu/dls.

Eagle Ambassadors

The UNT Eagle Ambassadors are a group of outstanding students with various majors and backgrounds, who are selected to provide a student perspective about our university through campus tours. They introduce thousands of prospective students and visitors to the University of North Texas annually and are known for their friendliness, genuine love for UNT and excellent customer service.

Being an Eagle Ambassador is a prestigious honor and a unique chance for personal and professional growth. Students chosen to be part of this elite group receive value training and experience, making them more marketable for today's workforce. In addition to monetary compensation and scholarship opportunity, Eagle Ambassadors participate in special events with the Office of the President, Enrollment and Advancement.

Eagle Alert

Eagle Alert is an automated system that allows UNT administrators to notify the campus community by phone in the event of an emergency. Eagle Alert sends voice and text messages to phones of everyone with an active EUID account who has registered with the system.

All students, faculty and staff are automatically enrolled in the Eagle Alert system using the telephone numbers provided to UNT during the registration or hiring process.

You should check your contact information regularly and update it as soon as it changes by logging in at my.unt.edu and following the "Update your information" link under the Eagle Alert banner. For more information on UNT Eagle Alert, visit www.unt.edu/eaglealert.

Early Alert Response System

The UNT Early Alert Response System seeks to ensure that every student has knowledge of and access to all available campus resources. Our office maintains and monitors the Early Alert Response System, and through this system we identify struggling students and connect them with appropriate on- and off-campus resources.

It is the mission of the Early Alert Program to facilitate campus-wide collaboration through the Early Alert Response System in an effort to increase student retention and persistence by identifying struggling students and actively provide a link to academic support services, advising, and campus referrals in a timely way.

Facilities use policy

The term *facilities* describes all structures on the campus or otherwise under the control of the university. Use of such facilities is governed by the university's "Facilities Use" policy and "Off-Campus Speakers" policy. Requests may be made through the University Union Event Planning and Scheduling Services One Stop Shop at 940-565-3804.

Student organizations wishing to reserve facilities should contact the Student Activities Center, University Union Suite 345, 940-565-3807.

Fine Arts Series

Established in 1903, the Mary Jo and V. Lane Rawlins Fine Arts Series provides a wide variety of visual, performing, and literary arts events for both the university and the greater Denton community. The series is overseen by a committee comprised of students, faculty, and staff who ensure educational and entertaining opportunities are available throughout the year.

All Fine Arts Series events are offered at no cost to UNT students. Faculty and staff can enjoy admission at a discounted rate. For further details, please contact 940-565-3825 or visit fineartsseries.unt.edu.

Gateway Center

The Gateway Center is a multipurpose facility housing class and conference rooms, the Club at Gateway Center, offices for General Counsel, the Office of Development, the UNT Alumni Association, the UNT Foundation Inc., and a banquet facility which caters to both on-and off-campus events. For banquet/conference scheduling, reservations and pricing, call the Coliseum/Gateway Center scheduling office at 940-565-2557.

Graduate Student Council

The Graduate Student Council assures formal avenues of communication between representatives of the graduate student body and both the dean of the graduate school and the Graduate Council. It serves as an advisory council to facilitate an interchange of views and information between these groups. Two members of the Graduate Student Council are elected annually to serve as non-voting members of the Graduate Council. For additional information, contact the Toulouse Graduate School or visit tgs.unt.edu/gsc.

Student Health and Wellness Center

The Student Health and Wellness Center (SHWC), located on the second floor of Chestnut Hall, is equipped with examination and treatment rooms, as well as a clinical laboratory and digital x-ray machine. Medical services are available to enrolled students paying the medical service fee. Medical care is not available on official university holidays. The SHWC operates on an appointment system. Call 940-565-2333 or go online to myosh.unt.edu to make an appointment. Forms, hours, and additional information are available online at healthcenter.unt.edu.

Services available to students include routine visits for injuries and illness, as well as monitoring of chronic conditions. Charges are assessed for office visits, supplies for procedures and treatments, laboratory testing, vaccinations, allergy injections, and most other services. Specialty services include psychiatric services, dietitian consultations, travel medicine consultations, and gynecological services. The SHWC accepts most major insurance plans and will file claims on behalf of the patient. The SHWC must have prior parental consent on file to treat patients under 18 years of age. Anyone with a complex medical condition is urged to meet with a medical provider to review their medical history within the first few weeks of attending UNT.

Allergy injections can be administered at the SHWC. Patients must have allergy serum and orders from their outside allergist prior to receiving allergy injections in the clinic. For more information, please visit our website.

If you are having a medical emergency, call 911. If a student needs medical care when the SHWC is closed, they can check the SHWC website for available options. Students enrolled in the student insurance plan may use a 24-hour Telehealth Line listed in their insurance benefits. Students enrolled in other health insurance should consult their carrier for medical advice options. All students may call Parkland's Nurse Call Line at 214-266-8777 free of charge.

Medical information is confidential and is not provided to others without a release signed by the patient. If a parent or guardian requests information on a patient under 18 years of age, the SHWC provides the information as allowed under the law.

Dental, optical, chiropractic, and massage services are available for UNT students and their families through contracted partnerships. These services are not covered by student fees, but can be covered under some insurance policies. Please contact the UNT Dental Office at 940-273-2184, College Optical Express at 940-369-7441, L-Evated Chiropractic at 940-323-2335, and Massage Therapy at 940-565-2787 for pricing, information on services, and other questions.

The Office of Health Promotion (OHP) provides individual health education and outreach programs for students and campus groups, as well as special programs to address specific health needs. Visit our website for information about services and programs. Contact the OHP at 940-565-2787 to request information or schedule a program. Wellness consultations are provided from a certified health education specialist.

The SHWC recommends that all students have current immunizations for diphtheria, pertussis, tetanus, rubella, mumps, measles and hepatitis B. Effective October 1, 2013, a bacterial meningitis vaccination is required by Texas state law for any new or transfer student under the age of 22 who is attending UNT for the first time, or for any returning students who have not been continuously enrolled for the previous long semester. Additional information on this requirement, including forms and the submission process, is available at www.healthcenter.unt.edu/immunization-requirements. The SHWC recommends that all UNT students consider receiving the bacterial meningitis vaccination, even if not required by state law.

Health insurance program

A group student health insurance plan is offered for students enrolled at UNT. Interested students can enroll online at <https://unt.myahpcare.com>.

International students should refer to "International Student Health Insurance Requirement" elsewhere in this section.

Homecoming

Each fall, Homecoming activities offer a full week of events sponsored by various campus departments and student organizations. Annual events include a picnic, bonfire, and tailgating before the football game. Additionally, departmental receptions and student organization gatherings welcome alumni and friends returning to the campus.

For more information, contact Student Activities in the University Union, Room 345; follow on Instagram or Facebook (@UNThomecoming); visit homecoming.unt.edu; or call 940-565-3807.

UNT Scholars Day

The purpose of Scholars Day is to celebrate the work of undergraduate researchers at UNT. Students do not need to be members of the Honors College to present. Undergraduate students are invited to submit abstracts for a poster or paper based on original research or artist statement for creative work conducted under the guidance of a faculty mentor at UNT during the past academic year.

Housing

All unmarried undergraduate students who have graduated from high school the semester prior to enrolling at UNT, who have completed fewer than 30 semester hours of university work (pre-college hours not included) and who enroll for 12 or more hours are required to reside in university-operated residence halls under a contractual room and board plan as long as space is available. Exemption may be granted by the director of housing in accordance with an established policy statement, which is available from the Department of Housing and Residence Life.

Residence halls

The University of North Texas' 15 residence halls provide students with a wide range of living environments. All halls have rooms specifically modified to meet ADA accommodation requests and offer a variety of learning opportunities.

Hall guidelines are set forth in the *Housing Handbook*, which is available at housing.unt.edu. It is a student's responsibility to be familiar with these regulations.

Residence hall applications

The Housing application, available online at housing.unt.edu must be accompanied by an administrative application fee and a prepayment in order to receive a room assignment. Room assignments are made primarily on the basis of the priority for first-year students who are required to live on campus. The online application includes a digitally acknowledged Housing License Agreement. A person who is not accepted to UNT must contact the Housing Assignment Office within 10 days- to receive a full application payment refund. For those accepted to UNT but electing not to attend, a schedule of application payment refund dates can be found in the terms and conditions of the Housing License Agreement.

For those accepted and attending UNT, there is a 10-business-day period after completing the contract in which to cancel for a full refund. Cancellation of an application beyond 10 days after completion can be subject to a loss of application payment and \$500 termination fee upon cancellation.

Students that move into on-campus housing are expected to complete the full term of the application period. Termination of housing after move-in is subject to terms outlined in the Housing License Agreement.

Room and board rates are subject to approval by the Board of Regents. A list of current rates is available online. For housing information, write to University of North Texas, Housing Department, 1155 Union Circle #311310, Denton, TX 76203-5017 or by e-mail to housinginfo@unt.edu. The housing application is available by accessing the eHousing portal through the Housing web site—housing.unt.edu.

Persons not admitted to UNT – If Student is denied admission to UNT, Student must notify the Housing Assignments Office within 10 days of receiving notice of denied admission to receive full refund of all charges and fees paid to UNT, including the Housing Application Fee and the Housing Fee Pre-Payment.

Persons admitted but electing not to attend UNT – If Student is admitted to UNT but elects not to attend, Student may submit a written request to the Housing Assignments Office prior to July 1 to terminate this Agreement and request full refund of the Housing Fee Pre-payment. Housing Application Fee will not be refunded. Written requests received after July 1 will result in refunds as follows:

Fall July 2 – July 15 \$300

July 16 – August 1 \$200

August 2 – move in \$100

Spring On or before December 15 Housing Fee Pre-Payment

UNT students electing not to reside in residence hall – If Student elects to terminate this Agreement prior to this Agreement term and is permitted to do so in accordance with UNT Housing Policy 07.008, Student must submit written notice of Agreement termination to the Housing Assignments Office within 10 business days of submitting the Housing Application Fee and Housing

Fee Pre-Payment to receive a full refund. Termination of the Agreement after 10 days is subject to a \$500 termination fee in addition to the loss of Application Fee and Prepayment.

Off-campus housing

Students who are not required to live in university housing under the terms of the housing policy may live where they choose. The university does not assume any responsibility in off-campus housing arrangements but does support the federal housing policies that housing owners not discriminate because of race, color, sex, age, religion, disability, veteran status or national origin.

Learning Center

Location: Sage Hall, Suite 170
Phone: 940-565-7006
Fax: 940-369-8394
Web site: learningcenter.unt.edu

The Learning Center (LC) was created to supplement and support academic excellence and life-long learning. A wide range of individual, group and self-help programs and materials are provided to maximize the academic potential of all University of North Texas students. Programs and services housed within the center include GRE course prep help, tutoring (one-on-one and online), Supplemental Instruction, Academic Coaching, academic-based workshops, Graduate Student Services and the Academic Resource. For additional information see learningcenter.unt.edu.

Living Learning Communities

Location: Welcome Center, 1417 Maple Street
Phone: 940-565-2610
Web site: housing.unt.edu/livinglearning

Living Learning Communities at the University of North Texas offer students the opportunity to live together to succeed based upon majors, general areas of study, and general interests. Living Learning Communities include Academic and Themed Communities:

Center for Belonging and Engagement

Location: University Union, Room 335
Phone: 940-565-3424
Web site: <https://belong.unt.edu>

The Center for Belonging and Engagement is committed to cultivating a campus environment where people of all identities and experiences are appreciated and able to thrive. Engagement in the Center's programs and services seek to increase the awareness and understanding of underserved student populations in the UNT community, promote a sense of belonging, and ensure their success.

UNT Alumni Association

The mission of the UNT Alumni Association is to foster a lifelong spirit of belonging and pride by connecting alumni and friends to the University of North Texas and each other. This organization creates networking and engagement opportunities for alumni in every stage of life. It also operates a Student Alumni Association and offers scholarships to support UNT students and build a strong alumni legacy. For more information, visit UNTalumni.com or call 940-565-2834.

Lifelong Learning and Community Engagement

Lifelong Learning and Community Engagement (LLCE) provides the administrative structure for lifelong learning programs that meet the needs of the 50 and better community and programming for UNT's retirees

Lifelong learning and community engagement programs are offered year round through LLCE. Programming includes classes, events, trips, special lectures, and activities.

Programs include the Osher Lifelong Learning Institute at UNT (OLLI at UNT, formerly Emeritus College), and the UNT Retiree Association (UNTRA). OLLI at UNT offers non-credit classes and activities for adults 50 and older. The UNT Retiree Association offers engagement opportunities, events, and activities for UNT's retirees.

Lifelong Learning and Community Engagement is located at 1500 N. Interstate 35 Denton, TX in the Support and Services Building (SSB). For additional information, call 940-369-7293, visit the website at untra.unt.edu or olli.unt.edu, or write the director, 1155 Union Circle #310560, Denton, TX 76203-5017.

Student organizations policy

The University of North Texas recognizes the right of any group of students to form a voluntary organization for purposes not forbidden by local, state or federal law, or university policy. All organizations that wish to obtain certain benefits (e.g., to reserve space on campus) must register each school year with Student Activities.

Policies regulating the approval, functioning, and privileges of registered organizations are available from Student Activities, University Union, Room 345; studentactivities.unt.edu/orgs; or 940-565-3807.

One of the goals of Student Activities is to help students get involved on campus, to maximize their college experience. Student Activities promotes a sense of community and UNT pride while enhancing the social, intellectual, and developmental growth of students as individuals or members of student organizations. We do this through student organization services, campus-wide events, and spirit and traditions.

For more information or help contacting any of the 450 registered student organizations, contact Student Activities in the University Union, Room 345; follow on Instagram or Facebook (@UNTactivities); visit studentactivities.unt.edu; or call 940-565-3807.

Parking

Parking regulations, maps detailing parking facilities, parking office hours, contact information, and the links to paying parking citations online or to purchasing a parking permit online may be obtained at transportation.unt.edu. All student, staff and faculty parking permits (except TF permits) are sold online based on availability.

Pohl Recreation Center

Located at the corner of North Texas Boulevard and Chestnut Street, the Pohl Recreation Center, managed by Recreational Sports, is open daily to provide a variety of facility space and programming for the recreation and fitness needs of the students, faculty and staff at UNT.

The Rec Center has a 14,500 sq. ft. weight and cardio area, 3 multi-purpose courts for basketball, volleyball, and badminton, an indoor soccer gymnasium, a 45 ft. climbing wall and 10 ft. bouldering wall, an 8-lane lap pool and 5,510 sq. ft. leisure pool with a hot tub, and an 1/8 mile indoor track. Also located in the facility are locker rooms, Smoothie King, a lounge and seating areas, meeting rooms, two group fitness rooms, lighted outdoor sand volleyball and basketball courts, and the Recreational Sports office.

The Rec Center is open to all currently enrolled UNT students with a valid UNT ID who pay the recreation fee included in tuition. Current and retired faculty, staff and their families may purchase memberships. Memberships are also available to alumni. Current and retired faculty and staff employees who are members of the Rec Center and students with an active Rec Center membership may sponsor up to three individuals over the age of 16 for membership. Members can sponsor up to three guests per day for a fee (sponsored guests under 16 years of age are free).

The Rec Center is a result of a project initiated by a UNT student group in 1997, which gained momentum through student involvement and was approved through a student referendum in 2000. The Rec Center is funded primarily through the recreation fee.

For more information about the Pohl Recreation Center, contact Recreational Sports by calling 940-565-2275 or emailing recsports@unt.edu. Information is also available on the UNT Rec Sports app and on the Rec Sports web site at recsports.unt.edu.

Recreational Sports

Recreational Sports is located in the state-of-the-art 138,000 square-foot Pohl Recreation Center and offers an incredible array of programs and experiences designed to support and inspire the wellness of the UNT Community. We also pride ourselves on being a welcoming and engaging family, committed to helping students, faculty, and staff live happy, healthy, and active lives by participating in our seven different program areas:

Fitness

The fitness program offers fitness assessments, personal training, instructor prep classes, and a variety of free events and classes each semester. The group fitness program offers students exciting, instructor-led aerobic activities like cycle, kickboxing, Pilates, yoga, Zumba and others. Group fitness class schedules and registration can all be done through the UNT Rec Sports app. The fitness staff also oversee the 14,500 square foot weight room, located in the Rec Center, that offers a variety of cardio machines including treadmills, ellipticals, free weights, and a functional training space.

Intramural Sports

UNT students versus UNT students! Any student who pays the recreation fee may participate in intramural events. Team sports are arranged on a round-robin basis, and individual and dual sports are set up by elimination tournaments, meets and special events. Major sports include flag football, outdoor soccer, basketball, softball, volleyball, and indoor soccer, while single-day events can include sand volleyball, table tennis, dodgeball, flag football and basketball tournaments, as well as PS5 and Nintendo Switch tournaments.

Esports

Esports at UNT is a varsity program dedicated to developing, guiding, and encouraging our varsity players to compete at the highest level within the collegiate arena, as well as training and facilitating the competitive growth of each player and team. The esports program also supports our students in the gaming community through club and intramural sports competitions. Varsity teams include League of Legends, Rocket League, and Overwatch.

Outdoor Pursuits

The Outdoor Pursuits program offers a 45-foot indoor climbing wall, 10-foot bouldering wall, rental of outdoor equipment like tents, sleeping bags, coolers, stoves, canoes and kayaks. Outdoor Pursuits also oversees an adventure trip program that takes members out on day, weekend, and even extended trips within Texas and beyond. Free clinics are also offered throughout the year that give instruction on various topics like stargazing, survival, campfires and kayak roll. The outdoor staff also oversee the Outdoor Pursuits Center, located behind the climbing wall, which rents high-quality outdoor equipment including tents, sleeping bags, canoes, kayaks, coolers and more.

Sport Clubs

The sport club program provides an opportunity for UNT students to compete against other colleges and universities in the Texas region and nationally. Nearly 40 student-led clubs compete recreationally and competitively and welcome all those interested in the sport, regardless of skill level. Club leader information and club practice times can be found on the UNT Rec Sports app or by visiting the Rec Sports web site.

Aquatics

The aquatics staff oversee an indoor lap pool and indoor leisure pool and spa. The program offers private swim lessons and instructional classes for adults and children, as well as American Red Cross certification courses for lifeguards and water safety instructors. The aquatics program also hosts free special events throughout the semester like dive-in movies and swim challenges, and is home to the Mean Green women's swim team.

Informal Recreation

Informal recreation offers drop-in activity at the Rec Center for basketball, indoor soccer, swimming, badminton, volleyball and more, and can check out equipment to you at no charge. Informal Recreation also oversees the Waranch Tennis Complex offering 12 lighted tennis courts, equipment checkout, and is home to the Mean Green women's tennis team. For more information about the Waranch Tennis Complex please call 940-565-2275.

Employment

Recreational Sports is one of the largest employers of students on the UNT campus. Rec Sports offers a wide range of job opportunities for students throughout the seven program areas including membership services, weight room, personal training, group fitness instruction, lifeguarding, outdoor pursuits, or officiating their favorite intramural sports.

For more information and program details, download the UNT Rec Sports app or visit the Rec Sports web site at recsports.unt.edu. Follow @UNTRecSports on social media for the latest news, program reminders, and special giveaway events.

Speech and Hearing Center

The University of North Texas Speech & Hearing Center offers services to adults and children in the Denton-Dallas-Fort Worth areas with speech, language, reading, swallowing, and hearing disorders. Audiology services include hearing testing, hearing aid dispensing and management, repair of hearing aids, management of cochlear implants, assessment of auditory processing disorders, assessment of tinnitus, vestibular assessment, and aural (re)habilitation programs. Speech-Language Pathology services include evaluation and treatment of language, articulation, fluency, voice, resonance, and swallowing disorders.

The Speech and Hearing Center offers many specialized services designed to meet the needs of UNT students, including testing and support for students with language-learning disabilities and social/pragmatic difficulties. Speech and language services are offered on an individual and group basis. The Center also provides assessment and treatment services to students in the performing arts, including a hearing conservation program for musician's ear protection, tinnitus management for musicians, and voice evaluation and treatment for performance-related disorders.

The Speech and Hearing Center accepts payment through cash and credit card, and is in network for a number of insurance plans, including most Medicaid and Medicare plans. To schedule an appointment or inquire about clinic services, fees and payment options, please call 940-565-2262. Additional information can be found at aslp.hps.unt.edu/clinic.

Student Activities

One of the goals of Student Activities is to help students get involved on campus, to maximize their college experience. Student Activities promotes a sense of community and UNT pride while enhancing the social, intellectual, and developmental growth of students as individuals or members of student organizations. We do this through student organization services, campus-wide events, and spirit and traditions.

For more information or help contacting any of the 450 registered student organizations, contact Student Activities in the University Union, Room 345; follow on Instagram or Facebook (@UNTactivities); visit studentactivities.unt.edu; or call 940-565-3807.

Financial Aid & Scholarships

Financial Aid & Scholarships (FAS) at the University of North Texas offers a variety of options to assist students in financing their education. For more information on Financial Aid & Scholarships at UNT, please visit financialaid.unt.edu, visit the UNT One Stop on the 2nd floor of the Eagle Student Services Center; call 940-565-2302 or contact us via ScrappySays.unt.edu.

Student Government Association

The Student Government Association (SGA) strives to promote the interests and opinions of students. As the official voice of the undergraduate student body, SGA represents students in matters of policy and student welfare. SGA sponsors programs and projects that enhance students' educational and collegiate experience.

To learn more about services or becoming a member, visit SGA in the University Union, Room 344; follow on Instagram (@UNTSGA); visit sga.unt.edu or call 940-565-3850.

Student Legal Services

Student Legal Services provides free legal advice and assistance to currently enrolled students. This office also maintains a variety of legal publications for student use. Students are encouraged to meet with an attorney during Open Legal Clinic hours or contact the department to schedule an appointment. Please refer to the web site studentaffairs.unt.edu/dean-of-students/programs-and-services/student-legal-services/index.html, for details send an email to Studentlegal@unt.edu or call 940-565-2614.

Student Money Management Center

The Student Money Management Center provides tools and solutions UNT students need to achieve financial independence during their college experience. Free services include private consultations with professionals or peer counselors. The center sponsors free workshops, seminars and clinics covering a wide variety of personal financial and money management topics. Some of the workshops are based in theory, some are based in methodology—but all the training opportunities include plenty of tips and strategies that students can apply to their personal financial situations. All educational opportunities are open to all members of the UNT community. For information, visit moneymanagement.unt.edu, call 940-369-7761 or stop by Suite 115 in Chestnut Hall.

Orientation and Transition Programs

Orientation and Transition Programs seeks to provide resources and services to help students establish and attain their educational goals. Beginning with first-year students, the office serves as a central location to help students transition to the UNT campus, but also connect with their peers, faculty, staff and parents. These connections help guide and direct students throughout their educational experience at UNT and facilitate their success. For more information on Orientation and Transition Programs, stop by our office, located in the University Union, Room 377, call 940-565-4198, or visit us on the web at transition.unt.edu.

Student Veteran Services

Student Veteran Services, in collaboration with a diversity of university departments, aims to serve as a safe place to help student veterans navigate university resources for academic success. Our focus is simply three pillars: to help remove barriers for student veterans through an emphasis on transition support through campus life; to provide connection to resources both on and off campus to assist student veterans; and to give due recognition of the service members in our UNT community through programs and scholarship. For more information, please visit the center in Sage Hall, Suite 236, or call 940-369-8021, or e-mail veterans@unt.edu for further assistance.

UNT TRIO Programs

TRIO develops, implements and administers programs specifically designed to meet the educational needs of unique student populations, such as the financially and educationally disadvantaged, underserved or underrepresented, and individuals with a

disability. UNT TRIO currently administers five programs that provide services to students from middle school level through undergraduate level. Projects administered through federal TRIO grants serve students and adults throughout the United States. The five UNT TRIO programs provide services for more than 1,700 participants yearly, ranging from 6th graders to upper-division undergraduate UNT students. Contact TRIO at 940-565-4182 or trio@unt.edu.

UNT Police Department

The UNT Police Department serves an integral role in campus life as the university's principal provider of safety and security for students, faculty, staff and visitors. Located at 1700 Wilshire in the Sullivant Public Safety Center, the department operates 24 hours a day.

University Police officers are licensed by the State of Texas and enforce state and local laws as well as university rules and regulations. The department offers numerous programs and services available to the university community.

For more information, contact the UNT Police Department at 940-565-3000, or visit their web site at police.unt.edu.

University Union

The University Union is situated at the heart of campus, offering an array of essential services, programs, and opportunities. It serves as a focal point for both formal and informal interactions, fostering community, engagement and understanding among its members.

Within the University Union, individuals can access a wide range of offices, services, and student organizations essential to their academic and personal needs. These include Barnes & Noble at UNT, Union Administration, Student Activities, Student Affairs, Dean of Students, DATCU, ESSC, Eagle Post, Design Works, Center for Belonging and Engagement, Center for Leadership and Service, University Program Council (UPC), the Union Arts Center, Orientation and Transition Programs, Student Government Association (SGA), and Graduate Student Council (GSC).

The University Union also offers a variety of dining options like Starbucks, Jamba Juice, Chick-Fil-A, Burger King, Fuzzy's Taco Shop, Krispy Krunchy Chicken, Verde Everyday Express, Campus Chat and Avesta. Whether students are in the mood for a quick snack or a full meal, there's something to satisfy every palate. Beyond its dining options, the University Union also serves as a welcoming space for students to unwind between classes or participate in the numerous events held here each week. Whether seeking a moment of relaxation or wanting to engage with campus life, the University Union provides an atmosphere for all members of the UNT community.

For the most up-to-date information regarding the Union, please visit union.unt.edu or contact the Union at 940-565-3805. Like us at [facebook.com/UNTUnion](https://www.facebook.com/UNTUnion) and follow us on Instagram @UNTUnion. Contact Union Scheduling Services for event planning and facility use at 940-565-3804 or visit union.unt.edu.

University Program Council

The University Program Council (UPC) is a student-run programming board that coordinates fun and exciting programs around the UNT campus. UPC is dedicated to providing programs that are entertaining, educational and free for students. UPC is comprised of several student executive positions and a student volunteer board that plan and implement events on campus. Students have the opportunity to join UPC at the beginning of each semester and assist in developing new ideas for future events as well as promote and organize events. All of our UPComing events can be found on our website <https://unt.edu/upc>, by liking our Facebook page at "UNTUPC" or following @UNT_UPC on Instagram.

Writing Center

The UNT Writing Center offers free tutoring to all UNT students in all disciplines and at all stages of their academic careers—from freshman English composition students to graduate students writing theses and dissertations.

We offer in-person appointments at the Writing Center in Sage Hall 150 from 9:00 a.m. – 9:00 p.m., Monday – Thursday and from 9:00 a.m. – 3:00 p.m. on Fridays. We also offer walk-ins at Willis Library from 5:00 p.m. - 9:00 p.m. Sunday – Thursday evenings. You can stop by at 5:00 p.m. when the tutor arrives to sign up for a slot that night – first come, first served.

We have online appointments available from 9:00 a.m. – 9:00 p.m., Monday –Thursday, from 9:00 a.m. – 3:00 p.m. on Fridays, and from 5:00 p.m. - 9:00 p.m. on Sundays.

Students may have up to 1 hour of instruction per day. All appointments can be scheduled by calling 940-565-2563 or e-mailing us at writingcenter@unt.edu.

To learn more, visit our website writingcenter.unt.edu.

Policies

Americans with Disabilities Act

The University of North Texas does not discriminate on the basis of disability in employment, admission, treatment, or access to its programs or activities. UNT is committed to providing equal educational access for qualified students with disabilities in accordance with state and federal laws including the Americans with Disabilities Act of 1990 as Amended (ADA) and Section 504 of the Rehabilitation Act of 1973. Additionally, the University is committed to making all UNT sponsored programs and activities accessible, as required by the Texas Accessibility Standards and the ADA Accessibility Guidelines. To this end, all academic units are willing to make reasonable and appropriate adjustments to the classroom environment and the teaching, testing, or learning methodologies in order to facilitate equality of educational access for people with disabilities.

For information about student accommodations, contact the Office of Disability Access at 940-565-4323. Faculty and staff should contact the Office of Human Resources at HRAdministration@unt.edu.

Student Academic Integrity

A strong university is built upon the academic integrity of its members. As an intellectual enterprise, it is dependent upon trust, honesty, and the exchange of ideas in a manner that gives full credit and context to the sources of those ideas. UNT's policy on Student Academic Integrity is designed to uphold these principles of academic integrity. It protects the rights of all participants in the educational process and validates the legitimacy of degrees awarded by the university.

The policy covers categories of academic dishonesty such as cheating, plagiarism, forgery, fabrication, facilitating academic dishonesty and sabotage. It includes descriptions of infractions, penalties and procedures. In the investigation and resolution of all allegations of student academic misconduct, the university's actions are intended to be restorative, educationally sound, fundamentally fair, and based on reliable evidence. The full policy (06.003) is available online at policy.unt.edu, where it can be located by searching for either title or number.

Changes of address

It is the responsibility of the student to provide correct enrollment, permanent and local mailing address information at all times and on all documents at the university. Students who change their enrollment or mailing address must notify the Registrar's Office immediately by calling 940-565-2111 or update their address at my.unt.edu.

Identification card regulations

The official UNT ID provides access to several on-campus amenities including Library access, events on campus, access to the recreational center and athletic events, access to on-campus dining and residence halls, and more.

There is no charge for your **first** UNT ID card. Replacement ID cards are subject to a \$10 replacement fee.

The card is deactivated when enrollment is interrupted or removed. Students are asked to retain their ID cards, even though they may not be enrolled. The cards are reactivated upon subsequent enrollment.

Liability for personal loss

The university is not responsible for and does not assume any liability for loss of or damage to personal property, including vehicles. Students are encouraged to obtain personal insurance coverage for loss of or damage to possessions on campus, including possessions in dormitories and vehicles.

Motor vehicle regulations

People who operate motor vehicles and bicycles on the UNT campus must comply with the Texas Transportation Code and published university regulations regarding vehicle and bicycle use, parking, display of decals and penalties for violation. The regulations are available online at transportation.unt.edu.

Paying bills

State law does not permit the university to extend credit; bills must be paid when they are due. Check and credit card payments are accepted online at my.unt.edu. Checks paid in person must be made payable to the University of North Texas for the exact amount to be paid. Checks on which money must be advanced and postdated checks are not accepted.

Emergency Closures

Weather conditions may temporarily disrupt university operations in that university administration may determine whether it is necessary to delay opening time, close early or close for the day.

Courses taught online via Web CT are unaffected by inclement or severe weather closings unless instructors inform students otherwise. Those students should continue course work as regularly scheduled.

Closings due to inclement or severe weather are posted on the UNT web site (www.unt.edu) and are released to Dallas–Fort Worth news media outlets. Registered students, faculty and staff will be notified via the Eagle Alert system as appropriate. Students can update their Eagle Alert contact numbers by going to <https://www.untsystem.edu>. Updates on inclement or severe weather can also be found by checking Facebook (@northtexas) following X (@UNTEagleAlert) and listening to local media outlets.

Detailed information, guidelines, safety tips and resources pertaining to inclement weather can be found at www.unt.edu/weather.

Transportation services

The UNT Shuttle serves the Denton campus including Discovery Park, Eagle Point, and various off-campus student housing complexes. Additionally, students can access the Denton local bus service fare free by presenting a valid UNT ID.

During the fall and spring semesters the Night Flight service provides transportation around the UNT campus and Eagle Point for areas not served by the campus shuttle. Between the hours of 2am and 7am, a late-night service operated by Lyft is available to students. Visit transportation.unt.edu for current e-ride information.

Alternative transportation options, including car sharing and bicycling, are supported by Transportation Services as well.

For information regarding hours of operation, route schedules and alternative transportation options, visit their web site at transportation.unt.edu.

Other policies

Additional policies and guidelines pertaining to particular subjects or for specific publics are listed in other publications, such as the Housing Handbook, available in the Housing and Residence Life Office; the Code of Student Conduct, available at studentaffairs.unt.edu/dean-of-students/conduct; Parking Regulations, available from the Parking Office and the UNT Bookstore in the University Union. International students should consult the International Admissions and Advising Center for information regarding policies and procedures required by federal regulation agencies.

All university policies are subject to change throughout the year.

Notice of complaint

The university may issue an official request or notice of complaint to a student to appear before a university administrator when a student's conduct or behavior is reasonably believed to be in violation of a published university policy. A student who receives a notice of complaint should always consider it important and respond immediately. Failure to respond to a notice of complaint can result in disciplinary action up to and including involuntary withdrawal from the university and a block on enrollment.

Code of Student Conduct

Purpose of the Code of Student Conduct

The University of North Texas is deeply committed to advancing educational excellence and preparing students to become thoughtful, engaged citizens of a diverse, global community. The University has established the Code of Student Conduct to promote the wellbeing, honor, and dignity of all who live, learn and work in our educational community. The Code of Student Conduct is intended to foster a safe environment conducive to learning and development, as well as to hold students accountable through an educational process that balances the interests of individual students with the interests of the University. Students and student groups are expected to conduct themselves in a manner that demonstrates respect for the rights and property of others and upholds the integrity and values of the University community.

The most up-to-date Code of Student Conduct is available online at deanofstudents.unt.edu.

University of North Texas Drug-Free Schools and Communities Act

Pursuant to the Drug-Free Schools and Communities Act Amendments of 1989, the University of North Texas is required to establish a drug and alcohol prevention program for its students and employees. UNT is also required to provide this information to students, faculty, and staff upon entry and annually. Following is a description of UNT's program. A biennial review of this program is done to determine its effectiveness, to implement changes to the program if they are needed and to ensure that the university's disciplinary sanctions described are consistently enforced. The DFSCA report can be found at deanofstudents.unt.edu.

Standards of conduct

University of North Texas regulations prohibit the unlawful possession, use, distribution and sale of alcohol and illicit drugs by university students and their guests and for employees on university-owned or controlled property and at university-sponsored or supervised activities.

University discipline

Violation of these university regulations can result in disciplinary action up to and including expulsion for students and discharge for employees.

Legal sanctions

Local, state, and federal laws also prohibit the unlawful possession, use, distribution and sale of alcohol and illicit drugs. Criminal penalties for violation of such laws range from fines up to \$20,000 to imprisonment for terms up to and including life.

Health risks

Specific serious health risks are associated with the use of alcohol and illicit drugs. Some of the major risks are listed below. For more information contact the Recovery and Intervention Support and Education Center at 1800 Chestnut, Chestnut Hall, Suite 301, or by calling 940-565-3177.

- *Alcohol and other depressants (barbiturates, benzodiazepines, sedatives, and tranquilizers)*
- Accidents as a result of impaired ability and judgment, alcohol poisoning, overdose when used with other depressants, damage to heart, liver, pancreas, and a developing fetus. Increase risk on cancer, decrease effectiveness of immune system. Overdose can occur when used with other depressants. Tolerance, physical dependence, and withdrawal can occur.
- *Cannabis (also known as marijuana)*
- Short term effects include problems with memory, thinking, problem solving, and physical coordination. Can cause confusion, anxiety, and paranoia, and increase the risk of respiratory ailments. Can interfere with judgment, attention span, concentration, and overall intellectual performance. Impairs driving ability. May cause psychological dependence.
- *Opioids (heroin, fentanyl, oxycodone, hydrocodone, codeine, morphine)*
- Harmful effects include drowsiness, confusion, nausea, slowed breathing. Long term effects include liver and kidney disease, lung complications, mental disorders, and sleep disruption. Tolerance, physical dependence, withdrawal, and overdose can occur.
- *Stimulants (amphetamines, methamphetamines, cocaine, and methcathinone)*
- Chronic, high dose use can cause agitation, hostility, panic, aggression, chest pain, excessive sweating, vomiting. Tolerance, physical dependence and overdose can occur.
- *Nicotine*
- Tobacco smoke contains thousands of chemical compounds, many of which are known to cause cancer. Nicotine, which is a central nervous system stimulant, produces an increase in heart and respiration rates, blood pressure, adrenaline production, and metabolism. Physical dependence and withdrawal from nicotine can occur.
- *Inhalants*
- Inhalants are a diverse group of chemicals that easily evaporate and can cause intoxication when their vapors are inhaled. Most inhalants are central nervous system depressants. The use of these drugs slows down many body functions. Chronic use of some of these chemicals can lead to irreversible liver damage and other health problems. High doses can cause loss of consciousness and sudden death.

Resources

A variety of resources exist for alcohol and other drug prevention education, counseling and referral. For detailed information concerning these resources available from the university and community agencies, students may contact the Recovery and Intervention Support and Education Center at 1800 Chestnut, Chestnut Hall, Suite 301, or by calling 940-565-3177. Faculty and staff members may contact the Employee Assistance Program at 800-343-3822 or Human Resources at 940-565-4817.

Fax: 940-565-4822

Web site: international.unt.edu/

International Affairs is a guide and champion for campus internationalization at the University of North Texas. International Affairs supports international teaching, research and service. We strive to enrich campus life by welcoming international students and scholars, cultivating global citizens among students, and fostering global connections between UNT and institutions, communities and people around the world.

International Affairs functions in a leadership and facilitation role to support the university's global endeavors and international initiatives. We provide expertise, assistance, and support to faculty, staff, students and administration in all international activities, and direct and support the activity of six constituent units: Global Engagement, International Programs and Communications, Intensive English Language Institute, International Recruitment, International Student and Scholar Services, and Study Abroad.

International Programs & Communication

Academic Advising

Academic advising for students wanting to attend UNT at Frisco is available for students through their academic college. Please be sure to indicate to your advisor that you intend to be a Frisco student and would prefer a Frisco schedule. For academic advising office information, please use the following links: [Undergraduate Advising Office Directory](#) & [Graduate Advising Directory](#).

Career Services

Career and professional development workshops are frequently available each semester; check the [UNT Frisco Events Calendar](#) to see what is coming up next. Career advising appointments can be made through your student account on Navigate. For additional questions email UNTFrisco@unt.edu.

Counseling Services

Counselors will be available on campus Tuesday and Thursday 8am-5pm. Services available are group workshops, therapy dogs and individual counseling. To make an appointment, call 940-565-2741 and ask for Frisco availability. For more information and resources including Therapy Assistance Online and anonymous mental health screenings, read more here studentaffairs.unt.edu/counseling-and-testing-services.

For after-hours needs, you may call the UNT Police at 940-565-3000 and ask for the On-Call Counselor.

For emergencies, please call 9-1-1.

Disability Accommodations

Students requesting reasonable accommodations for a disability should register through the Office of Disability Access (ODA) as a first step. Click here to start the process: <https://disability.unt.edu/services/apply>. Once you receive your Letter of Accommodations (LoA) from your ODA Coordinator, you will provide a copy of your LoA to each instructor at the start of every semester to begin receiving accommodations in your courses.

Financial Aid and Scholarships

Students with questions about financial aid or scholarships should be checking the my.unt.edu Student Center regularly. To Do List Items and Holds will give detailed descriptions with the next steps. Students at UNT Frisco can get assistance with financial aid by visiting the Welcome Desk to speak with staff from the UNT One Stop on campus by calling 940-565-2302. Additionally, students can visit ScrappySays.unt.edu to find answers to commonly asked questions, book a virtual appointment or submit their questions directly to our team.

Food Pantry

Our food pantry is available for students who are dealing with food insecurities of varying levels. Confidentiality will be maintained for students visiting the food pantry, and where appropriate, referral to additional campus and/or community resources can be made. Ask about this service at the welcome desk or by calling 972-668-7100.

Frisco Fitness Center

Located on the first floor and managed by Recreational Sports, the Frisco Fitness Center provides fitness equipment and programming to meet the need of the students, faculty and staff at Frisco Landing. The Fitness Center is open to all currently enrolled UNT students with a valid UNT ID who pay the recreation fee included in tuition. Current and retired faculty and staff may purchase memberships. All members of the Frisco Fitness Center also have access to enter and use the Pohl Recreation Center on the main campus. For more information about the Frisco Fitness Center, email Friscofitness@unt.edu. Information is also available on the UNT Rec Sports web site at recsports.unt.edu.

Health and Wellness

Look for activities and workshops on the [events calendar](#) such as Fall Flu Shot Clinics, stress-reduction activities, dietitian consultations and more. Medical appointments can be held virtually through the Student Health and Wellness Center. Visit the Health Center Patient portal. A Nurse Hotline is available 24/7 to answer questions on treatment of medical issues or how to determine severity 214-266-8777.

Student Organizations

As our campus grows, the need for specialized connections among students is becoming increasingly important. Please contact UNTFrisco@unt.edu if you would like to find other like-minded peers with common goals and create new student organizations for our campus. To search current UNT at Frisco organizations, visit OrgSync and use the key word Frisco to search by location.

Tutoring and Academic Success

Students can meet with an academic coach in Frisco Landing or virtually. Academic coaching can assist with study, test, and note taking tips as well as time management, test anxiety and more. Set up an appointment for academic coaching via Navigate. Tutoring at Frisco Landing is in room 250 and provides one-on-one tutoring, drop-in tutoring, and SI sessions virtually. Please

visit the Learning Center's webpage for dates and time for each semester. The Writing Lab is available to all students to assist with grammar, punctuation, and citations, as well as theses and dissertations. Online tutoring is also available. Please visit the UNT Writing Center web page to schedule an appointment.

Volunteer Opportunities

Volunteering to serve the community around us is a great way to make meaningful connections with our area partners, your peers, and within your field of interest. To find available service projects, check the [events calendar](#), or email UNTFrisco@unt.edu to propose a new project.

Occasionally other offices will visit our campus to deliver workshops, activities, or information such as Student Legal Services, Student Money Management Center, Off-Campus Student Services, Student Health and Wellness Center, etc. Watch the [events calendar](#) for updates on visits.

Glénisson de Oliveira, Dean

Sean Ryan, Associate Dean for the Honors College
James Duban, Associate Dean for Research and National Scholarships
Eric Gruver, Associate Dean for TAMS

Faculty

The Honors College is dedicated to enriching the undergraduate academic experience for talented, motivated and well-prepared students. Honors College membership is open to all qualified students, whatever their major. Upon joining the Honors College, students find that they are part of an exciting community of talented scholars pursuing academic and intellectual growth. The goal of the Honors College is to help these students build an excellent foundation, via research-based curricula, thereby preparing them to study at the graduate level, establish a career and meet the demands of responsible citizenship.

The benefits of Honors College membership

Honors classes

Honors faculty and staff work to design, implement and support learning opportunities for students, both in and beyond the classroom. The primary benefit of Honors College membership is the right to enroll in honors classes, which are taught by faculty members with a strong commitment to undergraduate education. Honors classes offer a supportive environment conducive to intellectual growth. The small enrollment of honors classes opens up opportunities for active participation in learning, including projects, presentations and class discussions. In addition, many honors classes can be substituted for non-honors classes in the University Core Curriculum. Honors students also enjoy priority registration each semester.

Undergraduate research

Many honors students elect to participate in undergraduate research. Students may take courses to learn about research, develop their research projects, and write an honors thesis, all under the guidance of a faculty mentor in their major. Honors research courses include HNRS 1500 - Introduction to Research: An Interdisciplinary Perspective; HNRS 3500 - Honors Thesis Proposal Development; XXXX 3996 – Honors Mentored Research; and XXXX 4951-Honors College Capstone Thesis. Students have opportunities to present their research at regional and national conferences and may submit their work for publication in the North Texas Journal of Undergraduate Research or in other scholarly journals.

Special programming

Members are invited to participate in many programs sponsored by the Honors College, staff- and student-led events. Staff-led events include welcome back, networking, mentorship, and professional development programs. Each student-led event is hosted

around one of five topics that appeal to a variety of interests and majors: STEM, the arts, cultural awareness, community engagement, and general student activities.

Honors College priority housing

The Honors College is proud to offer two residence halls for Honors students. Rawlins Hall is available to freshman Honors students. Honors Hall is available for upper classmen. Honors College students registering for housing are encouraged to select Rawlins Hall or Honors Hall. Both Honors residence halls feature a faculty-in-residence.

Honors College student lounge

Honors College students exclusively have access to the lounge space in Sage 340. Students have a number of options available to them in the lounge: a Keurig with a variety of tea, hot chocolate, and coffee; board games; books that can be borrowed; a TV that students can cast to; whiteboards; and free printing. The lounge is also the location for many Honors College programs.

Honors College membership and participation

Honors College membership is open to students completing their first Bachelor's degree and is compatible with every undergraduate major and program at UNT. Membership in the Honors College is secondary to membership in the college of the student's major, and the program's flexibility allows students to decide each semester on the combination of honors, non-honors and major classes that best suits their needs.

Eligibility for membership

Freshman, transfer and continuing students are invited to apply for membership to the Honors College. All applicants submit a response to a writing prompt and appropriate academic records. Applications are reviewed holistically. Interested students can review application deadlines and complete the application at honors.unt.edu.

Programs for participation and recognition in the Honors College

Honors College Scholar Award

The Honors College Scholar Award requires students to complete 18 honors credit hours with a cumulative GPA of at least 3.25. Honors credit hours can be earned through a variety of academic experiences, including Honors courses, Honors Contracts, Mentored Research, Experiential learning activities, graduate level coursework, Study Abroad, and writing an Honors Thesis project. Students who complete the Honors College Scholar Award receive the Honors College medallion and recognition on their final transcript.

Advanced Honors College Scholar Award (transfer students only)

Designed specifically for transfer students matriculating to UNT with a substantial number of credit hours, the Advanced Honors College Scholar Award requires these students to complete 12 hours of Honors credit, 3 hours of which must be either an Honors College Thesis Project (or department equivalent), 3996 Mentored Research experience, UNT-approved Study Abroad, HNRS 4200Z: Experiential Learning Seminar (internships, practicums or student teaching), or completion of HNRS 4000: Global Perspectives Capstone course. The student must maintain a cumulative GPA of at least 3.25. Students who complete the Advanced Honors College Scholar Award receive the Honors College medallion and recognition on their final transcript.

Distinguished Honors College Scholar Award

The highest recognition available to students through the Honors College is the Distinguished Honors College Scholar Award. For this award, the student must complete 21 honors credits that include an Honors Thesis Project. The remaining Honors credits can be earned through Honors courses, Honors Contracts, Mentored Research, Experiential learning activities, graduate level coursework, and Study Abroad. Students must also maintain a cumulative GPA of at least 3.25. Students who complete the Distinguished Honors College Scholar Award receive the Honors College medallion and recognition on their final transcript.

Honors College Engagement Recognition

This recognition is for students who are particularly active in attending Honors College events and/or campus activities. These students can receive the Honors College Engagement Recognition in addition to an Honors College award. Program requirements are posted at honors.unt.edu.

If you have any questions regarding the Honors College Distinctions or what catalog year you fall under, please contact Honors College Academic Advising.

Honors courses

Specific objectives have been adopted for honors courses, including the following.

1. Honors courses emphasize development of analytical and evaluative skills through readings from primary sources, journal articles and other supplementary materials.
2. Honors courses encourage students to engage in high-level thinking and learning through activities such as intensive discussion; writing in small, collaborative learning settings; and research papers and projects.
3. Honors courses promote independent thinking by making students accountable for important aspects of their learning.
4. Honors courses place material in a conceptual context that illustrates the importance of that material and its relationship to other knowledge.
5. Honors courses provide enhanced opportunities for students to develop research skills and produce independent, original research or creative products as part of the course requirements.

Honors Courses that meet University Core Curriculum requirements

Communication, 6 hours

- ENGL 1311 - Honors First-Year Writing I
- ENGL 1321 - Honors First-Year Writing II
- TECM 1700 - Introduction to Professional, Science, and Technical Writing (special section)

E-mail: internationalaffairs@unt.edu
Web site: international.unt.edu/

Amy Shenberger, Interim Vice Provost and Dean

International Affairs

International Affairs is a guide and champion for internationalization at the University of North Texas. International Affairs supports international teaching, research and service. We strive to enrich campus life by welcoming international students and scholars, cultivating global citizens among students, and fostering global connections between UNT and institutions, communities and people around the world.

International Affairs functions in a leadership and facilitation role to support the university's global endeavors and international initiatives. We provide expertise, assistance and support to faculty, staff, students and administration in all international activities.

All units are located in Marquis Hall (international.unt.edu).

Global Engagement

Marquis Hall, Room 105

Mailing address:
1155 Union Circle #311067
Denton, TX 76203-5017
940-565-2197

Email: GlobalPartnerships@unt.edu, Fulbright@unt.edu
Web site: international.unt.edu

Global Engagement supports UNT's global engagement activities and international initiatives. Global Engagement advises colleges on the development of global programs, manages UNT's international agreements and contracts, and oversees data and information about UNT's global engagement activities. Global Engagement acts as steward for campus internationalization by encouraging global scholarship, managing Fulbright and intramural grants, and promoting other global opportunities for faculty and students.

International Programs and Communication

Marquis Hall, Room 105

Mailing address:
1155 Union Circle #311067
Denton, TX 76203-5017
940-565-2197

E-mail: internationalaffairs@unt.edu

Web site: international.unt.edu/programs-and-events/index.html

International Programs and Communication provides UNT students opportunities for cross-cultural learning and engagement via a full schedule of international events and activities, provides international student support programs to help new students adjust to life in the U.S., and manages and awards International Affairs scholarships and grants.

Intensive English Language Institute

Marquis Hall, Room 223

Mailing address:

1155 Union Circle #311067

Denton, TX 76203-5017

940-565-2003

E-mail: ieli@unt.edu

Web site: international.unt.edu/ieli

The **Intensive English Language Institute, established in 1977**, is the longest-standing program of its kind in North Texas and one of the most prestigious programs for learning academic English in the United States. In addition, IELI conducts the International Teaching Assistants testing and training program for UNT.

International Recruitment Office

Marquis Hall, Room 209

Mailing address:

1155 Union Circle #311067

Denton, TX 76203-5017

940-369-7624

E-mail: study@unt.edu

Web site: international.unt.edu/international-students/index.html

International Recruitment recruits well-qualified and diverse international students to UNT colleges and schools. Its core activities include converting international prospects to applicants via digital outreach and recruitment at feeder institutions both abroad and in the U.S. Office staff work regularly with high school counselors, international faculty, U.S. higher education advisors and UNT alumni.

International Student and Scholar Services

Marquis Hall, Room 110

Mailing address:

1155 Union Circle #311067

Denton, TX 76203-5017

940-565-2195

Fax: 940-565-4145

E-mail: internationaladvising@unt.edu

Web site: international.unt.edu/international-scholar-services/index.html

International Student and Scholar Services provides culturally sensitive immigration advice and support to international students and scholars engaged in academic activities at the University of North Texas System. The office serves as the primary campus and system resource on immigration matters pertaining to all non-immigrant visa types.

Study Abroad Office

Marquis Hall, 145

Mailing address:
1155 Union Circle #311067
Denton, TX 76203-5017
940-565-2207

E-mail: studyabroad@unt.edu

Web site: studyabroad.unt.edu

The **Study Abroad Office** coordinates affiliate, exchange and faculty led programs for UNT students in collaboration with the university's colleges and schools. The office works to create programs that inspire global citizenship, enhance curriculum and support the academic, career and personal goals of UNT students from all majors and backgrounds. The office also serves as a U.S. Passport Acceptance Facility and is open to the UNT and North Texas communities.

Faculty

Mission

The College of Applied and Collaborative Studies prepares students to engage in a rapidly changing world through partnership and innovation. We create ongoing opportunities for students to learn and grow in an inclusive, challenging environment.

Vision

The College of Applied and Collaborative Studies will cultivate excellence among the faculty, staff, and the next generation of scholars and global community leaders. We will earn recognition as a leader in multidisciplinary, project-based education, and in providing educational opportunities for adult learners and diverse populations. These redesigned educational opportunities will serve our triple bottom lines, improving economic, social, and environmental outcomes in our region and the world.

Values

- Collaboration: We work across traditional boundaries, within and across the university and with partners in the public and private sectors.
- Community: We invest in public interest practices that prioritize ecological, social and economic benefits for all.
- Innovation: We reimagine and co-create the modern role of the academy, encouraging risk-taking and fostering creative, promising futures for faculty, staff, and students and the communities they touch.
- Authentic Learning Experiences: We identify and craft learning experiences that interweave liberal arts, data analysis, and design principles within the context of problems and projects that build 21st-century professional skills.

Academic advising

Students pursuing an undergraduate degree within the College of Applied and Collaborative Studies should contact the advising unit at 940-369-8129 or CACS@unt.edu. Students pursuing the BAAS 100% Online in partnership with Coursera track should contact BAASCoursera@unt.edu for all questions and inquiries.

Advisors help students select courses and answer questions about degree plans, application of transfer credit, military credit, and individual career needs, as well as general academic requirements, policies, and procedures.

Majors

Applied Arts and Sciences, BAAS

The 120-hour multidisciplinary degree program is specifically designed for nontraditional students who wish to earn a bachelor's degree. This unique program accepts credits earned from military training, from an Associate of Applied Science degree, or from other university credits. It may also facilitate graduation for students who are returning to college after spending time in the workplace. Interested students should contact the BAAS Program office at 940-369-8129 or CACS@unt.edu.

Degree requirements

Hours required and general/college requirements

A minimum of 120 semester hours, of which 36 must be advanced, and fulfillment of degree requirements for the Bachelor of Applied Arts and Sciences degree as specified in the General Degree Requirements in the Academic policies section of this catalog and the College of Applied and Collaborative Studies requirements.

Major requirements

Occupational specialization, 21 hours

Comprised of courses related to a specific occupation, field or subject. The occupational specialization often consists of field-specific course work completed for an Associate of Applied Science (AAS) degree at a community college. Active-duty military or veterans may receive credit for technical or other formal training courses under this component of the degree plan. Other students who have not completed an occupational specialization through courses taken in a community college or in the military may create one by selecting a primary area of study, in consultation with an advisor.

Unifying Courses, 9 hours

Three specific courses from the College of Applied and Collaborative Studies that help students sharpen their ability to communicate, analyze information and network effectively. Students must earn a C or better in each of the courses in this component to receive credit toward the degree.

- BAAS 3000 - Pathways to Civic Engagement
- BAAS 3020 - Fundamentals of Inquiry and Discovery
- BAAS 4100 - Managing a 21st Century Career

Professional development concentrations, 36 hours

Consists of two or three separate concentrations, each of which will consist of a minimum of 12 credit hours that serve to enhance the skills a student has acquired through prior education or are complimentary to the student's career plans.

Minor

None required.

Electives

Any UNT or transfer courses the student and advisor deem appropriate to the degree may be selected. Caution must be exercised to ensure the student fulfills the university requirement of 36 hours of advanced-level course work.

Other requirements

- A total of 36 hours of upper-division work.
- At least 24 hours of upper-division work in residence.

Note

A lower-level transfer course that is determined to be equivalent to a UNT upper-level course does not satisfy the requirement for advanced hours.

Departmental consent is required for students wishing to apply for up to 6 credit hours of university-approved Prior Learning Credit for non-traditional learning experiences in transfer to satisfy CACS degree requirements.

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

Year 1

Semester 1		Semester 2	
MGMT 3720 - Organizational Behavior	3 hours	Communication core	3 hours
MGMT 3850 - Foundations of Entrepreneurship	3 hours	Life and Physical Sciences core	3 hours
Communication core	3 hours	Organizations and Supervision Focus Area Part 1	3 hours
Mathematics core	3 hours	Organizations and Supervision Focus Area Part 2	3 hours
Component Area Option B core	3 hours	Elective	3 hours
Total	15 hours	Total	15 hours

Year 2

Semester 1		Semester 2	
American History core	3 hours	American History core	3 hours
Creative Arts core	3 hours	Organizations and Supervision Focus Area Part 1	3 hours
Life and Physical Sciences core	3 hours	Organizations and Supervision Focus Area Part 2	3 hours
Organizations and Supervision Focus Area Part 1	3 hours	Organizations and Supervision Focus Area Part 2	3 hours
Organizations and Supervision Focus Area Part 2	3 hours	Occupational Specialization course*	3 hours
Total	15 hours	Total	15 hours

Year 3

Semester 1		Semester 2	
Government/Political Science core	3 hours	BAAS 3000 - Pathways to Civic Engagement	3 hours
Occupational Specialization course*	3 hours	Government/Political Science core	3 hours
Entrepreneurship Certificate Concentration course	3 hours	Language, Philosophy and Culture core	3 hours

Notes:

*Occupational Specialization course: Courses related to a specific occupation, field or subject. Select in consultation with an academic advisor.

Applied Arts and Sciences, BAAS with a concentration in Applied Heritage Management

The 120-hour multidisciplinary degree program is specifically designed for nontraditional students who wish to earn a bachelor's degree. This unique program accepts credits earned from military training, from an Associate of Applied Science degree, or from other university credits. It may also facilitate graduation for students who are returning to college after spending time in the workplace.

Applied Heritage Management (HM, also called cultural heritage management) is a multidisciplinary field focused on identifying, preserving, and promoting cultural heritage. Cultural heritage is the tangible and intangible assets of societies that are inherited from the past. HM can include disciplines such as (listed in alphabetical order): archaeology, art history, art, cultural anthropology, dance, economics, environmental studies, history, marketing, museum studies, music, political science, tourism studies, among others. Specialists often work with other stakeholders, such as community members and government organizations.

Degree requirements

Hours required and general/college requirements

A minimum of 120 semester hours, of which 36 must be advanced, and fulfillment of degree requirements for the Bachelor of Applied Arts and Sciences degree as specified in the General Degree Requirements in the Academics section of this catalog and the College of Applied and Collaborative Studies requirements.

Focus area in Workforce and Technical Administration

The Workforce and Technical Administration focus area is tailored for working professionals in a trade seeking a Bachelor's degree for career and personal advancement. The focus area is a specialized area of study integrating the disciplines of project management, learning technology, industrial distribution, and a project-based learning curriculum to create a wholistic learning experience for students that will prepare them to understand and investigate real world business problems and to lead and collaborate with others effectively.

No course substitutions in the Focus Area will be made without the written consent of the director of the Applied Arts and Sciences program or the DMI department chair.

- AMDS 3100 - Applied Finance Essentials
- APMG 3120 - Problem Analysis
- CACS 2000 - Applied Professional Communications
- CACS 2040 - Team Development
- INDS 4040 - Industrial Innovation and Ideation
- LTEC 4040 - Organizational Development and Performance Improvement
- MGMT 3880 - Business Ethics and Social Responsibility
- PADM 3100 - Workplace Conflict

Electives

Any UNT or transfer courses the student and advisor deem appropriate to the degree may be selected. Caution must be exercised to ensure the student fulfills the university requirement of 36 hours of advanced-level course work.

Other requirements

A total of 36 hours of upper-division work.

At least 24 hours of upper-division work in residence.

Notes

A lower-level transfer course that is determined to be equivalent to a UNT upper-level course does not satisfy the requirement for advanced hours.

Departmental consent is required for students wishing to apply for up to 6 credit hours of university-approved Prior Learning Credit for non-traditional learning experiences in transfer to satisfy CACS degree requirements.

Applied Project Design and Analysis, BS

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Science degree as specified in the University Core Curriculum in the Academic policies section of this catalog and the College of Applied and Collaborative Studies requirements.

Major requirements

A minimum grade of C is required for all courses listed as "major requirements" for the Bachelor of Science with a major in Applied Project Design and Analysis.

Major of 53 hours, including:

- ADAR 2020 - Data Design, Analysis and Representation
- ADAR 3020 - Inferential Analysis
- ADAR 4020 - Process Optimization and Prescriptive Analysis
- ADSN 2030 - Applied Design Thinking
- ADSN 3030 - Applied Design Principles and Practices
- ADSN 4030 - Applied Strategic Design
- AMDS 3010 - Integrative Seminar II: Best Practices
- AMDS 3011 - Integrative Seminar II: Strategies of Growth
- AMDS 4010 - Integrative Seminar III: Campus to Career
- AMDS 4011 - Integrative Seminar III: Life as a Young Professional
- APMG 2011 - Project Workshop: Beginner
- APMG 3120 - Problem Analysis
- APMG 3121 - Project Workshop: Intermediate
- APMG 3220 - Project Management II
- APMG 3221 - Project Workshop: Intermediate
- APMG 4120 - Capstone

- APMG 4121 - Project Workshop: Advanced
- CACS 2000 - Applied Professional Communications
- CACS 2010 - Applied Project Management
- CACS 2020 - Research Design and Methods
- CACS 2030 - Creativity and Complex Problems
- CACS 2040 - Team Development
- SPDA 3012 - Internship II *

*Internship experience will need to be entered into Handshake and approved prior to student enrollment in course. May be used for 1-6 hours or repeated for credit up to a maximum of 6 hours. 1 credit hour is equal to 65 clock hours on the internship. The degree plan (53 hours in the major) assumes 3 credit hours of internship experience in a relevant field.

Minor

No minor is required.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information, see an academic advisor in the College of Applied and Collaborative Studies.

Other requirements

A minimum grade of C is required in each course of the major; a minimum UNT GPA of 2.0 and a minimum GPA of 2.50 in the major is required for graduation.

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

Year 1

Grad Track Options

Applied Arts and Sciences, BAAS with a grad track option leading to Learning Technologies, MS

Application and registration process:

- Declared Applied Arts and Sciences (AA&S) students with
 - a cumulative GPA 3.5 or higher for the last 60 hours completed,
 - 75 or more credit hours completed,
 - may apply during their junior year.
- Students submit the Toulouse Graduate School's Conditional Admission and Advisor Course Approval Form to the graduate coordinator for the Learning Technologies grad track list above. A signed copy of that form must be submitted to the applied arts and sciences advisor for official records.
- Students may not take a graduate class until 90 credit hours have been completed and must complete their BAAS degree within one year of taking their first graduate course within the track in order to have the courses transferred to their graduate plan.
- Students apply for admission to the learning technologies MS program through the Toulouse Graduate School and College of Information prior to the first semester of their final undergraduate year at UNT.

Admission process and standards:

To be admitted to the program, students submit the following items to the applied arts and sciences program director.

- written statement of purpose (500-700 words)
- resume or CV

The student's current transcript will also be pulled by the advisor to verify GPA and prerequisites. Grad track program admission decisions will be made holistically and in collaboration with the graduate program coordinators. Students will be notified of whether they were selected to be admitted to the grad track program through a letter co-signed by the applied arts and sciences program director and the learning technologies graduate coordinator.

Communication and monitoring:

Students are given a copy of this process form by their AA&S advisor to

- clarify all application and admissions requirements,
- notify students that they remain undergraduates until all undergraduate degree requirements and their BAAS degree is posted to their transcript,
- notify students that they are not eligible for most graduate perquisites, including teaching and research assistantships and related health insurance, financial aid or graduate award programs until their undergraduate degree is posted, and
- notify students that graduate courses successfully completed as a part of the grad track will be transferred officially as pass/fail credits to their graduate transcript, not factoring into the graduate GPA.

Student progress will be monitored through transcript and academic progress reports to the AA&S program director and the Learning Technologies graduate coordinators after each term, provided by the advisor. *The cumulative GPA must remain above 3.0, with no course grades below C for the student to be considered to be making satisfactory academic progress in the grad track. A student who fails to meet this standard will be removed from the grad track program.*

Required courses

- LTEC 5030 - Foundations of Learning Technologies
- LTEC 5200 - New Technologies of Instruction
- LTEC 5300 - Learning and Cognition
- LTEC 5510 - Technology-Based Learning Environments

All remaining courses for Applied Arts and Sciences, BAAS must be completed.

Project Design and Analysis, BS with grad track option leading to Data Analytics, MS

Application and registration process

- Declared project design and analysis students with
 - a cumulative GPA 3.5 or higher for the last 60 hours completed.
 - 75 or more credit hours completed.

May apply during their junior year.

- The following courses must be completed with a grade of C or higher or be in progress at the time of application:
 - ADTA 4130
 - ADTA 4240
 - ADTA 4250
 - MATH 1710
 - MATH 1720
- Students submit the Toulouse Graduate School's Conditional Admission and Advisor Course Approval Form to the graduate coordinator for the advanced data analytics pathway list above. A signed copy of that form must be submitted to the project design and analysis advisor for official records.
- Students may not take a graduate class until 90 credit hours have been completed and must complete their BS degree within one year of taking their first graduate course within the track in order to have the courses transferred to their graduate plan.
- Students apply for admission to the advanced data analytics MS program through the Toulouse Graduate School prior to the first semester of their final undergraduate year at UNT.

Students selected onto the grad track must complete the courses listed above. Then they will replace the final courses of the analysis and design sequences in the major with two graduate data analytics courses from the master's degree program.

Admission process and standards

To be admitted to the program, students submit the following items to the project design and analysis grad track coordinator:

- Written statement of purpose (500-700 words)
- Resume or CV

The student's current transcript will also be pulled by the advisor to verify GPA and prerequisites. Grad track program admission decisions will be made holistically and in collaboration with the graduate program coordinators. Students will be notified of whether they were selected to be admitted to the grad track program through a letter co-signed by the project design and analysis faculty coordinator and the advanced data analytics graduate coordinator.

Communication and monitoring

Students are given a copy of this process form by their advisor to

- Clarify all application and admissions requirements;
- Notify students that they remain undergraduates until all undergraduate degree requirements and their BS degree is posted to their transcript;
- Notify students that they are not eligible for most graduate perquisites, including teaching and research assistantships and related health insurance, financial aid or graduate award programs until their undergraduate degree is posted; and

- Notify students that graduate courses successfully completed as a part of the grad track will be transferred officially as pass/fail credits to their graduate transcript, not factoring into the graduate GPA.

Student progress will be monitored through transcript and academic progress reports to the project design and analysis faculty coordinator and the advanced data analytics graduate coordinators after each term, provided by the advisor. The cumulative GPA must remain above 3.0, with no course grades below C for the student to be considered to be making satisfactory academic progress in the grad track. A student who fails to meet this standard will be removed from the grad track program.

Required courses, 22 hours

All remaining hours for Project Design and Analysis, BS must be completed.

- ADTA 5230 - Data Analytics II
- ADTA 5340 - Discovery and Learning with Big Data
- ADTA 4130 - Data Analytics and Computational Statistics 1
- ADTA 4240 - Principles of Data Structures, Harvesting and Wrangling
- ADTA 4250 - Principles of Data Visualization for Large Data
- MATH 1710 - Calculus I
- MATH 1720 - Calculus II

Minors

Applied Heritage Management minor

Applied heritage management (HM, also called cultural heritage management) is a multidisciplinary field focused on identifying, preserving, and promoting cultural heritage. Cultural heritage is the tangible and intangible assets of societies that are inherited from the past. HM can include disciplines such as (listed in alphabetical order): archaeology, art history, art, cultural anthropology, dance, economics, environmental studies, history, marketing, museum studies, music, political science, tourism studies, among others. Specialists often work with other stakeholders, such as community members and government organizations.

Required courses, 18 hours

- AMDS 3210 - Public Engagement in Heritage Management
- AMDS 3220 - Heritage Museum Studies
- AMDS 3230 - Heritage Travel
- AMDS 3240 - Heritage Laws and Ethics
- ARCH 2800 - Archaeological Science
- GEOG 3500 - Introduction to Geographic Information Systems

Enology and brewing minor

The Enology and Brewing minor provides a multidisciplinary education in the biological principles underlying wine and beer production and distribution, including hands-on experiential learning about viticulture and fermentation. With the support of local industry partners, this program provides the knowledge base for problem-solving and decision-making in commercial beverage production and management.

Required courses, 18 hours

- AMDS 3900 - Principles of Viticulture
- AMDS 3910 - Principles of Enology
- AMDS 3920 - Principles of Brewing
- AMDS 3940 - Marketing and Distribution of Wine and Craft Beverage
- AMDS 3950 - Applied Business Fundamentals for Wine and Craft Beverage
- HMGT 4300 - Survey of Beverages in the Hospitality Industry *

*A course substitution will be allowed from an approved list of courses for students under the age of 21 or otherwise unable to be in contact with alcoholic beverages.

Undergraduate Academic Certificates

Applied Heritage Management certificate

Required Hours (12 sch): Applied Heritage Management (HM, also called cultural heritage management) is a multidisciplinary field focused on identifying, preserving, and promoting cultural heritage. Cultural heritage is the tangible and intangible assets of societies that are inherited from the past. HM can include disciplines such as (listed in alphabetical order): archaeology, art history, art, cultural anthropology, dance, economics, environmental studies, history, marketing, museum studies, music, political science, tourism studies, among others. Specialists often work with other stakeholders, such as community members and government organizations.

Required courses, 12 hours

- AMDS 3210 - Public Engagement in Heritage Management
- AMDS 3220 - Heritage Museum Studies
- AMDS 3230 - Heritage Travel
- AMDS 3240 - Heritage Laws and Ethics

Enology and Brewing certificate

Students who earn the Enology and Brewing Certificate will earn a multidisciplinary education in the principles underlying wine and beer production and distribution, including hands-on project-based learning in viticulture and fermentation. With the support of local industry partners, students will also have the opportunity to develop a knowledge base for problem-solving and decision-making in the fields of commercial beverage production or business management.

Requirements, 9 hours

- AMDS 3900 - Principles of Viticulture
- AMDS 3910 - Principles of Enology
- AMDS 3920 - Principles of Brewing

Elective, 3 hours

Choose one:

- AMDS 3940 - Marketing and Distribution of Wine and Craft Beverage
- AMDS 3950 - Applied Business Fundamentals for Wine and Craft Beverage
- HMGT 4300 - Survey of Beverages in the Hospitality Industry

Faculty

Mission

To prepare global business leaders and scholars in an intellectually stimulating and engaging community through preeminent teaching, research and service.

Vision

To be an agile institution that transcends national and international standards of excellence in research and education.

Programs of study

The college offers programs leading to the Bachelor of Business Administration (BBA) or Bachelor of Science (BS). A minimum of 50 percent of the business credit hours required for any undergraduate business degree must be completed at UNT. BBA and BS degree programs are offered through the following departments:

G. Brint Ryan College of Business

- BBA — Business Integrated Studies
- BBA — Business Integrated Studies with grad track option leading to Business Administration, MBA
- BBA — Business Integrated Studies with grad track option leading to Management, MBA
- BS — General Business
- BS — General Business with grad track option leading to Business Administration, MBA
- BS — General Business with grad track option leading to Management, MBA

Department of Accounting

- BBA — Accounting
- BS — Accounting (BS/MS — dual-degree program)

Department of Finance, Insurance, Real Estate and Law

- BBA — Economics
- BBA — Economics with grad track option leading to Business Administration, MBA

- BBA — Economics with grad track option leading to Management, MBA
- BBA — Finance
- BBA — Finance with a grad track option Business Administration, MBA
- BBA — Finance with a grad track option leading to Finance, MS
- BBA — Finance with a grad track option leading to Management, MBA
- BBA — Financial Planning
- BBA — Financial Planning with grad track option leading to Business Administration, MBA
- BBA — Financial Planning with grad track option leading to Management, MBA
- BBA — Real Estate
- BBA — Real Estate with a grad track option leading to Business Administration, MBA
- BBA — Real Estate with a grad track option leading to Management, MBA
- BBA — Real Estate with a concentration in Residential Property Management
- BBA — Real Estate with a concentration in Residential Property Management with grad track option leading to Business Administration, MBA
- BBA — Real Estate with a concentration in Residential Property Management with grad track option leading to Management, MBA
- BBA — Risk Management and Insurance
- BBA — Risk Management and Insurance with grad track option leading to Business Administration, MBA
- BBA — Risk Management and Insurance with grad track option leading to Management, MBA

Department of Information Technology and Decision Sciences

- BBA — Business Analytics
- BBA — Business Analytics with grad track option leading to Business Analytics, MS
- BS — Business Computer Information Systems
- BS — Business Computer Information Systems with grad track leading to Information Systems and Technologies, MS

Department of Management

- BBA — Entrepreneurship and Enterprise Management
- BBA — Entrepreneurship and Enterprise Management with grad track option leading to Business Administration, MBA
- BBA — Entrepreneurship and Enterprise Management with grad track option leading to Management, MBA
- BBA — Human Resource Management
- BBA — Human Resource Management with grad track option leading to Business Administration, MBA
- BBA — Human Resource Management with grad track option leading to Management, MBA
- BBA — Management
- BBA — Management with grad track option leading to Business Administration, MBA
- BBA — Management with grad track option leading to Management, MBA
- BBA — Sport Entertainment Management
- BBA — Sport Entertainment Management with grad track option leading to Sport Entertainment Management, MBA

Department of Marketing

- BBA — Marketing
- BBA — Marketing with grad track option leading to Business Administration, MBA
- BBA — Marketing with grad track option leading to Management, MBA
- BBA — Marketing with a concentration in Professional Selling
- BBA — Marketing with a concentration in Professional Selling with grad track option leading to Business Administration, MBA
- BBA — Marketing with a concentration in Professional Selling with grad track option leading to Management, MBA

Department of Supply Chain Management

- BS — Supply Chain Management

Accreditation

The college is accredited by the AACSB International—The Association to Advance Collegiate Schools of Business (777 South Harbour Island Blvd., Suite 750, Tampa, FL 33602; 813-769-6500) at both the undergraduate and graduate levels.

G. Brint Ryan College of Business Degree Requirements

Degree requirements and the University Core Curriculum

The University of North Texas core curriculum is listed in the University Core Curriculum requirements in the Academic policies section of this catalog. Each program within the G. Brint Ryan College of Business requires specific courses to satisfy particular degree requirements (see Bachelor of Business Administration and specific BS and BBA degree sections of this catalog). Occasionally a course required for a degree may also satisfy a requirement of the University Core Curriculum. In addition to taking the required course, a student may elect to take a different course from among those available to fulfill that core requirement; doing so, however, may add to the total number of hours required for the degree. Students who have questions regarding degree requirements and core requirements should consult an academic advisor.

G. Brint Ryan College of Business tiered academic progression plan and academic standards

All students pursuing a BBA or BS degree at RCOB must follow the tiered academic progression plan and conform to the academic standards outlined below.

Undergraduate tiered academic progression plan and admission policy

Tier One: Level One Pre-business (PBUS)

1. All students entering the G. Brint Ryan College of Business, whether for a BBA or BS degree, are admitted under pre-business (PBUS). This designation will include all new, transfer and continuing students who have not yet declared an official Ryan College of Business major. In addition to the requirements listed below, all pre-business students must have a 2.0 UNT GPA to move from Tier One: Level 1 to Tier One: Level 2 and all pre-business prerequisite courses require a minimum grade of C.
2. A PBUS student must have the following:
 - a) Completion of three courses from the following quantitative pre-business prerequisite courses: college-level math, ACCT 2010, ACCT 2020, DSCI 2710, ECON 1100, ECON 1110;
 - b) Earn a minimum of 2.66 GPA (example of two Bs and one C) in the three courses completed under (a) above; and
 - c) It is recommended that BUSI 1200 be completed (with a required C or higher) prior to progressing to Tier One: Level 2.
3. Once the above eligibility requirements are met, students must meet with an academic advisor to be changed officially to a Business Undergraduate (BUND) student (Level Two).
4. Students who are unable to progress to BUND status at the completion of 45 UNT attempted hours (this includes all attempts of all UNT courses) are subject to dismissal from the Ryan College of Business. Advisors will consult with each student prior to and at the time of dismissal and will refer to resources and other UNT programs which can better serve the students' needs.

5. UNT continuing students changing to PBUS from another UNT major, and students transferring from another institution with 45 or more hours, must progress to BUND within two semesters or will be subject to dismissal from the Ryan College of Business.

Tier One: Level Two Business Undergraduate (BUND)

1. BUND students must meet the following requirements to progress to Tier Two (Declared BBA/BS major).
 - a) Completion of at least 45 semester hours;
 - b) Completion of the following pre-business and communication courses with a minimum grade of C and a pre-business GPA of 2.7 on these nine courses (or equivalents): ACCT 2010 and ACCT 2020; BCIS 2610; DSCI 2710; ECON 1100 and ECON 1110; ENGL 1310; ENGL 1320 or TECM 2700 (TECM 2700 is required for BS/MS accounting); and MATH 1190 (preferred) or MATH 1710.
 - c) Completion of BUSI 1200 with a C or higher; and
 - d) Possess a 2.0 UNT GPA to file a degree plan for BBA and BS degrees in the G. Brint Ryan College of Business
2. Once the above eligibility requirements are met, BUND students must meet with an academic advisor to file for an official degree plan and move to Tier Two.

Tier One: Level 2 PBUS and BUND students are restricted to lower-level (1000/2000) business courses.

Tier Two: Declared BBA/BS major with a chosen professional field in Business

1. Students who meet all requirements for Tier Two receive clearance into upper level (3000/4000) business courses (business foundation and professional field) after meeting with an advisor to file for the official degree plan (BBA or BS with declared professional field).
2. Students in Tier Two are strongly encouraged to meet with their departmental advisor.
3. Tier Two students must meet all degree and graduation requirements as outlined under G. Brint Ryan College of Business Academic Standards and UNT.
4. Students must meet all prerequisites for upper-level business courses as stated in the current catalog.
5. Tier Two students must apply for graduation by the deadline posted in the Academic Calendar.

G. Brint Ryan College of Business academic standards

1. Students must complete the tiered academic progression plan as outlined above.
2. The G. Brint Ryan College of Business will not grant upper-division (3000-4000 level) degree credit for any transfer course taken at the lower division. Upper-division course work transferred from a regionally accredited four-year institution will be evaluated on an individual course basis to determine applicable degree credit. As a rule, upper division coursework taken at non-AACSB accredited institutions cannot be applied to satisfy upper-division business course requirements.
3. A grade of C or above must be earned in each business foundation course and each professional field or supporting field course completed in residence or transferred to UNT.
4. Degree progress and major dismissal:
 - Students who have been accepted to a business degree program must maintain satisfactory progress. Declared business majors are subject to dismissal from a business degree program and may not be permitted to enroll for additional courses in that major if they receive any combination of grades of D or F in two attempts of the same course in the professional field and supporting courses in their degree plan.
5. Academic requirements for graduation with a BBA or BS from the G. Brint Ryan College of Business include:
 - A minimum of 2.0 UNT cumulative GPA (all courses completed at UNT); and
 - A minimum 2.0 overall GPA (combined UNT and transfer GPA).
6. Individual departments may have higher graduation and/or entrance standards (see departmental sections of catalog).

Course listings

Individual courses of instruction are subject to change or withdrawal at any time and may not be offered each term/semester or every year. Any course may be withdrawn from current offers if the number of registrants is too small to justify conducting it.

Enrollment in advanced courses requires successful completion of the pre-business requirements.

WARNING: It is the student's responsibility to meet all course prerequisites listed in the current catalog prior to enrollment in any course.

Courses numbered 4900-4910 are offered under limited circumstances to advanced undergraduate students who are capable of developing a problem independently. These courses require approval by the department chair. A project is chosen by the student and instructor, developed through conferences and approved activities under the direction of the instructor and may require a term paper. These courses are not open to graduate students.

All Courses of Instruction are located in courses descriptions.

Academic advising

Undergraduate academic advising is available through the RCOB Undergraduate Programs Office. Through a collaborative relationship, RCOB advising staff assists students through the tiered progression process. Advisors support students in developing and accomplishing personal educational goals as well as advise on matters relating to selecting degree programs and courses, preparing degree plans, obtaining advising clearance forms, changing majors, and understanding policies and procedures. Departmental advisors are available to serve the needs of RCOB students in Tier II status who have declared a specific major within RCOB on matters pertaining to professional and supporting field courses required for a specific RCOB degree as well as career development.

Student Services and Resources

RCOB Undergraduate Programs Office

The RCOB Undergraduate Programs Office serves undergraduate students as they progress toward timely degree completion - from the time they are admitted to the RCOB to graduation. Our services include undergraduate academic advising, student affairs and services, student engagement, professional development services, and prospective student services. Our services are available throughout the year in the Business Leadership Building, Room 110.

RCOB academic advisors assist students through the tiered progression process, support students in developing and accomplishing personal educational goals as well as advise on matters relating to selecting degree programs and courses, preparing degree plans, obtaining advising clearance forms, changing majors, and understanding policies and procedures. We also review and apply transfer credits and monitor graduation requirements. Our office serves as the generalists for each degree in the undergraduate curriculum and has advisors trained to work uniquely with students. Once a student is declared in a major, they should also connect with a departmental advisor. Undergraduate departmental advisors in each department must be consulted concerning any changes in the professional or supporting field requirements and offer expertise in professional and career growth and development.

While RCOB advising staff and departmental advisors offer academic advice and assistance to students, the students are expected to take responsibility for their education and personal development. Students must know and abide by the academic and disciplinary policies given in the undergraduate catalog. Students must also know and meet the requirements of their selected degree program, including the University Core Curriculum; the RCOB tiered academic progression plan and academic standards outlined above; pre-business, business foundation, professional development requirements; professional field and supporting field requirements for specific RCOB BBA or BS degrees (see Bachelor of Business Administration and specific BS and BBA degree sections of this catalog). Students must enroll in courses appropriate to the program, meet prerequisites and take courses in the proper sequence to ensure orderly and timely degree progression. Students should seek advice from college

or departmental advisors in their major about degree requirements and other college and university policies when necessary. Students must also know and adhere to all college and university deadlines. Students will not be relieved of their responsibility to know the policies, deadlines and business practices of the university on the grounds that they were not told. If students have questions regarding these materials, it is the university's expectation that the student will consult their academic advisor for guidance and resolution.

Our student affairs and services team assists students who may encounter difficulties during their academic career. This may include instances where extenuating circumstances lead them to request adding a course after registration, requesting a late drop or a backdated withdrawal from a term, or when students may experience certain insecurities that are prohibiting them from being successful. These are reviewed internally by our team and may require additional review by a university committee.

Engagement outside of the classroom is vital to student success and is key in gaining soft skills that are necessary for career success. We offer various programs, including 26 business-focused student organizations, our Professional Leadership Program, Student Ambassadors, the Distinguished Speaker Series, and a peer mentor program for first-year students.

Professional development and career-readiness is a major focus for our college. As part of their degree program, all business students are required to complete professional development courses that cover topics such as business communication, career/major exploration, resume writing, interviewing, networking and Excel certification. Business students have an array of opportunities to attend events focused on career preparation. Our in-house Career Center offers dozens of workshops, webinars and trainings to assist students in their journey toward a successful career.

Our recruitment team works collaboratively with the university's Admissions Teams to reach out and provide information assistance to prospective business students to attend UNT. They oversee outreach initiatives including tours of the Business Leadership Building, College Day programming and Business Leadership Academy. They build partnerships with community colleges and high schools to make the transition to UNT a seamless one. Prospective students are invited to meet with our recruiter to learn more about our programs and requirements.

G. Brint Ryan College of Business Information Technology Services

The Business Information Technology Services department manages Business Leadership Building IT infrastructure and supports the IT needs of the G. Brint Ryan College of Business students, faculty, and staff, providing access to desktop computing, research computation space, and VMware-based remote learning environment.

The G. Brint Ryan College of Business has two types of virtual labs for students:

VMware Virtualization access is designed for the specialized business students that can be accessed anywhere at any time. The G. Brint Ryan College of Business specialized courses include course-related software for such courses as Introduction to Database Applications, Distributed Systems, and Teleprocessing; Data Communications and Networking; Information Resource Management; Decision Support Systems; Visual Display; and Fundamentals of Information Technology Security. Professors can schedule laptops that are delivered and enabled for wireless to support in-class tests and quizzes to standardize the experience. Information for the VMware Virtualization system can be found at RCoB Virtual Lab

General Student course software is accessed through the Campus Citrix Streaming Applications and Virtual Desktop service. Information for the Citrix Streaming and Virtual Desktop system can be found at: UNT Virtual Lab.

The Business Leadership Building has seven team rooms scheduled through a QR code on the door and the library reservation system. Several public access charging stations are provided on the ground level of the Business Leadership Building for walk-up device charging and personal laptop use.

The Business Information Technology Services department of the G. Brint Ryan College of Business is housed in the Business Leadership Building. It comprises the Senior Associate Dean, an IT manager, a desktop/computer lab manager, a desktop/computer lab technician, two system administrators, and two web developers. A technical support team of part-time student assistants aids the full-time staff in software installations, troubleshooting and working with faculty and staff when problems or questions arise concerning software and hardware.

All physical desktops, printing, and short or long-term laptop checkout needs should be directed to the Willis Library.

Virtual Labs

Citrix Virtual Lab Remote access to applications is provided by our UNT online virtual lab powered by Citrix. Find this lab here: <https://myuntlab.unt.edu/>

Beta Gamma Sigma

This national honorary society of business administration students was founded in 1913. The UNT chapter was established in 1962. The primary objective of Beta Gamma Sigma is to encourage and honor high academic achievement by students of business and management through chapters in all American Assembly of Collegiate Schools of Business accredited schools. Membership is a signal honor and is limited to outstanding students who show promise of success in the field of business and who rank in the upper 10 percent of their junior, senior or graduate class.

Majors

Bachelor of Business Administration

The following requirements must be satisfied for a Bachelor of Business Administration.

Common BBA degree requirements

G. Brint Ryan College of Business (RCOB) offers a BBA degree in multiple professional fields. A term BBA degree program is used here to refer to specific BBA professional fields. This section describes degree requirements that are common for all BBA degree programs. Professional Field and Supporting Field course requirements are outlined in individual BBA degree program sections.

Admission to program and tiered progression

All students entering the G. Brint Ryan College of Business for a BBA degree are admitted under the tiered academic progression plan and admission policy. Detailed information regarding this plan is described in the Tiered Progression Plan of the G. Brint Ryan College of Business. For academic standards and degree progression see the G. Brint Ryan College of Business.

Hours required and general/college requirements

Students must complete a minimum of 120 semester hours, of which 42 must be advanced, and fulfill all degree requirements for the Bachelor's degree as specified in the University Core Curriculum in the Academics section of this catalog, as well as the Bachelor's degree requirements outlined in the G. Brint Ryan College of Business.

University core and BBA communication requirements

University Core Curriculum requirements, 42 hours

Students must fulfill all degree requirements for the Bachelor's degree as specified in the University Core Curriculum in the Academics section of this catalog.

Some courses required for the BBA degree may also satisfy a requirement of the University Core Curriculum. A student may elect to take a different course from among those available to fulfill that core requirement; doing so, however, may add to the total number of hours required for the BBA degree.

BBA communication requirements, 9 hours*

Students pursuing a BBA degree must complete one of the following combinations of courses as part of their University Core requirement. This combination can be used to fulfill University Core communication and University Core option requirements. Students choosing to fulfill their University Core utilizing different courses are still required to complete one of the following combination of courses.

Combination A:

- ENGL 1310 - First-Year Writing I (with a grade of C or higher)
- ENGL 1320 - First-Year Writing II
or
- TECM 2700 - Technical Writing (preferred), (with a grade of C or higher)
- COMM 1010 - Introduction to Communication

OR

Combination B:

- ENGL 1310 - First-Year Writing I (with a grade of C or higher)
- ENGL 1320 - First-Year Writing II (with a grade of C or higher)
- TECM 2700 - Technical Writing

BBA communication requirements, along with pre-business requirements courses constitute the basis for tiered progression in the BBA degree as outlined in the G. Brint Ryan College of Business Degree Requirements.

The first two courses in the BBA Communication requirements need to be completed with a grade C or higher before a student can declare to pursue a specific BBA degree program.

*Communication requirement courses can be used to fulfill University Core requirements.

Pre-business requirements, 21 hours**

Pre-business requirements, along with BBA communication requirements constitute the basis for tiered progression in the BBA degree as outlined in the G. Brint Ryan College of Business Degree Requirements.

The following courses must be completed with a grade of C or higher.

** Certain Pre-business courses can be used to fulfill university core requirements.

- ACCT 2010 - Accounting Principles I (Financial Accounting)
- ACCT 2020 - Accounting Principles II (Managerial Accounting)
- BCIS 2610 - Introduction to Computers in Business
- DSCI 2710 - Data Analysis with Spreadsheets **
- ECON 1100 - Principles of Microeconomics **
- ECON 1110 - Principles of Macroeconomics **
- MATH 1190 - Business Calculus **

- or
- MATH 1710 - Calculus I **

Professional Development requirements, 3 hours

A series of one-hour professional development courses, BUSI 1200, BUSI 3100 and BUSI 3200 (or alternative) are designed to help students with planning their business careers and building career-relevant skills.

*BUSI 1200 is required for progression to the Tier II status of tiered progression in the BBA and BS degree as outlined in the G. Brint Ryan College of Business requirements. BUSI 1200 is expected to be completed along with pre-business requirements.

**BUSI 3100 is a co-requisite with DSCI 3710 or DSCI 3870 and is expected to be completed along with business foundation requirements.

***The third professional development requirement can be satisfied by designated departmental professional development courses. See individual BBA degree program sections.

- BUSI 1200 - Professional Development I-Strategies for Business (with grade of C or higher)
- BUSI 3100 - Professional Development II-Critical Thinking and Decision Making in Business (with grade of C or higher)
- BUSI 3200 - Professional Development III or departmental equivalent (with grade of C or higher)

Business foundation requirements, 24 hours

All students pursuing a BBA degree must complete the following business foundation courses.

- BCIS 3610 - Basic Information Systems
- BLAW 3430 - Legal and Ethical Environment of Business
- MGMT 3660 - Contemporary Business Writing and Presentation Skills
- MGMT 4940 - Strategic Management *
- DSCI 3710 - Business Statistics with Spreadsheets
- FINA 3770 - Finance
- MGMT 3720 - Organizational Behavior
- MKTG 3650 - Foundations of Marketing Practice

Note

*MGMT 4940. (All business foundation courses and professional development requirements must be completed with a grade of C or better prior to taking this course [see lists above]; senior standing required; must be taken during the last term/semester of course work.)

Professional field and supporting field requirements, hours vary by BBA degree program

See individual BBA degree program sections. Professional and supporting field courses are expected to include the following common BBA requirement.

International requirement, 3 hours

International requirements for the degree can be fulfilled with one of the following courses (see individual BBA degree program sections to determine which of the following courses is required for your specific BBA degree program):

- BCIS 4730 - International Issues of Information Technology
- BLAW 4480 - International Business Law
- FINA 4500 - International Finance
- MGMT 4660 - International Management Perspectives
- MKTG 4280 - Global Marketing Issues and Practice
- SENM 4230 - International Brand Strategies in the Sport Entertainment Industry

Electives

See individual BBA degree program sections. Hours required for electives may vary based on course placement or University Core Requirement course selection. Some BBA degree programs may designate specific courses in place of elective hours (see BBA degree program sections). Students are responsible for completing the total minimum hours required for the degree. Only free electives may be taken under the pass/no pass option.

Other requirements

- A candidate for the degree must complete 33 hours of business administration courses in residence, of which 15 hours must be in the professional field of study.
- The G. Brint Ryan College of Business will not grant upper-division (3000–4000 level) degree credit for any transfer course taken at the lower division. Upper-division course work transferred from a regionally accredited four-year institution will be evaluated on an individual course basis to determine applicable degree credit.
- Registration for any junior- or senior-level course should be authorized by an advising clearance form or a formal degree plan.
- The applicability to a degree plan of all credits being transferred and/or awarded by placement or credit by examination must be determined in the dean's office either prior to enrollment at UNT or during the first term/semester of residence.
- It is the student's responsibility to meet all course prerequisites listed in the current catalog prior to enrollment in any course.
- A grade of C or above must be earned on each business administration foundation course completed in residence or transferred to UNT.
- Individual departments may have higher graduation and/or entrance standards (see departmental sections of catalog).
- An application for a formal degree plan must be submitted after 60 hours of course work (including the pre-business requirements) have been completed.
- Additional academic standards and requirements are outlined in the G. Brint Ryan College of Business.

Business Integrated Studies, BBA

A Bachelor of Business Administration in business integrated studies helps you develop the capabilities, knowledge and character needed for a successful business career.

The G. Brint Ryan College of Business offers a Bachelor of Business Administration degree with a professional field in business integrated studies. Students pursuing the professional field in business integrated studies have the option to pursue a dual degree with the Burgundy School of Business in Dijon, France. See your advisor for more information.

This degree has a required supporting field in business administration. This degree is designed to prepare students for a variety of generalist positions in business and industry. Some flexibility is allowed to accommodate the student's career objectives.

General requirements for the BBA are listed in the "University Core Curriculum," "Requirements of this catalog" in the Academic policies section of this catalog and under "Bachelor of Business Administration" in the G. Brint Ryan College of Business.

In addition to the University Core Curriculum, Pre-Business and Business Foundation requirements, students must complete the following professional and supporting field courses. A grade of C or better must be earned in each professional field and supporting course completed in residence or transferred to UNT.

Professional field

- 12 hours from Business Subject Area 1 (courses must be pre-approved by program advisor)
- 12 hours from Business Subject Area 2 (courses must be pre-approved by program advisor)
- 6 hours of Business Integrated Study electives (3000/4000 level business courses)

*Some Subject Areas contain more than 12 hours. This will not increase the number of hours required for the degree, but will reduce the number of free electives

Additional requirements

- The above hours must encompass a total of at least three business subject areas
- 3 hours must be completed from the creation of goods and services requirement (DSCI 3870, LSCM 3960, OPSM 3830, ECON 4140 or other approved creation of goods and services courses)
- 3 hours must be completed from international business (MKTG 4280, MGMT 4660, FINA 4500 or other approved international business courses)
- At least 15 of the 30 hours must be completed at the 4000 level

Academic standards

Refer to "G. Brint Ryan College of Business Academic Standards" in the G. Brint Ryan College of Business section and "Bachelor of Business Administration" for General Degree Requirements.

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

Year 1

Semester 1		Semester 2

General Business, BS

The BS in general business is a flexible program designed for students who may have earned an Associate's degree in an area outside of business but wish to complete a bachelor's degree in business. The BS in general business provides a solid foundation of essential business skills in the functional areas of business (accounting, finance, marketing and management) that can enhance previous areas of study.

Hours required and general/college requirements

A minimum of 120 semester hours, of which 36 must be advanced, and fulfillment of degree requirements for the Bachelor of Science degree as specified in the University Core Curriculum in the Academic policies section of this catalog and the G. Brint Ryan College of Business requirements.

Major requirements

In addition to completion of the University Core Curriculum (42 hours), students must complete the following:

Pre-business requirements, 21 hours

Students must complete the following courses with a grade of C or higher:

- ACCT 2010 - Accounting Principles I (Financial Accounting)
- ACCT 2020 - Accounting Principles II (Managerial Accounting)
- BCIS 2610 - Introduction to Computers in Business
- DSCI 2710 - Data Analysis with Spreadsheets
- ECON 1100 - Principles of Microeconomics

- ECON 1110 - Principles of Macroeconomics
 - MATH 1190 - Business Calculus
or
 - MATH 1710 - Calculus I
- All of the above courses can be substituted with an approved course if equivalent course is completed prior to enrollment at UNT.**

Professional development courses, 3 hours

- BUSI 1200 - Professional Development I-Strategies for Business
- BUSI 3100 - Professional Development II-Critical Thinking and Decision Making in Business
or
- BUSI 3105 - Professional Development II - Critical Thinking and Decision Making in Business/Coursera
May only take one course BUSI 3100 or BUSI 3105
- BUSI 3200 - Professional Development III

Basic business foundation requirements, 21 hours

- BCIS 3610 - Basic Information Systems
- BLAW 3430 - Legal and Ethical Environment of Business
- MGMT 3660 - Contemporary Business Writing and Presentation Skills
- DSCI 3710 - Business Statistics with Spreadsheets
- FINA 3770 - Finance
- MGMT 3720 - Organizational Behavior
- MKTG 3650 - Foundations of Marketing Practice

Advanced level business courses, 15 hours

- 12 hours of upper-level business courses from approved list
- Applied Business Project Course or Internship (3 hrs)

Electives

Minimum of 18 hours of free electives or enough free elective hours to reach required total of 120 hours for the degree. Number of electives varies depending on course selection for University Core Curriculum.

Other requirements

- A candidate for the degree must complete 33 hours of business administration courses in residence, of which 15 hours must be in the professional field of study.
- The G. Brint Ryan College of Business will not grant upper-division (3000–4000 level) degree credit for any transfer course taken at the lower division. Upper-division course work transferred from a regionally accredited four-year institution will be evaluated on an individual course basis to determine applicable degree credit. As a rule, upper

division coursework taken at non-AASCB accredited institutions cannot be applied to satisfy upper division business course requirements.

- Registration for any junior- or senior-level course should be authorized by an advising clearance form or a formal degree plan.
- The applicability to a degree plan of all credits being transferred and/or awarded by placement or credit by examination must be determined in the dean's office either prior to enrollment at UNT or during the first term/semester of residence.
- It is the student's responsibility to meet all course prerequisites listed in the current catalog prior to enrollment in any course.
- A grade of C or above must be earned on each business administration foundation course completed in residence or transferred to UNT.

Grad Track Options

Business Integrated Studies, BBA with grad track option leading to Business Administration, MBA

Admission requirements and program policies

Admission requirements

After completing at least 75 credit hours of undergraduate coursework, students are eligible for acceptance in the grad track option. In this grad track option, the student will take nine (9) credit hours of graduate courses while completing an undergraduate degree. After earning the undergraduate degree, these credit hours can be counted toward the MBA degree.

Prior to registering for these courses, the student must be admitted to the grad track option and obtain approvals from the undergraduate and graduate coordinators. Students will be required to hold a 3.5 GPA at the time of application and be identified by the department as an exceptional candidate for the grad track pathway.

Final admission

- a 3.5 GPA (will qualify the student for a test waiver)
- successful completion of all grad track pathway courses with a GPA of 3.5 or higher
- 3 letters of recommendation
- essay
- resume
- official application submitted and approved by the Toulouse Graduate School

Program policies

Students meeting the grad track requirements will be notified to start the accelerated program after completing 90 credit hours of coursework toward their undergraduate degree program. This official notification is required for taking graduate-level courses.

Undergraduate students who have been accepted into a grad track program should complete all of the bachelor's degree requirements and graduate within one academic year of beginning graduate coursework.

Program requirements

Students may take 9 hours from the following:

- BCIS 5150 - Leveraging Information Technology for Business (BCIS 3610 - Basic Information Systems)
- MGMT 5140 - Organizational Behavior and Analysis (MGMT 3720 - Organizational Behavior)
- MGMT 5710 - Seminar in Business Ethics and Social Responsibility (MGMT 3880 - Business Ethics and Social Responsibility)
- MKTG 5150 - Marketing Management (MKTG 3650 - Foundations of Marketing Practice)

Note

All remaining courses for the Business Integrated Studies, BBA must be completed.

Minors

Business Foundations minor

The business foundations minor is designed to provide a foundation in business concepts, operations and practice. The program consists of six courses (18 hours) that may be taken by non-business students in good academic standing.

Students may select from one of two tracks within the minor but may not combine courses across tracks.

General prerequisites for both tracks

Completion of the university's core mathematics and economics requirements. ACCT 2010 and ACCT 2020 are prerequisites for all upper-division (3000- and 4000-level) business courses. ECON 1110 is strongly recommended.

General business track

This track is directed toward students who desire a broad grounding in the various business disciplines. Required courses include:

- ACCT 2010 - Accounting Principles I (Financial Accounting)
- ACCT 2020 - Accounting Principles II (Managerial Accounting)
- FINA 3770 - Finance

- MKTG 3650 - Foundations of Marketing Practice
or
- MKTG 3651 - Foundations of Marketing Practice for Non-Business Majors

- MGMT 3720 - Organizational Behavior
or
- MGMT 3721 - Essentials of Organizational Behavior for Non-Business Majors
or
- MGMT 3820 - Management Concepts
- Three hours chosen from any 3000- or 4000-level business courses (subject to all course prerequisites)

MBA preparation track

This track is designed for students who are considering continuing their studies in an MBA program. The courses on the list will meet many of the leveling requirements required of non-business majors entering an MBA program. In addition to those listed below, students wishing to pursue the MBA program should have also completed calculus and micro-and macro-economics (these courses are not built into this minor).

Required courses for the track include:

- ACCT 2010 - Accounting Principles I (Financial Accounting)
- ACCT 2020 - Accounting Principles II (Managerial Accounting)
- BLAW 3430 - Legal and Ethical Environment of Business

Plus three courses chosen from

- BCIS 3610 - Basic Information Systems
- DSCI 3710 - Business Statistics with Spreadsheets
- FINA 3770 - Finance

- MKTG 3650 - Foundations of Marketing Practice
or
- MKTG 3651 - Foundations of Marketing Practice for Non-Business Majors
- OPSM 3830 - Operations Management

Note

BCIS 3610, DSCI 3710 and OPSM 3830 have prerequisites not included in the minor.

Undergraduate Academic Certificates

International Business certificate

Undergraduate students enrolled in the G. Brint Ryan College of Business may document their training in international business by obtaining a certificate in international business.

Students must complete 12 semester hours of organized business courses as specified in Part 1 below and must present evidence of proficiency in a foreign language as specified in Part 2.

Part 1: International core, 12 hours

Select four courses from the following list (minimum grade of C required in each course):

- ACCT 4420 - International Accounting
- BLAW 4480 - International Business Law
- BUSI 4700 - Topics in International Business Practices and Policies
- ECON 4850 - International Trade
- FINA 4500 - International Finance
- LSCM 4360 - Global Alliances and International Supply Chain Management
- MGMT 4660 - International Management Perspectives
- MKTG 4280 - Global Marketing Issues and Practice

Note

A course taken through a G. Brint Ryan College of Business–sponsored study abroad program may substitute for up to 3 hours of the international core.

Students may be able to satisfy the international core within the course requirements of a concentration by using these international core courses as electives, subject to approval by the academic advisor. Thus, international core courses completed for the certificate need not necessarily increase the total hours required for graduation.

Part 2: Foreign language requirement

Students must present evidence of minimum proficiency in a foreign language. This requirement may be satisfied in either of these ways:

1. Completing formal foreign language study through the level of LANG 1020 or its equivalent.

2. Submitting evidence of foreign language proficiency through the level of LANG 1020. For example, students may document proficiency with results from a foreign language course above the level of LANG 1020 or with the College Level Examination Program (CLEP) subject examinations. These examinations are administered by the College Board.

Courses are available in Business French, German and Spanish, and students may also earn a Professional French certificate (INACTIVE) (deleted 10/2/24 UCC meeting) or Professional Spanish certificate. For more information, visit the Department of World Languages, Literatures and Cultures page in this catalog.

Ananth Seetharaman, Chair

Faculty

Mission in brief

To advance the knowledge and ethical practice of accounting, and promote technical, professional and personal skills to a diverse student body to excel in a technology-dependent global economy.

The mission of the doctoral program in accounting at the University of North Texas is to prepare students to conduct discipline-based research, appreciate a variety of research methods and engage in quality instructional activities.

Statement of commitment

The faculty of the Department of Accounting is committed to extending the body of knowledge in the areas of both discipline-based and practice-oriented research and to participating in the intellectual discourse in the field in general. The faculty is further committed to the dissemination of knowledge through high-quality teaching and other curricula-related endeavors. The faculty values service activities that contribute to the advancement of the profession and the academy and that provide opportunities for professional interaction and faculty development.

The department serves a diverse student body that is largely nontraditional and employed. The faculty is committed to providing an accommodating and supportive learning environment, including flexible class scheduling, office hours, modes of student-teacher communication and course delivery.

The faculty of the department is committed to preparing students for career development, life-long learning and a global work environment. The faculty strives to produce graduates who are technically competent, think independently, critically appraise

situations, act in a responsible and ethical manner, and contribute positively and cooperatively to their employers and communities.

Majors

Accounting, BBA

In the BBA program with a professional field in accounting, students learn to appraise situations critically, act responsibly and ethically, as well as become strategic thinkers and problem-solvers. Our "learn today, apply tomorrow" classroom philosophy is achieved within an accommodative and supportive learning environment.

The following requirements must be satisfied for a Bachelor of Business Administration with a professional field in accounting:

Bachelor of Business Administration

The department offers the Bachelor of Business Administration with a professional field in accounting. General requirements for the BBA are listed in the University Core Curriculum and the University Core Curriculum Requirements in the Academic policies section and under Bachelor of Business Administration in the G. Brint Ryan College of Business.

Professional field in accounting, 25 hours

The following courses are required for the professional field in accounting:

- ACCT 3110 - Intermediate Accounting I (see note below)
- ACCT 3120 - Intermediate Accounting II
- ACCT 3270 - Cost Accounting
- ACCT 3405 - Professional Development
- ACCT 4100 - Accounting Systems
- ACCT 4140 - Advanced and Not-for-Profit Accounting Principles
- ACCT 4300 - Federal Income Taxation
- ACCT 4320 - Federal Income Taxation II
- ACCT 4400 - Auditing — Professional Responsibilities

Note: All students entering ACCT 3110 (Intermediate Accounting I) are required to complete and pass an entrance exam. This policy applies to both UNT students and transfer students. The exam will be administered at least three times a year and the student must obtain a passing grade of at least 70%. The exam will be composed by the full-time financial accounting faculty and administered by the Department of Accounting.

Approved supporting courses, 12 hours

The following courses selected by the student and approved in advance by the faculty advisor include one 3 hour course from each group.

International business course, 3 hours

Choose one from the following:

- BCIS 4730 - International Issues of Information Technology

- BLAW 4480 - International Business Law
- FINA 4500 - International Finance
- MGMT 4660 - International Management Perspectives
- MKTG 4280 - Global Marketing Issues and Practice

Approved elective, 3 hours

- ACCT 4430 - Accounting Research and Data Analysis
- or other approved elective

Advanced economics, 3 hours

Any 3000- or 4000-level ECON course.

Creation of goods and services, 3 hours

Choose from:

- DSCI 3870 - Management Science
- LSCM 3960 - Logistics and Supply Chain Management
- OPSM 3830 - Operations Management

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

Year 1

Semester 1		Semester 2	
ENGL 1310 - First-Year Writing I	3 hours	BCIS 2610 - Introduction to Computers in Business	3 hours

Total	15 hours	Total	15 hours

Accounting, BS (dual degree; may not be earned without completion of the MS)

The Bachelor of Science with a major in accounting is offered as part of a dual-degree program with the Master of Science with a major in accounting or the Master of Science with a major in taxation.

Dual Degrees

Accounting, BS and MS

Applies to Bachelor of Science with a major in accounting and Master of Science with a major in either accounting or taxation.

The combined Bachelor of Science with a major in accounting and Master of Science with a major in either accounting or taxation is a 153-semester-hour program designed to provide an appropriate base of knowledge for entry into the accounting profession, as well as a broad-based general educational background. Students awarded the Master of Science with a major in accounting or a major in taxation are simultaneously awarded the Bachelor of Science with a major in accounting. (The Bachelor of Science with a major in accounting is not awarded separately.)

Students who earn these degrees complete an educational program consistent with recommendations of professional accountants and accounting educators, and are prepared for entry into careers as public accountants, management accountants, or internal auditors within either the public or private sector.

The BS/MS program meets the 153-hour requirement for the Certified Public Accountant exam in Texas and other states.

Continuation requirements

Undergraduate students must meet the minimum standards of the Bachelor of Business Administration with a major in accounting to be admitted automatically to the undergraduate portion of the professional program. Students who have at least 60 hours of college credit but who lack credit in certain courses in the preprofessional program may be admitted provisionally with deficiencies. Students granted such provisional admission must proceed immediately to remove the deficiencies.

In addition to the departmental graduate admission requirements, a student must have a minimum overall program GPA of 2.8 and a minimum advanced accounting GPA of 3.0 in order to be admitted to the MS-Accounting or MS-Taxation program.

Students seeking admission who already hold a baccalaureate or higher degree should see the *Graduate Catalog* for information regarding the one-year (33-hour) Master of Science with a major in accounting or Master of Science with a major in taxation program.

The final decision regarding admission to the Master of Science with a major in accounting or Master of Science with a major in taxation programs rests with the Department of Accounting. Students enrolled in the BS/MS programs that are unable to complete all degree requirements may elect to change to the BBA in accounting degree program. Students will be required to complete all remaining degree requirements for the BBA degree, which may be as little as 6 semester credit hours. See undergraduate advisor for details.

Degree requirements

The following requirements must be satisfied for a Bachelor of Science with a major in accounting/Master of Science with a major in either accounting or taxation.

Hours required and general/college requirements

A minimum of 153 semester hours (including a minimum of 120 undergraduate hours, of which 42 must be advanced) and fulfillment of degree requirements for the Bachelor of Science degree as specified in the "University Core Curriculum" in the Academics section of this catalog, fulfillment of degree requirements for the Master of Science as specified below, and the G. Brint Ryan College of Business requirements.

Business foundation requirements

See "Professional program" requirements.

Professional field requirements

See "Professional program" (undergraduate/graduate accounting courses).

Other course requirements

- Completion of at least 33 semester hours of graduate work (at least 33 semester hours for MS with a major in either accounting or taxation).
- At least 30 semester hours in 5000-level accounting courses at UNT.

Electives

See individual degree plan.

Other requirements

- A GPA of 3.0 on all work taken beyond the 90th semester credit hour.
- After 9 graduate semester credit hours, an overall GPA of 3.0 must be maintained throughout the program.

Preprofessional program

University Core Curriculum requirements

See "University Core Curriculum requirements" as listed in the Academics section of this catalog.

Pre-business requirements

1. To enroll in upper-division courses in the G. Brint Ryan College of Business, the student must have:
2. Completion of at least 45 semester hours with a 2.0 UNT GPA
3. Completion of the following pre-business prerequisites with a minimum grade of C and a GPA of 2.7 on these nine courses (or equivalents): ENGL 1310; TECM 2700; MATH 1190 or MATH 1710; ECON 1100 and ECON 1110; ACCT 2010 and ACCT 2020; BCIS 2610; and DSCI 2710.
4. First-term/semester transfer students who have completed at least 45 semester hours at another institution must have a minimum 2.0 overall GPA on all transfer work accepted by UNT and a 2.7 pre-business GPA to be admitted to the Bachelor of Science program and to enroll in upper-division courses.

Note

Some of these requirements may be taken as part of the University Core Curriculum requirements.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Students are responsible for completing the total minimum hours required for the degree.

Preprofessional program

The 90 hours making up the professional program are subject to the prior approval of an accounting advisor. Courses include the following:

Business foundation, 18 hours

- BCIS 3610 - Basic Information Systems
- BLAW 3430 - Legal and Ethical Environment of Business
- DSCI 3710 - Business Statistics with Spreadsheets
- FINA 3770 - Finance
- MGMT 3720 - Organizational Behavior
- MKTG 3650 - Foundations of Marketing Practice

Other courses, 12 hours

ACCT 4430 - Accounting Research and Data Analysis

Advanced Economics, 3 hours

- Any 3000 or 4000 level Economics course

Approved Elective, 3 hours choose one from:

- Any 3000/4000 level BCIS course
- DSCI 3870 - Management Science
- OPSM 3830 - Operations Management
- PRCH 4810 - Purchasing and Materials Management

Business Communications course, 3 hours

- MGMT 3660 - Contemporary Business Writing and Presentation Skills

Undergraduate accounting courses, 25 hours

- ACCT 3110 - Intermediate Accounting I (see note below)
- ACCT 3120 - Intermediate Accounting II
- ACCT 3270 - Cost Accounting
- ACCT 3405 - Professional Development
- ACCT 4100 - Accounting Systems
- ACCT 4140 - Advanced and Not-for-Profit Accounting Principles
- ACCT 4300 - Federal Income Taxation
- ACCT 4320 - Federal Income Taxation II
- ACCT 4400 - Auditing — Professional Responsibilities

Note: All students entering ACCT 3110 (Intermediate Accounting I) are required to complete and pass an entrance exam. This policy applies to both UNT students and transfer students. The exam will be administered at least three times a year and the student must obtain a passing grade of at least 70%. The exam will be composed by the full-time financial accounting faculty and administered by the Department of Accounting.

Graduate accounting and required courses, 33 hours

Either graduate accounting degree (the Master of Science with a major in accounting or the Master of Science with a major in taxation) requires 33 hours of accounting and other required courses.

Note: The student must be admitted to the Toulouse Graduate School before registering for these courses. The student should take the Graduate Management Admissions Test (GMAT) after completing approximately 90 semester hours of credit and prior to the term/semester during which the undergraduate program of 120 semester hours is completed. As soon as the test results are available, the student should contact the G. Brint Ryan College of Business Graduate Programs Office regarding application to the graduate school.

The 33-hour program varies with the major and concentration chosen. However, a minimum of 30 hours of 5000-level accounting courses must be taken. General requirements include the following:

- An accounting or tax research course (depending on the student's major)
- ACCT 5120 - Data Analysis in Accounting
- An accounting or tax capstone class (depending on the student's major)
- Accounting concentration (to be determined in consultation with advisor)
- Approved electives (to be determined in consultation with advisor)

At present, the department offers concentrations under the Master of Science with a major in accounting as follows:

- Audit and data analytics concentration
- Corporate accounting concentration

Detailed information on requirements of each concentration is available from the G. Brint Ryan College of Business Graduate Programs Office. Students with areas of interest not represented above are invited to consult with an accounting faculty advisor.

Professional Development Requirements

- ACCT 3405 - Professional Development (with a grade of C or higher)

- BUSI 1200 - Professional Development I-Strategies for Business (with a grade of C or higher)
- BUSI 3100 - Professional Development II-Critical Thinking and Decision Making in Business (with a grade of C or higher)

Required courses, 21 hours

Pre-business requirements, along with BBA communication requirements constitute the basis for tiered progression in the BBA degree as outlined in the G. Brint Ryan College of Business Degree Requirements.

The following courses must be completed with a grade of C or higher.

****Certain Pre-business courses can be used to fulfill university core requirements.**

- ACCT 2010 - Accounting Principles I (Financial Accounting)
- ACCT 2020 - Accounting Principles II (Managerial Accounting)
- BCIS 2610 - Introduction to Computers in Business
- DSCI 2710 - Data Analysis with Spreadsheets **
- ECON 1100 - Principles of Microeconomics **
- ECON 1110 - Principles of Macroeconomics **
- MATH 1190 - Business Calculus **
- MATH 1710 - Calculus I **

Minors

Accounting minor

An 18-hour minor in accounting is available to non-accounting majors.

Variation of the minor in accounting may be granted with approval from the Department of Accounting. It is the student's responsibility to satisfy required course prerequisites where applicable.

Students who minor in accounting must take

- ACCT 2010 - Accounting Principles I (Financial Accounting)
- ACCT 2020 - Accounting Principles II (Managerial Accounting)
- ACCT 3110 - Intermediate Accounting I
- ACCT 3120 - Intermediate Accounting II
- ACCT 3270 - Cost Accounting
- ACCT 4300 - Federal Income Taxation

Stephen Ferris, Chair

Faculty

The Department of Finance, Insurance, Real Estate and Law trains professionals to manage successfully all financial aspects of a firm and to manage and work within financial institutions, their regulatory bodies, investment firms and mortgage banks. It prepares students for careers in life insurance marketing, brokerage, underwriting and risk management in the insurance industry. The department educates individuals in real estate finance and investment, brokerage, property management and appraisal. The business law curriculum prepares business managers to function in the increasingly complex legal and ethical environment of business.

Instruction in the financial services field provides the expertise needed to achieve the Certified Financial Planner® (CFP) designation and to assist clients with investment decisions, taxation issues, estate and trust planning, and retirement. Study of economics teaches students how to make business decisions based on analysis of governmental policies, industry changes, technological advances and a myriad of other factors in careers such as banking, communications, trade or manufacturing, to name just a few.

All programs within the department prepare the students for more advanced professional work or schools and/or a successful career in business.

Scholarships

The Department of Finance, Insurance, Real Estate and Law offers a variety of competitive scholarships for full-time students majoring in finance, financial services, risk management and insurance, and real estate who have completed at least one or more terms at UNT and have a high overall GPA. A complete listing of scholarships with eligibility requirements and the application form are available online at cob.unt.edu/scholarships.

Majors

Economics, BBA

A Bachelor of Business Administration with a professional field in economics helps students develop a clear understanding of how to apply economic theory to real-world policy issues. The Department of Finance, Insurance, Real Estate and Law administers a rigorous curriculum leading to the BBA.

Bachelor of Business Administration

The department offers the Bachelor of Business Administration in the professional fields listed below. General requirements for the BBA are listed in the University Core Curriculum and the University Core Curriculum requirements in the Academic policies section and under Bachelor of Business Administration in the G. Brint Ryan College of Business section.

Professional field in economics, 18 hours

To earn a BBA in Economics, students must receive at least a B in ECON 1100 and ECON 1110. A student must earn at least a C in any prerequisite course before taking the next course in a sequence.

The following courses are required for the professional field in economics:

- ECON 3550 - Intermediate Micro-Theory
- ECON 3560 - Intermediate Macro-Theory
- ECON 4140 - Managerial Economics
- 9 advanced hours approved in advance by the economics department advisors.

Approved supporting courses, 12 hours

FINA 4500, plus 9 hours approved in advance by the department chair or professional field advisor. Courses in the College of Liberal Arts and Social Sciences may be counted as professional courses in business administration when authorized on a degree plan. ECON 4630 may not be used as an elective or a supporting course. ECON 3200 may not be used as a professional field or a supporting field course and therefore will not count toward a major in Economics.

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

Year 1

Semester 1		Semester 2	
ENGL 1310 - First-Year Writing I	3 hours	BCIS 2610 - Introduction to Computers in Business	3 hours

Brint Ryan College of Business section.

Professional Field requirements, 21 hours

Courses required to fulfill the CFP Board Education requirements:

- FIPL 3100 - Fundamentals of Financial Planning
- RMIN 2500 - Personal Risk Management
or
- RMIN 3100 - Introduction to Risk Management and Insurance
- ACCT 4300 - Federal Income Taxation
- FINA 4200 - Investments
- FIPL 4400 - Retirement Planning and Employee Benefits
- FIPL 4500 - Estate Planning
- FIPL 4610 - Financial Planning Capstone

Supporting Field Requirement, 9 hours

To satisfy the internship requirement:

**Internship subject to program director or FIREL department approval.*

- FINA 4800 - Internship
- FIPL 4800 - Internship

To satisfy the international course requirement

- FINA 4500 - International Finance

Other course requirements

Choose one (3 hours) from the following options:

Courses that provide training for additional industry licensing/certifications:

- FIPL 4605 - Client Communications and Behavioral Finance
- FIPL 4200 - Life and Health Insurance Planning
- FIPL 4210 - Securities Licensing

Additional course options:

- DSCI 3870 - Management Science
- ECON 3200 - Behavioral Economics for Non-Economics Majors
- ECON 4140 - Managerial Economics
- FINA 3600 - Applied Topics in Banking
- FINA 4400 - Financial Markets and Institutions
- FIPL 2770 - Show Me the Money - Lessons in Money Education Can only be used to satisfy University Core or Supporting Field Requirement, not both.
- LSCM 3960 - Logistics and Supply Chain Management
- OPSM 3830 - Operations Management
- REAL 2100 - Principles of Real Estate

Electives

Electives may be required to satisfy University Core Curriculum, Ryan College of Business requirements, and minimum total hour requirements for the degree.

Additional requirements

Any other Ryan College of Business requirements for a BBA

Real Estate with a concentration in Residential Property Management, BBA

A Bachelor of Business Administration in real estate with a concentration in residential property management helps students obtain the skills, knowledge, training and experience necessary for a successful career in the residential property management industry.

It will help students prepare for the state licensing exam and will provide students with practical experience with locally owned properties.

Bachelor of Business Administration

The department offers the Bachelor of Business Administration in the professional fields listed below. General requirements for the BBA are listed in the University Core Curriculum and the University Core Curriculum requirements in the Academic policies section and under Bachelor of Business Administration in the G. Brint Ryan College of Business section.

Professional field, 18 hours

The following courses are required for the concentration in residential property management:

- BLAW 4770 - Real Estate Law and Contracts
- REAL 2100 - Principles of Real Estate
- REAL 4000 - Real Estate Finance
- REAL 4200 - Property Management
- REAL 4300 - Real Estate Investments
- REAL 4400 - Real Estate Valuation

Approved supporting courses, 12 hours

- REAL 4210 - Advanced Property Management
- BLAW 4790 - Property Management Law
- REAL 4800 - Internship

And one course chosen from

- BLAW 4480 - International Business Law
- FINA 4500 - International Finance
- MGMT 4660 - International Management Perspectives
- MKTG 4280 - Global Marketing Issues and Practice

Real Estate, BBA

A Bachelor of Business Administration in real estate prepares students for opportunities in all areas of real estate including commercial and residential brokerage, leasing, commercial and residential property management, appraisal, investments and mortgage/finance.

It will help students prepare for the state licensing exam and will provide students with practical experience with locally owned properties.

Bachelor of Business Administration

Grad Track Options

Economics, BBA with grad track option leading to Business Administration, MBA

Admission requirements and program policies

Admission requirements

After completing at least 75 credit hours of undergraduate coursework, students are eligible for acceptance in the grad track option. In this grad track option, the student will take nine (9) credit hours of graduate courses while completing an undergraduate degree. After earning the undergraduate degree, these credit hours can be counted toward the MBA degree.

Prior to registering for these courses, the student must be admitted to the grad track option and obtain approvals from the undergraduate and graduate coordinators. Students will be required to hold a 3.5 GPA at the time of application and be identified by the department as an exceptional candidate for the grad track pathway.

Final admission

- a 3.5 GPA (will qualify the student for a test waiver)
- successful completion of all grad track pathway courses with a GPA of 3.5 or higher
- 3 letters of recommendation
- essay
- resume
- official application submitted and approved by the Toulouse Graduate School

Program policies

Students meeting the grad track requirements will be notified to start the accelerated program after completing 90 credit hours of coursework toward their undergraduate degree program. This official notification is required for taking graduate-level courses.

Undergraduate students who have been accepted into a grad track program should complete all of the bachelor's degree requirements and graduate within one academic year of beginning graduate coursework.

Program requirements

Students may take 9 hours from the following:

- BCIS 5150 - Leveraging Information Technology for Business (BCIS 3610 - Basic Information Systems)
- MGMT 5140 - Organizational Behavior and Analysis (MGMT 3720 - Organizational Behavior)
- MGMT 5710 - Seminar in Business Ethics and Social Responsibility (MGMT 3880 - Business Ethics and Social Responsibility)
- MKTG 5150 - Marketing Management (MKTG 3650 - Foundations of Marketing Practice)

Note

All remaining courses for the Economics, BBA must be completed.

- BCIS 5150 - Leveraging Information Technology for Business (BCIS 3610 - Basic Information Systems)
- MGMT 5140 - Organizational Behavior and Analysis (MGMT 3720 - Organizational Behavior)
- MGMT 5710 - Seminar in Business Ethics and Social Responsibility (MGMT 3880 - Business Ethics and Social Responsibility)
- MKTG 5150 - Marketing Management (MKTG 3650 - Foundations of Marketing Practice)

Note

All remaining courses for the Finance, BBA must be completed.

Financial Planning, BBA with grad track option leading to Business Administration, MBA

Admission requirements and program policies

Admission requirements

After completing at least 75 credit hours of undergraduate coursework, students are eligible for acceptance in the grad track option. In this grad track option, the student will take nine (9) credit hours of graduate courses while completing an undergraduate degree. After earning the undergraduate degree, these credit hours can be counted toward the MBA degree.

Prior to registering for these courses, the student must be admitted to the grad track option and obtain approvals from the undergraduate and graduate coordinators. Students will be required to hold a 3.5 GPA at the time of application and be identified by the department as an exceptional candidate for the grad track pathway.

Final admission

- a 3.5 GPA (will qualify the student for a test waiver)
- successful completion of all grad track pathway courses with a GPA of 3.5 or higher
- 3 letters of recommendation
- essay
- resume
- official application submitted and approved by the Toulouse Graduate School

Program policies

Students meeting the grad track requirements will be notified to start the accelerated program after completing 90 credit hours of coursework toward their undergraduate degree program. This official notification is required for taking graduate-level courses.

Undergraduate students who have been accepted into a grad track program should complete all of the bachelor's degree requirements and graduate within one academic year of beginning graduate coursework.

Program requirements

Students may take 9 hours from the following:

- BCIS 5150 - Leveraging Information Technology for Business (BCIS 3610 - Basic Information Systems)
- MGMT 5140 - Organizational Behavior and Analysis (MGMT 3720 - Organizational Behavior)
- MGMT 5710 - Seminar in Business Ethics and Social Responsibility (MGMT 3880 - Business Ethics and Social Responsibility)
- MKTG 5150 - Marketing Management (MKTG 3650 - Foundations of Marketing Practice)

Note

All remaining courses for the Financial Planning, BBA must be completed.

Minors

Finance minor

A minor in finance requires 18 hours:

Required courses

- FINA 3770 - Finance
- FINA 4200 - Investments
- FINA 4400 - Financial Markets and Institutions
- FINA 4500 - International Finance

One course selected from

- FINA 4300 - Financial Statement Analysis and Liquidity Management
- FINA 4310 - Valuation and Financial Decisions

One course selected from

- FINA 4210 - Introduction to Derivatives
- FINA 4300 - Financial Statement Analysis and Liquidity Management
- FINA 4310 - Valuation and Financial Decisions
- REAL 4000 - Real Estate Finance
- RMIN 4600 - Corporate Risk Management

Financial Planning minor

A minor in financial planning requires 21 hours, including:

Required courses

- ACCT 4300 - Federal Income Taxation

- FIPL 2770 - Show Me the Money - Lessons in Money Education
Or
- FIPL 3100 - Fundamentals of Financial Planning
- FINA 4200 - Investments
- FIPL 4400 - Retirement Planning and Employee Benefits
- FIPL 4500 - Estate Planning
- FIPL 4610 - Financial Planning Capstone
- RMIN 2500 - Personal Risk Management
Or
- RMIN 3100 - Introduction to Risk Management and Insurance

Legal Studies in Business minor

A minor in legal studies in business requires 18 hours.

18 hours selected from the following

- BLAW 2000 - Personal Law
- BLAW 3430 - Legal and Ethical Environment of Business
- BLAW 4450 - Corporation Law
- BLAW 4480 - International Business Law
- BLAW 4770 - Real Estate Law and Contracts
- BLAW 4790 - Property Management Law
- ECON 4550 - Law and Economics
- FIPL 4500 - Estate Planning
- LGAV 3150 - Transportation Regulation and Trade Compliance
- MGMT 3880 - Business Ethics and Social Responsibility
- MGMT 4890 - Legal Aspects of Employment Practices

Real Estate minor

A minor in real estate requires 18 hours, including:

Required courses, 9 hours

- BLAW 4770 - Real Estate Law and Contracts
- REAL 2100 - Principles of Real Estate
- REAL 3100 - Real Estate Agency

3 hours selected from

- REAL 4000 - Real Estate Finance
- REAL 4200 - Property Management

- REAL 4300 - Real Estate Investments
- REAL 4400 - Real Estate Valuation

6 hours selected from

- BLAW 3430 - Legal and Ethical Environment of Business
- FIPL 2770 - Show Me the Money - Lessons in Money Education
or
- FINA 3770 - Finance
- MKTG 3010 - Foundations of Selling and Communication
- REAL 4200 - Property Management
- RMIN 2500 - Personal Risk Management
or
- RMIN 3100 - Introduction to Risk Management and Insurance
- Any upper-level business course approved by the department.

Residential Property Management minor

A minor in residential property management requires 18 hours, including:

Requirements

- BLAW 4790 - Property Management Law
- REAL 2100 - Principles of Real Estate
- REAL 4200 - Property Management
- REAL 4210 - Advanced Property Management

Plus 3 hours from

One course chosen from the following:

- BLAW 4770 - Real Estate Law and Contracts
- REAL 4000 - Real Estate Finance
- REAL 4300 - Real Estate Investments
- REAL 4400 - Real Estate Valuation

And 3 hours from

One course chosen from the following:

- MGMT 3820 - Management Concepts
- MGMT 3860 - Human Resource Management
- MGMT 4470 - Leadership
- MGMT 4860 - Organizational Design and Change

- MKTG 3720 - Digital Marketing Fundamentals
- MKTG 4120 - Consumer Behavior

Note

FINA 3770 is a prerequisite or corequisite for REAL 4000, REAL 4300, and REAL 4400.

Risk Management and Insurance minor

A minor in risk management and insurance requires 18 hours.

Required courses

- RMIN 2500 - Personal Risk Management
or
- RMIN 3100 - Introduction to Risk Management and Insurance
(Choose RMIN 2500 or RMIN 3100. May not take both.)
- RMIN 4600 - Corporate Risk Management

Plus 6 hours selected from

- FIPL 4400 - Retirement Planning and Employee Benefits
- FIPL 4500 - Estate Planning
- FIPL 4200 - Life and Health Insurance Planning
- RMIN 4300 - Property/Liability Risk Management and Insurance
- RMIN 4310 - Insurance Company Operations
- RMIN 4800 - Internship
- RMIN 4900 - Special Problems

Plus 6 hours selected from

3000/4000 level MATH, ECON, EADP or any RCOB courses approved in advance by the RMIN Faculty Adviser.

Certificates

Financial Services certificate

The Certificate in Financial Services requires a total of 12 hours and is open to students of any major. There are 4 required courses that provide students with the education necessary to prepare for a career in financial services. These courses are designed for students to receive basic financial literacy and retirement planning training. The courses will prepare students to sit for FINRA SIE and Series 63 exams and for the Texas General Lines - Life, Accident, and Health Insurance exam. These securities and insurance licenses are often requirements for obtaining entry-level jobs for major financial services employers in the industry.

Requirements, 12 hours

- FIPL 2770 - Show Me the Money - Lessons in Money Education
- FIPL 4200 - Life and Health Insurance Planning
- FIPL 4210 - Securities Licensing
- FIPL 4400 - Retirement Planning and Employee Benefits

Undergraduate Academic Certificates

Residential Property Management certificate

Requirements, 12 hours

A grade of C or better is required.

- BLAW 4790 - Property Management Law
- REAL 4200 - Property Management
- REAL 4210 - Advanced Property Management

Plus 3 hours selected from

- REAL 2100 - Principles of Real Estate
- REAL 4000 - Real Estate Finance
- REAL 4300 - Real Estate Investments
- REAL 4400 - Real Estate Valuation

Note

FINA 3770 is a prerequisite or corequisite for REAL 4000, REAL 4300 and REAL 4400.

Risk Management and Insurance certificate

A risk management and insurance certificate requires a total of 12 credit hours and is open to students in any major. There are two required courses plus two elective courses. This program is designed to expand students' knowledge in risk management and insurance and career options in the insurance industry. Examples of career options include risk analyst, underwriter, risk manager, claim adjuster, broker or agent.

Required courses

- RMIN 2500 - Personal Risk Management
or
- RMIN 3100 - Introduction to Risk Management and Insurance
(Choose RMIN 2500 or RMIN 3100. May not take both.)
- RMIN 4600 - Corporate Risk Management

Plus 6 hours selected from the following

- FIPL 4400 - Retirement Planning and Employee Benefits
- FIPL 4500 - Estate Planning
- FIPL 4200 - Life and Health Insurance Planning
- RMIN 4300 - Property/Liability Risk Management and Insurance
- RMIN 4310 - Insurance Company Operations
- RMIN 4800 - Internship
- RMIN 4900 - Special Problems

Anna Sidorova, Chair

Faculty

The Department of Information Technology and Decision Sciences educates business computer information systems designers, systems and business analysts for careers in industry and government. Two strong undergraduate programs are available for students who intend to pursue careers in the growing business computing and analytics fields.

Majors

Business Analytics, BBA

A Bachelor of Business Administration (BBA) with a professional field in business analytics prepares you for successful careers in business analytics and data science. You will build a background in analytical and quantitative methods and apply these methods to the analysis of business data to enable data-driven decision-making in organizations. In addition, as part of the core BBA coursework, you will gain an understanding of accounting, manufacturing, finance, management, supply chain management, marketing and information technology through a comprehensive curriculum.

Bachelor of Business Administration

General requirements for the BBA are listed in the University Core Curriculum in the Academic policies section of this catalog and under Bachelor of Business Administration in the G. Brint Ryan College of Business section.

Business analytics professional field

The professional field in business analytics requires 18 hours of the following courses.

- BCIS 4660 - Introduction to Data Warehousing
- DSCI 3870 - Management Science
- DSCI 4330 - Enterprise Applications of Business Intelligence/Analytics
- DSCI 4510 - Modeling for Business Intelligence
- DSCI 4520 - Introduction to Data Mining
- DSCI 4700 - Analytics for Decision Making

Approved supporting courses, 12 hours

- BCIS 4730 - International Issues of Information Technology
(or MKTG 4280, FINA 4500, or MGMT 4660, if approved in advance by departmental undergraduate coordinator)

Remaining hours

The remaining hours are selected from 3000- or 4000-level business courses. The following are suggested elective sequences.

- BCIS 3630 - Object-Oriented Programming for Business
- BCIS 3680 - Advanced Object-Oriented Programming for Business
- BCIS 4620 - Introduction to Database Applications
- BCIS 4650 - Visual Programming for Business Applications
- BCIS 4750 - Blockchain for Business
- DSCI 4800 - Internship
- MKTG 3700 - Marketing Metrics
- MKTG 3710 - Marketing Research and Analytics
- MKTG 4620 - E-Commerce Marketing Tools and Applications
- OPSM 3830 - Operations Management
- PRCH 4810 - Purchasing and Materials Management
- OPSM 4820 - Manufacturing Planning and Control
- OPSM 4880 - Management of Projects and Systems

Additional Requirements

A candidate for the degree must complete 33 hours of business administration courses in residence, of which 15 hours must be in the professional field of study. Students are encouraged to use free electives to meet professional goals.

Students interested in the theoretical and mathematical science of computing should see the Department of Computer Science and Engineering.

Academic Standards

1. It is recommended that students selecting business analytics as a professional field for the BBA degree meet at least one of the following standards:
 - a. Be in the top 25 percent of their high school graduating class; or
 - b. Attain a minimum score of 920 recentered on the SAT or 20 on the ACT.
2. It is required that students entering the business analytics professional field for the BBA degree have a GPA of at least 2.7 in all courses completed at UNT. First term/semester transfer students must have a transfer GPA of at least 2.7 in order to take professional field courses.

3. A grade of C or above must be earned in each professional field or supporting field course completed in residence or transferred to UNT.
4. Academic requirements for graduation with a professional field in business analytics include:
 - a. A minimum 2.7 GPA in all hours attempted in the professional field and supporting courses, with minimum grades of C required in each professional and supporting field course;
 - b. A minimum 2.0 GPA in all courses completed at UNT; and
 - c. A grade of C or above in each BCIS/DSCI course taken in the professional field, supporting decision sciences courses or career track.

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

Year 1

Semester 1		Semester 2	
ENGL 1310 - First-Year Writing I	3 hours	BCIS 2610 - Introduction to Computers in Business	3 hours
MATH 1180 - College Math for Business, Economics and Related Fields	3 hours	BUSI 1200 - Professional Development I-Strategies for Business	1 hour
Component Area Option A core	3 hours	ECON 1100 - Principles of Microeconomics	3 hours
Government/Political Science core	3 hours	ENGL 1320 - First-Year Writing II	3 hours
Life and Physical Sciences core	3 hours	MATH 1190 - Business Calculus	3 hours
		Government/Political Science core	3 hours
Total	15 hours	Total	16 hours

Year 2

Semester 1		Semester 2	
ACCT 2010 - Accounting Principles I (Financial Accounting)	3 hours	ACCT 2020 - Accounting Principles II (Managerial Accounting)	3 hours
ECON 1110 - Principles of Macroeconomics	3 hours	COMM 1010 - Introduction to Communication	3 hours
American History core	3 hours	DSCI 2710 - Data Analysis with Spreadsheets	3 hours
Creative Arts core	3 hours	American History core	3 hours
Language, Philosophy and Culture core	3 hours	Life and Physical Sciences core	3 hours

Semester 1		Semester 2	
Total	15 hours	Total	15 hours

Year 3

Semester 1		Semester 2	
BCIS 3610 - Basic Information Systems	3 hours	BUSI 3200 - Professional Development III	1 hour
BLAW 3430 - Legal and Ethical Environment of Business	3 hours	DSCI 3870 - Management Science	3 hours
BUSI 3100 - Professional Development II-Critical Thinking and Decision Making in Business	1 hour	DSCI 4330 - Enterprise Applications of Business Intelligence/Analytics	3 hours
MGMT 3660 - Contemporary Business Writing and Presentation Skills	3 hours	MGMT 3720 - Organizational Behavior	3 hours
DSCI 3710 - Business Statistics with Spreadsheets	3 hours	MKTG 3650 - Foundations of Marketing Practice	3 hours
Elective	3 hours	Supporting field suggested elective sequences for BBA BUAN	3 hours
Total	16 hours	Total	16 hours

Year 4

Semester 1		Semester 2	
BCIS 4660 - Introduction to Data Warehousing	3 hours	MGMT 4940 - Strategic Management	3 hours
DSCI 4520 - Introduction to Data Mining	3 hours	DSCI 4510 - Modeling for Business Intelligence	3 hours
FINA 3770 - Finance	3 hours	DSCI 4700 - Analytics for Decision Making	3 hours
Approved International course	3 hours	Supporting field suggested elective sequences for BBA BUAN	3 hours
Supporting field suggested elective sequences for BBA BUAN	3 hours		
Total	15 hours	Total	12 hours

Business Computer Information Systems, BS

A Bachelor of Science with a major in Business Computer Information Systems prepares you for careers in digital transformation, data and technology management, enterprise computing, information systems development, and information security management by building a thorough understanding of how information technology is developed and applied to critical business problems. Developed in consultation with world business leaders in the region, successful completion of this program ensures that you will have the knowledge and skill set that the market demands.

The faculty of the Department of Information Technology and Decision Sciences believes that there is a need in industry and government for systems analysts who have a thorough understanding of both a functional area of business and computer-based information systems.

The following requirements must be satisfied for a Bachelor of Science with a major in business computer information systems.

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Science degree as specified in the "University Core Curriculum" in the Academics section of this catalog and the G. Brint Ryan College of Business requirements regarding tiered progression and the Professional Development courses except for the professional development course BUSI 3200 which is not required for the BS Business Computer Information Systems degree.

Business foundation requirements

See "Business foundation requirements."

Electives

See individual degree plan.

Other requirements

Professional Development Requirements:

- BUSI 1200 - Professional Development I-Strategies for Business (with a grade of C or higher)
- BUSI 3100 - Professional Development II-Critical Thinking and Decision Making in Business (with a grade of C or higher)

BUSI 1200 and BUSI 3100 both require a grade of C or higher. These professional development requirements must be taken prior to MGMT 4940.

Other requirements for the BS Business Computer Information Systems:

- a. It is required that students entering the business computer information systems major for the BS degree have a grade point average of at least 2.7 in all courses completed at UNT. First term/semester transfer students must have a transfer grade point average of 2.7 in order to take professional program courses.
- b. A grade of C or above must be earned in each professional program course completed in residence or transferred to UNT.
- c. Academic requirements for graduation with a major in business computer information systems for the BS degree:
 - A minimum 2.7 grade point average in all hours attempted in the professional program course, with minimum grades of C required in each professional program course;
 - A grade of C or above in each BCIS course taken in the professional program.

Preprofessional program

See Pre-business requirements in Bachelor of Business Administration in this catalog

University Core Curriculum requirements

See "University Core Curriculum Requirements" in the Academics section of this catalog.

Electives

Hours required for electives may vary based on course placement or University Core Curriculum course selection. Some professional field programs may designate specific courses in place of elective hours. Students are responsible for completing the total minimum hours required for the degree.

Upper-level business foundation

- BCIS 3610 - Basic Information Systems
- BCIS 3615 - Visual Display of Business Information
- BLAW 3430 - Legal and Ethical Environment of Business
- MGMT 4940 - Strategic Management

- DSCI 3710 - Business Statistics with Spreadsheets
or
- DSCI 3870 - Management Science

- FINA 3770 - Finance
- MGMT 3720 - Organizational Behavior
- MKTG 3650 - Foundations of Marketing Practice

Professional program

Business Computer Information Systems, 33 hours:

- BCIS 3630 - Object-Oriented Programming for Business
- BCIS 3680 - Advanced Object-Oriented Programming for Business
- BCIS 4610 - Analysis of Business Information Systems
- BCIS 4620 - Introduction to Database Applications
- BCIS 4630 - Fundamentals of Information Technology Security

- BCIS 4680 - Business Data Communications and Networking
- BCIS 4690 - Information Technology Management
- BCIS 4720 - Web-Based Information Technologies

Selective three elective courses from:

- BCIS 3620 - Mainframe Concepts
- BCIS 3690 - Advanced Mainframe Concepts
- BCIS 4650 - Visual Programming for Business Applications
- BCIS 4660 - Introduction to Data Warehousing
- BCIS 4670 - Continuing Seminar in Computer-Based Information Systems
- BCIS 4730 - International Issues of Information Technology
- BCIS 4740 - Administration and Policy in Information Security
- BCIS 4750 - Blockchain for Business
- BCIS 4760 - Introduction to Business Aspects of Digital Forensics
- BCIS 4770 - Operating Systems Security Principles for Business
- BCIS 4800 - Internship
- BCIS 4900 - Special Problems
- DSCI 4520 - Introduction to Data Mining

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

Year 1

Semester 1		Semester 2	
ENGL 1310 - First-Year Writing I	3 hours	BCIS 2610 - Introduction to Computers in Business	3 hours

Grad Track Options

Business Analytics, BBA with grad track option leading to Business Analytics, MS

The Department of Information Technology and Decision Sciences would like to build a new pathway in Business Analytics to encourage its brightest students to move into graduate study after completing their bachelor's degrees. The selected pathway courses mirror learning objectives and the partnership makes good sense for those students ready for advanced study.

Admission requirements and program policies

Students will be required to hold a 3.5 GPA at the time of application and be identified by the department as an exceptional candidate for the grad track pathway. Final admission will demand a 3.5 GPA at the time of application, which will qualify the student for a GMAT waiver, successful completion of all grad track pathway courses with a GPA of 3.5 or higher, 3 letters of recommendation, essay, resume and official application submitted and approved by the Toulouse Graduate School.

Program requirements, 6 hours

- BCIS 4660 - Introduction to Data Warehousing with BCIS 5610 – Enterprise Data Warehousing
 - DSCI 4520 - Introduction to Data Mining with DSCI 5240 – Data Mining and Machine Learning for Business
- OR
- DSCI 4330 - Enterprise Applications of Business Intelligence/Analytics with DSCI 5330 – Business Intelligence Foundations

All remaining courses for the Business Analytics, BBA must be completed.

Business Computer Information Systems, BS with grad track option leading to Information Systems and Technologies, MS

Admission requirements and program policies

Students will be required to hold a 3.5 GPA at the time of application and be identified by the department as an exceptional candidate for the grad track pathway. Final admission will demand a 3.5 GPA at the time of application, which will qualify the student for a GMAT waiver, successful completion of all grad track pathway courses with a GPA of 3.5 or higher, 3 letters of recommendation, essay, resume and official application submitted and approved by the Toulouse Graduate School.

The BS in Business Computer Information Systems is 120 credit hours, the MS in Information Systems & Technology is 30 hours. Up to 6 graduate credit hours may be used first toward the bachelor's degree, then transferred to the master's degree upon completion of the bachelor's.

Program requirements, 6 hours

Allow the substitution of the following courses:

- BCIS 4740 - Administration and Policy in Information Security with BCIS 5740 - Information Security Management

And one of the following:

- BCIS 4610 - Analysis of Business Information Systems with BCIS 5120 – Information Systems Development
- BCIS 4720 - Web-Based Information Technologies with BCIS 5680 Web-Based Systems Development
- BCIS 4660 - Introduction to Data Warehousing with BCIS 5610 – Enterprise Data Warehousing
- BCIS 4730 - International Issues of Information Technology with BCIS 5670 - International Issues in Information Technology

All remaining courses for the Business Computer Information Systems, BS must be completed.

Minors

Business Analytics minor

A minor in business analytics is open to non-business analytics majors.

Variation of the minor in business analytics may be granted with approval from the Department of Information Technology and Decision Sciences. It is the student's responsibility to satisfy the required course prerequisites where applicable.

18 hours selected from the following:

- BCIS 4660 - Introduction to Data Warehousing
- DSCI 2710 - Data Analysis with Spreadsheets
- DSCI 3710 - Business Statistics with Spreadsheets
- DSCI 3870 - Management Science
- DSCI 4330 - Enterprise Applications of Business Intelligence/Analytics
- DSCI 4510 - Modeling for Business Intelligence
- DSCI 4520 - Introduction to Data Mining
- DSCI 4700 - Analytics for Decision Making
- OPSM 3830 - Operations Management

Business Computer Information Systems minor

A minor in business computer information systems is available to non-business computer information systems majors.

Variation of the minor in BCIS may be granted with approval from the Department of Information Technology and Decision Sciences. It is the student's responsibility to satisfy the required course prerequisites where applicable.

18 hours, including

- BCIS 3630 - Object-Oriented Programming for Business
- BCIS 4610 - Analysis of Business Information Systems
- BCIS 4620 - Introduction to Database Applications

Plus three courses selected from

- BCIS 4630 - Fundamentals of Information Technology Security
- BCIS 4640 - Administrative Problems in Information Systems
- BCIS 4650 - Visual Programming for Business Applications
- BCIS 4660 - Introduction to Data Warehousing
- BCIS 4680 - Business Data Communications and Networking
- BCIS 4690 - Information Technology Management
- BCIS 4720 - Web-Based Information Technologies
- BCIS 4740 - Administration and Policy in Information Security

Faculty

Mission/vision statement

The mission of the Department of Management is to provide quality management education leading to bachelor's, master's and doctoral degrees; to conduct relevant basic and applied research; to engage in instructional development; and to provide professional expertise and service to the department's constituent communities. Our mission is accomplished with a primary focus on the undergraduate and master's degrees, while maintaining a small, high-quality doctoral program in keeping with the mission of the G. Brint Ryan College of Business. This mission reflects our firm belief in the importance of teaching, supported by intellectual contributions and service.

The vision of the Department of Management, as leading educators, is to work together as a team of professionals with a singular focus — student learning. Central to the implementation of this vision is that students are our first priority. Their success is our success. We further believe that we are accountable as educators to display academic leadership. Finally, our success is enhanced by the business community as partners in developing cutting-edge education.

Professional field

The terms "professional field" (BBA degree programs), "concentration" (MBA degree programs) and "major" (BBA, PhD degree programs) are used to designate the primary area of study.

Career opportunities

For information on career opportunities for graduates of the Department of Management, visit our web site (www.cob.unt.edu/mgmt).

Majors

Entrepreneurship and Enterprise Management, BBA

From home-based businesses to venture capital start-ups, entrepreneurs work in all types of jobs and industries and are a driving force behind economic growth. The Bachelor of Business Administration with a professional field in entrepreneurship gives you maximum flexibility and preparation to chart your own future.

Bachelor of Business Administration

The department offers the Bachelor of Business Administration degree in the professional fields listed below. General requirements for the BBA are listed in the University Core Curriculum and the University Core Curriculum Requirements in the Academic policies section and under Bachelor of Business Administration in the G. Brint Ryan College of Business section.

Academic standards

Refer to the G. Brint Ryan College of Business Academic Standards and the Bachelor of Business Administration General Degree Requirements sections.

Entrepreneurship and Enterprise Management professional field, 18 hours

The following courses are required for the professional field in entrepreneurship.

A C or higher is required in all professional and supporting courses and students must maintain an overall 2.00 GPA in professional and supporting field courses.

Required courses

- MGMT 3850 - Foundations of Entrepreneurship
- MGMT 4100 - Business Planning for Entrepreneurs

Four courses from the following

- MGMT 4210 - E-Management: Managing in a Digital Economy
- MGMT 4220 - Entrepreneurial Growth and Strategy
- MGMT 4235 - Social Entrepreneurship
- MGMT 4335 - Technology and Innovation Management
- MGMT 4710 - Family Entrepreneurship

Approved supporting courses, 12 hours

Supporting courses required

- MGMT 4660 - International Management Perspectives
- MGMT 4860 - Organizational Design and Change
- OPSM 3830 - Operations Management

Supporting course

Choose one of the following courses:

- ACCT 3270 - Cost Accounting
- FINA 4300 - Financial Statement Analysis and Liquidity Management
- MGMT 3860 - Human Resource Management
- MGMT 3880 - Business Ethics and Social Responsibility
- MGMT 4470 - Leadership
- MGMT 4560 - Topics in Entrepreneurship
- MGMT 4800 - Internship
- MKTG 3700 - Marketing Metrics
- RMIN 4300 - Property/Liability Risk Management and Insurance

- SENM 3700 - Pricing Strategies in the Sport Entertainment Industry
- SENM 3900 - Leadership for Sport Business Professionals in the 21st Century

Minor

Optional.

Electives

Hours required for electives may vary based on course placement or University Core Curriculum course selection. Students are responsible for completing the total minimum hours required for the degree.

Grad Track Options

Entrepreneurship & Enterprise Management, BBA with grad track option leading to Management, MBA

Admission requirements and program policies

Admission requirements

After completing at least 75 credit hours of undergraduate coursework, students are eligible for acceptance in the grad track option. In this grad track option, the student will take nine (9) credit hours of graduate courses while completing an undergraduate degree. After earning the undergraduate degree, these credit hours can be counted toward the MBA degree.

Prior to registering for these courses, the student must be admitted to the grad track option and obtain approvals from the undergraduate and graduate coordinators. Students will be required to hold a 3.5 GPA at the time of application and be identified by the department as an exceptional candidate for the grad track pathway.

Final admission

- a 3.5 GPA (will qualify the student for a test waiver)
- successful completion of all grad track pathway courses with a GPA of 3.5 or higher
- 3 letters of recommendation
- essay
- resume
- official application submitted and approved by the Toulouse Graduate School

Program policies

Students meeting the grad track requirements will be notified to start the accelerated program after completing 90 credit hours of coursework toward their undergraduate degree program. This official notification is required for taking graduate-level courses.

Undergraduate students who have been accepted into a grad track program should complete all of the bachelor's degree requirements and graduate within one academic year of beginning graduate coursework.

Program requirements

Students may take 9 hours from the following:

- BCIS 5150 - Leveraging Information Technology for Business (BCIS 3610 - Basic Information Systems)
- MGMT 5140 - Organizational Behavior and Analysis (MGMT 3720 - Organizational Behavior)
- MGMT 5710 - Seminar in Business Ethics and Social Responsibility (MGMT 3880 - Business Ethics and Social Responsibility)
- MKTG 5150 - Marketing Management (MKTG 3650 - Foundations of Marketing Practice)

Note

All remaining courses for the Entrepreneurship and Enterprise Management, BBA must be completed.

- MGMT 5710 - Seminar in Business Ethics and Social Responsibility (MGMT 3880 - Business Ethics and Social Responsibility)
- MKTG 5150 - Marketing Management (MKTG 3650 - Foundations of Marketing Practice)

Note

All remaining courses for the Human Resource Management, BBA must be completed.

Human Resource Management, BBA with grad track option leading to Management, MBA

Admission requirements and program policies

Admission requirements

After completing at least 75 credit hours of undergraduate coursework, students are eligible for acceptance in the grad track option. In this grad track option, the student will take nine (9) credit hours of graduate courses while completing an undergraduate degree. After earning the undergraduate degree, these credit hours can be counted toward the MBA degree.

Prior to registering for these courses, the student must be admitted to the grad track option and obtain approvals from the undergraduate and graduate coordinators. Students will be required to hold a 3.5 GPA at the time of application and be identified by the department as an exceptional candidate for the grad track pathway.

Final admission

- a 3.5 GPA (will qualify the student for a test waiver)
- successful completion of all grad track pathway courses with a GPA of 3.5 or higher
- 3 letters of recommendation
- essay
- resume
- official application submitted and approved by the Toulouse Graduate School

Program policies

Students meeting the grad track requirements will be notified to start the accelerated program after completing 90 credit hours of coursework toward their undergraduate degree program. This official notification is required for taking graduate-level courses.

Undergraduate students who have been accepted into a grad track program should complete all of the bachelor's degree requirements and graduate within one academic year of beginning graduate coursework.

Program requirements

Students may take 9 hours from the following:

- BCIS 5150 - Leveraging Information Technology for Business (BCIS 3610 - Basic Information Systems)

- MGMT 5140 - Organizational Behavior and Analysis (MGMT 3720 - Organizational Behavior)
- MGMT 5710 - Seminar in Business Ethics and Social Responsibility (MGMT 3880 - Business Ethics and Social Responsibility)
- MKTG 5150 - Marketing Management (MKTG 3650 - Foundations of Marketing Practice)

Note

All remaining courses for the Human Resource Management, BBA must be completed.

Charles Blankson, Chair

Faculty

The Department of Marketing offers professional education programs to prepare individuals for the pursuit of marketing careers with manufacturers, retail and wholesale, profit and nonprofit service organizations, governmental agencies, and academic institutions. Additionally, the department of marketing offers education programs in professional selling that prepare individuals with a strong desire for B2B and B2S sales, as well as business development careers.

Academic Standards

Please refer to the G. Brint Ryan College of Business Degree Requirements.

Professional field

The terms "professional field" (BBA, MBA degree programs) and "major" (BS, PhD degree programs) are used to designate the primary area of study.

Certificates

The department offers undergraduate academic certificates in marketing. For additional details, please contact the department.

Majors

Marketing with a concentration in Professional Selling, BBA

A Bachelor of Business Administration with a concentration in Professional Selling gives you the skills to identify target audiences, gather market information, develop products and services and more.

Degree requirements

Bachelor of Business Administration

The department offers the Bachelor of Business Administration degree in the professional field listed below. General requirements for the BBA are listed in the University Core Curriculum and the Academic policies section and under Bachelor of Business Administration in the G. Brint Ryan College of Business.

Professional field in marketing with concentration in professional selling, 28 hours

Students must apply for admission into the professional selling concentration and meet specific admission criteria. See the Department of Marketing for details. A grade of C or above must be earned in each professional field and supporting course completed in residence or transferred to UNT.

- MKTG 3010 - Foundations of Selling and Communication (cannot be applied to both the business foundation and professional field)
- MKTG 3700 - Marketing Metrics
- MKTG 3720 - Digital Marketing Fundamentals
- MKTG 3881 - Personal Professional Development
- MKTG 4280 - Global Marketing Issues and Practice
- MKTG 4470 - Business-to-Business Marketing
- MKTG 4570 - Professional Selling Analytics
- MKTG 4670 - Advanced Professional Selling
- MKTG 4770 - Sales Force Design and Management
- MKTG 4805 - Internship in Professional Selling

Approved supporting courses, 3 hours

Three hours of 3000/4000-level marketing course chosen in consultation with the Departmental Advisor.

Marketing, BBA

A Bachelor of Business Administration with a professional field in marketing gives you the skills to identify target audiences, gather market information, develop products and services and more. Additionally, to get a competitive advantage over other job seekers, you can earn certificates in e-commerce, new product development, and retailing.

Degree requirements

Bachelor of Business Administration

The department offers the Bachelor of Business Administration degree in the professional field listed below. General requirements for the BBA are listed in the University Core Curriculum and the Academic policies section and under Bachelor of Business Administration in the G. Brint Ryan College of Business.

Professional field in Marketing, 22 hours

The professional field in marketing consists of 22 hours of course work beyond Foundations of Marketing Practice (MKTG 3650), plus an additional 9 hours of supporting field courses. A grade of C or above must be earned in each professional field and supporting course completed in residence or transferred to UNT. The professional field consists of the following courses:

- MKTG 3700 - Marketing Metrics
- MKTG 3710 - Marketing Research and Analytics
- MKTG 3720 - Digital Marketing Fundamentals
- MKTG 3881 - Personal Professional Development
- MKTG 4120 - Consumer Behavior
- MKTG 4280 - Global Marketing Issues and Practice
- MKTG 4330 - Strategic Brand Management
- MKTG 4890 - Applied Marketing Problems

Approved supporting field courses, 9 hours

Nine hours of 3000- or 4000-level marketing courses.

The supporting field courses can be varied to meet the needs of students seeking specialized training toward career objectives in marketing management, sales management, retail management, logistics and professional selling.

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

Year 1

Grad Track Options

Marketing with a concentration in Professional Selling, BBA with grad track option leading to Business Administration, MBA

Admission requirements and program policies

Admission requirements

After completing at least 75 credit hours of undergraduate coursework, students are eligible for acceptance in the grad track option. In this grad track option, the student will take nine (9) credit hours of graduate courses while completing an undergraduate degree. After earning the undergraduate degree, these credit hours can be counted toward the MBA degree.

Prior to registering for these courses, the student must be admitted to the grad track option and obtain approvals from the undergraduate and graduate coordinators. Students will be required to hold a 3.5 GPA at the time of application and be identified by the department as an exceptional candidate for the grad track pathway.

Final admission

- a 3.5 GPA (will qualify the student for a test waiver)
- successful completion of all grad track pathway courses with a GPA of 3.5 or higher
- 3 letters of recommendation
- essay
- resume
- official application submitted and approved by the Toulouse Graduate School

Program policies

Students meeting the grad track requirements will be notified to start the accelerated program after completing 90 credit hours of coursework toward their undergraduate degree program. This official notification is required for taking graduate-level courses.

Undergraduate students who have been accepted into a grad track program should complete all of the bachelor's degree requirements and graduate within one academic year of beginning graduate coursework.

Program requirements

Students may take 9 hours from the following:

- BCIS 5150 - Leveraging Information Technology for Business (BCIS 3610 - Basic Information Systems)
- MGMT 5140 - Organizational Behavior and Analysis (MGMT 3720 - Organizational Behavior)
- MGMT 5710 - Seminar in Business Ethics and Social Responsibility (MGMT 3880 - Business Ethics and Social Responsibility)
- MKTG 5150 - Marketing Management (MKTG 3650 - Foundations of Marketing Practice)

Note

All remaining courses for the Marketing with a concentration in Professional Selling, BBA must be completed.

Brian Sauser, Chair

Faculty

Research

Research interests of the faculty include transportation, supply chain mapping, project management, supply chain metrics, logistics costing and pricing, cash-to-cash, use of real options, economic forecasting through the use of the supply chain, new product development, franchising, cross-cultural consumer buying behavior, advertising, sales promotion, corporate image, internet marketing, positioning and services marketing.

In addition to the UNT Faculty Research Fund, research in the department has been sponsored by Fortune 500 Companies, Texas Logistics Education Foundation, Texas Motor Transportation Association, NSF, NASA, and Texas Department of Transportation.

Degree programs

The college offers a Master of Business Administration with a major in business administration and concentrations in supply chain management and supply chain analytics.

The college offers a Doctor of Philosophy with a major in business and concentrations in logistics systems.

Minimum admission standards are established by the graduate faculty of the Ryan College of Business and the Department of Supply Chain Management. Satisfaction of the minimum standards does not guarantee admission to a degree program. The graduate faculty of the logistics and operations management department have established additional requirements specific to the academic programs within the department.

Majors

Supply Chain Management, BS

The course work for the Bachelor of Science with a major in supply chain management encompasses all of the activities involved in getting a product to the consumer. Because this field is so broad, virtually any business could be a potential employer.

Degree requirements

The following requirements must be satisfied for a Bachelor of Science with a major in supply chain management.

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Science degree as specified in the University Core Curriculum and the Academic policies section and the G. Brint Ryan College of Business requirements.

Pre-Business requirements

- ACCT 2010 - Accounting Principles I (Financial Accounting) (with a grade of C or higher)
- ACCT 2020 - Accounting Principles II (Managerial Accounting) (with a grade of C or higher)
- BCIS 2610 - Introduction to Computers in Business (with a grade of C or higher)
- DSCI 2710 - Data Analysis with Spreadsheets
- ECON 1100 - Principles of Microeconomics
- ECON 1110 - Principles of Macroeconomics

- MATH 1190 - Business Calculus
or
- MATH 1710 - Calculus I (with a grade of C or higher)

Business Foundation requirements

In addition to ACCT 2010, ACCT 2020, BCIS 2610 and DSCI 2710, the BS degree requires the following 21 semester hours of basic foundation courses in business administration:

- BLAW 3430 - Legal and Ethical Environment of Business
- DSCI 3710 - Business Statistics with Spreadsheets

- FINA 3770 - Finance
- LSCM 3960 - Logistics and Supply Chain Management
- MGMT 3720 - Organizational Behavior
- MKTG 3650 - Foundations of Marketing Practice
- OPSM 3830 - Operations Management

Major requirements

The major in supply chain management consists of 30 hours beyond the business foundations requirements, 9 hours of degree core, 9 hours of concentration core, 6 hours of professional field electives, 3 hours of internship, and 3 hours of capstone.

Supply Chain Management Core

- LSCM 4360 - Global Alliances and International Supply Chain Management
- PRCH 4810 - Purchasing and Materials Management
- OPSM 4880 - Management of Projects and Systems

Logistics concentration

- LSCM 4510 - Logistics and Business Analysis
- LSCM 4530 - E-Logistics in Supply Chain Management
- LSCM 4560 - Business Transportation Management
- Professional Field Electives (6 hours)

Logistics Internship and Capstone

- LSCM 4800 - Logistics Internship
- LSCM 4860 - Advanced Logistics Management

Operations concentration

- OPSM 4820 - Manufacturing Planning and Control
- OPSM 4830 - Productivity and Quality Management
- OPSM 4850 - Lean/Six Sigma
- Professional Field Electives (6 hours)

Operations Internship and Capstone

- LSCM 4860 - Advanced Logistics Management
- OPSM 4800 - Internship in Operations and Supply Management

Aviation Logistics concentration

- LGAV 3100 - Introduction to Aviation Industry
- LGAV 3120 - Aviation Safety Systems
- LGAV 3130 - Air Cargo Planning and Control

- Professional Field Electives (6 hours)

Aviation Logistics Internship and Capstone

- LGAV 4100 - Airport and Infrastructure Planning and Control
- LSCM 4800 - Logistics Internship

Supply Chain Analytics concentration

- DSCI 3870 - Management Science
- DSCI 4510 - Modeling for Business Intelligence
- DSCI 4520 - Introduction to Data Mining
- Professional Field Electives (6 hours)

Supply Chain Analytics Internship and Capstone

- LSCM 4860 - Advanced Logistics Management
- LSCM 4800 - Logistics Internship

Purchasing concentration

- PRCH 4825 - Sourcing Strategy and Supplier Relationship Management
- PRCH 4835 - Cost and Price Analysis
- PRCH 4845 - B2B Negotiations
- Professional Field Electives (6 hours)

Purchasing Internship and Capstone

- LSCM 4860 - Advanced Logistics Management
- PRCH 4800 - Internship in Purchasing

Professional Field electives

*An additional 6 hours of professional field course work from any 3XXX/4XXX level course within the G. Brint Ryan College of Business or exceptions with approval from department advisor.

Electives

Hours required for electives may vary based on course placement or University Core Requirement course selection. Some professional field programs may designate specific courses in place of elective hours. Students are responsible for completing the total minimum hours required for the degree.

Other requirements

1. It is required that students entering the supply chain management major for the BS degree have a grade point average of at least 2.7 in all courses completed at UNT. First term/semester transfer students must have a transfer grade point average of 2.7 in order to take professional program courses.
2. A grade of C or above must be earned in each professional program course completed in residence or transferred to UNT.
3. Academic requirements for graduation with a major in supply chain management for the BS degree:
 - A minimum 2.0 grade point average in all hours attempted in the professional program course, with minimum grades of C required in each professional program course.
 - A minimum 2.0 grade point average in all courses completed at UNT.
 - A grade of C or above in each course taken in the professional program.

Professional Development

BUSI 1200, BUSI 3100 and BUSI 3200 all require a grade of C or higher.

- BUSI 1200 - Professional Development I-Strategies for Business
- BUSI 3100 - Professional Development II-Critical Thinking and Decision Making in Business
- BUSI 3200 - Professional Development III
- COMM 1010 - Introduction to Communication
or
- TECM 2700 - Technical Writing

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

Year 1

Semester 1		Semester 2	
ENGL 1310 - First-Year Writing I	3 hours	BCIS 2610 - Introduction to Computers in Business	3 hours
MATH 1180 - College Math for Business, Economics and Related Fields	3 hours	BUSI 1200 - Professional Development I-Strategies for Business	1 hour
Government/Political Science core	3 hours	ECON 1100 - Principles of Microeconomics	3 hours
Life and Physical Sciences core	3 hours	ENGL 1320 - First-Year Writing II	3 hours
Component Area Option A core	3 hours	MATH 1190 - Business Calculus	3 hours
		Government/Political Science core	3 hours
Total	15 hours	Total	16 hours

Year 2

Semester 1		Semester 2	
ACCT 2010 - Accounting Principles I (Financial Accounting)	3 hours	ACCT 2020 - Accounting Principles II (Managerial Accounting)	3 hours
ECON 1110 - Principles of Macroeconomics	3 hours	COMM 1010 - Introduction to Communication	3 hours
American History core	3 hours	DSCI 2710 - Data Analysis with Spreadsheets	3 hours
Creative Arts core	3 hours	American History core	3 hours
Language, Philosophy and Culture core	3 hours	Life and Physical Sciences core	3 hours
Total	15 hours	Total	15 hours

Year 3

Semester 1		Semester 2	
DSCI 3710 - Business Statistics with Spreadsheets	3 hours	BUSI 3100 - Professional Development II-Critical Thinking and Decision Making in Business	1 hour
FINA 3770 - Finance	3 hours	LSCM 4510 - Logistics and Business Analysis	3 hours
LSCM 3960 - Logistics and Supply Chain Management	3 hours	LSCM 4560 - Business Transportation Management	3 hours
OPSM 3830 - Operations Management	3 hours	LSCM 4800 - Logistics Internship	3 hours
Elective	3 hours	MKTG 3650 - Foundations of Marketing Practice	3 hours
		PRCH 4810 - Purchasing and Materials Management	3 hours

MGMT 3720 - Organizational Behavior	3 hours	Professional Field Elective	3 hours
Professional Field Elective	3 hours	Elective	3 hours
Total	15 hours	Total	13 hours

Minors

Aviation Logistics minor

A minor in aviation logistics requires 18 hours.

Required course

- LGAV 3100 - Introduction to Aviation Industry

Plus 15 hours

Select 5 courses. At least three must be LGAV courses.

- LGAV 3110 - Aviation Maintenance Programs
- LGAV 3120 - Aviation Safety Systems
- LGAV 3130 - Air Cargo Planning and Control
- LGAV 3140 - Air Passenger Planning and Control
- LGAV 3150 - Transportation Regulation and Trade Compliance
- LGAV 4500 - Human Factors and Cockpit Resource Leadership
- LGAV 4810 - Special Topics in Aviation Logistics
- LGAV 4900 - Special Problems
- LSCM 3960 - Logistics and Supply Chain Management
- LSCM 4360 - Global Alliances and International Supply Chain Management
- LSCM 4510 - Logistics and Business Analysis
- LSCM 4530 - E-Logistics in Supply Chain Management
- LSCM 4540 - Logistics Application of Enterprise Resource Planning Systems
- LSCM 4560 - Business Transportation Management

Logistics and Supply Chain Management minor

The minor in logistics and supply chain management requires 18 hours.

Requirements

Students who wish to minor in logistics and supply chain management must take one required course:

- LSCM 3960 - Logistics and Supply Chain Management

Plus 15 hours

Any five courses selected from the following:

- LGAV 3120 - Aviation Safety Systems
- LGAV 3130 - Air Cargo Planning and Control
- LGAV 3140 - Air Passenger Planning and Control
- LGAV 3150 - Transportation Regulation and Trade Compliance
- LSCM 4360 - Global Alliances and International Supply Chain Management
- LSCM 4530 - E-Logistics in Supply Chain Management
- LSCM 4540 - Logistics Application of Enterprise Resource Planning Systems
- LSCM 4560 - Business Transportation Management

Undergraduate Academic Certificates

Logistics and Supply Chain Management certificate

For information, please contact the Department of Supply Chain Management.

Mission

Developing professionals who help others reach their full potential through powerful learning, social-emotional wellness, physical health and civic engagement.

Vision

The Dallas—Fort Worth region, Texas, the United States and the world will pursue increasing numbers of our graduates as informed and thoughtful practitioners.

The people our students serve will become personally committed to the processes in which our students engage them, and client/student outcomes will inspire those who know them.

The work of those practitioners, and the policies needed to support them, will be understood by the general public and by policy makers.

Our faculty research will be influential and useful to both practitioners and other researchers in their areas of inquiry; our researchers will be widely recognized for their expertise.

The College of Education will be recognized for its excellence – in rankings and in the quality of students and faculty who seek to join us.

The College of Education will be sought out for advice and partnership, across the university and by international and community organizations.

We Value

Whole people – Though our particular specializations may focus on the body, on learning or on emotional well-being, our research and practitioners serve individuals as whole people.

Wellness – Our research and practice with communities and individuals focuses on physical, emotional and intellectual wellness across the lifespan and across domains of experience.

Lifelong learning – Formal learning experiences, like school or therapy, should prepare individuals to remain inquirers and learners across their lives.

Social connectedness – Individuals live, learn and recreate in communities; our research and teaching should strengthen interpersonal bonds and social improvement.

Equity – People from all social groups should experience fairness, access, similar opportunities and satisfactory outcomes in their quests for learning and health.

Innovation – We create worlds of innovators. Our research and teaching break with past practices to expand possibilities, the practitioners and researchers we prepare learn to innovate in their own work, and the people they serve, in turn, invent and advance new practices in their spheres of influence.

The College of Education educator preparation program is accredited by the Texas Education Agency-State Board for Educator Certification <https://tea.texas.gov/>. The program in counselor education is accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP) (5999 Stevenson Avenue, 4th Floor; Alexandria, VA 22304; 703-823-4800, ext. 301 www.cacrep.org). The program in recreation and leisure studies is accredited by the National Recreation and Park Association/American Association of Leisure and Recreation Council on Accreditation (22377 Belmont Ridge Road, Ashburn, VA 20148; 703-858-0784).

Degrees offered

The college offers these undergraduate and graduate degrees:

- Bachelor of Science with majors in human development and family studies; education (teacher certification in early childhood through grade 6, bilingual education, and special education); kinesiology; health behavior and fitness; and recreation, event and sport management;
- Master of Education with majors in counseling; curriculum and instruction; educational leadership; higher education; special education; and teaching;
- Master of Science with majors in counseling; development and family studies; early childhood education; educational psychology; higher education; and kinesiology;
- Doctor of Philosophy with majors in counseling; curriculum and instruction; educational leadership; educational psychology; higher education; human performance and movement science; and special education;
- Doctor of Education with majors in educational leadership; and higher education.

General requirements for each undergraduate degree are listed in the appropriate departmental section of this catalog. Requirements for graduate degrees are listed in the UNT Graduate Catalog.

Prospective graduate students must meet all admission requirements of the Toulouse Graduate School, the College of Education and the selected graduate degree program within the college. Admission to the individual programs is done through a

holistic review of the application portfolio of each candidate. Some financial support for graduate student teaching and research is available from the programs and from the College.

Language and Literacy Studies

University Core Curriculum requirements and degree requirements

The University of North Texas core curriculum is listed in the University Core Curriculum requirements in the Academic policies section of this catalog. Each program within the College of Education requires specific courses to satisfy particular degree requirements. Occasionally, a course required for a degree may also satisfy a requirement of the core. In addition to taking the required course, a student may elect to take a different course from among those available to fulfill that core requirement; doing so, however, may add to the total number of hours required for the degree and may cause students to incur excess hour penalties. Students who have questions regarding degree requirements and course requirements should consult a degree program advisor in the Student Advising Office, Matthews Hall, Room 105.

Teacher certification

Students planning to teach in elementary early childhood-grade 6 (EC-6) must major in Education (see Department of Teacher Education and Administration).

Students planning to teach in secondary schools (7–12) must earn a major and degree in the academic discipline in which they plan to teach and take a minor in secondary education to qualify for a teaching certificate. Students should check with the appropriate department for degree requirements.

The State of Texas Standard Teaching Certificate requires completion of an approved four-year degree program, passing of the appropriate TExES state examinations and clearance on a criminal record search. Students must meet all prerequisite requirements and apply for admission to the teacher education program prior to taking education courses. Continuation in the teacher education program is contingent upon the results of criminal background checks and successful progress in teacher education courses.

A minimum of 12 semester hours must be completed in residence before a recommendation from UNT is made for any teaching certificate. For the University of North Texas to recommend an undergraduate student for teacher certification, additional teaching field, or area of specialization, that student must have successfully (1) completed an approved teacher education program for the preparation of early childhood, secondary or all-level teachers; (2) completed clinical teaching, including attendance at required seminars; and (3) passed the TExES EC-12 Pedagogy and Professional Responsibilities (PPR) and all required content and supplemental certification exams of the Texas Examinations of Educator Standards (TExES), as applicable.

Access to register for Texas teacher certification exams (TExES) is only granted to students who have been formally admitted to the Teacher Education program at UNT. Teacher candidates (who have been admitted to TED) must take UNT-sponsored TExES practice exams prior to the start of Block B courses.

Practice exams are free of charge. The TExES Practice exams are offered four times in each long semester and twice during the summer.

Contact the TExES Success Office in Matthews Hall 119 at 940-369-8601 or COE_TSO@unt.edu for information about registering for your practice TExES Exams, TEAL account setup, and for information and study resources for your actual certification exams. Students who have completed all requirements must apply for teaching certificates online (see www.tea.state.tx.us). In some cases, teacher service records may be required.

Teaching certificates

The awarding of teaching certificates is a function of the Texas Education Agency (TEA) under the authority of the State Board for Educator Certification (SBEC) and is contingent upon a recommendation by the UNT College of Education. The College of Education is authorized to recommend students who successfully fulfill all state and program requirements for the chosen teaching certificate in the following areas:

Early Childhood through Grade Six (certifies to teach grades EC–6)

- EC–6 Core Subjects with Science of Teaching Reading and ESL Supplemental
- EC–6 Core Subjects with Science of Teaching Reading and Bilingual Education Supplemental – Spanish (Grades EC–12)
- EC–6 Core Subjects with Science of Teaching Reading and EC–12 Special Education Supplemental

Standard Secondary (certifies grades 7–12) and All-Level (EC–12)

At the time this catalog went to press, UNT was authorized to recommend secondary and all-level teacher certification for students who have completed a baccalaureate degree in the following content areas:

- Secondary content areas: chemistry; dance; English language arts and reading; family and consumer sciences; history; hospitality, nutrition and food sciences; human development and family studies; journalism; life science; mathematics; physical sciences; physics/mathematics; science; social studies; and speech.
- All-level content areas: art; French; German; music; physical education; Spanish; and theatre.

Although teacher certification programs share many commonalities, what applies to one certificate or grade level is not necessarily applicable to another. Also, changes to existing teacher standards, content areas and certificate levels continue to be made by the State Board for Educator Certification.

Students are encouraged to schedule an appointment with an advisor in the Student Advising Office, Matthews Hall, Room 105, or check online at coe.unt.edu/student-advising.html for the current information regarding specific certificate requirements and any pending changes. The SAO sees students by appointment only, except during the regular registration period each term/semester when they accept drop-in visits. Appointment times fill quickly and students are encouraged to schedule early. Appointments can be made up to two weeks in advance.

Professional (Advanced) educator certification

The College of Education is also authorized by the Texas Education Agency to offer preparation programs leading to professional certification for post-baccalaureate students. The following certifications are available:

- Educational Diagnostician
- Principal as Instructional Leader
- Superintendent
- School Counselor
- School Librarian

See Graduate Catalog for details.

Teacher certification

Eligibility for Teacher Certification and Recommendation

Teaching certificates are granted by the Texas Education Agency (TEA) under the authority of the State Board for Educator Certification (SBEC). Completion of the bachelor's degree and the required education courses does not guarantee certification by the TEA. In order to be recommended by UNT for a standard teaching certificate students must:

- Earn the required Bachelor's Degree.

- Be admitted to the UNT Teacher Education (TEd) Program and meet all state and program requirements including coursework with acceptable grades and GPAs.
- Complete and pass all clinical practice requirements including early field experiences and clinical (student) teaching and be recommended by the university field supervisor and cooperating teacher/s.
- Pass all Texas Examinations of Educator Standards (TExES) teacher certification exams.
- Apply to the Texas Education Agency to be certified after all requirements are met and the bachelor's degree is posted on the transcript.
- Complete fingerprinting. All first-time applicants must be fingerprinted by the TEA-authorized entity and clear a national criminal background check.

Admission to the Teacher Education (TEd) Program

To be eligible for admission, students must have:

- Completed a minimum of 60 semester hours, including the University Core Curriculum. (See "General University Requirements" in the Academics section of this catalog.) Programs leading to teacher certification require specific courses contained in parts of the University Core Curriculum to satisfy particular degree requirements. Students should consult degree program advisors for best choices in the core;
- A 2.75 UNT GPA;
- A 2.75 overall GPA (includes all courses transferred to UNT, plus all courses taken at UNT);
- TSI Complete Status, or have appropriate exam scores on either the ACT or SAT. (Contact the Student Advising Office in Matthews Hall, Room 105, for further information on the score requirements); and
- Submit an application to the UNT Teacher Education (TEd) Program. To apply, Contact the College of Education Student Advising Office, 940-565-2736; Matthews Hall, Room 105; or visit <https://coe.unt.edu/student-advising> for details.

Clinical Teaching Requirement

All EC-6, secondary and all-level teacher candidates must complete Clinical Teaching (6 SCH) with a grade of P (Pass) for both courses to be recommended for their standard teaching certificate. Clinical teaching requirements include attendance at required non-credit seminars.

Clinical Teaching is a full-time, 5 days per week, supervised teaching experience in a school district. Teacher candidates must attend their placement for 100% of the school day. Clinical Teaching can only be completed during long (Fall or Spring) semesters and should be the last semester before the intended graduation.

Clinical Teaching may not count as full-time status for financial aid purposes, depending on student-specific awards. Therefore, the student should plan ahead and consult UNT Student Accounting sfs.unt.edu before they intend to apply for Clinical Teaching to verify what financial aid will be available to them during the clinical teaching semester.

To be eligible for a clinical practice placement for both early field experiences and clinical teaching, students are responsible for applying the semester BEFORE by completing the Clinical Practice Application. Dates for the Clinical Practice Application are listed on the Clinical Practice Office webpage. Applications must be submitted by the designated deadline. For more information, please contact the Clinical Practice Office via email at COE-ClinicalPractice@unt.edu.

To be eligible to begin clinical teaching, students must meet the following requirements:

- Have been admitted to and accepted their admission offer to the UNT Teacher Education (TEd) Program; and
- Must be in residence at UNT and have earned at least 6 semester hours of resident credit in education at UNT; and

For EC-6 clinical teachers:

- Have completed all prerequisites and have a C or better in all courses in the education major and any applicable certification-specific courses for bilingual and special education candidates; exclusive of student teaching and EDEE 4890 (as required for students seeking any EC-6 certification;

- Have a minimum GPA of 2.75 in each area: UNT core, the education major and any applicable certification-specific courses for bilingual and special education candidates. No courses taken during the clinical teaching term/semester can be used to determine eligibility to clinical teach; and
- Have passed all actual TExES content and supplemental exams required for their certificate. (This does not include the TExES Pedagogy and Professional Responsibilities, Science of Teaching Reading, or BTLPT exams.)

For secondary and all-level clinical teachers:

- Have completed all the required coursework in the teaching field;
- Have completed all prerequisites and have a grade of C or better in all education courses (DFST, EDCI, EDEC, EDEE, EDRE, EDUC, etc.);
- Have a minimum GPA of 2.75 in each area (academic major and education/pedagogy courses) and in all college work completed at UNT, as well as a cumulative GPA of 2.75 for all colleges attended; and
- Have passed all actual TExES content and supplemental exams required for their certificate. (This does not include the TExES Pedagogy and Professional Responsibilities.)

Admission, Review and Retention (ARR) Committee

Students not meeting eligibility requirements for admission to TE^d or to Clinical Teaching may file an appeal with the Department of Teacher Education ARR Committee. To initiate an appeal, a student must complete the Admission, Retention and Review Appeal Form. The student completes the application and attaches the required materials and documents along with their appeal statement.

TExES Certification Exams

TExES Practice Test requirements

Teacher candidates (students who have been admitted to TE^d) must take UNT-sponsored TExES practice exams. Practice exams are free of charge. TExES Practice exams are offered four times in each long semester and twice during the summer. Visit the TExES Success Office (TSO) in Matthews Hall, Room 119, for further information about their required exams (940-369-8601) or visit the TSO webpage.

- EC-6 candidates must complete all practice tests before the end of PDS Block A.
- Secondary candidates must complete all practice exams prior to enrolling in EDCI 4840.
- All-Level candidates must complete all practice exams by the end of the last semester of early field observations.

Exception: A candidate may be excused from the TExES Practice Exam requirement by presenting an official TExES Test Score Report indicating passing scores on each required exam.

TExES Exam Eligibility and Passing Policies

Access to register for all actual TExES exams is granted by the UNT TExES Success Office (TSO). Students must be formally admitted to the UNT Teacher Education Program and have met any program-specific practice testing requirements prior to being granted test permission for the actual TExES exams.

EC-6 candidates must pass all content and supplemental TExES Exams to be eligible to clinical teach, with the exception of the TExES Science of Teaching Reading and BTLPT. Take the Pedagogy and Professional Responsibilities TExES before or during clinical teaching to be eligible for recommendation.

Secondary and All-Level candidates must pass all content and supplemental TExES exams to be eligible to clinical teach. Take the TExES Pedagogy and Professional Responsibilities exam prior to or during clinical teaching to be eligible for recommendation.

A minimum of 12 semester hours must be completed in residence before a recommendation from UNT is made for any teaching certificate.

Centers and clinics

The Office for Research and Consulting offers services to graduate students and faculty members in the College of Education. Services include assistance in research design, measurements and analysis of data using either the SPSS or SAS statistical packages. Assistance is also given in the interpretation of computer output and display of data in the form of tables or charts.

The Center for the Study of Educational Reform conducts research and serves as an information clearinghouse on educational reform initiatives. Created in 1990, the center has received grants to conduct a statewide survey on education reform and to conduct research on private and public school choice programs. The center also provides doctoral students with opportunities for dissertation research.

The Child and Family Resource Clinic (CFRC) is an interdisciplinary diagnostic and remedial clinic serving children, adults and families from the North Texas area. Services offered include interdisciplinary assessment, counseling, reading instruction, speech/language therapy and parent education classes. Fees for all services are based on a sliding scale. CFRC provides clinical training opportunities for graduate and undergraduate students in counseling, reading and speech/language/hearing.

Center for Young Children (CYC) is an accredited preschool program for young children ages 3 through 5. In addition, it serves as a model, an observation site for undergraduate and graduate students in fields related to young children. Research related to the care and education of young children is conducted by graduate students and faculty members from across the university.

Other centers are listed under the departments with which they are associated.

Endowed chairs

The Don A. Buchholz Endowed Chair in Community College Education in the Bill J. Priest Center for Community College Education began its service to two-year colleges and to the linkage between two- and four-year colleges and universities in the fall of 2000. While the chair and the center's primary function is to provide graduate education, research, and development activities for institutions, administrators and faculty in two-year colleges, the chair and center seek to improve the efficiency and effectiveness of the linkage between two- and four-year colleges and universities in the provision of education to students in post-secondary education.

The Meadows Chair for Excellence in Education was established and funded by the Meadows Foundation to attract distinguished scholars to the College of Education to teach, interact with faculty and students, and engage in scholarly work. Involving such scholars in the academic community should enhance professional development of the faculty, improve the quality of education for students and ultimately lead to a better-prepared Texas public school student body.

The Dr. Mike Moses Chair in Educational Administration was established in honor of a major figure in educational administration in Texas. Dr. Moses, for whom it is named, was Commissioner of Education for Texas, Deputy Chancellor for Systems Operations at Texas Tech University System, and Superintendent of the Dallas Independent School District. The chair position supports the chair holder's scholarship and also provides resources for building UNT's educational administration programs and bringing increased recognition to the graduate programs.

The Velma Schmidt Endowed Chair in Early Childhood Development was established and fully funded as a continuing memorial to Dr. Velma Schmidt and her work on behalf of young children. The holder of the chair is responsible for teaching and mentoring graduate and undergraduate students, collaboration with faculty and schools, participation in professional and scholarly activities, and providing leadership in the university and community.

Course listings

Independent study courses numbered 4900-4910 are open to advanced undergraduate students who are capable of developing a problem independently. A project is chosen by the student and instructor and developed through conferences and approved activities under the direction of the instructor, who may require a term paper. These courses are not open to graduate students and

are offered only when other required courses are unavailable. Prerequisites include consent of instructor and consent of the appropriate authority.

Individual courses of instruction are subject to change or withdrawal at any time and may not be offered each term/semester or every year. Any course may be withdrawn from current offers if the number of registrants is too small to justify conducting it.

Natalya Lindo, Chair

Faculty

The Department of Counseling and Higher Education provides programs designed to prepare professionals for leadership positions in community services, preschools, schools, colleges, universities and the public sector.

Consortium for Animal Assisted Therapy trains professionals and volunteers to work with their pets to facilitate the development of students with pet-assisted educational programs and to enhance the emotional well-being of people of all ages through positive human-animal interactions.

The Higher Education Development Initiative was established in 1972 with a focus to provide professional development activities to graduate students and to disseminate research findings through books, journals and monographs. The center expanded its goals to include support of the UNT Law Conference and comparative international studies.

The Center for Play Therapy exists to facilitate the unique development and emotional growth of children through the process of play therapy. The center carries out this commitment by providing graduate courses in play therapy, a play therapy summer institute, an annual play therapy conference, research, scholarships, a directory of play therapy training in the United States and Canada, a bibliography of play therapy literature, an international clearinghouse for play therapy literature, play therapy for children and training for parents.

The Counseling and Human Development Center (CHDC) and **The Child and Family Resource Clinic (CFRC)** are instructional facilities in which master's and doctoral-level counselors-in-training provide counseling under faculty supervision. These clinics serve individuals of all ages, couples, families and groups. Fees are based on a sliding scale, making counseling affordable to a segment of the population that otherwise might not have access to mental health services.

Minors

Counseling minor

The counseling minor program is available to undergraduate students who are working toward a bachelor's degree. Students must check with their academic advisors to have their minor program approved. The interpersonal skills gained in this program may be applied to a variety of employment settings within the professions related to health and human services. A minor in counseling also provides students with a background that serves as a strong foundation when applying to master's degree programs in counseling and related fields.

A minimum of five counseling courses are offered each fall and spring term/semester. At least one section of the two introductory courses (COUN 2610 and COUN 3620) is offered each fall and spring term/semester. There are minimal courses are offered during the summer.

Requirements:

A counseling minor requires 18 hours of coursework.

- COUN 2610 - Principles of Counseling I
- COUN 3620 - Principles of Counseling II

12 hours from

- COUN 2620 - Diversity and Cultural Awareness
- COUN 3600 - Therapeutic Play
- COUN 3630 - Survey of Career Development and Career Guidance
- COUN 3640 - Group Process in Helping Relationships

Anne Rinn, Chair

Faculty

Academic Support and Outreach Services

Two EPSY offices provide a variety of academic, research and outreach services to students, faculty and the community at large:

Office of Research Consulting

The EPSY **Office of Research Consulting (ORC)** supports the research needs of faculty and students across the UNT community by providing methodological and statistical advice on grants, research, dissertations and classwork. ORC is dedicated to enhancing the research atmosphere at UNT by improving statistical understanding of students and faculty, providing seminars and support on latest developments in data analysis and research methods, archiving publicly available national and international research data, and providing consulting on grant proposals and funded projects.

Office of Giftedness, Talent Development, and Creativity

The **Office for Giftedness, Talent Development, and Creativity (OGTD)** is committed to transforming potential into excellence through innovative educational opportunities, research and outreach. The OGTD aspires to serve the intellectual, academic, social and emotional needs of gifted children and adolescents in the greater North Texas area, and assist those who parent, teach and otherwise work with them. The office aspires to be a leading resource on giftedness, talent development and creativity that is known regionally, nationally and internationally.

Human Development and Family Science

Web site: www.coe.unt.edu/educational-psychology

Human development and family science provides students with a program of study and career opportunities in a selected emphasis area focusing on foundations in child and human development and/or family science. Emphasis areas include community and family services and individual and family development.

The program offers coursework leading to credentialing as a Certified Family Life Educator (CFLE) through the National Council on Family Relations or as an Early Intervention Specialist with the Texas Department of Assistive and Rehabilitative Services. Students interested in either credential should meet with their faculty advisor as soon as possible for a list of required coursework.

Degree/teacher certification plan

The **Human Development and Family Science** secondary teaching certificate is a specialized certificate encompassing a subset of content area standards (1, 2 and 3) from the composite certificate and credentialing to teach a corresponding subset of the discipline's courses.

The **Family and Consumer Sciences** secondary teaching certificate is a composite certificate with content area standards encompassing competencies from the full breadth of the discipline (content area standards 1–8) and credentialing to teach the full range of the discipline's courses.

The degree/teacher certification plan is the official document outlining the student's course of study. The student is responsible for initiating the degree/teacher certification plan process and should do so as soon as possible after being formally enrolled at the university.

Advising should be sought in the Student Advising Office. The student, with advisement, makes decisions relating to the program of study. The degree/teacher certification plan is subsequently prepared in the College of Education Student Advising Office in Matthews Hall, Room 105. Degree/teacher certification plan processing takes four to six weeks. Students must make an appointment to review completed degree/teacher certification plans in Matthews Hall, Room 105.

Educational Psychology

Web site: www.coe.unt.edu/educational-psychology

Special Education

Web site: www.coe.unt.edu/educational-psychology

Special Education EC-12 certification is available in conjunction with the Bachelor of Science with a major in Education with EC-6 certification. See the Education, BS (offered by the Department of Teacher Education and Administration) for specific details.

Courses in special education leading to teacher certification credentials are also offered at the graduate level. See the *Graduate Catalog* for additional information.

Scholarships

The Department of Educational Psychology offers several scholarships designated for undergraduate students in human development and family science and for undergraduate students seeking a special education (K-12) certification. Applications can be found online at coe.unt.edu/scholarships. Deadlines for applications vary slightly with each academic year, with awards generally being announced in late spring. Check with the department office, Matthews Hall, Room 316, for additional scholarship information.

Degree plan

The degree plan is the official document outlining the students' course of study. The student is responsible for initiating the degree plan process and should do so as soon as possible after being formally enrolled at the university.

Career advising should be sought in the departmental office, Matthews Hall, Room 316. The student, with advisement, makes decisions relating to the program of study. The degree plan is subsequently prepared in the College of Education Student Advising Office in Matthews Hall, Room 105. Students should have their degree plans updated the term/semester before graduation in Matthews Hall, Room 105.

UNT ELEVAR Inclusive Post-Secondary Program

UNT ELEVAR (Empower, Learn, Excel, enVision, Advance, Rise) is a four-year inclusive postsecondary education program for students with intellectual disabilities (ID). Following the definition of the program's name, ELEVAR [lift, soar, rise, in Spanish], the program's vision is to empower young adults with ID who wish to continue postsecondary education (PSE) to become self-determined, independent, and healthy adults readied for integrated competitive employment. The UNT ELEVAR program has received U.S. Department of Education Comprehensive Transition Program Accreditation.

Program Contact:

Brenda L. Barrio, Ph.D.
Associate Professor of Special Education (Critical Perspectives)
UNT ELEVAR Inclusive Post-Secondary Program (Project Lead)
Educational Psychology Department
College of Education
University of North Texas
<https://elevar.unt.edu>

Certified Transition Program Certificate

Fully admitted UNT ELEVAR students who fulfill all the requirements below will earn the Certified Transition Program Certificate (CTP) from the Department of Education.

Certificate requirements

The ELEVAR certificate requires the completion of 48 credit hours of course work earned with a grade of pass.

Course work, 48 hours of zero-credit courses

Zero-credit courses will include modified assignments tied to both course content and specific career and or life goals. Course of study (48-hour program) will be individually determined in relation to student goals. Satisfactory academic progress will be measured by performance on individually modified assignments.

Internships

Minimum of eight (8) supervised internships related to career goal. Internships can be paid or non-paid. Every internship must last no less than six-weeks and can be completed in one or more inclusive and competitive employment setting.

Workshops, 32 hours

UNT ELEVAR Program semester-long seminar workshops. Semester-long workshops will include assignments tied to course content, career goals, and life goals. Course of study (32-hour program) will be required for all students in the program. Satisfactory academic progress will be measured by performance on individually modified assignments. Additional workshops can be accessed by the student if needed.

Portfolio

Student portfolio of accomplishments is required for completion of the program. Portfolio will include examples of assignments or projects for courses taken; projects for classes/workshops; examples of skills obtained through internships; and may also include examples of leadership or service learning activities on campus or in the community, extra-curricular involvement, etc.

Career Certificate

In addition to the CTP certificate, fully admitted UNT ELEVAR students may select to earn a UNT Career Certificate. This certificate is available only to students enrolled in the UNT ELEVAR program. Only UNT ELEVAR students who are admitted and fulfill all the requirements below will earn the Career Certificate from the University of North Texas.

UNT ELEVAR Career Certificate

UNT ELEVAR has one certificate with five career emphases. Students select one career emphasis:

1. Arts and Communication
2. Business
3. Public Service, Health and Education
4. Sport and Hospitality
5. STEM

The UNT ELEVAR Career Certificate is designed to ready students to enter the workforce and develop pathways to meaningful careers. The UNT Career Certificate is completed during the UNT ELEVAR four-year academic program. The following are core courses that are required for the UNT Career Certificate and the courses must be satisfactorily completed for the Certificate to be awarded.

Core required courses for UNT ELEVAR Career Certificate

- Health and Sex Education I and II (completion during the freshman year) - equivalent to 6 credit hours

- COMM 1010 - Introduction to Communication (completion during the freshman year) - equivalent to 3 credit hours
- Financial Literacy (completion during the freshman year) - equivalent to 3 credit hours
- UCAR 1000Z - Career Readiness Seminar I (completion during the freshman year) - equivalent to 3 credit hours
- Independent Living I and II (completion during the sophomore year) - equivalent to 3 hour each (6 hours total)
- Self-Advocacy (completion during the junior year) - equivalent to 3 credit hours
- Community Engagement (completion during the junior year) - equivalent to 3 credit hours
- Senior Seminar I and II (completion during the senior year) - equivalent to 3 credit hours each (6 hours total)
- UCAR 2000Z - Career Readiness Seminar II (completion during the senior year) - equivalent to 3 credit hours
- Internships I, II, III, and IV (completion of I and II during the sophomore year and III and IV during the junior year) - equivalent to 3 credit hours each (12 hours total)
- Advanced Career Internships I and II (completion during the senior year) - equivalent to 3 credit hours each (6 hours total)

Additional requirements for UNT ELEVAR Career Certificate

In addition to core requirements, UNT ELEVAR students seeking the UNT ELEVAR Career Certificate will satisfactorily complete six (6), 3-hour academic courses for their specific UNT ELEVAR Career Certificate emphasis. These academic courses are selected by the UNT academic discipline faculty, UNT ELEVAR academic advisors, and workforce coordinators to prepare students for careers and employment in their chosen career emphasis. These academic courses are UNT academic courses offered face-to-face, hybrid or online as designed and approved by the academic department for 3 hours of credit.

Majors

Human Development and Family Science with a concentration in Individual and Family Development across the Lifespan, BS (non–teacher certification)

Graduates of the human development and family science program seek to enhance the well-being of individuals and families through research and community engagement. Individual and family development across the lifespan is one of the two non-certification concentrations offered.

Degree Requirements

The following requirements must be satisfied for a Bachelor of Science with a major in human development and family science with a concentration in individual and family development across the lifespan (non–teacher certification).

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Science degree as specified in the University Core Curriculum in the Academic policies section of this catalog and the College of Education requirements.

Major requirements

Educational psychology core, 42 hours

It is recommended that students enroll in HDFS 1013, HDFS 1023, HDFS 2013, and HDFS 2042 during their first year in the program.

- EPSY 3013 - Reading and Understanding Research
- HDFS 1013 - Human Development
- HDFS 1023 - Assessment and Observation
- HDFS 2013 - Introduction to Human Development and Family Science Theories
- HDFS 2033 - Parenting
- HDFS 2042 - Professional Development in Human Development and Family Science
- HDFS 3113 - Infant and Child Development
- HDFS 3153 - The Impact of Culture on Individuals and Families
- HDFS 3313 - Interpersonal Relationships
- HDFS 3423 - Family, School and Community
- HDFS 3533 - Families in Crisis
- HDFS 4011 - Pre-Internship
- HDFS 4023 - Internship
- HDFS 4133 - Adolescence and Emerging Adulthood
- HDFS 4323 - Family Law and Public Policy

Concentrations

Students must also complete course requirements for a concentration, chosen with the advice of a faculty member within the program area. Concentrations are available in Individual and Family Development Across the Lifespan or Community and Family Services.

Individual and family development across the lifespan, 21 hours

Required courses

- HDFS 2313 - Courtship and Marriage
- HDFS 4433 - Family Resource Management
- HDFS 4353 - Current Research in Family Science

- HLTH 2200 - Family Life and Human Sexuality
or
- PSYC 4470 - Sexual Behavior

- PSYC 3480 - Adult Development and Aging
or
- AGER 3480 - Psychology of Adult Development and Aging

- TWO upper-level electives from the following departments/programs: AGER, ANTH, ASLP, COUN, EDSP, HDFS, HSML, PADM, PSYC, RHAB, SOCI, SOWK, WGST.

Electives

To complete the minimum of 120 hours for the degree.

Other requirements

- A minimum grade of C is required in each course in the major; a minimum GPA of 2.50 in the major, 2.0 GPA in UNT courses and 2.0 overall GPA is required for graduation (overall GPA includes all course work transferred in addition to those taken at UNT).
- Students who are interested in research and preparing for graduate studies are advised to take a research practicum and complete a senior thesis. Any student who is interested in research should meet with a faculty advisor early in the program to plan an appropriate minor and electives and to seek approval for choosing a senior thesis.
- Students majoring in human development and family science must contact the Student Advising Office, Matthews Hall, Room 105, to prepare their degree audits.

Internship information

Include one 3-hour unpaid internship (HDFS 4023) related to the student's selected emphasis area (see below). Students must complete a minimum of 150 clock hours to meet this requirement. Some students may be required to complete a second internship. Students should have senior status and have completed HDFS 4011 before beginning the internship. Liability insurance is required for all internship students. Permission to enroll in an internship and approval of the internship site are required. Students must have completed the following courses to be eligible for enrollment in internships related to:

Infants or toddlers

- HDFS 3113 - Infant and Child Development
- HDFS 3213 - Infant and Toddler Intervention and Education

Teaching young children (2 years–8 years)

- HDFS 4233 - Guidance of Children and Youth
- EDEC 4243 - Environmental Processes and Assessment

School-age care and programming

- HDFS 3123 - Child Development for Non-Majors
- HDFS 4133 - Adolescence and Emerging Adulthood

Adolescents

- HDFS 4133 - Adolescence and Emerging Adulthood

Administration and/or parent/family life education

- HDFS 4253 - Administration of Programs for Children, Youth and Families
- HDFS 4413 - Family Life Education

Child life

- HDFS 4213 - Child Life Seminar

Human Development and Family Science with a concentration in Community and Family Services, BS (non–teacher certification)

Graduates of the human development and family science program seek to enhance the well-being of individuals and families through research and community engagement. Community and family services is one of two non-certification concentrations offered.

Degree requirements

The following requirements must be satisfied for a Bachelor of Science with a major in human development and family science with a concentration in community and family services (non–teacher certification).

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Science degree as specified in the University Core Curriculum in the Academic policies section of this catalog and the College of Education requirements.

Major requirements

Educational psychology core, 42 hours

It is recommended that students enroll in HDFS 1013, HDFS 1023, HDFS 2013, and HDFS 2042 during their first year in the program.

- EPSY 3013 - Reading and Understanding Research
- HDFS 1013 - Human Development
- HDFS 1023 - Assessment and Observation
- HDFS 2013 - Introduction to Human Development and Family Science Theories
- HDFS 2033 - Parenting
- HDFS 2042 - Professional Development in Human Development and Family Science
- HDFS 3113 - Infant and Child Development
- HDFS 3153 - The Impact of Culture on Individuals and Families
- HDFS 3313 - Interpersonal Relationships
- HDFS 3423 - Family, School and Community
- HDFS 3533 - Families in Crisis
- HDFS 4011 - Pre-Internship
- HDFS 4023 - Internship
- HDFS 4133 - Adolescence and Emerging Adulthood
- HDFS 4323 - Family Law and Public Policy

Concentrations

Students must also complete course requirements for a concentration, chosen with the advice of a faculty member within the program area. Concentrations are available in Community and Family Services or Individual and Family Development across the Lifespan.

Community and family services, 21 hours

Required courses

- HDFS 3213 - Infant and Toddler Intervention and Education
- HDFS 4253 - Administration of Programs for Children, Youth and Families
- HDFS 4413 - Family Life Education
- PADM 3010 - Foundations of Philanthropy and Nonprofits
- SOWK 4700 - Child Welfare Practice and Services
- TWO upper-level electives from the following departments/programs: AGER, ANTH, ASLP, COUN, EDSP, HDFS, HSML, PADM, PSYC, RHAB, SOCI, SOWK, WGST.

Electives

To complete the minimum of 120 hours for the degree.

Other requirements

- A minimum grade of C is required in each course in the major; a minimum GPA of 2.50 in the major, 2.0 GPA in UNT courses and 2.0 overall GPA is required for graduation (overall GPA includes all course work transferred in addition to those taken at UNT).

- EDEC 4243 - Environmental Processes and Assessment

School-age care and programming

- HDFS 3123 - Child Development for Non-Majors
- HDFS 4133 - Adolescence and Emerging Adulthood

Adolescents

- HDFS 4133 - Adolescence and Emerging Adulthood

Administration and/or parent/family life education

- HDFS 4253 - Administration of Programs for Children, Youth and Families
- HDFS 4413 - Family Life Education

Child life

- HDFS 4213 - Child Life Seminar

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years, and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

Year 1

Semester 1		Semester 2	
HDFS 1013 - Human Development	3 hours	HDFS 1023 - Assessment and Observation	3 hours
HDFS 2033 - Parenting	3 hours	American History core	3 hours
American History core	3 hours	Communication core	3 hours
Communication core	3 hours	Creative Arts core	3 hours
Mathematics core	3 hours	Elective	3 hours
Total	15 hours	Total	15 hours

Year 2

Semester 1		Semester 2	
HDFS 2013 - Introduction to Human Development and Family Science Theories	3 hours	HDFS 2042 - Professional Development in Human Development and Family Science	2 hours
Government/Political Science core	3 hours	Government/Political Science core	3 hours
Life and Physical Sciences core	3 hours	Life and Physical Sciences core	3 hours
Elective	3 hours	HDFS Concentration	3 hours
Elective	3 hours	HDFS Upper Division elective	3 hours
Total	15 hours	Total	14 hours

Year 3

Semester 1		Semester 2	
EPSY 3013 - Reading and Understanding Research	3 hours	HDFS 3113 - Infant and Child Development	3 hours
HDFS 3153 - The Impact of Culture on Individuals and Families	3 hours	HDFS 3423 - Family, School and Community	3 hours
HDFS 3313 - Interpersonal Relationships	3 hours	HDFS 3533 - Families in Crisis	3 hours

Total	16 hours	Total	15 hours

Human Development and Family Science, BS (teacher certification)

Graduates of the human development and family science program with teacher certification seek to enhance the well-being of individuals and families through education and community engagement.

Degree requirements

The following requirements must be satisfied for a Bachelor of Science with a major in human development and family science (teacher certification).

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Science degree as specified in the University Core Curriculum in the Academic policies section of this catalog and the College of Education requirements.

Major requirements

Human development and family science certificate, 55 hours

- CMHT 4750 - Managing a Diverse Workforce
- EDEC 3613 - Childhoods Across Time, Space and Place
- EDEC 4243 - Environmental Processes and Assessment
- EDEC 4633 - Nurturing Children's Social Competence
- HDFS 1013 - Human Development
- HDFS 1023 - Assessment and Observation
- HDFS 2033 - Parenting
- HDFS 2313 - Courtship and Marriage
- HDFS 3113 - Infant and Child Development
- HDFS 3123 - Child Development for Non-Majors
- HDFS 3213 - Infant and Toddler Intervention and Education
- HDFS 3313 - Interpersonal Relationships
- HDFS 3423 - Family, School and Community
- HDFS 4011 - Pre-Internship
- HDFS 4133 - Adolescence and Emerging Adulthood

- HDFS 4233 - Guidance of Children and Youth
- HDFS 4253 - Administration of Programs for Children, Youth and Families
- HDFS 4323 - Family Law and Public Policy
- HDFS 4413 - Family Life Education
- HDFS 4433 - Family Resource Management
- HMGT 1450 - Principles of Nutrition

Family and consumer sciences certificate, 64 hours

- ICON 3800 - Consumer Psychology
- CMHT 4750 - Managing a Diverse Workforce
- EDEC 4243 - Environmental Processes and Assessment
- HDFS 1013 - Human Development
- HDFS 2033 - Parenting
- HDFS 2313 - Courtship and Marriage
- HDFS 3113 - Infant and Child Development
- HDFS 3123 - Child Development for Non-Majors
- HDFS 3313 - Interpersonal Relationships
- HDFS 4011 - Pre-Internship
- HDFS 4233 - Guidance of Children and Youth
- HDFS 4253 - Administration of Programs for Children, Youth and Families
- HDFS 4413 - Family Life Education
- HDFS 4433 - Family Resource Management
- FADM 2400 - Introduction to the Furniture Industry
- HMGT 1420 - Food Sanitation
- HMGT 1450 - Principles of Nutrition
- HMGT 1470 - Introduction to Professional Food Preparation
- HMGT 1500 - Orientation to the Hospitality Industry
- HMGT 3700 - Hotel Operations
- MDSE 2650 - Textiles for Apparel
- MDSE 4250 - Product Development

Other course requirements, 3 hours

- LTEC 1100 - Computer Applications

Other requirements

Admission to teacher education

1. Junior standing (60 credit hours earned);
2. a 2.75 overall GPA (includes all transferred and UNT courses) and a 2.75 GPA in the core with all graded courses complete;
3. appropriate exam scores on either the ACT, SAT or Praxis Core: Academic Skills for Educators; (contact the Student Advising Office in Matthews Hall, Room 105, for further information on the exam requirement);
4. a rating of "Accepted" on the online admission interview questionnaire;

5. active enrollment at UNT and a completed or in-process degree audit in the College of Education Student Advising Office; and
6. a completed Application for Admission to Teacher Education submitted to the College of Education Student Advising Office once all requirements are complete.

Contact the College of Education Student Advising Office, 940-565-2736; Matthews Hall, Room 105; or www.coe.unt.edu/sao for additional information.

Professional education requirements, 21 hours

Pedagogy, 12 hours

- EDCI 3800 - Professional Issues in Teaching
- EDCI 3830 - Teaching/Learning Process and Evaluation
- EDCI 4070 - Teaching in a Multicultural Classroom
- EDCI 4840 - Instructional Strategies and Classroom Management

Reading/English/language arts, 3 hours

- EDCI 4060 - Content Area Reading

Internship (student teaching), 6 hours

- EDCI 4108 - Student Teaching in the Secondary School
- EDCI 4118 - Student Teaching in the Secondary School

Note

See "Student Teaching" in the College of Education general information section of this catalog.

Eligibility for teacher certification and endorsements

Teacher certification is a function of the State Board for Educator Certification. Completion of the bachelor's degree and the required education courses does not necessarily result in certification by the agency. In order to receive recommendation for teacher certification through the University of North Texas, students must have:

- Successfully completed an approved teacher education program for the preparation of secondary teachers;
- Successfully completed student teaching, including attendance at appropriate seminars and passing a comprehensive teacher preparation examination; and
- Passed the content examination from the American Association of Family and Consumer Sciences.

Students completing course requirements for the Human Development and Family Science teacher certificate will be eligible to apply to the National Council of Family Relations for the Certified Family Life Educator credential. Students completing course requirements for the Family and Consumer Sciences teacher certificate will be eligible to apply to the American Association of Family and Consumer Sciences for the Certified Family and Consumer Sciences credential.

Grad Track Options

Human Development and Family Science, BS with grad track option leading to Educational Psychology, MS

Academically strong undergraduate students with a major or minor in human development and family science (HDFS) may apply for and be admitted to the master's in educational psychology while still undergraduates. Doing so allows them to finish first their bachelor's degree and then their master's program on an accelerated pathway. With departmental approval, and subject to the requirements of the accelerated master's degree (see below), four undergraduate courses are replaced with their graduate counterparts. These four graduate courses also count toward the 33 hours for the master's degree in educational psychology.

Admission requirements and program policies

Admission requirements

Students who have completed 75 credit hours of undergraduate coursework may apply for admission into the grad track program in educational psychology by submitting the following:

1. *Submission of official GRE scores is strongly encouraged but not required.*
2. At least two written letters of recommendation from individuals who can give evidence of the candidate's reading, critical thinking, writing and quantitative skills. These letters must be sent from the recommender, signed and on letterhead. Preference is given to letters from full-time EPSY faculty and/or the UNT faculty from whom the applicant has taken upper-division or graduate courses.
3. Resume or vita that includes educational and any professional experiences.
4. A personal statement (1–3 pages) stating the applicant's goals and rationale for applying to the desired degree concentration. Please describe any related job experiences or any relevant research and/or evaluation experiences.

Students meeting the grad track requirements will be notified to start the accelerated program after completing 90 credit hours of coursework toward their undergraduate degree program. This official notification is required for taking graduate-level courses.

Program policies

Students with an overall GPA of 3.50 may apply to the program and to the graduate school for the grad track option, which includes 6 hours of undergraduate courses in human development and family science and up to 12 hours of graduate courses in educational psychology. Following successful completion of the undergraduate degree, students may transfer the 12 graduate hours into the MS with a major in educational psychology and concentrations in family policy and program administration or learning and development.

Students admitted into the grad track option must earn a grade point of 3.0 or higher in each of the four graduate courses taken. Full admission to the UNT graduate school is obtained upon completion of the undergraduate degree.

Program requirements

Students seeking a master's concentration in Family Policy and Program Administration will take the following courses in the grad track option:

- EPSY 5000 - Introduction to Educational Psychology
- EPSY 5050 - Foundations of Educational Research Methodology
- EPSY 5413 - Family Relationships
- EPSY 5453 - Family Law and Policy

Students seeking a master's concentration in Learning and Development will take the following courses in the grad track option:

- EPSY 5000 - Introduction to Educational Psychology

- EPSY 5050 - Foundations of Educational Research Methodology
- EPSY 5133 - Infant and Child Development
- EPSY 5143 - Advanced Adolescent Development

With department approval the following courses may be substituted based on course availability:

- EPSY 5210 - Educational Statistics
- EPSY 5250 - Grant Proposal Writing Techniques

All remaining courses for Human Development and Family Science with a concentration in Community and Family Services, BS (non-teacher certification), Human Development and Family Science, BS (teacher certification) or Human Development and Family Science with a concentration in Individual and Family Development across the Lifespan, BS (non-teacher certification) must be completed.

Human Development and Family Science, minor with grad track option leading to Educational Psychology, MS

A minor in human development and family science (HDFS) is suggested for students whose careers or graduate degree audits involve children and families, for students who desire enrichment in family life education and for students in pre-professional studies leading to careers in medicine and family law. A grad track minor in HDFS requires 18 semester hours, including 12 advanced hours. Students who choose HDFS as a minor must meet prerequisite requirements for courses.

Admission requirements and program policies

Admission requirements

Students who have completed 75 credit hours of undergraduate coursework may apply for admission into the grad track program in educational psychology by submitting the following:

1. *Submission of official GRE scores is strongly encouraged but not required.*
2. At least two written letters of recommendation from individuals who can give evidence of the candidate's reading, critical thinking, writing and quantitative skills. These letters must be sent from the recommender, signed and on letterhead. Preference is given to letters from full-time EPSY faculty and/or the UNT faculty from whom the applicant has taken upper-division or graduate courses.

4. A personal statement (1–3 pages) stating the applicant's goals and rationale for applying to the desired degree concentration. Please describe any related job experiences or any relevant research and/or evaluation experiences.

Students meeting the grad track requirements will be notified to start the accelerated program after completing 90 credit hours of coursework toward their undergraduate degree program. This official notification is required for taking graduate-level courses.

Program policies

Students with an overall GPA of 3.50 may apply to the program and to the graduate school for the grad track option, which includes 6 hours of undergraduate courses in human development and family science and up to 12 hours of graduate courses in educational psychology. Following successful completion of the undergraduate degree, students may transfer the 12 graduate hours into the MS with a major in educational psychology and concentrations in research and evaluation, family policy and program administration, child life or learning and development.

Students admitted into the grad track option must earn a grade point of 3.0 or higher in each of the four graduate courses taken. Full admission to the UNT graduate school is obtained upon completion of the undergraduate degree.

Program requirements

Students seeking a master's concentration in family policy and program administration will take the following courses in the grad track option:

- EPSY 5000 - Introduction to Educational Psychology
- EPSY 5050 - Foundations of Educational Research Methodology
- EPSY 5413 - Family Relationships
- EPSY 5453 - Family Law and Policy

Students seeking a master's concentration in learning and development will take the following courses in the grad track option:

- EPSY 5000 - Introduction to Educational Psychology
- EPSY 5050 - Foundations of Educational Research Methodology
- EPSY 5133 - Infant and Child Development
- EPSY 5143 - Advanced Adolescent Development

Students seeking a master's concentration in research and evaluation will take the following courses in the grad track option:

- EPSY 5000 - Introduction to Educational Psychology
- EPSY 5050 - Foundations of Educational Research Methodology
- EPSY 5123 - Human Development Across the Life Span
- EPSY 5350 - Foundations of PsychoEducational Measurement

With department approval the following courses may be substituted based on course availability:

- EPSY 5210 – Educational Statistics
- EPSY 5250 - Grant Proposal Writing Techniques

For the remainder of the minor requirements, please contact the Department of Educational Psychology.

All remaining courses for the Human Development and Family Science minor must be completed.

Special Education, minor with grad track option leading to Special Education, MEd

Academically strong undergraduate students in departments other than educational psychology (EPSY) who have a cumulative GPA of 3.5 or better may apply for permission to pursue a grad track pathway minor in SPED. Acceptance into the minor will enable them to both finish their coursework for a bachelor's degree in their major programs, while also transfer up to 12 graduate credit hours into the Master of Education degree. Upon acceptance into the pathway minor, students will take 4 graduate and 2 undergraduate courses. The four graduate courses will count towards the master's degree in special education, pending a grade of B or better.

Admission requirements

Students who have completed 75 credit hours of undergraduate course work may apply for admission into the grad track program in special education by submitting the following:

1. *Submission of official GRE scores is strongly encouraged but not required.*
2. At least two written letters of recommendation from individuals who can give evidence of the candidate's reading, critical thinking, writing and quantitative skills. These letters must be sent from the recommender, signed and on letterhead. Preference is given to letters from full-time EPSY faculty and/or the UNT faculty from whom the applicant has taken upper-division or graduate courses.
3. Resume or vita that includes educational and any professional experiences.

4. A personal statement (1–3 pages) stating the applicant's goals and rationale for applying to the desired degree concentration. Please describe any related job experiences or any relevant research and/or evaluation experiences.

Students meeting the grad track requirements will be notified to start the graduate program after completing 90 credit hours of course work toward their undergraduate degree program. This official notification is required for taking graduate-level courses.

Program policies

Students with an overall GPA of 3.50 may apply to the program and to the graduate school for the grad track option, which includes 6 hours of undergraduate courses and up to 12 hours of graduate courses in special education. Following successful completion of the undergraduate degree, students may transfer the 12 graduate hours into the MEd with a major in special education, concentrations in autism intervention, high incidence disabilities or educational diagnostician.

Students admitted into the grad track option must earn a grade point of 3.0 or higher in each of the four graduate courses taken. Full admission to the UNT graduate school is obtained upon completion of the undergraduate degree. Please see Graduate Catalog for other requirements for the MEd degree.

The 18-hour minor with grad track option will consist of

- EPSY 5000 - Introduction to Educational Psychology (replaces EPSY 3000)
- EDSP 5240 - Collaboration with Parents, Paraeducators and Professionals (replaces EDSP 3240)
- EDSP 5330 - Classroom and Behavior Management Strategies for Exceptional Learners (replaces EDSP 4340)

One of the following options (3 hours):

- For autism intervention concentration: EDSP 5310 - Introduction to Autism Spectrum Disorder (replaces EDSP 3410)
- For high incidence disabilities concentration: EDSP 5740 - Learning Strategies for Promoting Proficiency in Reading and Language Arts for Exceptional Learners (replaces EDSP 4330)
- For educational diagnostician concentration: EDSP 5510 - Educational Appraisal of Exceptional Learners (replaces EDSP 4320)
- Plus two other EDSP courses listed under special education minor, with advisor's approval.

All remaining courses for Special Education minor must be completed.

Minors

Human Development and Family Science minor

An 18-hour minor (12 of which are advanced hours) in human development and family science is suggested for students whose careers or degree audits involve children and families, for students who desire enrichment in family life education and for students in preprofessional studies leading to careers in medicine and family law. Students who choose human development and family science as a minor must meet prerequisite requirements for courses.

Special Education minor

The special education minor is available to undergraduate students working toward a bachelor's degree. Because of its compatibility with other human service fields, special education provides an appropriate minor for students majoring in such areas as rehabilitation, speech and hearing science, behavior analysis, psychology, criminal justice, social work, recreation, kinesiology, and human development and family science.

Students minoring in special education must take a minimum of 18 semester hours to complete the minor, with at least 6 hours of advanced work (3000- or 4000-level). Minors must observe the system of prerequisites for courses. Departmental advisors are

available for consultation on the minor in special education. Contact the College of Education Advising Office at (940) 565-2736 or the Educational Psychology Office at (940) 565-4646. Certain courses are recommended depending on the student's major.

Required courses

A minor in special education requires 18 semester hours from the following, with EPSY advisor's approval:

- EDSP 3210 - Educational Aspects of Exceptional Learners
- EDSP 3240 - Family Collaboration for Exceptional Learners
- EDSP 3410 - Developmental Disabilities and Autism: Identification and Intervention
- EDSP 3420 - Behavioral Disorders: Characteristics, Identification and Intervention
- EDSP 4320 - Educational Assessment and Evaluation of Exceptional Learners
- EDSP 4330 - Advanced Educational Strategies for Exceptional Learners
- EDSP 4340 - Classroom and Behavioral Management Strategies for Exceptional Learners
- EDSP 4360 - Transition Education and Services for Exceptional Learners
- EPSY 3000 - Foundations of Educational Psychology

Department of Kinesiology, Health Promotion and Recreation

Main Office

Physical Education Building, Room 209

Mailing address:

1155 Union Circle #310769

Denton, TX 76203-5017

940-565-2651

Fax: 940-565-4904

Web site: coe.unt.edu/kinesiology-health-promotion-and-recreation/index.html

Jakob Vingren, Chair

Faculty

The Department of Kinesiology, Health Promotion and Recreation offers a variety of programs of study in kinesiology; health promotion; and recreation, events and sport management. The department offers teaching and non-teaching degrees and courses that fulfill university's core requirements.

The Center for Sport Psychology and Performance Excellence (CSPPE) is a multi-disciplinary center devoted to offering sport psychology interventions, research and training. The center combines the expertise of faculty in psychology and kinesiology to produce the most comprehensive and state-of-the-art sport psychology services available.

Kinesiology

Main Office

Physical Education Building, Room 209

940-565-2651

The program in kinesiology offers a complete curriculum that prepares students for a variety of careers in the public and private sectors and in teaching. Degrees include Bachelor of Science and Master of Science with a major in kinesiology. A teacher

certification program is available, which is a standard all-level certificate in physical education (kinesiology) at the bachelor's level.

All kinesiology majors must fulfill program requirements. The program requires successfully completing Tier 1 and Tier 2.

Tier 1 courses are MATH 1680, BIOL 2301/BIOL 2311, BIOL 2302/BIOL 2312 (or KINE 2105*), PHED 1000, KINE 2030, and KINE 2050 with a 2.5 overall GPA.

Tier 2 courses are KINE 3080, KINE 3090 with a 2.5 overall GPA.

*KINE 2105 will fulfill the anatomy and physiology requirement for the general and teacher certification track. Students on the allied health track are required to take BIOL 2301/BIOL 2311 and BIOL 2302/BIOL 2312. Note an additional 3 hours of physical and life science core is required.

Teacher certification

Students should refer to the sections on "Teacher certification," "Teaching certificates" and "Student teaching" in the College of Education general information pages of this catalog for necessary requirements to qualify for recommendation for a Texas teaching certificate.

Degree plan

The degree plan is the official document outlining the student's course of study. The student is responsible for initiating the degree plan process and should do so as soon as possible after being formally enrolled at the university.

Career advising should be sought in the departmental office, Physical Education Building, Room 209. The student, with advisement, makes decisions relating to the program of study. The degree plan is subsequently prepared in the College of Education Student Advising Office in Matthews Hall, Room 105. Students should have their degree plans updated the term/semester before graduation in Matthews Hall, Room 105.

Scholarships

The Irma Caton, John Douthitt Memorial, Corinne and David Hill, Morrow Family, and Peggy Richardson scholarships are awarded annually to a kinesiology major. The Eurice Miller Bass, Paramount Pictures KHPR and Delta Psi Kappa Beulah A. Harriss scholarships also are available. Information and applications are available in the departmental office, Physical Education Building, Room 209, and on the departmental web site <https://coe.unt.edu/kinesiology-health-promotion-and-recreation/index.html>.

Health Behavior and Fitness

Main Office
Physical Education Building, Room 209
940-565-2651

The health behavior and fitness program is designed to prepare graduates for careers in a variety of community health organizations (hospital-based health programs, work-site wellness programs, community-based agencies, commercial fitness centers, public health departments), as well as in local, state and national government health agencies (CDC&P, FDA, EPA).

Degree plan

The degree plan is the official document outlining the student's course of study. The student is responsible for initiating the degree plan process and should do so as soon as possible after being formally enrolled at the university.

Career advising should be sought in the departmental office in PEB, Room 209. The student, with advisement, makes decisions relating to the program of study. The degree plan is subsequently prepared in the College of Education Student Advising Office in Matthews Hall, Room 105. Students should have their degree plans updated the term/semester before graduation in Matthews Hall, Room 105.

Scholarships

The Linda and Philip Dudney Health Promotion Scholarship is awarded to deserving undergraduate and graduate majors. The Eurice Miller Bass, Paramount Pictures KHPR, and Delta Psi Kappa Beulah A. Harriss scholarships also are available. For information, contact the departmental office or visit the departmental web site coe.unt.edu/kinesiology-health-promotion-and-recreation/index.html.

Recreation, Event and Sport Management

Main Office
Physical Education Building, Room 209
940-565-2651

The program's primary goals are the professional preparation of undergraduate and graduate students, research into the phenomena of leisure; practical application related to recreation and sport operation and management; development of new techniques for professional practice; community and professional service; continuing education; scholarly publications; and technical assistance.

The program in recreation, event and sport management leading to the Bachelor of Science degree prepares students for careers in three interest areas: program management, event management, and sport management. The undergraduate program emphasizes the study of recreation, event and sport and the preparation of students for management and leadership positions in a variety of agency settings.

Career opportunities for program graduates include federal, state and local government park and recreation agencies; intramural, youth, community, intercollegiate and professional sport management agencies; commercial recreation agencies; corporate employee and campus and military recreation operations.

Degree plan

The degree plan is the official document outlining the student's course of study. The student is responsible for initiating the degree plan process and should do so as soon as possible after being formally enrolled at the university.

Advising should be sought in the departmental office. The student, with advisement, makes decisions related to the program of study. The degree plan is subsequently prepared in the College of Education Student Advising Office in Matthews Hall, Room 105. Students should have their degree plans updated the term/semester before their internship in Matthews Hall, Room 105.

Scholarships

The Don C. Bailey, Sue Delmark, Marian C. Keller, Rita Pilkey, Julia Wakeley, and the Rich Herold Scholarships are awarded annually on a competitive basis to undergraduate and graduate majors in the program. The KHPR and Delta Psi Kappa Beulah A. Harriss scholarships also are available. Information and applications are available in the departmental office and on the departmental web site <https://coe.unt.edu/kinesiology-health-promotion-and-recreation/index.html>.

Majors

Health Behavior and Fitness, BS

The Bachelor of Science with a major in health behavior and fitness provides you with the skills to assist others in living a healthy life with an emphasis on wellness and physical activity. The curriculum explores a range of areas around healthy lifestyle choices including exercise, nutrition, psychology and wellbeing. This degree provides students with a strong foundation to pursue careers in workplace wellness, fitness, personal training, wellness coaching and related health and exercise industries as well as to pursue advanced degrees in these areas.

Degree requirements

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 hours must be advanced, and fulfillment of degree requirements for Bachelor of Science degree as specified in the General University requirements in the Academic policies section of this catalog and the College of Education requirements.

Major requirements

Pre-theory core

Pre-theory core to be completed with C or better before taking 4000-level HLTH courses.

- HLTH 1900 - Principles of Health
- KINE 2105 - Human Anatomy and Physiology for the movement sciences
- PHED 1000 - Scientific Principles and Practices of Health-Related Fitness

Health core

- HLTH 2200 - Family Life and Human Sexuality
- HLTH 3150 - Psychology of Exercise
- HLTH 3300 - Health Emergencies and First Aid
- HLTH 4300 - Workplace Wellness
- HLTH 4340 - Minority Populations and Health
- HLTH 4360 - Chronic Disease Prevention and Management
- HLTH 4600 - Behavioral Change Strategies in Health Promotion
- HLTH 4850 - Internship in Health Behavior and Fitness

Culture awareness

- PUBH 3010 - Social Justice and Behavioral Foundations in Public Health

Exercise and fitness

- KINE 2010 - Fundamentals of Strength and Conditioning
- KINE 2050 - Sociology of Sport
- KINE 3020 - Movement for Individuals with Disabilities
- KINE 3030 - Fundamentals of Sport Nutrition
- KINE 3080 - Physiological Bases of Exercise and Sport

- KINE 4300 - Exercise Leadership
- KINE 4325 - Fitness Testing

Minor

Minimum of 18 hours, 6 of which must be advanced. Recreation, Event and Sport Management Minor (for non-majors) is preferred.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information, see an academic advisor.

Other course requirements

- MATH 1680 - Elementary Probability and Statistics
- COMM 2020 - Interpersonal Communication
or
- COMM 2040 - Public Speaking
or
- COMM 2140 - Advocating in Public
- HMGH 2460 - Introduction to Nutrition Science

Other requirements

Students must have:

- a 2.5 GPA for the major (including both HLTH and KINE core courses),
- a 2.0 overall GPA, and
- a C or better in all HLTH and KINE courses.

Kinesiology, BS (All-Level Teacher Certification)

Hours required and general/college requirements

A minimum of 120 semester hours (124 semester hours for those seeking all-level teacher certification), of which 36 must be advanced, and fulfillment of degree requirements for the Bachelor of Science degree as specified in the University Core Curriculum in the Academic policies section of this catalog and the College of Education requirements.

All kinesiology majors

Tier 1

- KINE 2105 - Human Anatomy and Physiology for the movement sciences
or
 - BIOL 2301 - Human Anatomy and Physiology I
 - BIOL 2311 - Human Anatomy and Physiology I Laboratory
and
 - BIOL 2302 - Human Anatomy and Physiology II
 - BIOL 2312 - Human Anatomy and Physiology II Laboratory
 - KINE 2030 - Introduction to Kinesiology
 - KINE 2050 - Sociology of Sport
 - MATH 1680 - Elementary Probability and Statistics
 - PHED 1000 - Scientific Principles and Practices of Health-Related Fitness
- To move into Tier 2, you must have completed each course in Tier 1 with a minimum grade of C and have a 2.5 overall GPA or higher.

Tier 2

- KINE 3080 - Physiological Bases of Exercise and Sport
 - KINE 3090 - Motor Behavior
- To take any additional upper division KINE courses, you must have completed each course in Tier 2 with a minimum grade of C and have a 2.5 overall GPA or higher.

Additional course requirements

- HLTH 2200 - Family Life and Human Sexuality

Other requirements

A Kinesiology course may be repeated one time in order to improve a grade to the requirement of a C or better. Following the second attempt, approval for a third attempt must be sought from the Program Coordinator or Department.

Kinesiology theory core, 15 hours

All kinesiology majors take the following courses and must meet all prerequisites:

- KINE 2010 - Fundamentals of Strength and Conditioning
- KINE 3050 - Biomechanics
- KINE 3090 - Motor Behavior
- KINE 4000 - Psychology of Sport
- KINE 4050 - Quantitative Analysis in Kinesiology (major capstone course)

Minor, 18 hours

Minimum of 18 hours from area other than kinesiology, 6 of which must be advanced.

Admission to Teacher Education (2.75 GPA);

- Junior standing (minimum of 60 earned hours)
- 2.75 overall GPA and 2.75 UNT GPA
- Acceptable scores on SAT, ACT, Praxis
- Approved online interview questionnaire
- An official degree audit with certification
- A signed application for admission to Teacher Education

Contact the College of Education Student Advising Office, 940-565-2736; Matthews Hall, Room 105; or go to coe.unt.edu/student-advising for additional information.

Required Courses, 35 hours:

- KINE 3020 - Movement for Individuals with Disabilities
- KINE 3500 - Motor Development
- **Once admitted to Teacher Education (2.75 GPA):**
- EDCI 3830 - Teaching/Learning Process and Evaluation
- EDCI 4060 - Content Area Reading
- EDCI 4070 - Teaching in a Multicultural Classroom
- HDFS 3423 - Family, School and Community
- KINE 3550 - Pedagogical Skills, Strategies and Management in Physical Education and Movement for Children
- KINE 3560 - Pedagogical Skills, Strategies and Management in Secondary Physical Education
- KINE 4100 - Curriculum and Methods in Kinesiology (Sport Pedagogy)
- KINE 4101 - Early Field Experience Kinesiology Certification
- **After all other courses are completed:**
- KINE 4102 - Student Teaching in Physical Education, Grades EC–5
- KINE 4104 - Student Teaching in Physical Education, Grades 6–12

Additional program requirements

- A minimum grade of C is required in each course in the major; a minimum GPA of 2.75 in the major, 2.0 in UNT courses, and overall is required for graduation. (Overall GPA includes all coursework transferred plus that taken at UNT.)
- 12 hours of KINE must be taken at UNT.
- 36 hours must be advanced; 24 of which must be taken at UNT.
- 6 hours minimum of minor must be advanced.

The total number of hours may be reduced if the student follows recommendations for courses listed in the university core. (Consult the Student Advising Office).

Students are encouraged to see their academic or faculty advisor each term/semester for help with program decisions and enrollment.

Teacher education

Additional requirements:

Prior to student teaching, students must provide verification of current certifications in First Aid, CPR and Bloodborne Pathogens training. The certifications must be maintained through the duration of student teaching.

Student teaching KINE 4102 and KINE 4104.

The student may not receive credit for education courses until after admission to teacher education.

KINE 4102 will serve as a capstone for all-level teacher certification students.

Spring	Fall	Spring	Fall
Complete online admission interview, if successful the student must apply for admission this semester or complete an interview again the next semester			KINE 4100
Complete admission application to teacher education once the student has a successful interview	Back-up application for admission to teacher education	Apply for Early Field Experience	Early Field Experience

Completion

To receive final approval for teacher certification:

- Completion of all requirements of an approved 122-hour degree plan.
- Grades of C or better for each kinesiology course.
- Minimum 2.75 GPA in each of the following areas: each teaching field, all education courses, all UNT work, overall.
- Successful completion of student teaching (see Eligibility for teacher certification requirements listed under the Department of Teacher Education and Administration in this catalog for details).
- Successful scores on appropriate sections of the Texas Examinations of Educator Standards (TExES).

Students should visit their academic advisor in PEB 220 for additional information regarding degree audits. Questions about early field experience or student teaching should be addressed to the Clinical Practice Office in Matthews Hall, Room 207. Questions regarding the TExES exam should be addressed to the TExES Advising Office in Matthews Hall, Room 103 (940-369-8601).

Students are encouraged to see their academic or faculty advisor each term/semester for help with program decisions and enrollment.

Kinesiology, BS (Coaching Education track) (not currently accepting students)

This track is not currently accepting students.

Degree requirements

The following requirements must be satisfied for a Bachelor of Science degree with a major in kinesiology (coaching education track).

Hours required and general/college requirements

A minimum of 120 semester hours (127 semester hours for those seeking all-level teacher certification), of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Science degree as specified in "General university requirements" in the Academics section of this catalog and the College of Education requirements.

All kinesiology majors

All kinesiology majors must take the following courses. Some are prerequisites for courses in the kinesiology core.

- BIOL 2301 - Human Anatomy and Physiology I
- BIOL 2311 - Human Anatomy and Physiology I Laboratory
- BIOL 2302 - Human Anatomy and Physiology II
- BIOL 2312 - Human Anatomy and Physiology II Laboratory
- MATH 1680 - Elementary Probability and Statistics
- PHED 1000 - Scientific Principles and Practices of Health-Related Fitness

Literature, 3 hours

3 hours selected from the following English courses:

Theory core, 24 hours

All kinesiology majors take the following courses and must meet all prerequisites.

- KINE 2030 - Introduction to Kinesiology
- KINE 2050 - Sociology of Sport
- KINE 3020 - Movement for Individuals with Disabilities
- KINE 3050 - Biomechanics
- KINE 3080 - Physiological Bases of Exercise and Sport
- KINE 3090 - Motor Behavior
- KINE 4000 - Psychology of Sport
- KINE 4050 - Quantitative Analysis in Kinesiology

Capstone course, 3 hours

- RESM 4150 - Capstone Experience in Recreation, Event and Sport Management (may be used to satisfy the Capstone requirement of the University Core Curriculum)

Physical performance courses, 5 hours

PHED 1211 and one course from Group I, Section D are required of all students in the non-teacher certification option. In addition, students must choose two **additional** sport activities from Group I (each from a different section) and one selected from Group II. At least **one** activity must be at the intermediate or advanced level.

Group I

Section A

- PHED 1010 - Beginning Swimming
- PHED 1030 - Intermediate Swimming

Section B

- PHED 1590 - Beginning Tennis
- PHED 1600 - Intermediate Tennis
- PHED 1610 - Advanced Tennis

Section C

- PHED 1570 - Beginning Racquetball
- PHED 1660 - Intermediate Racquetball

Section D

- PHED 1120 - Swim Conditioning
- PHED 1200 - Conditioning Exercises
- PHED 1220 - Jogging
- PHED 1230 - Aerobic Dance
- PHED 1250 - Pilates
- PHED 1260 - Yoga

Group II

Section A

- PHED 1700 - Women's Beginning Basketball
- PHED 1710 - Intermediate Basketball
- PHED 1711 - Men's Intermediate Basketball

Section B

- PHED 1780 - Women's Beginning Volleyball
- PHED 1781 - Men's Beginning Volleyball
- PHED 1790 - Intermediate Volleyball
- PHED 1791 - Men's Intermediate Volleyball

Section C

- PHED 1740 - Soccer
- PHED 1741 - Men's Soccer
- PHED 1770 - Touch Football

Other kinesiology requirements

Coaching education track, 15 hours

Required courses, 9 hours including

- HLTH 3300 - Health Emergencies and First Aid
- 6 hours in consultation with advisor

Plus 6 hours selected from

- KINE 3260 - Coaching Youth Sport
- KINE 4200 - Basic Athletic Training
- KINE 4410 - Facilities, Equipment and Budget for Athletics or
- RESM 4180 - Facility and Area Management in Recreation, Event, and Sport Organizations
- KINE 4860 - Internship in Kinesiology
- Other courses in consultation with advisor

Minor

Minimum of 18 hours from area other than kinesiology, 6 of which must be advanced.

Electives

14 hours, most of which must be advanced

Other requirements

- A minimum grade of C is required in each course in the major; a minimum GPA of 2.75 in the major, a 2.0 in UNT courses, and overall is required for graduation. (Overall GPA includes all course work transferred plus that taken at UNT.)
- 12 hours of KINE must be taken at UNT.
- 42 hours must be advanced; 24 of which must be taken at UNT.
- 6 hours minimum of minor must be advanced.

Total number of hours may be reduced if student follows recommendations for courses listed in university core. (Consult the Student Advising Office, Matthews Hall, Room 105, for details.)

Students are encouraged to see their academic or faculty advisor each term/semester for help with program decisions and enrollment.

All kinesiology majors

A minimum grade of C is required in MATH 1680, BIOL 2301/**BIOL 2311** and BIOL 2302/**BIOL 2312**. A 3.0 GPA is required in PHED 1000, KINE 2030 and KINE 2050 prior to a kinesiology major being allowed to take any KINE 3000- or 4000-level theory core courses.

Kinesiology, BS (General track)

A Bachelor of Science with a major in kinesiology shows that you are committed to best practices within the field of human movement and wellness. By choosing the general track, you have a wide latitude for choice of studies within your major.

Degree requirements

The following requirements must be satisfied for a Bachelor of Science with a major in kinesiology (general track):

Hours required and general/college requirements

A minimum of 120 semester hours (122 semester hours for those seeking all-level teacher certification), of which 36 must be advanced, and fulfillment of degree requirements for the Bachelor of Science degree as specified in General university requirements in the Academic policies section of this catalog and the College of Education requirements.

All kinesiology majors

Tier 1

- KINE 2105 - Human Anatomy and Physiology for the movement sciences
or
 - BIOL 2301 - Human Anatomy and Physiology I
 - BIOL 2311 - Human Anatomy and Physiology I Laboratory
and
 - BIOL 2302 - Human Anatomy and Physiology II
 - BIOL 2312 - Human Anatomy and Physiology II Laboratory
 - KINE 2030 - Introduction to Kinesiology
 - KINE 2050 - Sociology of Sport
 - MATH 1680 - Elementary Probability and Statistics
 - PHED 1000 - Scientific Principles and Practices of Health-Related Fitness
- To move into Tier 2, you must have completed each course in Tier 1 with a minimum grade of C and have a 2.5 overall GPA or higher.

Tier 2

- KINE 3080 - Physiological Bases of Exercise and Sport
 - KINE 3090 - Motor Behavior
- To take any additional upper-division KINE courses, you must have completed each course in Tier 2 with a minimum grade of C and have a 2.5 overall GPA or higher.

Additional course requirements

- HLTH 2200 - Family Life and Human Sexuality

Other requirements

A kinesiology course may be repeated one time in order to improve a grade to the requirement of a C or better. Following the second attempt, approval for a third attempt must be sought from the program coordinator or department.

Kinesiology theory core, 15 hours

- KINE 2010 - Fundamentals of Strength and Conditioning
- KINE 3050 - Biomechanics
- KINE 3090 - Motor Behavior
- KINE 4000 - Psychology of Sport
- KINE 4050 - Quantitative Analysis in Kinesiology

Major capstone, 3 hours

- KINE 4050 - Quantitative Analysis in Kinesiology

General interest area, 15 hours

Students select 15 hours from any KINE 3000/4000-level courses not already required for program. KINE 2240 - Coaching Soccer may be selected as part of these 15 hours.

Minor, 18 hours

Minimum of 18 hours from area other than kinesiology, 6 of which must be advanced.

Other requirements

- A minimum grade of C is required in each course in the major; a minimum GPA of 2.75 in the major, 2.0 in UNT courses, and overall is required for graduation. (Overall GPA includes all course work transferred plus that taken at UNT.)
- 12 hours of KINE must be taken at UNT.
- 36 hours must be advanced; 24 of which must be taken at UNT.
- 6 hours minimum of minor must be advanced.

The total number of hours may be reduced if the student follows recommendations for courses listed in university core. (Consult the Student Advising Office).

Students are encouraged to see their academic or faculty advisor each term/semester for help with program decisions and enrollment.

Kinesiology, BS (Pre-PT/Allied Health Track)

Hours required and general/college requirements

A minimum of 120 semester hours, of which 36 must be advanced, and fulfillment of degree requirements for the Bachelor of Science degree as specified in the University Core Curriculum in the Academic policies section of this catalog and the College of Education requirements.

Major requirements

All kinesiology majors

Tier 1

- BIOL 2301 - Human Anatomy and Physiology I
- BIOL 2302 - Human Anatomy and Physiology II
- BIOL 2311 - Human Anatomy and Physiology I Laboratory
- BIOL 2312 - Human Anatomy and Physiology II Laboratory
- KINE 2030 - Introduction to Kinesiology
- KINE 2050 - Sociology of Sport
- MATH 1680 - Elementary Probability and Statistics
- PHED 1000 - Scientific Principles and Practices of Health-Related Fitness

To move into Tier 2, you must have completed each course in Tier 1 with a minimum grade of C and have a 2.5 overall GPA or higher.

Tier 2

- KINE 3080 - Physiological Bases of Exercise and Sport
- KINE 3090 - Motor Behavior

To take any additional upper-division KINE courses, you must have completed each course in Tier 2 with a minimum grade of C and have a 2.5 overall GPA or higher.

Additional course requirements

- HLTH 2200 - Family Life and Human Sexuality

Other requirements

A kinesiology course may be repeated one time in order to improve a grade to the requirement of a C or better. Following the second attempt, approval for a third attempt must be sought from the program coordinator or department.

Kinesiology theory core, 15 hours

All kinesiology majors take the following courses and must meet all prerequisites:

- KINE 2010 - Fundamentals of Strength and Conditioning
- KINE 3050 - Biomechanics
- KINE 3090 - Motor Behavior
- KINE 4000 - Psychology of Sport
- KINE 4050 - Quantitative Analysis in Kinesiology (major capstone course)

Required courses, 51 hours

Biology, 8 hours

- BIOL 1710 - Biology for Science Majors I
- BIOL 1720 - Biology for Science Majors II
- BIOL 1760 - Biology for Science Majors Laboratory
- BIOL 2301 - Human Anatomy and Physiology I and

- BIOL 2311 - Human Anatomy and Physiology I Laboratory
- BIOL 2302 - Human Anatomy and Physiology II and
- BIOL 2312 - Human Anatomy and Physiology II Laboratory

Chemistry, 8 hours

- CHEM 1410 - General Chemistry I for Science Majors and
- CHEM 1430 - Laboratory Sequence for General Chemistry I
- CHEM 1420 - General Chemistry II for Science Majors and
- CHEM 1440 - Laboratory Sequence for General Chemistry II

Health promotion courses, 3 hours

- HLTH 4600 - Behavioral Change Strategies in Health Promotion

Kinesiology courses, 18 hours

- KINE 3500 - Motor Development
- KINE 4200 - Basic Athletic Training
- KINE 4300 - Exercise Leadership
- KINE 4325 - Fitness Testing
- Students select 6 hours from any KINE 3000/4000-level courses not already required for program.

Physics, 8 hours

- PHYS 1410 - General Physics I and
- PHYS 1430 - General Physics Laboratory I
- PHYS 1420 - General Physics II and
- PHYS 1440 - General Physics Laboratory II

Psychology, 6 hours

- PSYC 1630 - General Psychology I
- PSYC 3620 - Developmental Psychology

Electives

See degree plan.

KINE 4860 - Internship may be taken as an elective.

UNT Electives, 3 hours

- BIOL 1500 - Medical Terminology
- HLTH 3300 - Health Emergencies and First Aid
- KINE 3020 - Movement for Individuals with Disabilities
- KINE 3030 - Fundamentals of Sport Nutrition
- KINE 4310 - Advanced Strength and Conditioning
- KINE 4325 - Fitness Testing
- KINE 4330 - Advanced Sport Nutrition and Metabolism
- KINE 4860 - Internship in Kinesiology
- PSYC 4300 - Biopsychosocial Challenges Related to Sexually Transmitted Infections

Minor

None required.

Additional program requirements

- A minimum grade of C is required in each course in the major; a minimum GPA of 2.75 in the major, 2.0 in UNT courses, and overall is required for graduation. (Overall GPA includes all coursework transferred plus that taken at UNT.)
- 12 hours of KINE must be taken at UNT.
- 36 hours must be advanced; 24 of which must be taken at UNT.
- 6 hours minimum of the minor must be advanced.

Total number of hours may be reduced if the student follows recommendations for courses listed in university core. (Consult the Student Advising Office).

Students are encouraged to see their academic or faculty advisor each term/semester for help with program decisions and enrollment.

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

Year 1

Semester 1		Semester 2	
HLTH 2200 - Family Life and Human Sexuality	3 hours	KINE 2030 - Introduction to Kinesiology	3 hours
MATH 1680 - Elementary Probability and Statistics	3 hours	KINE 2050 - Sociology of Sport	3 hours
PHED 1000 - Scientific Principles and Practices of Health-Related Fitness	3 hours	American History core	3 hours
American History core	3 hours	Communication core	3 hours

Semester 1		Semester 2	
Communication core	3 hours	Creative Arts core	3 hours
Total	15 hours	Total	15 hours

Year 2

Semester 1		Semester 2	
BIOL 2301 - Human Anatomy and Physiology I	3 hours	BIOL 2302 - Human Anatomy and Physiology II	3 hours
BIOL 2311 - Human Anatomy and Physiology I Laboratory	1 hour	BIOL 2312 - Human Anatomy and Physiology II Laboratory	1 hour
PSYC 1630 - General Psychology I	3 hours	KINE 2010 - Fundamentals of Strength and Conditioning	3 hours
Government/Political Science core	3 hours	Government/Political Science core	3 hours
Language, Philosophy and Culture core	3 hours	Elective List option	4 hours
Total	13 hours	Total	14 hours

Year 3

Semester 1		Semester 2	
BIOL 1710 - Biology for Science Majors I	3 hours	BIOL 1720 - Biology for Science Majors II	3 hours
CHEM 1410 - General Chemistry I for Science Majors	3 hours	BIOL 1760 - Biology for Science Majors Laboratory	2 hours

Total	16 hours	Total	16 hours

Recreation, Event and Sport Management, BS

The Bachelor of Science degree program with a major in Recreation, Event, and Sport Management (RESM) prepares students for entry-level positions within recreation, event, and sport organizations and agencies. This degree provides students with a foundational understanding of recreation, event, and sport management fields while also developing their practical operational and management skills. Students are prepared for careers in public, non-profit, and private recreation, event, and sport organizations.

The Recreation, Event, and Sport Management degree is also designed as a 2 + 2 program. Students earning their associate in arts or associate in science degrees from a Texas college may come with 60 semester credit hours that will be applied to their degree.

Degree requirements

The following requirements must be satisfied for a Bachelor of Science with a major in recreation, event, and sport management.

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Science degree as specified in the "University Core Curriculum" in the Academics section of this catalog.

Recreation, event and sport management core courses, 30 hours

- RESM 1950 - Foundations and Career Opportunities in Recreation, Event, and Sport Organizations (must be taken during the first semester enrolled in the program)
- RESM 2150 - Leadership in Recreation, Event, and Sport Organizations
- RESM 3050 - Operations and Logistics in Recreation, Event and Sport Organizations
- RESM 3450 - Social Issues in Recreation, Event, and Sport Organizations
- RESM 4050 - Management of Recreation, Event and Sport Organizations
- RESM 4080 - Legal Aspects of Recreation, Event and Sport Organizations
- RESM 4160 - Assessment and Data Analytics in Recreation, Event and Sport Organizations
- RESM 4180 - Facility and Area Management in Recreation, Event, and Sport Organizations

- RESM 4190 - Finance in Recreation, Event, and Sport Organizations
- RESM 4250 - Marketing in Recreation, Event, and Sport Organizations

RESM capstone/pre-internship, 3 hours

- RESM 4150 - Capstone Experience in Recreation, Event and Sport Management

Internship, 12 hours

Each Recreation, Event, and Sport Management student is required to complete a total of 12 credit hours of internship/on-site experience (RESM 4100).

- Students must complete a minimum of 400 clock hours of documented internship hours to meet this requirement.
- The student must meet several requirements prior to enrollment in this course, including:
 - Completion of RESM 4150 (Capstone/Pre-Internship) with a "C" or better;
 - A minimum of 2.00 overall GPA and a "C" or better in each RESM course;
- Departmental permission to enroll in the course.
- The internship is typically a 30 to 40-hours per week affiliation with an approved agency.
- RESM 4100 - Internship in Recreation, Event, and Sport Organizations

Minor requirements, 18 hours

Student may choose a pre-defined minor from another discipline.

Electives, 15 hours

Students must choose 15 hours of electives. Pursuing a certificate complementing the student's career interest is highly suggested.

Other requirements

- A minimum grade of C is required in each RESM course.
- A 2.5 overall GPA is required on all RESM courses.
- A minimum UNT GPA of 2.0 and an overall GPA of 2.0 are required for graduation. Overall GPA includes all course work transferred plus that taken at UNT.

Notes

Students are encouraged to see their academic or faculty advisor and the department degree audit advisor each term/semester for help with program decisions and enrollment.

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

Year 1

Total	15 hours	Total	12 hours

Grad Track Options

Kinesiology, BS with grad track option leading to Kinesiology, MS

The Department of Kinesiology, Health Promotion and Recreation offers a grad track option for existing UNT undergraduate students majoring in kinesiology. In this grad track option, the student can take a maximum of twelve (12) hours of graduate courses while completing the BS degree. These credits will be counted toward both the BS and MS degrees. Prior to registering for these courses, the student must be admitted to the grad track option and obtain approvals from the undergraduate and graduate coordinators.

Admission requirements and program policies

Admission requirements

Students must earn a 3.5 or higher GPA on all undergraduate work and have completed 75 hours, including BIOL 2301/BIOL 2311 and BIOL 2302/BIOL 2312, KINE 3050, as well as the pre-theory core in kinesiology (PHED 1000, KINE 2030 and KINE 2050) with a 3.0 overall in those pre-theory core classes in order to be admitted to this program.

A student who fails to maintain the 3.5 GPA will not be allowed to enroll in the master's level courses.

Students who are applying for the grad track pathway in kinesiology are not required to take the GRE.

Students are required to submit a candidate statement. The candidate statement is an essay in which students describe their interest in enrolling in the grad track pathway in kinesiology. The statement must include reasons for applying to this program, academic goals, career goals, research interests, etc.

Students admitted to a pathway must complete 90 credit hours before taking the courses in the pathway. Students must complete the bachelor's degree within one academic year of their first pathway course in order to have the graduate course credits transferred to their graduate plan of study.

Program policies

Students' applications to the grad track pathway in kinesiology will be reviewed by the kinesiology undergraduate and graduate program coordinators, and students will be admitted only when approved by both program coordinators.

Students' progress will be monitored by both undergraduate and graduate kinesiology program coordinators (before completing the BS degree) and the graduate program coordinator in kinesiology (after completing the BS degree).

Students will be considered undergraduate students until all undergraduate requirements have been met and the bachelor's degree has been posted to the student's transcript. Students will not be eligible for teaching and research assistantships, or related health insurance, financial aid or graduate awards, until the undergraduate degree is completed.

Undergraduate students who have been accepted to the grad track option should complete all bachelor's degree requirements and graduate within 12 months of the first day of the semester for which they start taking graduate courses or enrollment in graduate level course work will be suspended.

Students must enroll in graduate school in the long semester after completing their BS degree and should take the remaining graduate courses in the following year(s) to complete the master's degree.

Program requirements

The Master of Science 36-hour degree includes a 15-hour core curriculum of courses in kinesiology.

- KINE 5090 - Motor Behavior
- KINE 5100 - Research Perspectives in Kinesiology, Health Promotion and Recreation
- KINE 5125 - Sport and Exercise Psychology
- KINE 5150 - Quantitative Procedures in Exercise and Sport Sciences
- KINE 5301 - Physiology of Exercise

12 hours may be chosen from the following

- KINE 5000 - Supervision in Kinesiology
- KINE 5020 - Aging and Movement Control
- KINE 5030 - Life-span Motor Development
- KINE 5050 - Administration and Supervision of Recreation and Sport
- KINE 5060 - Areas and Facilities for Recreation and Sport
- KINE 5090 - Motor Behavior
- KINE 5100 - Research Perspectives in Kinesiology, Health Promotion and Recreation
- KINE 5102 - Student Teaching in Kinesiology

- KINE 5125 - Sport and Exercise Psychology
- KINE 5135 - Exercise and Health Psychology
- KINE 5140 - Women, Leisure and Sport
- KINE 5150 - Quantitative Procedures in Exercise and Sport Sciences
- KINE 5160 - Sports in American Culture
- KINE 5175 - Social Psychology of Sport
- KINE 5185 - Applied Sport Psychology
- KINE 5205 - Sport and Exercise Psychology Research Seminar
- KINE 5210 - Administration Issues and Problems in Kinesiology
- KINE 5230 - Professional Preparation in Kinesiology
- KINE 5290 - Current Topics in Exercise Physiology
- KINE 5301 - Physiology of Exercise
- KINE 5310 - Exercise and Fitness for Special Populations
- KINE 5330 - Sport Nutrition and Metabolism
- KINE 5340 - Biomechanics of Sports Skills
- KINE 5390 - Physiological Assessment in the Health Science
- KINE 5400 - Clinical Application of Exercise Physiology
- KINE 5410 - Sport/Fitness Organization Management
- KINE 5420 - Facilities and Equipment in Kinesiology
- KINE 5430 - Legal Aspects of Kinesiology
- KINE 5450 - Implementing Health/Fitness Programs
- KINE 5470 - Special Topics in Health Fitness
- KINE 5700 - Curriculum and Methods in Kinesiology and Health Promotion
- KINE 5800 - Studies in Kinesiology
- KINE 5850 - Sport and Exercise Psychology Practicum
- KINE 5860 - Practicum, Field Problem or Internship
- KINE 5940 - Current Topics in Kinesiology

All remaining courses for Kinesiology, BS (All-Level Teacher Certification), Kinesiology, BS (General track) or Kinesiology, BS (Pre-PT/Allied Health Track) must be completed.

Additional requirements

For the remainder of the bachelor's degree requirements, please see the appropriate kinesiology degree on the Department of Kinesiology, Health Promotion and Recreation page.

For the remainder of the graduate degree requirements, a student will take 21 hours of additional course work that allows for the development of an interest area such as exercise physiology, sport and exercise psychology, or sport pedagogy. Four graduate courses listed below may be applied toward the student's undergraduate degree as part of the Grad Track Pathway.

Minors

Health Promotion minor

Students who wish to minor in health promotion must take a minimum of 18 credit hours in health courses, including 12 hours at the advanced level. A minimum grade of C is required in each course in the minor.

Kinesiology minor

The requirements for a minor in kinesiology are 21 hours.

15 hours selected from

*Course has prerequisite

- KINE 2000 - History and Philosophy of Sport and Physical Activity in the United States (course not being offered)
- KINE 2030 - Introduction to Kinesiology
- KINE 2050 - Sociology of Sport
- KINE 3020 - Movement for Individuals with Disabilities
- KINE 3050 - Biomechanics *
- KINE 3080 - Physiological Bases of Exercise and Sport *
- KINE 3090 - Motor Behavior
- KINE 4000 - Psychology of Sport
- KINE 4050 - Quantitative Analysis in Kinesiology *

Plus 6 additional hours

Selected from any KINE courses.

Additional requirements

Six hours must be advanced. A minimum grade of C is required in each course in the minor.

Recreation, Event and Sport Management Minor (for non-majors)

Students minoring in recreation, event and sport management are required to take:

Major course, 3 hours

- RESM 1950 - Foundations and Career Opportunities in Recreation, Event, and Sport Organizations

Additional Minor Requirements

Student must select 5 courses (15 hours) from the list of courses below:

- RESM 2150 - Leadership in Recreation, Event, and Sport Organizations
- RESM 3050 - Operations and Logistics in Recreation, Event and Sport Organizations
- RESM 4050 - Management of Recreation, Event and Sport Organizations
- RESM 4080 - Legal Aspects of Recreation, Event and Sport Organizations
- RESM 4160 - Assessment and Data Analytics in Recreation, Event and Sport Organizations
- RESM 4180 - Facility and Area Management in Recreation, Event, and Sport Organizations
- RESM 4190 - Finance in Recreation, Event, and Sport Organizations
- RESM 4250 - Marketing in Recreation, Event, and Sport Organizations

Additional requirements

A minimum grade of C is required in each course in the minor.

Angie Cartwright, Chair

Faculty

The Department of Teacher Education and Administration seeks to improve educational practice through the generation of knowledge and to prepare education professionals who serve all students in an effective, inclusive and equitable manner. Its focus is on the preparation of highly competent educators, researchers and administrators who employ current theory and research as they fill these important roles. The department also provides service to educational institutions, governmental agencies and practitioners at all levels.

Programs in Teacher Education are approved by the Texas Education Agency (1701 N. Congress Avenue, Austin, TX 78701 [www.tea.state.tx.us]).

The department offers teacher certification programs for both undergraduate and graduate students. Undergraduates seeking teacher certification in early childhood through grade six (EC–6) should enroll in the Bachelor of Science program with a major in education. Undergraduates seeking certification in all-level or secondary education receive a degree through the major department and add the required courses for teacher certification.

Students who have earned an undergraduate degree from an accredited university may have their undergraduate transcript evaluated to develop a post-baccalaureate certification plan. Post-baccalaureate students must apply for admission and be admitted to the Toulouse School of Graduate Studies prior to enrolling in any classes (see the *Graduate Catalog* for admission requirements).

Degree/certification plan

The degree/certification plan is the official document outlining the student's course of study. The student is responsible for initiating the degree/certification plan process and should do so as soon as possible after being formally enrolled at the university and prior to the first term/semester in teacher education.

Advising should be sought in the Student Advising Office. The student, with advisement, makes decisions relating to the program of study. The degree/certification plan is subsequently prepared in the College of Education Student Advising Office in Matthews Hall, Room 105. Degree/certification plan processing takes four to six weeks. Students must make an appointment to review completed degree/certification plans in Matthews Hall, Room 105. Any changes in degree/certification plans must be approved by the academic departments and the Department of Teacher Education and Administration office.

Certification options

The department offers several options leading to educator certification, including:

- EC–6 Core Subjects with Science of Teaching Reading and ESL Supplemental
- EC–6 Core Subjects with Science of Teaching Reading and Bilingual Education Supplemental – Spanish
- EC-6 Core Subjects with Science of Teaching Reading and Special Education EC-12

Scholarships

The University of North Texas is committed to excellence in all academic programs. In keeping with this commitment the university offers a variety of scholarships and awards to continuing students and to exceptional entering freshmen and transfer students. The university has two categories of competitive academic scholarships: general and departmental. Information on general scholarships may be obtained from Financial Aid and Scholarships.

Departmental scholarships are listed on the department's web page.

Admission, Review and Retention (ARR) Committee

The ARR Committee reviews referrals made by faculty and determines a course of action. The ARR Committee also reviews student appeals and determines an appropriate course of action regarding changes in the student's course of study. Any instructor

in the College of Education has the right and responsibility to refer any student to the ARR Committee if that instructor has a concern about a student's academic progress, behavioral characteristics or communication skills that indicates potential problems in school settings.

Center for Young Children

The Center for Young Children (CYC) is an accredited preschool program for young children ages 3 through 5. In addition, it serves as a model, an observation site for undergraduate and graduate students in fields related to young children. Research related to the care and education of young children is conducted by graduate students and faculty members from across the university.

Secondary Education

Secondary Education, in cooperation with other schools and departments, offers a complete curriculum of teacher preparation.

Undergraduate professional development courses in secondary education constitute a minor for bachelor's degree programs in College of Liberal Arts and Social Sciences, G. Brint Ryan College of Business or College of Health and Public Service. The program of studies offered through Secondary Education meets all current professional development requirements for Texas teacher certification.

Individuals interested in pursuing certification in math or science teaching at the secondary level may wish to pursue a minor through the Teach North Texas program. See Teach North Texas in the College of Science section of this catalog.

Majors

Education, BS

Students completing the requirements for the undergraduate degree will receive the Bachelor of Science with a major in education. The undergraduate program requires a minimum of 120 semester hours.

This degree centers on the professional interests and personal curiosity of students who are studying to be teachers. There are opportunities in this degree for students to choose courses based on their interests and their goals for their careers as teachers. It is the intention of this degree to set beginning teachers/future educators on a lifelong career path of professional learning.

The last three long semesters of this degree are structured using a block model and must be taken in sequence. Block A signals the entry into the professional development sequence, and students must be admitted to Teacher Education (TEd) to enroll in Block A courses. Students must be in good standing to continue into Block B and C.

NOTE: As of 12/23/2020, UNT discontinued admissions to Grade 4-8 certification programs. All students admitted to 4-8 programs prior to 12/23/2020 will be able to complete their certification program as described in the Catalog under which they were admitted.

Degree requirements

Students must be admitted to the Teacher Education (TEd) Program before enrolling in courses in Blocks A and B and must be admitted to clinical teaching before enrolling in Block C courses. In addition, students must maintain a 2.75 GPA in various sub-areas of their degree audit (i.e., university core, academic major, and education courses) in order to be eligible for Blocks A, B, and C. Students seeking EC-6 teacher certification must also earn grades of C or above in all required courses on their degree audit. Contact the College of Education Student Advising Office, 940-565-2736; Matthews Hall, Room 105; or coe.unt.edu/student-advising for details and to apply for admission to the Teacher Education program.

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be 3000 or 4000 level courses, and fulfillment of degree requirements for the Bachelor of Science degree as specified in the University Core Curriculum in the Academic policies section of this catalog and the College of Education degree requirements.

The department recommends specific courses (best choices) in some categories. Students may elect to take other courses listed under the University Core Curriculum to fulfill these requirements; however, doing so may add hours to the degree.

Students should consult with their advisors to determine how best to meet the core requirements.

Major requirements

Early Childhood through Grade Six (EC–6) core subjects teacher certification options

Students may prepare for the following certifications:

- (a) Core subjects EC-6 with Science of Teaching Reading and ESL Supplemental.
- (b) Core subjects EC-6 with Science of Teaching Reading and Bilingual Education Supplemental - Spanish (Grades EC-12).

Or

- (c) Core subjects EC-6 with Science of Teaching Reading with EC-12 Special Education.

Core subjects EC-6 with Science of Teaching Reading and ESL Supplemental

- ART 1600 - Foundations: Perception and Translation
- BEHV 2300 - Behavior Principles I
- COUN 2600 - Culture-Centered Social and Emotional Learning in the Schools
- EDBE 2050 - Teaching Multilingual Students
- EDBE 3050 - Teaching English as an Additional Language
- EDCI 4010 - Classrooms as Communities
- EDCI 4841 - Instructional Strategies and Classroom Management
- EDEC 1010 - Learning With and From Children
- EDEE 1010 - Introduction To Teaching
- EDEE 3330 - Teaching Science EC-6
- EDEE 3340 - Teaching Social Studies EC–6
- EDEE 3350 - Teaching Mathematics EC-6
- EDEE 4890 - Practice-Based Research
- EDEE 4891 - Clinical Teaching Seminar
- EDLE 2010 - How Schools Work
- EDRE 3350 - Early Language and Literacy Development
- EDRE 4850 - Teaching the Tools and Practices of Reading Across the Curriculum
- EDRE 4860 - Teaching the Tools and Practices of Writing across the Curriculum
- EDSP 3210 - Educational Aspects of Exceptional Learners
- EDSP 4350 - Strategies to Support Diverse Learners in General Education
- EPSY 2010 - How People Learn

- HLTH 1100 - School and Community Health Problems and Services
- LTEC 2600 - Digital Tools in Education
- THEA 4240 - Theatre in the Classroom

Two courses chosen from:

- EDEC 3613 - Childhoods Across Time, Space and Place
- EDEC 3700 - Pedagogies and Practices of Early Childhood

Internship (student teaching), 6 hours

Students seeking certification in (a) core subjects EC-6 with Science of Teaching Reading and ESL Supplemental or (b) core subjects EC-6 with Science of Teaching Reading and Bilingual Education Supplemental - Spanish (Grades EC-12) will enroll in the following courses:

- EDEE 4101 - Clinical Teaching
- EDEE 4102 - Clinical Teaching

Students seeking certification in core subjects EC-6 with Science of Teaching Reading with EC-12 Special Education will enroll in the following courses:

- EDEE 4102 - Clinical Teaching
- EDSP 4110 - Student Teaching in Special Education

Minor requirements

There is no minor for this degree.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement and/or the minimum total hours required for the degree. For specific information, see an academic advisor in the College of Education.

Other requirements

Admission to elementary teacher education

For admission to elementary teacher education, a student must have:

- Completed a minimum of 60 semester hours;
- 2.75 UNT GPA;
- 2.75 overall GPA (includes all transferred and UNT courses);
- Appropriate exam scores on either the ACT or SAT, or TSI Complete; (contact the Student Advising Office in Matthews Hall, Room 105, for further information on the exam requirement); and
- Receive a score of "Accepted" on the Admissions Interview Questionnaire.

Contact the College of Education Student Advising Office, 940-565-2736; Matthews Hall, Room 105; or <https://coe.unt.edu/student-advising> for details on the application process. See the College of Education's calendar for application deadlines.

Students seeking EC–6 teacher certification must also earn grades of C or above in all required courses on their degree audit.

Admission to Clinical Practice

In order to be accepted into Clinical Practice, students must:

- Apply to Clinical Practice during Block A but before Block B (see College of Education calendar for application deadlines). Clinical Practice Application periods are posted on the Clinical Practice Office (calendar: <https://coe.unt.edu/educator-preparation-office/clinical>);
- Have completed all TX Common Core courses (42 hours) with no grade lower than a C;
- Have at least a 2.75 GPA in the academic major and for overall UNT GPA, with no grade lower than a C in the academic major;
- Have at least an average of 2.75 GPA in Common Core, Education major, teaching field courses and pedagogy (education) courses;
- Have a grade of at least a C in all courses required for graduation;
- Except for Block A courses, have all required courses completed (except for those in Blocks B and C);
- Submit a Statement of Qualification Form prior. Forms are available here: <https://coe.unt.edu/educator-preparation-office/clinical>. This form must be approved by your academic advisor prior to submission; and
- Have completed a UNT-sponsored TExES Certification Practice Exams for all certification areas relevant to the degree plan. Practice exams are scheduled by the TExES Success Office. Information about the practice exams is located at <https://coe.unt.edu/educator-preparation-office/texas>.

Contact the Educator Preparation Office, Matthews Hall, Room 119; 940-369-8411; or <https://coe.unt.edu/educator-preparation-office> for additional information.

Admission to secondary or all-level teacher education

For admission to secondary or all-level teacher education, a student must have:

- Junior standing (60 credit hours earned);
- 2.75 UNT GPA;
- 2.75 overall GPA (includes all transferred and UNT courses);
- Appropriate exam scores on either the ACT, SAT or Praxis Core: Academic Skills for Educators; (contact the Student Advising Office in Matthews Hall, Room 105, for further information on the exam requirement);
- A rating of "Accepted" on the online Admission Interview Questionnaire (for all students except all-level art and music);
- Active enrollment at UNT and an official degree audit on file in the College of Education Student Advising Office; and
- A completed application for admission to Teacher Education submitted to the College of Education Student Advising Office once all requirements are complete.

- Students must be admitted to teacher education before enrolling in most education classes. In addition, students must maintain a 2.75 GPA in various sub-areas of their degree audit (i.e., teaching field and education/pedagogy courses) to proceed with early field experience and student teaching.

Contact the College of Education Student Advising Office, 940-565-2736; Matthews Hall, Room 105; or <https://coe.unt.edu/student-advising> for additional information.

Eligibility for recommendation for Teacher Certification

Teacher certification is granted by the Texas Education Agency (TEA), not UNT. As an approved State of Texas Educator Preparation Program, UNT can only recommend students for certification. Completion of the bachelor's degree and the required education courses does not necessarily result in certification by TEA. In order to be recommended for teacher certification through the University of North Texas, students must have:

- Successfully completed an approved teacher education program for the preparation of early childhood, secondary or all-level teachers;
- Successfully completed clinical teaching, including attendance at required seminars; and
- Passed the TExES EC-12 Pedagogy and Professional Responsibilities (PPR) and all required content and supplemental certification exams of the Texas Examinations of Educator Standards (TExES), as applicable.

Access to register for Texas teacher certification exams (TExES) is only granted to students who have been formally admitted to the Teacher Education program at UNT. Teacher candidates (who have been admitted to TEEd) must take UNT-sponsored TExES practice exams prior to the start of Block B courses. Practice exams are free of charge.

The TExES Practice exams are offered four times in each long semester and twice during the summer.

Contact the TExES Success Office in Matthews Hall 208 at 940-369-8601 or COE_TSO@unt.edu for information about registering for your practice TExES Exams, TEAL account setup and for information and study resources for your actual certification exams.

Four-year degree plan (example)

The following four-year plan is **one** example (EC-6 with ESL) of a variety of ways in which you can complete your chosen degree in four years and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

Year 1

Semester 1		Semester 2	
ART 1600 - Foundations: Perception and Translation	3 hours	BIOL 1132 - Environmental Science	3 hours
BIOL 1082 - Biology for Educators	3 hours	EDEE 1010 - Introduction To Teaching	3 hours
EDEC 1010 - Learning With and From Children	3 hours	ENGL 1320 - First-Year Writing II	3 hours
ENGL 1310 - First-Year Writing I	3 hours	HIST 2610 - United States History to 1865	3 hours
HLTH 1100 - School and Community Health Problems and Services	3 hours	MUMH 1610 - Music as Communication	3 hours
Total	15 hours	Total	15 hours

Year 2

Semester 1		Semester 2	
EDLE 2010 - How Schools Work	1.5 hours	EDBE 2050 - Teaching Multilingual Students	3 hours
COUN 2600 - Culture-Centered Social and Emotional Learning in the Schools	1.5 hours	EPSY 2010 - How People Learn	3 hours
HIST 2620 - United States History Since 1865	3 hours	LTEC 2600 - Digital Tools in Education	3 hours
HMGT 1450 - Principles of Nutrition	3 hours	PHED 1000 - Scientific Principles and Practices of Health-Related Fitness	3 hours
MATH 1580 - Survey of Mathematics with Applications	3 hours	PSCI 2305 - US Political Behavior and Policy	3 hours
PHIL 1400 - Ethics and Society	3 hours	Concentration elective	3 hours
Total	15 hours	Total	18 hours

Year 3

Semester 1		Semester 2	
BEHV 2300 - Behavior Principles I	3 hours	EDCI 4841 - Instructional Strategies and Classroom Management	3 hours
EDBE 3050 - Teaching English as an Additional Language	3 hours	EDEE 3330 - Teaching Science EC-6	3 hours

EDSP 4350 - Strategies to Support Diverse Learners in General Education	3 hours		
Total	15 hours	Total	12 hours

Minors

Secondary and All-level (EC-12) Education Teacher Certification minor (for BA, BS)

Teacher certification is granted by the Texas State Board for Educator Certification (SBEC). UNT is authorized to recommend secondary and all-level teacher certification for students who successfully fulfill all state and program requirements for the chosen teaching certificate in the following content areas:

- Secondary Content Areas: chemistry; dance; English language arts and reading; family and consumer sciences; history; hospitality, nutrition and food sciences; human development and family studies; journalism; life science; mathematics; physical sciences; physics/mathematics; science; social studies; and speech.
- All-Level (EC-12) Content Areas: art, French, German, music, physical education, Spanish and theatre.

Although teacher certification programs share many commonalities, course and program requirements will vary by chosen content area. Standards for teaching certificates are continually reviewed by the SBEC, meaning that requirements can and do change. Therefore, it is impractical to list certification requirements for individual content areas in this catalog. Consult your advisor for specific requirements.

Degree requirements

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 hours must be advanced, and fulfillment of degree requirements for the Bachelor of Arts or Bachelor of Science degree as specified in the University Core Curriculum in the Academic policies section of this catalog and all College of Education requirements. Students seeking teacher certification in secondary or all-level education must also meet all degree requirements of the college responsible for awarding the degree for their selected major.

Major requirements

See your degree program advisor for an individual degree audit.

Other course requirements

See individual degree audit.

Minor requirements

Pedagogy, 12 hours

- EDCI 3800 - Professional Issues in Teaching
- EDCI 3830 - Teaching/Learning Process and Evaluation
- EDCI 4070 - Teaching in a Multicultural Classroom
- EDCI 4840 - Instructional Strategies and Classroom Management

Reading/English language arts, 3 hours

- EDCI 4060 - Content Area Reading

Internship (student teaching), 6 hours

See Student Teaching in the College of Education general information section of this catalog.

- EDCI 4108 - Student Teaching in the Secondary School
- EDCI 4118 - Student Teaching in the Secondary School

Electives

See your degree program advisor for an individual degree audit.

Other requirements

- Admission to the Teacher Education (TEd) Program:** You must be accepted to the Teacher Education Program prior to enrolling in the first education course. To be eligible for admission, students must have:
 - Completed a minimum of 60 semester hours, including the University Core Curriculum. (See General University requirements in the Academic policies section of this catalog.) Programs in teacher education require specific courses contained in parts of the University Core Curriculum to satisfy particular degree requirements. Students should consult program advisors for best choices in the core;
 - A 2.75 UNT GPA;
 - A 2.75 overall GPA (includes all courses transferred to UNT, plus all courses taken at UNT);
 - Appropriate exam scores on either the ACT, SAT or Praxis Core: Academic Skills for Educators; (contact the Student Advising Office in Matthews Hall, Room 105, for further information on the exam requirement); and
 - Formally applied and been admitted to Teacher Education through the College of Education Student Advising Office in Matthews Hall, Room 105. Contact the College of Education Student Advising Office, 940-565-2736; Matthews Hall, Room 105; or <https://coe.unt.edu/student-advising> for details and to apply for admission to the Teacher Education.
- Eligibility for Teacher Certification and Recommendation:** Teacher certification is granted by the State Board for Educator Certification. Completion of the bachelor's degree and the required education courses does not necessarily result in certification by the agency. In order to be recommended for teacher certification through the University of North Texas, students must have:
 - Successfully completed an approved teacher education program for the preparation of early childhood, elementary, middle grades, secondary or all-level teachers;

- Successfully completed student teaching, including attendance at appropriate seminars; and
- Passed the TExES Pedagogy and Professional Responsibilities (PPR) and all required content tests of the Texas Examinations of Educator Standards (TExES), as applicable.
- **Eligibility to test:** Access to register for Texas teacher certification exams (TExES) is granted to students who have been formally admitted to the Teacher Education program at UNT. Some content areas require that students take their content practice exam as part of a course requirement, or prerequisite for Early Field Experience. Only students who have been admitted to the Teacher Education program may sit for the practice exam.

The TExES Practice exams are offered four times in each long semester and twice during the summer. Students should visit with the TExES Success Office in Matthews Hall, Room 119, for further information about their required exams (940-369-8601).

Faculty

Engineering is the application of science and mathematics to the solution of relevant societal needs and problems. The current standard of living is due in large part to efforts of engineers and technologists. Technological development has created a demand for qualified engineers and technologists who maintain the momentum of innovation and who extend and direct its course. The expanding population, with its increased demand for goods and services, has imposed challenges to provide a diversity of new and better products with minimized adverse side effects. Engineers and technologists recognize that long-term solutions are found in careful, thorough planning and study.

The University of North Texas College of Engineering strives to educate and train engineers and technologists who have the vision to recognize and solve the problems of society. The College of Engineering comprises five degree-granting departments of instruction and research. The Department of Biomedical Engineering, the Department of Computer Science and Engineering, the Department of Electrical Engineering, the Department of Materials Science and Engineering, and the Department of Mechanical Engineering offer programs of study and research leading to bachelor's, master's and doctoral degrees; some offer programs in one or more majors. Undergraduate programs include biomedical engineering, computer engineering, computer science, construction engineering technology, construction management, cybersecurity, electrical engineering, information technology, materials science and engineering, mechanical and energy engineering, and mechanical engineering technology.

The College of Engineering strives to maximize everyone's potential to transform toward greater excellence. As the university continues to ascend in its Tier One designation and as the College of Engineering excels in impactful research and education, all faculty and staff in the College of Engineering will use their respective strengths to advance this shared mission.

The College of Engineering provides a caring and inclusive environment for students to learn and excel. As the university becomes a preferred destination of first-generation college students, underrepresented minority students and non-traditional students, the College of Engineering provides education through a combination of on-campus and online methods and offers a quality curriculum, accommodation and dedicated mentoring.

Mission

The College of Engineering prepares a diverse pool of students to become future engineers and engineering leaders and conducts basic and applied research of societal impact.

Vision

The College of Engineering will be an impactful institution that excels in knowledge creation, propagation and application.

College of Engineering admissions requirements

Admission to the College of Engineering is contingent on clear admission to the university. The College of Engineering has 5 departments.

Applicants will be admitted to the College of Engineering in an engineering program if they meet the requirements below:

Freshman applicants:

1. They were in the top 25% of their graduating class and have a math SAT score of 590 or better and a total SAT score of 1140 or better; or a math ACT score of 23 or better and a cumulative ACT score of 23 or better.
 2. They were in the top 50% of their graduating class or have no graduating class ranking (home schooled, GED, international students, etc.) and have a math SAT score of 620 or better and a total SAT score of 1170 or better; or a math ACT score of 24 or better and a cumulative ACT score of 24 or better.
 3. They were below 50% in their graduating class and have a math SAT score of 650 or better and a total SAT score of 1250 or better; or a math ACT score of 26 or better and a cumulative ACT score of 26 or better.
- Freshman applicants to the construction engineering technology or mechanical engineering technology programs must have a math SAT score of 570 or better, or a math ACT score of 22 or better.
 - Freshman applicants to the construction management program are automatically admitted when their admissions to the university is met.

Transfer, international and post-baccalaureate applicants:

- Transfer, international and post-baccalaureate (second bachelor's degree) applicants must be eligible to enroll in MATH 1710 (Calculus I) or in a higher-level math class and have a grade point average of 2.0 or greater in all prior math, science and engineering coursework.

Admission for pre-majors and students changing major to an engineering program within UNT:

- Students not meeting the admission requirements for the major or applying to change their major into a degree in the College of Engineering will be supported through enrollment as a pre-major in their corresponding program.
- Students classified as pre-majors will be reclassified into their respective major with the College of Engineering upon completing the corresponding course listed below with a C or higher and a student in good standing

Pre-major	Course to be completed with a C or higher
Pre-Computer Science	CSCE 1030
Pre-Information Technology	CSCE 1030
Pre-Computer Engineering	CSCE 1030
Pre-Electrical Engineering	MATH 1710
Pre-Mechanical and Energy Engineering	MATH 1710

Pre-Biomedical Engineering	MATH 1710
Pre-Materials Science and Engineering	MATH 1710
Pre-Mechanical Engineering Technology	MATH 1710
Pre-Construction Engineering Technology	MATH 1710

While enrolled in the pre-major, a student must be continuously enrolled each semester in a MATH course approved by an engineering advisor. A student will have 4 long semesters once enrolled in the pre-major to meet the requirements to be admitted to the major.

Enrollment in mathematics classes for entering freshmen will be determined in accordance with criteria established by the Department of Mathematics. The UNT mathematics department web site lists links to preparation tests for the UNT math placement exam (math.unt.edu/undergraduate/placement).

Degree audit

A degree audit is an official document of the university that lists all the courses needed to complete a chosen degree and shows how all of the courses completed are applied toward the degree.

1. The College of Engineering Undergraduate Academic Advising Office prepares degree audits. Transfer credit may require an evaluation per a course syllabus by a departmental faculty advisor for application on the degree audit. Graduation checks should be requested during the term/semester before graduation.

Academic advising

Information about academic matters is available from various sources within the College of Engineering. Undergraduate academic advising is available through the Dean's Office and in the major departments. Advisors assist students in the selection of courses and answer questions about selecting a major, degree audits, application of transfer credit, general academic requirements and policies and procedures.

While college faculty and staff members give students' academic advice and assistance, each student is expected to take responsibility for his or her education and personal development. The student must know and abide by the academic and disciplinary policies given in the undergraduate catalog, including rules governing quantity of work, the standard of work required to continue in the university, academic probation and dismissal and enforced withdrawal. The student must also know and meet the requirements of his or her degree program, including the University Core Curriculum and the College of Engineering foundation requirements; must enroll in courses appropriate to the program; must meet prerequisites and take courses in the proper sequence to ensure orderly and timely progress; and must seek advice from college advisors or faculty advisors in the major about degree requirements and other college and university policies when necessary. The student must also know and adhere to all college and university deadlines.

All students are expected to be familiar with the following sources of information. Students will not be relieved of their responsibility to know the policies, deadlines and business practices of the university on the grounds that they were not told. If students have questions regarding these materials, it is the university's expectation that the student will consult his/her academic advisor for guidance and resolution.

Policy on academic performance and dismissal in the College of Engineering

1. Students in the College of Engineering will conduct themselves in a professional manner in their interaction with their peers, faculty, staff and the community in general. A student may be dismissed from the college for inappropriate conduct (please refer to the Code of Student Conduct).
2. A student must maintain good academic standing within the university. Please see "Academic status" and "Regulations governing students under academic suspension" in the Academics section of this catalog.
3. Additional requirements for academic performance are found under the program the student is enrolled in.

NOTE: Students placed on academic suspension for a second time are eligible to apply for readmission to the College of Engineering after having not attended UNT for the prescribed period of time as outlined in "Regulations governing students under academic suspension" in the Academics section of this catalog. A student must petition the dean of the College of Engineering for reinstatement. If the petition for reinstatement is disapproved, a student may not file another petition until the following term. The decision of the office of the dean is final. A student who receives a third suspension will be dismissed indefinitely from the university but will be dismissed permanently from the College of Engineering.

Programs of Study

The college offers the following undergraduate degrees:

- Bachelor of Science with majors in biomedical engineering, computer science, computer engineering, construction management, cybersecurity, electrical engineering, materials science and engineering, and mechanical and energy engineering;
- Bachelor of Science in engineering technology with majors in construction engineering technology, and mechanical engineering technology; and
- Bachelor of Arts with a major in information technology.

Grad track programs

The College of Engineering offers grad track options to enable eligible undergraduate students to earn graduate credit hours that are applied towards both the undergraduate and graduate degree plans.

To be eligible, students should be eligible to enroll in the capstone design course in the following semester, have a UNT GPA of 3.5 or higher and want to complete a Master's or PhD that is a) housed in the department from which they are completing their bachelor's degree, and b) within the same discipline as their bachelor's degree.

Two options for the program are offered:

- The grad track leading to Master's degree allows you to earn 9 hours of graduate credit while you are enrolled as an undergraduate student. These 9 credits are also applied to your Master's degree plan once you are admitted to the graduate program.
- The grad track Leading to PhD degree allows you to earn 12 hours of graduate credit while you are enrolled as an undergraduate student. These 12 credits are also applied to your PhD degree plan once you are admitted to the graduate program.

Degree requirements and the University Core Curriculum

Occasionally a course required for a degree may also satisfy a requirement of the University Core Curriculum. In addition to taking the required course, a student may elect to take a different course from among those available to fulfill that core requirement; doing so, however, may add to the total number of hours required for the degree. Students who have questions regarding degree requirements and core requirements should consult an academic advisor.

Bachelor of Science degree requirements

Candidates for the Bachelor of Science degree must satisfy all general requirements for the bachelor's degree listed in the Academic policies section of this catalog, and all engineering degree requirements as listed below:

1. Hours required for the degree: Completion of a minimum of 120–128 total semester hours; 36–45 must be advanced, depending on the major.
2. General university requirements: See University Core Curriculum in the Academic policies section of this catalog.
3. Major requirements: A major of at least 24 semester hours; 12 hours of advanced work in the major must be completed at UNT. Only grades of A, B and C in major courses are accepted. See specific degree audit for exact requirements.
4. Minor (optional): A minor is at least 18 hours, of which a minimum of 6 hours must be advanced, from a field outside the major. Minors are chosen with faculty advisors for selected majors. For some majors, the minor is specified, but for most majors, a minor field is optional. Consult major requirements.
5. Electives: see specific degree audit for exact requirements.
6. Other course requirements: Only grades of A, B and C in other required courses are accepted. Examples of other required courses include, but are not limited to, supporting area courses, technical elective courses, technical option courses, math and science courses, and specialization courses. See specific degree audit for exact requirements.

Bachelor of Arts degree requirements

Candidates for the Bachelor of Arts degree must satisfy all general requirements for the bachelor's degree listed in the Academic policies section of this catalog, and all engineering degree requirements as listed below:

1. Hours required for the degree: Completion of a minimum of 121 semester hours; 42 must be advanced.
2. General university requirements: See University Core Curriculum in the Academic policies section of this catalog.
3. Major requirements: A major of at least 30 semester hours; 12 hours of advanced work in the major must be completed at UNT. Only grades of A, B and C in major courses are accepted. See specific degree audit for exact requirements.
4. Minor (optional): A minor is at least 18 hours, of which a minimum of 6 hours must be advanced, from a field outside the major. Minors are chosen with faculty advisors for selected majors. For some majors, the minor is specified, but for most majors, a minor field is optional. Consult major requirements.
5. Electives: See specific degree audit for exact requirements.
6. Other course requirements: Only grades of A, B and C in other required courses are accepted. Examples of other required courses include, but are not limited to, supporting area courses, technical elective courses, technical option courses, math and science courses, and specialization courses. See specific degree audit for exact requirements.

Undergraduate Academic Certificates

Additive and Digital Manufacturing certificate

Additive and digital manufacturing is an area that combines computer aided design, structural analysis, materials selection and performance, manufacturing, lean manufacturing and technical communication. The certificate enables students to complete courses and complete a project report. The certificate will be administered by the College of Engineering and is open to all majors on campus.

Course requirements, 12 hours

Manufacturing, 9 hours

Students complete 3 courses from the following:

- BMEN 3312 - Introduction to Biomechanics
- BMEN 4100 - Biomedical Mechatronics
- BMEN 4312 - FDA Regulations and Quality Control of Biomedical Systems
- DSCI 2710 - Data Analysis with Spreadsheets
- ENGR 1304 - Engineering Graphics

- ENGR 3450 - Engineering Materials
- MEEN 3100 - Manufacturing Processes
- MEEN 4800 - Topics in Mechanical and Energy Engineering (when topic is "CAD/CAE")
- MEET 3550 - Geometrical Dimensioning and Tolerancing
- MEET 3750 - Digital Manufacturing
- MEET 4100 - Fundamentals of Product and Process Design Development
- MTSE 3000 - Fundamentals of Materials Science and Engineering - I
- MTSE 4040 - Computational Materials Science
- MTSE 4060 - Materials Selection and Performance
- MTSE 4900 - Special Topics in Materials Science and Engineering (when topic is "Additive Manufacturing: Processes and Materials")
- OPSM 3830 - Operations Management
- OPSM 4850 - Lean/Six Sigma

Communication, 3 hours

- TECM 2700 - Technical Writing

Report

Students must register for a zero-credit course under their department major and request a faculty mentor. The students will complete a 5,000 character report that addresses a product that can be additively or digitally manufactured. An introductory paragraph will describe the product or part. The report should have headings with:

1. Design of the part or product using computer aided design.
2. Structural analysis of mechanical failure.
3. Material and manufacturing options to be used.
4. Lean manufacturing and supply chain considerations for large scale production of the part addressing planning for material replacement or equipment options to be considered.

Vijay Vaidyanathan, Chair

Faculty

Mission and vision

The mission of the Department of Biomedical Engineering is to provide a student-centered environment that facilitates a culture of interdisciplinary learning and innovation, while encouraging active participation in scholarly and professional activities to serve the biomedical engineering profession and society, while advancing regional economic development.

The vision of the Department of Biomedical Engineering is to create an innovative, interdisciplinary academic program that emphasizes the fundamentals of biomedical engineering; state-of-the-art applications pertaining to biomedical instrumentation, biomaterials, biotechnology, biomechanics and bioinformatics, and other health care-related areas in an environment of life-long learning and research.

Program educational objectives for the biomedical engineering program

Graduates of the biomedical engineering program will:

1. Successfully practice biomedical engineering to serve healthcare institutions, academia, and industry at regional, state, national and international levels.
2. Work professionally in one or more of the following areas: biomedical instrumentation, biomechanics, biomaterials, biotechnology, biocomputing, medicine and healthcare, and business or entrepreneurship.
3. Achieve personal and professional success with commitment to ethical and social responsibility, both as individuals and in team environments.
4. Engage in lifelong learning, including entering and succeeding in an advanced degree program in a field such as engineering, science, medicine and business.

Student outcomes

Upon completion of the Bachelor of Science with a major in biomedical engineering, students are enabled to achieve the following outcomes:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science and mathematics;
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental and economic factors;
3. an ability to communicate effectively with a range of audiences;
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts;
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives;
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions; and
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Constituencies of the biomedical engineering program

Our program constituencies are:

- students: current, as well as alumni
- faculty, and
- industry (particularly in the North Texas region) represented primarily by our departmental Industrial Advisory Board (IAB) and in general by the College of Engineering Advisory Board (CEAB).

Majors

Biomedical Engineering, BS

Degree requirements

Hours required and general/college requirements

A minimum of 120 semester hours, of which 36 must be advanced courses, and fulfillment of degree requirements for the Bachelor of Science degree as specified in the "University Core Curriculum" in the Academics section of this catalog and the College of Engineering.

Major requirements

A minimum of 65 semester hours, including:

Required courses, 38 hours

- BMEN 1300 - Discover Biomedical Engineering
- BMEN 1400 - Software for Biomedical Engineers
- BMEN 2200 - Advanced Software for Biomedical Engineers
- BMEN 2210 - Biomedical Circuits and Data Acquisition Best Practices
- BMEN 2320 - Biomedical Instrumentation I
- BMEN 3310 - Engineering Measurements from Human Systems
- BMEN 3311 - Biomedical Signal Analysis
- BMEN 3312 - Introduction to Biomechanics
- BMEN 3321 - Biomaterials
- BMEN 3350 - Biomedical Transport Phenomena
- BMEN 4007 - Biomedical Experimental Design and Data Analysis
- BMEN 4212 - Senior Design I
- BMEN 4222 - Senior Design II

Biomedical engineering electives, 9 or 15 hours

Three or five advanced, 3000 and/or 4000-level, organized BMEN courses, dependent on track. Students completing option 1 below will take 9 hours of biomedical engineering electives. Students completing option 2 will take 15 hours of biomedical engineering electives.

Additional electives, 12 or 18 hours (minimum)

Choose one from the options below:

Option 1: Additional engineering electives, 18 hours

18 hours to fulfill one of eight tracks:

- Comprehensive Biomedical Engineering: 18 hours in BMEN courses
- Biomedical instrumentation: 18 hours in EENG courses
- Biomechanics: 18 hours in MEEN courses
- Biocomputing: 18 hours in CSCE courses
- Biotechnology: 18 hours in BIOC/BIOL courses

- Pre-med: 18 hours in BIOC/BIOL courses+ additional courses as deemed necessary by the Pre-med program
- Biomaterials: 18 hours in MTSE courses
- Computational Epidemiology: 18 hours in CSCE courses, including CSCE 1035; CSCE 1045; CSCE 2100; CSCE 2110; CSCE 3850; CSCE 4820.

Option 2: Business electives, 12 hours

12 hours to fulfill one of four tracks:

- Business Foundations Track: 12 hours in Business Foundations courses
- Management: 12 hours in Management courses
- Marketing: 12 hours in Marketing courses
- Entrepreneurship: 12 hours in Entrepreneurship courses

Students choosing Business electives will need to complete 15 hours of Biomedical Engineering (BMEN) Electives.

Other required courses, 31 hours

- BIOL 2301 - Human Anatomy and Physiology I and
- BIOL 2311 - Human Anatomy and Physiology I Laboratory
or
- CHEM 1420 - General Chemistry II for Science Majors and
- CHEM 1440 - Laboratory Sequence for General Chemistry II
or
- PHYS 2220 - Electricity and Magnetism and
- PHYS 2240 - Laboratory in Electricity and Magnetism

- CHEM 1410 - General Chemistry I for Science Majors and
- CHEM 1430 - Laboratory Sequence for General Chemistry I
or
- CHEM 1415 - General Chemistry for Engineering Majors and
- CHEM 1435 - General Chemistry Laboratory for Engineering Majors

- MATH 1710 - Calculus I
- MATH 1720 - Calculus II
- MATH 2700 - Linear Algebra and Vector Geometry
- MATH 2730 - Multivariable Calculus
or
- MATH 3350 - Introduction to Numerical Analysis
- MATH 3410 - Differential Equations I
- PHYS 1710 - Mechanics and
- PHYS 1730 - Laboratory in Mechanics

- TECM 2700 - Technical Writing

Minor

Through careful selection of engineering, mathematics electives and electives taken toward one of the five optional tracks (see below), it may be possible for a student to fulfill the requirements for a minor in mathematics and a minor in computer science and computer engineering, material science and engineering, electrical engineering, or mechanical and energy engineering.

Other requirements

Foundation courses

BMEN foundation courses include BMEN 1300, BMEN 1400, BMEN 2200, BMEN 2210, BMEN 2320, MATH 1710, MATH 1720, ENGL 1310 or TECM 1700; TECM 2700; PHYS 1710, PHYS 1730; CHEM 1410/CHEM 1430 or CHEM 1415/CHEM 1435; BIOL 2301/BIOL 2311 or PHYS 2220/PHYS 2240 or CHEM 1420/CHEM 1440.

Successful completion of foundation courses is based on achieving a C or higher in each course and cumulative GPA of 2.0.

Major transfer policy

Students enrolled at UNT can transfer into Biomedical Engineering if they have completed the following courses with a C or better and with a cumulative GPA of at least 2.5.

- BMEN 1300 - Discover Biomedical Engineering
- BMEN 1400 - Software for Biomedical Engineers
- BMEN 2200 - Advanced Software for Biomedical Engineers or equivalent CAD course
- MATH 1710 - Calculus I
- MATH 1720 - Calculus II

- ENGL 1310 - First-Year Writing I
or
- TECM 1700 - Introduction to Professional, Science, and Technical Writing

- TECM 2700 - Technical Writing

Department policies

Policy on Academic Performance, Progression, and Dismissal in the College of Engineering

Students in the College of Engineering will conduct themselves in a professional manner in their interaction with their peers, faculty, staff and the community in general. A student may be dismissed from the college for inappropriate conduct (please refer to the Code of Student Conduct).

Each semester, students are required to take engineering foundation courses and/or prerequisites to the engineering foundation courses until all foundation courses are successfully completed. Successful completion is a 2.5 GPA for all engineering foundation courses with a C or better in each course.

Successful completion of the foundation courses is required for enrollment in all 3000 and 4000 level courses.

A student will graduate with a degree in Biomedical Engineering, provided the following conditions are satisfied:

1. The student has an overall GPA ≥ 2.0
2. The student has a GPA of 2.0 in Biomedical Engineering Foundation courses and all have been passed with a grade of C or better.

3. The student has a GPA ≥ 2.0 in all degree major courses including but not limited to, engineering, math, sciences, laboratory sciences and technical electives.
4. The student has completed all required courses in the student's degree plan.
5. The student has satisfied all College of Engineering and UNT criteria for graduation.

A student must maintain good academic standing within the university. Please see "Academic status" and "Regulations governing students under academic suspension" in the Academics section of this catalog."

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

Year 1

Semester 1		Semester 2	
BMEN 1300 - Discover Biomedical Engineering	3 hours	BMEN 1400 - Software for Biomedical Engineers	3 hours
MATH 1710 - Calculus I	4 hours	MATH 1720 - Calculus II	3 hours
Communication core	3 hours	TECM 2700 - Technical Writing	3 hours
Creative Arts core	3 hours	Major science selection*	4 hours
CHEM selection*	4 hours		
Total	17 hours	Total	14 hours

Year 2

Semester 1		Semester 2	
BMEN 2210 - Biomedical Circuits and Data Acquisition Best Practices	3 hours	BMEN 2320 - Biomedical Instrumentation I	3 hours
MATH 2700 - Linear Algebra and Vector Geometry	3 hours	MATH 3410 - Differential Equations I	3 hours
PHYS 1710 - Mechanics	3 hours	American History core	3 hours
PHYS 1730 - Laboratory in Mechanics	1 hour	Political Science core	3 hours
American History core	3 hours	Major math selection*	3 hours
Political Science core	3 hours		

Semester 1		Semester 2	
Total	16 hours	Total	16 hours

Year 3

Semester 1		Semester 2	
BMEN 3310 - Engineering Measurements from Human Systems	3 hours	BMEN 3312 - Introduction to Biomechanics	3 hours
BMEN 3311 - Biomedical Signal Analysis	3 hours	BMEN 3321 - Biomaterials	3 hours
BMEN 3350 - Biomedical Transport Phenomena	3 hours	Language, Philosophy and Culture core	3 hours
Business track elective**	3 hours	Business track elective**	3 hours
Business track elective**	3 hours	Business track elective**	3 hours
Total	15 hours	Total	15 hours

Year 4

Semester 1		Semester 2	
BMEN 4007 - Biomedical Experimental Design and Data Analysis	3 hours	BMEN 4222 - Senior Design II	3 hours
BMEN 4212 - Senior Design I	3 hours	Social and Behavioral Sciences core	3 hours
BMEN elective-4000 level	3 hours	BMEN elective-4000 level	3 hours
BMEN elective-4000 level	3 hours	BMEN elective-4000 level	3 hours
BMEN Elective-4000 level	3 hours		
Total	15 hours	Total	12 hours

Notes

*See "Other required courses" section above and consult with an advisor.

**See "Option 2" under "Additional electives" above.

Grad Track Options

Biomedical Engineering, BS with grad track option leading to Biomedical Engineering, MS

Admission requirements and program policies

Admission requirements

1. Student should be a major in the UNT Biomedical Engineering, BS program.
2. Students can apply for the grad track option his/her junior year (following completion of at least 75 credit hours; a benchmark is if the student is ready for BME Senior Design in the following fall semester).
3. Minimum of 3.5 or higher cumulative GPA required at the time of application submission, with a minimum GPA of 3.5 for BME core courses BMEN 1300, BMEN 2210, BMEN 2320, BMEN 3310, BMEN 3311, BMEN 3312 and BMEN 3321.
4. The student should provide two recommendation letters from BME faculty members with his/her application.
5. Application will be reviewed by both the BME undergraduate advisor and graduate advisor.
6. Once approved by the BME advisors, the student must apply to the Toulouse Graduate School within the first semester of the senior year.

Program policies

1. After being admitted to the grad track program and completion of at least 90 credit hours, the student can start taking the graduate courses as technical electives or biomedical electives for the BS degree requirement. For the graduate courses to be counted for the MS degree, the student should get a B or above for the courses.
2. The student in the grad track program will be advised and monitored by both the undergraduate coordinator (prior to completion of the BS) and the graduate advisor (after completion of the BS).
3. The student should choose a major research advisor in the semester that the student begins taking graduate courses.
4. There will be an annual review of each student's academic progress in meeting both bachelor's and master's degree requirements. If the student fails to meet degree requirements, the student will be placed in a probationary period for one semester. If the student continues to not meet the degree requirements in the probationary period, the student will be expelled from the grad track program (he/she will still be in the general biomedical engineering BS program if all general biomedical engineering BS degree requirements are met).
5. Undergraduate students who have been accepted to a grad track option should complete all of their bachelor's degree requirements and graduate within 12 months of the first day of the semester in which they begin taking graduate courses or enrollment in graduate level course work will be suspended.
6. The students admitted to the grad track option will be admitted into the MS program on a conditional basis. Once the student has satisfied all course work for the BS degree and maintained a 3.0 or higher GPA, he/she will be fully admitted to the MS program.
7. The student must enroll in graduate school in the long semester after finishing his/her BS degree and should take the remaining graduate courses in the following years to complete his/her biomedical engineering master's degree. If the student did not enroll in graduate school in the long semester after finishing his/her BS degree those graduate course credit hours will not be counted toward the MS degree, even if the student comes back for graduate school in the future.

Program requirements

BMEN courses that apply to the grad track, with corresponding undergraduate courses in parenthesis:

- BMEN 5007 - Research Methods in Biomedical Engineering (BMEN 4007)
- BMEN 5310 - Clinical Instrumentation (BMEN 4311)
- BMEN 5313 - Bioengineering of Cellular Systems (BMEN 4313)

- BMEN 5314 - Advanced Tissue Engineering and Regenerative Medicine (BMEN 4314)
- BMEN 5315 - Computational Methods in Biomedical Engineering (BMEN 4310)
- BMEN 5319 - Cardiovascular Fluid Dynamics (BMEN 4319)
- BMEN 5323 - Advanced Biomedical Optics (BMEN 4321)
- BMEN 5325 - Biomedical Nanotechnology Compatibility (BMEN 4325)
- BMEN 5326 - Biomolecular Engineering (BMEN 4326)

All remaining courses required for the Biomedical Engineering, BS must also be completed. Other Biomedical Engineering graduate courses, including BMEN 5800, BMEN 5810, may be applied to the grad track program in Biomedical Engineering with consent of the department.

Biomedical Engineering, BS with grad track option leading to Electrical Engineering, MS

The Department of Electrical Engineering offers a grad track option for existing UNT undergraduate students enrolled in the Biomedical Engineering, BS program.

In this grad track option, the student can take a maximum of three (3) credit hours of graduate courses while completing the BS degree. After earning the BS degree, these credit hours can be counted toward the MS degree. Prior to registering for these courses, the student must be admitted to the grad track option and obtain approvals from the undergraduate and graduate coordinators of their respective programs.

Admission requirements

To be eligible to apply for grad track, students must have a cumulative GPA of 3.5 or higher at the time of application

To apply, students should submit the following to the grad track coordinator of the Department of Electrical Engineering, MS before the first semester of their senior year:

- A completed grad track application form, and
- An up-to-date official transcript

The student's application will be reviewed by the undergraduate coordinator in Biomedical Engineering and the graduate coordinator in Electrical Engineering.

After a student is admitted to the grad track program, the student must apply to the Toulouse Graduate School during their senior year for admission to the Electrical Engineering, MS, which should follow the same application procedure, application deadlines, and admission requirements as the regular graduate applications for admission to the Electrical Engineering, MS.

Program policies

After being accepted into the grad track option, the student then can take graduate courses in their senior year as Biomedical Engineering, BS electives to meet the bachelor's degree requirements. In order for courses to be counted toward the MS degree, the student must meet the minimum grade requirements of the courses in the MS program. After being accepted into the grad track option, the student must complete the bachelor's degree within one year of the first graduate level course they take.

Students admitted to the program will be admitted into the MS program on a conditional basis. Once the student has satisfied all requirements for the bachelor's degree and maintained a GPA of 3.0 or higher, they will be fully admitted to the MS program.

The student must enroll in graduate school in the long semester within one year after receiving his or her bachelor's degree and should complete the remaining graduate courses in the following year(s) to receive the MS degree. If the student does not enroll in graduate school in the long semester within one year after finishing the BS degree, those graduate credit hours will not be counted toward the MS degree, even if the student comes back to graduate school in the future.

Program requirements

The student is allowed to take one of the graduate courses listed below in the senior year of the program for a total of 3 hours (may be changed only if approved by both the Biomedical Engineering undergraduate and Electrical Engineering graduate coordinators):

- BMEN 5324 – Applications of Biomedical MEMS
- CSCE 5215 – Machine Learning
- CSCE 5290 – Natural Language Processing
- CSCE 5430 – Software Engineering
- CSCE 5640 – Operating System Design
- EENG 5310 - Control Systems Design
- EENG 5320 - Systems Modeling and Simulation
- EENG 5520 - Design and Testing of Digital Systems
- EENG 5530 - Analog Integrated Circuit Design
- EENG 5610 - Digital Signal Processing
- EENG 5810 - Digital Communications
- MEEN 5440 – Finite Element Analysis
- MEEN 5610 – Sensors and Actuators
- MTSE 5100 – Fundamental Concepts of Materials Science
- MTSE 5500 – Electronic, Optical, and Magnetic Materials
- MTSE 5550 – Materials and Mechanics for MEMS Devices
- MTSE 5560 – Compound Semiconductor Materials and Devices

In the senior year, in addition to the approved graduate courses, the student is required to take all remaining courses required for the Biomedical Engineering, BS.

After receiving his or her bachelor's degree and being enrolled in the graduate program, the student is required to take all remaining courses required for the MS degree with a major in electrical engineering (*see Graduate Catalog*).

Biomedical Engineering, BS with grad track option leading to Materials Science and Engineering, MS

Admission requirements

Students applying to the grad track option should be majors in the Biomedical Engineering, BS program. Students are eligible to apply to the grad track option during their junior year, after completing at least 75 credit hours. Other requirements include:

- A cumulative GPA of 3.5 or higher is required at the time of application
- A personal statement, curriculum vitae and two letters of recommendation from materials science and engineering faculty members

The student's application will be reviewed by both undergraduate and graduate advisors in the respective BS and MS programs. Once approved, the student must apply to the Toulouse Graduate School within the first semester of their senior year.

Program policies

After completing at least 90 credit hours and after authorization from undergraduate and graduate advisors, the student may begin taking graduate courses as electives for the BS requirements. Students should earn a B or higher in these graduate courses to be counted toward the MS degree.

Students admitted to the grad track option will be admitted to the MS on a conditional basis. Once the student has satisfied all course work for the BS degree and maintained a GPA of 3.0 or higher, they will be fully admitted to the MS program with all the rights and privileges of a graduate student.

The student must enroll in the graduate school in the long semester after finishing the BS degree and should take the remaining graduate courses in the following year(s) to complete the MS degree. If the student does not enroll in the graduate school in the long semester after finishing the BS degree, those graduate course credit hours will not be counted for the MS degree, even if the student comes back for graduate school in the future.

The student will be awarded the BS degree immediately upon successful completion of the requirements for the undergraduate degree.

Program requirements

Students in the grad track option may choose 9 hours from the following graduate level courses to replace electives in the BS degree with approval of the undergraduate coordinator and advisor in the Department of Biomedical Engineering and the graduate coordinator in the Department of Materials Science and Engineering.

- BMEN 5324 – Applications of Biomedical MEMS
- CSCE 5210 – Fundamentals of Artificial Intelligence
- CSCE 5215 – Machine Learning
- CSCE 5380 – Data Mining
- MEEN 5140 – Advanced Mathematical Methods for Engineers
- MEEN 5300 – Advanced Thermodynamics
- MEEN 5310 – Conduction and Radiation Heat Transfer
- MEEN 5440 – Finite Element Analysis
- MEEN 5520 – Advanced Manufacturing
- MEEN 5610 – Sensors and Actuators
- MTSE 5000 – Thermodynamics of Materials
- MTSE 5010 – Bonding, Structure, and Crystallography
- MTSE 5020 – Mechanical Properties of Materials
- MTSE 5070 – Tribology of Materials
- MTSE 5100 – Fundamental Concepts of Materials Science
- MTSE 5200 – Advanced Concepts of Metallurgical Science
- MTSE 5210 – Corrosion and Oxidation of Materials
- MTSE 5300 – Science and Technology of Modern Ceramics
- MTSE 5400 – Advanced Polymer Physics and Chemistry
- MTSE 5500 – Electronic, Optical, and Magnetic Materials
- MTSE 5520 – Physical and Chemical Based Integrated Circuit Fabrication
- MTSE 5550 – Materials and Mechanics for MEMS Devices
- MTSE 5560 – Compound Semiconductor Materials and Devices
- MTSE 5600 – Materials Characterization
- MTSE 5610 – Fundamentals of Surface Thin Film Analysis
- MTSE 5620 – Scanning Electronic and Ion Microscopy
- MTSE 5710 – Computational Materials Science

If the student wishes to take other graduate courses to satisfy the grad track option requirements, he or she will need to obtain approval from both the undergraduate advisor in Biomedical Engineering and graduate advisor in Materials Science and Engineering. Students should earn a B or higher in these courses in order to be counted toward the MS degree.

All remaining courses for the Biomedical Engineering, BS must be completed according to the catalog.

Minors

Biomedical Engineering minor

A minor in biomedical engineering requires a total of 19 semester hours of biomedical engineering courses, including 12 hours of advanced courses. Twelve hours of advanced courses must be taken at UNT.

Requirements

- BMEN 2210 - Biomedical Circuits and Data Acquisition Best Practices
- BMEN 2320 - Biomedical Instrumentation I

Any two courses from:

- BMEN 3311 - Biomedical Signal Analysis or
- BMEN 3312 - Introduction to Biomechanics or
- BMEN 3321 - Biomaterials

- BMEN 3350 - Biomedical Transport Phenomena
- One 3 hour 4000-level BMEN course (student may not use BMEN 4900 or BMEN 4910 to meet this requirement)

Gergely Záruha, Chair

Faculty

The Department of Computer Science and Engineering at the University of North Texas provides very high quality educational programs by maintaining a balance between theoretical and experimental aspects of computer science and engineering, as well as a balance between software and hardware issues, and by providing curricula that serve the citizens and industrial organizations of Texas in general, and those in North Texas in particular. The department offers ABET-accredited Bachelor of Science degrees in computer engineering and computer science and an ABET-accredited Bachelor of Arts degree in information technology. The bachelor of science degree in cybersecurity enabled students to gain skills to create and maintain secure computing systems. The department also offers Master of Science degrees in computer engineering and computer science and a doctoral degree in computer science and engineering. Current research interests of the faculty may be grouped broadly into algorithms and computational science, computer security, computer systems and networks, databases and data mining, intelligent systems and software engineering. Details about specific faculty research may be found on the faculty members' web pages. The departmental research is supported by federal and state agencies as well as industrial concerns.

Vision and mission

The vision of the Department of Computer Science and Engineering is to be a leader for quality research and education in selected areas in computer engineering, computer science and information technology. The mission of the Department of Computer Science and Engineering is to provide high-quality education through its undergraduate degree program in information technology, undergraduate and graduate degree programs in computer science and computer engineering, and to conduct internationally recognized research in selected areas of computer science and engineering.

Majors

Computer Engineering, BS

The Bachelor of Science with a major in computer engineering provides a high-quality education by balancing the theoretical and experimental aspects of hardware and software issues. A BS with a major in computer engineering provides excellent job prospects in the engineering and technology sectors.

The Bachelor of Science degree with a major in computer engineering is designed for students who wish to specialize in computer hardware, communication systems, digital signal processing, micro-controllers, real-time and embedded systems. Computer engineering students are exposed to both theoretical and practical issues of both hardware and software in laboratories with state-of-the art equipment. The program provides a strong engineering background, with an understanding of the principles and techniques of computing. A professional degree, which includes a two-term/semester senior design project sequence, prepares the graduates for a career and graduate studies in computer engineering and related fields.

The Bachelor of Science degree with a major in computer engineering is accredited by the Engineering Accreditation Commission (EAC) of ABET (abet.org), (415 N. Charles Street, Baltimore, MD 21201; 410-347-7700).

Program educational objectives

Graduates will:

1. Excel in completing projects involving design, including evaluating design constraints, managing computational resources to solve problems in multi-disciplinary teams, and communicating effectively.
2. Pursue professional career or graduate studies in computer engineering or related disciplines involving real-time systems. VLSI design, communication and networks, computer systems, or artificial intelligence and machine learning.
3. Act responsibly and ethically in their professional conduct and successfully engage in life-long learning and contribute to society.
4. Complete professional work assignments that exhibit excellence and a good balance between software and hardware systems, including software development, design of digital systems, microprocessors, embedded systems, real-time systems, and digital communication systems.

Student outcomes

This program will enable students to attain, by the time of graduation:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.

6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Degree requirements

Hours required and general/college requirements

A minimum of 121 semester hours, of which 39 must be advanced, and fulfillment of degree requirements for the Bachelor's degree as specified in the "University Core Curriculum" in the Academics section of this catalog and the College of Engineering requirements.

Major requirements

A minimum of 46 semester hours, including:

- CSCE 1010 - Discovering Computer Science
- CSCE 1015 - Computing Tools and Techniques Laboratory
- CSCE 1030 - Computer Science I
- CSCE 1040 - Computer Science II
- CSCE 2100 - Foundations of Computing
- CSCE 2110 - Foundations of Data Structures
- CSCE 2610 - Assembly Language and Computer Organization
- CSCE 3010 - Signals and Systems
- CSCE 3020 - Communications Systems
- CSCE 3600 - Principles of Systems Programming
- CSCE 3610 - Introduction to Computer Architecture
- CSCE 3612 - Embedded Systems Design
- CSCE 3730 - Reconfigurable Logic
- CSCE 4010 - Social Issues in Computing
- CSCE 4910 - Computer Engineering Design I
- CSCE 4915 - Computer Engineering Design II

Other required courses

- CHEM 1410 - General Chemistry I for Science Majors and
- CHEM 1430 - Laboratory Sequence for General Chemistry I
- or
- CHEM 1415 - General Chemistry for Engineering Majors and
- CHEM 1435 - General Chemistry Laboratory for Engineering Majors

- EENG 2610 - Circuit Analysis and
- EENG 2611 - Circuit Analysis Lab

- EENG 2710 - Digital Logic Design and
- EENG 2711 - Digital Logic Design Lab

- EENG 3510 - Electronics I (Devices and Materials)

- MATH 1710 - Calculus I
- MATH 1720 - Calculus II
- MATH 1780 - Probability Models
or
- MATH 3680 - Applied Statistics
- MATH 2700 - Linear Algebra and Vector Geometry
- MATH 2730 - Multivariable Calculus

- PHYS 1710 - Mechanics and
- PHYS 1730 - Laboratory in Mechanics

- PHYS 2220 - Electricity and Magnetism and
- PHYS 2240 - Laboratory in Electricity and Magnetism

- TECM 2700 - Technical Writing

Specialization area, 9 hours

Three courses selected from one of the five computer engineering specialization areas listed below.

Real-Time and Embedded Systems

- CSCE 3444 - Software Engineering
- CSCE 4440 - Real-Time Software Development
- CSCE 4600 - Introduction to Operating Systems
- CSCE 4610 - Computer Architecture
- CSCE 4620 - Real-Time Operating Systems
- CSCE 4730 - VLSI Design
- CSCE 4890 - Directed Study

VLSI and Electronics

- CSCE 3610 - Introduction to Computer Architecture
- CSCE 4610 - Computer Architecture
- CSCE 4730 - VLSI Design
- CSCE 4890 - Directed Study
- PHYS 4500 - Introduction to Solid-State Physics

Communication and Networks

- CSCE 3420 - Internet Programming
- CSCE 3530 - Introduction to Computer Networks
- CSCE 3550 - Foundations of Cybersecurity
- CSCE 4510 - Introduction to Wireless Communications
- CSCE 4520 - Wireless Networks and Protocols
- CSCE 4530 - Computer Network Design
- CSCE 4560 - Secure Electronic Commerce

- CSCE 4890 - Directed Study

Computer Systems

- CSCE 4160 - Parallel Programming
- CSCE 4050 - Applications of Cryptography
- CSCE 4240 - Introduction to Digital Image Processing
- CSCE 4600 - Introduction to Operating Systems
- CSCE 4610 - Computer Architecture
- CSCE 4620 - Real-Time Operating Systems
- CSCE 4650 - Introduction to Compilation Techniques
- CSCE 4730 - VLSI Design
- CSCE 4890 - Directed Study

Artificial intelligence and machine learning

Many embedded systems designers are using Artificial Intelligence (AI) and Machine Learning (ML) techniques to provide smart solutions for their applications. Currently, there is demand for engineers in the job market with some AI and ML expertise.

- CSCE 3110 - Data Structures and Algorithms
- CSCE 4200 - Web Search and Information Retrieval
- CSCE 4201 - Introduction to Artificial Intelligence
- CSCE 4205 - Introduction to Machine Learning
- CSCE 4290 - Introduction to Natural Language Processing
- CSCE 4380 - Data Mining
- CSCE 4890 - Directed Study

Note

A maximum of 6 hours of credit in CSCE 4890, CSCE 4920, CSCE 4940, or CSCE 4950 will count toward this degree. The 6 hours may include at most 3 hours in CSCE 4920.

Minor

Optional.

Electives

See CSE faculty advisor.

Other requirements

Department policies

Policy on Academic Performance, Progression, and Dismissal in the College of Engineering

Students in the College of Engineering will conduct themselves in a professional manner in their interaction with their peers, faculty, staff and the community in general. A student may be dismissed from the college for inappropriate conduct (please refer to the Code of Student Conduct).

A minimum grade of C is required in all courses required in a student's major for degree completion. Courses include, but are not limited to, engineering, computing, mathematics, laboratory sciences, supporting area, technical elective, technical option, energy elective, and specialization courses.

A minimum grade of C is required in all courses required in a student's major for prerequisite completion. Courses include, but are not limited to, engineering, computing, mathematics, laboratory sciences, supporting area, technical elective, technical option, energy elective, and specialization courses.

A student making grades lower than C two times in the same course in any course required by the major is subject to dismissal from the College of Engineering, pending a review by the Associate Dean for Undergraduate Studies in the College of Engineering.

A student must maintain good academic standing within the university. Please see "Academic status" and "Regulations governing students under academic suspension" in the Academics section of this catalog.

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

Year 1

Semester 1		Semester 2	
CSCE 1010 - Discovering Computer Science	3 hours	CSCE 1030 - Computer Science I	3 hours
CSCE 1015 - Computing Tools and Techniques Laboratory	1 hour	MATH 1720 - Calculus II	3 hours
MATH 1710 - Calculus I	4 hours	TECM 2700 - Technical Writing	3 hours
MATH 1780 - Probability Models	3 hours	PHYS 1710 - Mechanics	3 hours
Communication core	3 hours	PHYS 1730 - Laboratory in Mechanics	1 hour
CHEM selection*	4 hours	Language, Philosophy and Culture core	3 hours
Total	18 hours	Total	16 hours

Year 2

Semester 1		Semester 2	
CSCE 1040 - Computer Science II	3 hours	CSCE 2100 - Foundations of Computing	3 hours
EENG 2710 - Digital Logic Design	3 hours	CSCE 2110 - Foundations of Data Structures	3 hours
EENG 2711 - Digital Logic Design Lab	1 hour	EENG 2610 - Circuit Analysis	3 hours
MATH 2730 - Multivariable Calculus	3 hours	EENG 2611 - Circuit Analysis Lab	1 hour
PHYS 2220 - Electricity and Magnetism	3 hours	MATH 2700 - Linear Algebra and Vector Geometry	3 hours
PHYS 2240 - Laboratory in Electricity and Magnetism	1 hour	American History core	3 hours
Total	14 hours	Total	16 hours

Year 3

Semester 1		Semester 2	
CSCE 2610 - Assembly Language and Computer Organization	3 hours	CSCE 3020 - Communications Systems	3 hours
CSCE 3010 - Signals and Systems	3 hours	CSCE 3610 - Introduction to Computer Architecture	3 hours
CSCE 3600 - Principles of Systems Programming	3 hours	CSCE 3612 - Embedded Systems Design	3 hours
CSCE 3730 - Reconfigurable Logic	3 hours	American History core	3 hours
EENG 3510 - Electronics I (Devices and Materials)	3 hours	Communication and Networks specialization selection	3 hours
Total	15 hours	Total	15 hours

Year 4

Semester 1		Semester 2	
CSCE 4910 - Computer Engineering Design I	3 hours	CSCE 4010 - Social Issues in Computing	3 hours
Creative Arts core	3 hours	CSCE 4915 - Computer Engineering Design II	3 hours
Political Science core	3 hours	Political Science core	3 hours

Semester 1		Semester 2	
Communication and Networks specialization selection	3 hours	Social and Behavioral Sciences core	3 hours
Communication and Networks specialization selection	3 hours		
Total	15 hours	Total	12 hours

Notes

*See "Other required courses" above.

Computer Science, BS

A Bachelor of Science with a major in computer science provides a high-quality education by balancing the theoretical and experimental aspects of hardware and software issues. Computer science is considered to be at or near the top in terms of BS degrees in demand for job prospects.

The Bachelor of Science degree with a major in computer science is a professional degree designed to prepare the student for a career of further studies in the technology and application of computers.

The Bachelor of Science degree with a major in computer science is accredited by the Computing Accreditation Commission (CAC) of ABET (abet.org), (415 N. Charles Street, Baltimore, MD 21201; 410-347-7700).

Program educational objectives

Graduates will:

1. Excel in completing projects involving design, including evaluating design constraints, managing computational resources to solve problems in multi-disciplinary teams, and communicating effectively.
2. Pursue professional career or graduate studies in computer engineering or related disciplines involving real-time systems. VLSI design, communication and networks, computer systems, or artificial intelligence and machine learning.
3. Act responsibly and ethically in their professional conduct and successfully engage in life-long learning and contribute to society.
4. Complete professional work assignments that exhibit excellence and a good balance between software and hardware systems, including software development, design of digital systems, microprocessors, embedded systems, real-time systems, and digital communication systems.

Student outcomes

This program will enable students to attain, by the time of graduation:

1. Analyze a complex computing problem and apply principles of computing and other relevant disciplines to identify solutions.
2. Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
3. Communicate effectively in a variety of professional contexts.
4. Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
5. Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.

6. Apply computer science theory and software development fundamentals to produce computing-based solutions.

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor's degree as specified in the University Core Curriculum in the Academics section of this catalog and the College of Engineering requirements.

Major requirements

A minimum of 58 semester hours, including:

- CSCE 1010 - Discovering Computer Science
- CSCE 1015 - Computing Tools and Techniques Laboratory
- CSCE 1030 - Computer Science I
- CSCE 1040 - Computer Science II
- CSCE 2100 - Foundations of Computing
- CSCE 2110 - Foundations of Data Structures
- CSCE 2610 - Assembly Language and Computer Organization
- CSCE 3444 - Software Engineering
- CSCE 3550 - Foundations of Cybersecurity
- CSCE 3600 - Principles of Systems Programming
- CSCE 4010 - Social Issues in Computing
- CSCE 4110 - Algorithms

- CSCE 4901 - Software Development Capstone I
- CSCE 4902 - Software Development Capstone II
- plus 6 hours chosen from CSCE Advanced Elective Courses
or
- CSCE 4999 - Senior Thesis
plus 9 hours chosen from CSCE Advanced Elective Courses.

CSCE core, 6 hours

Students choose 6 hours from the following.

- CSCE 3530 - Introduction to Computer Networks
- CSCE 4115 - Formal Languages, Automata and Computability
- CSCE 4430 - Programming Languages
- CSCE 4600 - Introduction to Operating Systems
- CSCE 4650 - Introduction to Compilation Techniques

CSCE breadth courses, 6 hours

Students choose 6 hours from the following.

- CSCE 4201 - Introduction to Artificial Intelligence
- CSCE 4210 - Game Programming I

- CSCE 4230 - Introduction to Computer Graphics
- CSCE 4240 - Introduction to Digital Image Processing
- CSCE 4290 - Introduction to Natural Language Processing
- CSCE 4350 - Fundamentals of Database Systems
- CSCE 4460 - Software Testing and Empirical Methodologies

Note

A maximum of 6 hours of credit in CSCE 2900, CSCE 4890, CSCE 4920, CSCE 4940 or CSCE 4950 will count toward this degree. The 6 hours may include at most 3 hours in CSCE 4920.

Other required courses

- EENG 2710 - Digital Logic Design
- MATH 1710 - Calculus I
- MATH 1720 - Calculus II
- MATH 1780 - Probability Models
or
- MATH 3680 - Applied Statistics
- MATH 2700 - Linear Algebra and Vector Geometry
- TECM 2700 - Technical Writing

Laboratory science, 6-8 hours

Choose 2 courses (6-8 hours) from the following courses

Note: some CSCE courses may have specific science prerequisites. Please check with an advisor when selecting your science options.

- BIOL 1132 - Environmental Science
- BIOL 1710 - Biology for Science Majors I and/or
- BIOL 1720 - Biology for Science Majors II
and
- BIOL 1760 - Biology for Science Majors Laboratory
- CHEM 1410 - General Chemistry I for Science Majors and
- CHEM 1430 - Laboratory Sequence for General Chemistry I
or
- CHEM 1415 - General Chemistry for Engineering Majors and
- CHEM 1435 - General Chemistry Laboratory for Engineering Majors
- CHEM 1420 - General Chemistry II for Science Majors and
- CHEM 1440 - Laboratory Sequence for General Chemistry II
- GEOG 1710 - Earth Science

- GEOL 1610 - Introduction to Geology
- PHYS 1270 - Science and Technology of Musical Sound
- PHYS 1410 - General Physics I and
- PHYS 1430 - General Physics Laboratory I
- PHYS 1420 - General Physics II and
- PHYS 1440 - General Physics Laboratory II
- PHYS 1710 - Mechanics and
- PHYS 1730 - Laboratory in Mechanics
- PHYS 2220 - Electricity and Magnetism and
- PHYS 2240 - Laboratory in Electricity and Magnetism

3 hours selected from

Any 4000-level TECM course.

Minor

Optional.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information see an academic advisor in the College of Engineering. Currently, there should be approximately 15 hours of CSCE electives available.

Department policies

Policy on Academic Performance, Progression, and Dismissal in the College of Engineering

Students in the College of Engineering will conduct themselves in a professional manner in their interaction with their peers, faculty, staff and the community in general. A student may be dismissed from the college for inappropriate conduct (please refer to the Code of Student Conduct).

A minimum grade of C is required in all courses required in a student's major for degree completion. Courses include, but are not limited to, engineering, computing, mathematics, laboratory sciences, supporting area, technical elective, technical option, energy elective, and specialization courses.

A minimum grade of C is required in all courses required in a student's major for prerequisite completion. Courses include, but are not limited to, engineering, computing, mathematics, laboratory sciences, supporting area, technical elective, technical option, energy elective, and specialization courses.

A student making grades lower than C two times in the same course in any course required by the major is subject to dismissal from the College of Engineering, pending a review by the Associate Dean for Undergraduate Studies in the College of Engineering.

A student must maintain good academic standing within the university. Please see "Academic status" and "Regulations governing students under academic suspension" in the Academics section of this catalog.

Cybersecurity, BS

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Science degree as specified in the University Core Curriculum in the Academics section of this catalog and the College of Engineering requirements.

Program objectives

Graduates will:

1. Pursue a career in a Cybersecurity-related field utilizing CS-related skills, including some or all the following: analyze/assess risks and vulnerabilities, deployment of countermeasures, policy implementation, incident response and digital forensics.
2. Act responsibly and ethically in their professional conduct.
3. Exhibit the skills to successfully engage in lifelong learning and pursue graduate studies in cybersecurity-related programs, as needed.

4. Exhibit the ability to communicate effectively in written and verbal formats.
5. Demonstrate the ability to work effectively in diverse and distributed multi-disciplinary teams.

Major requirements

Major of 64 hours, including:

- CSCE 1010 - Discovering Computer Science
- CSCE 1015 - Computing Tools and Techniques Laboratory
- CSCE 1035 - Computer Programming I
- CSCE 1045 - Computer Programming II
- CSCE 2100 - Foundations of Computing
- CSCE 2110 - Foundations of Data Structures
- CSCE 3530 - Introduction to Computer Networks
- CSCE 3550 - Foundations of Cybersecurity
- CSCE 3560 - Cloud Security
- CSCE 3600 - Principles of Systems Programming
- CSCE 4010 - Social Issues in Computing
- CSCE 4535 - Introduction to Network Administration
- CSCE 4555 - Computer Forensics
- CSCE 4560 - Secure Electronic Commerce
- CSCE 4565 - Secure Software Development
- CSCE 4575 - Blockchain and Applications
- CSCE 4907 - Cybersecurity Capstone I
- CSCE 4927 - Cybersecurity Capstone II

Electives

Students choose four courses from the following list:

- CSCE 4050 - Applications of Cryptography
- CSCE 4350 - Fundamentals of Database Systems
- CSCE 4357 - Database Systems Security
- CSCE 4520 - Wireless Networks and Protocols
- CSCE 4570 - Information Privacy
- CSCE 4600 - Introduction to Operating Systems
- CJUS 3340 - Computer Crime
- CJUS 4330 - Domestic and International Terrorism
- INFO 4670 - Data Analysis and Knowledge Discovery
- INFO 4710 - Information Technology Management
- INFO 4745 - Information Architecture

Other course requirements

- MATH 1710 - Calculus I
- MATH 1720 - Calculus II
- MATH 2700 - Linear Algebra and Vector Geometry

- MATH 3680 - Applied Statistics
- TECM 2700 - Technical Writing

Choose 2 courses (6-8 hours including labs) from the following:

Note: courses that have a separate lab must include both the lecture and lab components (e.g., PHYS 1710 AND PHYS 1730).

- BIOL 1132 - Environmental Science
- BIOL 1710 - Biology for Science Majors I
- BIOL 1720 - Biology for Science Majors II
- BIOL 1760 - Biology for Science Majors Laboratory
- BIOL 2301 - Human Anatomy and Physiology I
- BIOL 2302 - Human Anatomy and Physiology II
- BIOL 2311 - Human Anatomy and Physiology I Laboratory
- BIOL 2312 - Human Anatomy and Physiology II Laboratory
- CHEM 1410 - General Chemistry I for Science Majors and
- CHEM 1430 - Laboratory Sequence for General Chemistry I
- CHEM 1420 - General Chemistry II for Science Majors and
- CHEM 1440 - Laboratory Sequence for General Chemistry II
- GEOG 1710 - Earth Science
- GEOL 1610 - Introduction to Geology
- PHYS 1270 - Science and Technology of Musical Sound
- PHYS 1410 - General Physics I
- PHYS 1420 - General Physics II
- PHYS 1430 - General Physics Laboratory I
- PHYS 1440 - General Physics Laboratory II
- PHYS 1710 - Mechanics
- PHYS 1730 - Laboratory in Mechanics
- PHYS 2220 - Electricity and Magnetism
- PHYS 2240 - Laboratory in Electricity and Magnetism

Minor

No minor is required.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information see an academic advisor in the College of Engineering. Typically, 3 courses or 9 credit hours is needed to reach the required 120 credit hours.

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

Year 1

Semester 1		Semester 2	
CSCE 1010 - Discovering Computer Science	3 hours	CSCE 1015 - Computing Tools and Techniques Laboratory	1 hour

Notes

*See "Electives" section under "Major Requirements" above.

Information Technology, BS

A Bachelor of Science with a major in information technology provides you with computer science skills while offering more flexibility, fewer math and science requirements, and the opportunity to study a supporting area that can be outside of computer science. Information technology is currently one of the most rapidly growing areas with excellent employment prospects.

The Bachelor of Science degree with a major in information technology is designed to provide a broad education so that the student can take advantage of a variety of professional opportunities in the information technology field.

Program educational objectives

Graduates will:

1. Pursue a career in a technology field utilizing IT-related skills, including the ability to design, develop, manage, maintain, and implement information systems to provide solutions to real problems.
2. Act responsibly and ethically in their professional conduct.

3. Exhibit the skills to successfully engage in lifelong learning and pursue graduate studies in information technology-related programs, as needed.
4. Exhibit the ability to communicate effectively in written and verbal formats.
5. Demonstrate the ability to work effectively in diverse and distributed multi-disciplinary teams.

The Bachelor of Science degree with a major in information technology is accredited by the Computing Accreditation Commission (CAC) of ABET (abet.org), (415 N. Charles Street, Baltimore, MD 21201; 410-347-7700).

Student outcomes

This program will enable students to attain, by the time of graduation, the abilities to:

1. Analyze a complex computing problem and apply principles of computing and other relevant disciplines to identify solutions.
2. Design, implement and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
3. Communicate effectively in a variety of professional contexts.
4. Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
5. Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.
6. Use systemic approaches to select, develop, apply, integrate and administer secure computing technologies to accomplish user goals.

Degree requirements

Hours required and general/college requirements

A minimum of 121 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Science degree as specified in the "University Core Curriculum" in the Academics section of this catalog, and college requirements as specified in the College of Engineering section of this catalog. A minimum of 31 semester hours must be completed at UNT.

Required courses

The courses listed below are required; some of these courses may be used to meet University Core Curriculum requirements.

- TECM 2700 - Technical Writing
- MATH 1710 - Calculus I

- MATH 1680 - Elementary Probability and Statistics
or
- MATH 1780 - Probability Models
or
- MATH 3680 - Applied Statistics

Pick two (6-8 hours including labs) from the following laboratory science options:

- BIOL 1132 - Environmental Science

- BIOL 1710 - Biology for Science Majors I and
- BIOL 1760 - Biology for Science Majors Laboratory

- BIOL 2301 - Human Anatomy and Physiology I and
- BIOL 2311 - Human Anatomy and Physiology I Laboratory

- BIOL 2302 - Human Anatomy and Physiology II and
- BIOL 2312 - Human Anatomy and Physiology II Laboratory

- CHEM 1410 - General Chemistry I for Science Majors and
- CHEM 1430 - Laboratory Sequence for General Chemistry I
or
- CHEM 1415 - General Chemistry for Engineering Majors and
- CHEM 1435 - General Chemistry Laboratory for Engineering Majors

- PHYS 1410 - General Physics I and
- PHYS 1430 - General Physics Laboratory I

- PHYS 1420 - General Physics II and
- PHYS 1440 - General Physics Laboratory II

- PHYS 1710 - Mechanics and
- PHYS 1730 - Laboratory in Mechanics

Major requirements

- CSCE 1010 - Discovering Computer Science
- CSCE 1015 - Computing Tools and Techniques Laboratory
- CSCE 1035 - Computer Programming I
- CSCE 1045 - Computer Programming II
- CSCE 2100 - Foundations of Computing
- CSCE 2110 - Foundations of Data Structures
- CSCE 3055 - IT Project Management
- CSCE 3220 - Human Computer Interfaces
- CSCE 3420 - Internet Programming
- CSCE 3530 - Introduction to Computer Networks
- CSCE 3550 - Foundations of Cybersecurity
- CSCE 3600 - Principles of Systems Programming
- CSCE 3605 - Systems Administration
- CSCE 3615 - Enterprise Systems Architecture and Design
- CSCE 4010 - Social Issues in Computing
- CSCE 4350 - Fundamentals of Database Systems
- CSCE 4355 - Database Administration
- CSCE 4535 - Introduction to Network Administration
- CSCE 4905 - Information Technology Capstone I
- CSCE 4925 - Information Technology Capstone II

Supporting area, 21 hours

21 hours are required to support the information technology major and can be chosen from courses in many UNT departments. Check with a CSE faculty advisor concerning eligible courses.

Note

A maximum of 6 hours of credit in the following will count toward this degree: CSCE 4890, CSCE 4920, CSCE 4940, or CSCE 4950. The 6 hours may include at most 3 hours in CSCE 4920.

Minor

Optional.

Electives

See your academic advisor to discuss electives needed to reach the required 121 credit hours needed to graduate.

Other requirements

Department policies

Policy on Academic Performance, Progression, and Dismissal in the College of Engineering

Students in the College of Engineering will conduct themselves in a professional manner in their interaction with their peers, faculty, staff and the community in general. A student may be dismissed from the college for inappropriate conduct (please refer to the Code of Student Conduct).

A minimum grade of C is required in all courses required in a student's major for degree completion. Courses include, but are not limited to, engineering, computing, mathematics, laboratory sciences, supporting area, technical elective, technical option, energy elective, and specialization courses.

A minimum grade of C is required in all courses required in a student's major for prerequisite completion. Courses include, but are not limited to, engineering, computing, mathematics, laboratory sciences, supporting area, technical elective, technical option, energy elective, and specialization courses.

A student getting grades lower than C two times in the same course in any course required by the major is subject to dismissal from the College of Engineering, pending a review by the Associate Dean for Undergraduate Studies in the College of Engineering.

A student must maintain good academic standing within the university. Please see "Academic status" and "Regulations governing students under academic suspension" in the Academics section of this catalog.

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

Year 1

Semester 1		Semester 2	
CSCE 1010 - Discovering Computer Science	3 hours	CSCE 1015 - Computing Tools and Techniques Laboratory	1 hour
MATH 1710 - Calculus I	4 hours	CSCE 1035 - Computer Programming I	3 hours
American History Core	3 hours	MATH 1680 - Elementary Probability and Statistics	3 hours
Communication Core	3 hours	TECM 2700 - Technical Writing	3 hours
CSIT Major Science	4 hours	Government/Political Science Core	3 hours
Total	17 hours	Total	13 hours

Year 2

Semester 1		Semester 2	
CSCE 1045 - Computer Programming II	3 hours	CSCE 2100 - Foundations of Computing	3 hours
PHYS 1710 - Mechanics	3 hours	CSCE 2110 - Foundations of Data Structures	3 hours
PHYS 1730 - Laboratory in Mechanics	1 hour	Creative Arts Core	3 hours
BSIT Supporting Area	3 hours	Language, Philosophy and Culture Core	3 hours
American History Core	3 hours	Social and Behavioral Sciences Core	3 hours
Government/Political Science Core	3 hours		
Total	16 hours	Total	15 hours

Year 3

Semester 1		Semester 2	
CSCE 3055 - IT Project Management	3 hours	CSCE 3530 - Introduction to Computer Networks	3 hours
CSCE 3220 - Human Computer Interfaces	3 hours	CSCE 3605 - Systems Administration	3 hours
CSCE 3420 - Internet Programming	3 hours	CSCE 3615 - Enterprise Systems Architecture and Design	3 hours
CSCE 3600 - Principles of Systems Programming	3 hours	CSCE 4010 - Social Issues in Computing	3 hours

Semester 1		Semester 2	
BSIT Supporting Area	3 hours	CSCE 4350 - Fundamentals of Database Systems	3 hours
Total	15 hours	Total	15 hours

Year 4

Semester 1		Semester 2	
CSCE 3550 - Foundations of Cybersecurity	3 hours	CSCE 4925 - Information Technology Capstone II	3 hours
CSCE 4355 - Database Administration	3 hours	BSIT Supporting Area	3 hours
CSCE 4535 - Introduction to Network Administration	3 hours	BSIT Supporting Area	3 hours
CSCE 4905 - Information Technology Capstone I	3 hours	BSIT Supporting Area	3 hours
BSIT Supporting Area	3 hours	BSIT Supporting Area	3 hours
Total	15 hours	Total	15 hours

Grad Track Options

Computer Engineering, BS with grad track option leading to Artificial Intelligence, MS

Admission requirements and program policies

Admission requirements

Students applying to the grad track option should be majors in the department's Computer Engineering, BS program. Students are eligible for acceptance at the end of their junior year. Approval will be considered once a student has completed at least 75 credit hours. One benchmark is whether or not the student is ready for CSE Senior Design in the following fall semester. Other requirements include:

- A minimum cumulative GPA of 3.5 or higher is required at the time of application;
- A minimum cumulative GPA of 3.5 for all computer science core courses; and
- A statement of purpose.

The students' application will be reviewed by an undergraduate and a graduate coordinator in computer science and engineering. Once approved by the CSE coordinators, the student must apply to the Toulouse Graduate School within the first semester of the senior year.

Program policies

After completing at least 90 credit hours, the student can start taking the accepted graduate courses as technical electives for the BS degree. If the student wants to take other graduate courses for grad track credits, they will need to obtain approvals from both the undergraduate and graduate CSE coordinators. For these graduate courses to be counted for the MS degree, the student must earn a grade of B or higher for each course. Courses cross-listed as graduate/undergraduate must be taken at the graduate level to be counted for graduate credit.

Students admitted to the grad track option will be admitted into the MS program on a conditional basis. Once the student has satisfied all coursework for the BS degree and maintained a 3.0 GPA or higher, they will be fully admitted to the graduate program. Undergraduate students who have been accepted into a grad track program should complete all of the bachelor's degree requirements and graduate within 12 months of the first day of the semester for which they began taking graduate courses, or enrollment in graduate-level coursework will be suspended.

Students must enroll in graduate school in the long semester after finishing the BS degree and should take the remaining graduate courses in the following year(s) to complete the MS degree. If the student does not enroll in graduate school in the long semester after finishing the BS degree, those graduate course credit hours will not be counted for the MS degree, even if the student comes back for graduate school in the future.

Program requirements

The student is required to take three of the courses listed below in the fourth year of their bachelor's degree program:

- CSCE 5200 - Information Retrieval and Web Search
- CSCE 5210 - Fundamentals of Artificial Intelligence
- CSCE 5215 - Machine Learning
- CSCE 5290 - Natural Language Processing
- CSCE 5380 - Data Mining

All remaining courses for Computer Engineering, BS must be completed.

Computer Engineering, BS with grad track option leading to Biomedical Engineering, MS

Admission requirements and program policies

Admission requirements

1. Student should be a major in the UNT Computer Engineering, BS program.
2. Students can apply for the grad track option his/her junior year (following completion of at least 75 credit hours; a benchmark is if the student is ready for Senior Design in the following fall semester).
3. Minimum of 3.5 or higher cumulative GPA required at the time of application submission, with a minimum GPA of 3.5.
4. Application will be reviewed by both the undergraduate advisor in Computer Science and Engineering and graduate advisor in Biomedical Engineering.
5. Once approved by the respective advisors, the student must apply to the Toulouse Graduate School within the first semester of the senior year.

Program policies

1. After being admitted to the grad track program and completion of at least 90 credit hours, the student can start taking the graduate courses as technical electives for the BS degree requirement. For the graduate courses to be counted for the MS degree, the student should get a B or above for the courses.
2. The student in the grad track program will be advised and monitored by both the undergraduate coordinator (prior to completion of the BS) and the graduate advisor (after completion of the BS).
3. The student should choose a major research advisor in the semester that the student begins taking graduate courses.
4. There will be an annual review of each student's academic progress in meeting both bachelor's and master's degree requirements. If the student fails to meet degree requirements, the student will be placed in a probationary period for one semester. If the student continues to not meet the degree requirements in the probationary period, the student will be expelled from the grad track program (they will still be in the general biomedical engineering BS program if all general biomedical engineering BS degree requirements are met).
5. Undergraduate students who have been accepted to a grad track option should complete all of their bachelor's degree requirements and graduate within 12 months of the first day of the semester in which they begin taking graduate courses or enrollment in graduate level course work will be suspended.
6. The students admitted to the grad track option will be admitted into the MS program on a conditional basis. Once the student has satisfied all course work for the BS degree and maintained a 3.0 or higher GPA, they will be fully admitted to the MS program.
7. The student must enroll in graduate school in the long semester after finishing their BS degree and should take the remaining graduate courses in the following years to complete his/her biomedical engineering master's degree. If the student did not enroll in graduate school in the long semester after finishing his/her BS degree those graduate course credit hours will not be counted toward the MS degree, even if the student comes back for graduate school in the future.

Program requirements

The student is required to take three of the courses listed below in the fourth year of their bachelor's degree program. BMEN courses that apply to the grad track, with corresponding undergraduate courses in parenthesis:

- BMEN 5007 - Research Methods in Biomedical Engineering (BMEN 4007 - Biomedical Experimental Design and Data Analysis)
- BMEN 5310 - Clinical Instrumentation (BMEN 4311 - Biomedical Instrumentation II)
- BMEN 5313 - Bioengineering of Cellular Systems (BMEN 4313 - Cellular Engineering)
- BMEN 5314 - Advanced Tissue Engineering and Regenerative Medicine (BMEN 4314 - Tissue Engineering)
- BMEN 5315 - Computational Methods in Biomedical Engineering (BMEN 4310 - Biomedical Modeling)
- BMEN 5319 - Cardiovascular Fluid Dynamics (BMEN 4319 - Cardiovascular Flows)
- BMEN 5323 - Advanced Biomedical Optics (BMEN 4321 - Biophotonics)
- BMEN 5325 - Biomedical Nanotechnology Compatibility (BMEN 4325 - Biomedical Nanotechnology)
- BMEN 5326 - Biomolecular Engineering (BMEN 4326 - Principles of Biomolecular Engineering)
- CSCE 5050 – Applications of Cryptography
- CSCE 5200 – Information Retrieval and Web Search
- CSCE 5210 – Fundamentals of Artificial Intelligence
- CSCE 5215 – Machine Learning
- CSCE 5220 – Computer Graphics
- CSCE 5225 – Digital Image Processing
- CSCE 5290 – Natural Language Processing
- CSCE 5350 – Fundamentals of Database Systems
- CSCE 5380 – Data Mining
- CSCE 5400 – Formal Languages, Automata, and Computability
- CSCE 5430 – Software Engineering
- CSCE 5450 – Programming Languages
- CSCE 5460 – Software Testing and Empirical Methodologies

- CSCE 5510 – Wireless Communications
- CSCE 5520 – Wireless Networks and Protocols
- CSCE 5550 – Introduction to Computer Security
- CSCE 5555 – Computer Forensics
- CSCE 5560 – Secure Electronic Commerce
- CSCE 5585 – Network Security
- CSCE 5610 – Computer System Architecture
- CSCE 5620 – Real-Time Operating Systems
- CSCE 5650 – Compiler Design
- CSCE 5655 – Principles of Compiler Optimization
- CSCE 5730 – Digital CMOS VLSI Design
- CSCE 5810 – Bioinformatics Algorithms
- CSCE 5820 – Advances in Bioinformatics
- EENG 5310 – Control Systems Design
- EENG 5320 – Systems Modeling and Simulation
- EENG 5520 – Design and Testing of Digital Systems
- EENG 5530 – Analog Integrated Circuit Design
- EENG 5610 – Digital Signal Processing
- EENG 5810 – Digital Communications
- MEEN 5000 – Energy: The Fundamentals
- MEEN 5110 – Renewable Energy
- MEEN 5112 – Nuclear Energy
- MEEN 5140 – Advanced Mathematical Methods for Engineers
- MEEN 5150 – Thermal Energy Storage System and Applications
- MEEN 5152 – Mechanics of Composites And Foams For Lightweight Energy Efficient Structures
- MEEN 5220 – Computational Fluid Dynamics and Heat Transfer
- MEEN 5300 – Advanced Thermodynamics
- MEEN 5310 – Conduction and Radiation Heat Transfer
- MEEN 5311 – Convection Heat Transfer II
- MEEN 5315 – Nanoscale Energy Transport
- MEEN 5330 – Combustion Science and Engineering
- MEEN 5332 – Air Pollution Control Engineering
- MEEN 5340 – Advanced Fluid Mechanics
- MEEN 5410 – Advanced Solid Mechanics
- MEEN 5420 – Continuum Mechanics
- MEEN 5440 – Finite Element Analysis
- MEEN 5510 – Manufacturing Process for Biocomposites
- MEEN 5520 – Advanced Manufacturing
- MEEN 5600 – Feedback Control of Dynamical Systems
- MEEN 5610 – Sensors and Actuators
- MEEN 5640 – Applied Engineering Vibrations
- MEEN 5800 – Topics in Mechanical and Energy Engineering
- MSET 5020 – Design of Experiments
- MSET 5030 – Product Design and Development
- MSET 5040 – Analytical Methods in Engineering Technology
- MSET 5120 – Computer-Integrated Manufacturing
- MSET 5150 – Applications of Electron Microscopy and Failure Analysis

- MSET 5160 – Creep and Fatigue in Engineering Design and Systems Performance
- MSET 5200 – Advanced Construction Scheduling
- MSET 5220 – Building Information Modeling
- MSET 5230 – Risk Management in Construction
- MSET 5800 – Studies in Engineering Technology
- MTSE 5000 – Thermodynamics of Materials
- MTSE 5010 – Bonding, Structure, and Crystallography
- MTSE 5020 – Mechanical Properties of Materials
- MTSE 5070 – Tribology of Materials
- MTSE 5100 – Fundamental Concepts of Materials Science
- MTSE 5200 – Advanced Concepts of Metallurgical Science
- MTSE 5210 – Corrosion and Oxidation of Materials
- MTSE 5300 – Science and Technology of Modern Ceramics
- MTSE 5400 – Advanced Polymer, Physics, and Chemistry
- MTSE 5500 – Electronic, Optical, and Magnetic Materials
- MTSE 5520 – Physical and Chemical Based Integrated Circuit Fabrication
- MTSE 5550 – Materials and Mechanics for MEMS Devices
- MTSE 5560 – Compound Semiconductor Materials and Devices
- MTSE 5600 – Materials Characterization
- MTSE 5610 – Fundamentals of Surface Thin Film Analysis
- MTSE 5620 – Scanning Electron and Ion Microscopy
- MTSE 5710 – Computational Materials Science

All remaining courses required for the Computer Engineering, BS must also be completed. Other graduate courses, including BMEN 5800, BMEN 5810, may be applied to the Computer Engineering, BS and Biomedical Engineering, MS with consent of the departments.

Computer Engineering, BS with grad track option leading to Computer Engineering, MS

The Department of Computer Science and Engineering offers a grad track option for existing UNT undergraduate students majoring in computer engineering.

In this grad track option, the student can take a maximum of nine (9) credit hours of graduate courses while completing the BS degree. After earning the BS degree, these credit hours can be counted toward the MS degree. Prior to registering for these courses, the student must be admitted to the grad track option and obtain approvals from the undergraduate and graduate coordinators.

Admission requirements and program policies

Admission requirements

Students applying to the grad track option should be majors in the department's Computer Engineering, BS program. Students are eligible for acceptance at the end of their junior year. Approval will be considered once a student has completed at least 75 credit hours (one benchmark is whether or not the student is ready for CSE Senior Design in the following fall semester). Other requirements include:

- A minimum cumulative GPA of 3.5 or higher is required at the time of application;

- Average minimum GPA of 3.5 for all computer engineering core courses (CSCE 2610, CSCE 3600, and either CSCE 3612 or CSCE 3730); and
- A statement of purpose is required.

The students' application will be reviewed by an undergraduate and a graduate coordinator in computer science and engineering. Once approved by the CSE coordinators, the student must apply to the Toulouse Graduate School within the first semester of the senior year.

Program policies

After completing at least 90 credit hours, the student can start taking the accepted graduate courses as technical electives for the BS degree. If the student wants to take other graduate courses for grad track credits, he or she will need to obtain approvals from both the undergraduate and graduate CSE coordinators. For these graduate courses to be counted for the MS degree, the student must earn a grade of B or higher for each course. Courses cross-listed as graduate/undergraduate must be taken at the graduate level to be counted for graduate credit.

Students admitted to the grad track option will be admitted into the MS program on a conditional basis. Once the student has satisfied all course work for the BS degree and maintained a 3.0 GPA or higher, he or she will be fully admitted. Undergraduate students who have been accepted to a grad track program should complete all of the bachelor's degree requirements and graduate within 12 months of the first day of the semester for which they began taking graduate courses, or enrollment in graduate level course work will be suspended.

Students must enroll in graduate school in the long semester after finishing the BS degree and should take the remaining graduate courses in the following year(s) to complete the MS degree. If the student does not enroll in graduate school in the long semester after finishing the BS degree, those graduate course credit hours will not be counted for the MS degree, even if the student comes back for graduate school in the future.

Program requirements

The student is required to take three of the courses listed below in the fourth year of the program.

- CSCE 5050 - Applications of Cryptography
- CSCE 5200 - Information Retrieval and Web Search
- CSCE 5210 - Fundamentals of Artificial Intelligence
- CSCE 5215 - Machine Learning
- CSCE 5220 - Computer Graphics
- CSCE 5250 - Introduction to Game Programming
- CSCE 5255 - Programming Math and Physics for Games
- CSCE 5260 - 3D Game Programming
- CSCE 5265 - Advanced Topics in Game Development
- CSCE 5290 - Natural Language Processing
- CSCE 5350 - Fundamentals of Database Systems
- CSCE 5380 - Data Mining
- CSCE 5400 - Formal Languages, Automata and Computability
- CSCE 5430 - Software Engineering
- CSCE 5450 - Programming Languages
- CSCE 5510 - Wireless Communications
- CSCE 5520 - Wireless Networks and Protocols
- CSCE 5550 - Introduction to Computer Security
- CSCE 5555 - Computer Forensics
- CSCE 5560 - Secure Electronic Commerce

- CSCE 5585 - Network Security
- CSCE 5610 - Computer System Architecture
- CSCE 5620 - Real-Time Operating Systems
- CSCE 5640 - Operating System Design
- CSCE 5650 - Compiler Design
- CSCE 5655 - Principles of Compiler Optimization
- CSCE 5730 - Digital CMOS VLSI Design
- CSCE 5810 - Bioinformatics Algorithms
- CSCE 5820 - Advances in Bioinformatics

All remaining courses for Computer Engineering, BS must be completed.

Computer Engineering, BS with grad track option leading to Computer Science and Engineering, PhD

This grad track option is a BS to PhD accelerated program for computer science and computer engineering undergraduate students. The student can take a maximum of 12 credit hours of graduate courses while completing the BS degree. These credits will be counted first toward the BS degree and then, upon graduation, be transferred to the PhD degree.

The following is the step-by-step process:

1. A student applies for the grad track option in the junior year (having completed at least 75 credit hours with a GPA of 3.5 or higher).
2. After the application is approved and the student has completed at least 90 credit hours, the student can start taking graduate courses that are approved for the grad track option as CSE electives for the BS degree requirements. For the graduate courses to be counted toward the PhD degree later, the student should earn a grade of B or higher for the courses.
3. The student applies to the Toulouse Graduate School within the first semester of the senior year. Once the student satisfies all course work for the BS degree and having maintained a 3.5 or higher GPA, the student will submit three recommendation letters from faculty members and a statement of purpose to be considered for entry into the PhD program.
4. The student must enroll in graduate school in the long semester after finishing his/her BS degree and should take the remaining graduate courses in the following year(s) to complete his/her PhD degree. If the student does not enroll in graduate school in the long semester after finishing his/her BS degree, those graduate course credit hours will no longer be counted for the PhD degree, even if the student comes back for graduate school in the future.
5. Once admitted to the PhD program, the students will have higher priority for funding (research and teaching assistantship) to support PhD study.
6. TGS will be consulted for cases when students enrolled in the BS program with the BS-to-MS grad track option are transferred to the program with the BS-to-PhD grad track option.

Program requirements

Students may choose up to 12 hours from the following list of courses:

- CSCE 5050 - Applications of Cryptography (for CSCE 4050)
- CSCE 5200 - Information Retrieval and Web Search (for CSCE 4200)
- CSCE 5210 - Fundamentals of Artificial Intelligence (for CSCE 4201)
- CSCE 5215 - Machine Learning (for CSCE 4930 when topic is "Machine Learning")
- CSCE 5220 - Computer Graphics (for CSCE 4230)
- CSCE 5225 - Digital Image Processing (for CSCE 4240)
- CSCE 5250 - Introduction to Game Programming (for CSCE 4210)

- CSCE 5255 - Programming Math and Physics for Games (for CSCE 4255)
- CSCE 5260 - 3D Game Programming (for CSCE 4220)
- CSCE 5265 - Advanced Topics in Game Development (for CSCE 4250)
- CSCE 5290 - Natural Language Processing (for CSCE 4290)
- CSCE 5350 - Fundamentals of Database Systems (for CSCE 4350)
- CSCE 5400 - Formal Languages, Automata and Computability (for CSCE 4115)
- CSCE 5430 - Software Engineering (for CSCE 3444)
- CSCE 5450 - Programming Languages (for CSCE 4430)
- CSCE 5460 - Software Testing and Empirical Methodologies (for CSCE 4460)
- CSCE 5510 - Wireless Communications (for CSCE 4510)
- CSCE 5520 - Wireless Networks and Protocols (for CSCE 4520)
- CSCE 5560 - Secure Electronic Commerce (for CSCE 4560)
- CSCE 5585 - Network Security (for CSCE 4930 when topic is "Block Chain")
- CSCE 5610 - Computer System Architecture (for CSCE 4610)
- CSCE 5620 - Real-Time Operating Systems (for CSCE 4620)
- CSCE 5640 - Operating Systems Design (for CSCE 4600)
- CSCE 5650 - Compiler Design (for CSCE 4650)
- CSCE 5655 - Principles of Compiler Optimization (for CSCE 4655)
- CSCE 5730 - Digital CMOS VLSI Design (for CSCE 4730)
- CSCE 5810 - Bioinformatics Algorithms (for CSCE 4810)
- CSCE 5820 - Advances in Bioinformatics (for CSCE 4820)

All remaining courses for Computer Engineering, BS must be completed.

Computer Engineering, BS with grad track option leading to Computer Science, MS

Admission requirements

Students applying to the grad track option should be majors in the department's Computer Engineering, BS. Students are eligible for acceptance at the end of their junior year. - CSCE 5650 - Compiler Design (CSCE 4650)
- CSCE 5655 - Principles of Compiler Optimization (CSCE 4655)
- CSCE 5730 - Digital CMOS VLSI Design (CSCE 4730)
- CSCE 5810 - Bioinformatics Algorithms (CSCE 4810)
- CSCE 5820 - Advances in Bioinformatics (CSCE 4820)

All remaining courses for Computer Engineering, BS must be completed.

Computer Engineering, BS with grad track option leading to Data Engineering, MS

Admission requirements

Students applying to the grad track option should be majors in the department's Computer Engineering, BS. Students are eligible for acceptance at the end of their junior year. Approval will be considered once a student has completed at least 75 credit hours. One benchmark is whether or not the student is ready for CSE Senior Design in the following fall semester. Other requirements include:

- A minimum cumulative GPA of 3.5 or higher is required at the time of application;
- A minimum cumulative GPA of 3.5 for all computer science core courses; and
- A statement of purpose.

The students' application will be reviewed by an undergraduate and a graduate coordinator in computer science and engineering. Once approved by the CSE coordinators, the student must apply to the Toulouse Graduate School within the first semester of the senior year.

Program policies

After completing at least 90 credit hours, the student can start taking the accepted graduate courses as technical electives for the BS degree. If the student wants to take other graduate courses for grad track credits, they will need to obtain approvals from both the undergraduate and graduate CSE coordinators. For these graduate courses to be counted for the MS degree, the student must

earn a grade of B or higher for each course. Courses cross-listed as graduate/undergraduate must be taken at the graduate level to be counted for graduate credit.

Students admitted to the grad track option will be admitted into the MS program on a conditional basis. Once the student has satisfied all coursework for the BS degree and maintained a 3.0 GPA or higher, they will be fully admitted to the graduate program. Undergraduate students who have been accepted into a grad track program should complete all of the bachelor's degree requirements and graduate within 12 months of the first day of the semester for which they began taking graduate courses, or enrollment in graduate-level coursework will be suspended.

Students must enroll in graduate school in the long semester after finishing the BS degree and should take the remaining graduate courses in the following year(s) to complete the MS degree. If the student does not enroll in graduate school in the long semester after finishing the BS degree, those graduate course credit hours will not be counted for the MS degree, even if the student comes back for graduate school in the future.

Program requirements

The student is required to take three of the courses listed below in the fourth year of their bachelor's degree program:

- CSCE 5050 - Applications of Cryptography (CSCE 4050)
- CSCE 5200 - Information Retrieval and Web Search (CSCE 4200)
- CSCE 5200 - Information Retrieval and Web Search (CSCE 4930)
- CSCE 5210 - Fundamentals of Artificial Intelligence (CSCE 4201)
- CSCE 5215 - Machine Learning (CSCE 4930)
- CSCE 5220 - Computer Graphics (CSCE 4230)
- CSCE 5225 - Digital Image Processing (CSCE 4240)
- CSCE 5250 - Introduction to Game Programming (CSCE 4210)
- CSCE 5255 - Programming Math and Physics for Games (CSCE 4255)
- CSCE 5260 - 3D Game Programming (CSCE 4220)
- CSCE 5265 - Advanced Topics in Game Development (CSCE 4250)
- CSCE 5290 - Natural Language Processing (CSCE 4290)
- CSCE 5350 - Fundamentals of Database Systems (CSCE 4350)
- CSCE 5380 - Data Mining
- CSCE 5400 - Formal Languages, Automata and Computability (CSCE 4115)
- CSCE 5430 - Software Engineering (CSCE 3444)
- CSCE 5450 - Programming Languages (CSCE 4430)
- CSCE 5460 - Software Testing and Empirical Methodologies (CSCE 4460)
- CSCE 5510 - Wireless Communications (CSCE 4510)
- CSCE 5520 - Wireless Networks and Protocols (CSCE 4520)
- CSCE 5550 - Introduction to Computer Security
- CSCE 5555 - Computer Forensics
- CSCE 5560 - Secure Electronic Commerce (CSCE 4560)
- CSCE 5585 - Network Security (CSCE 4930)
- CSCE 5610 - Computer System Architecture (CSCE 4610)
- CSCE 5620 - Real-Time Operating Systems (CSCE 4620)
- CSCE 5640 - Operating System Design (CSCE 4600)
- CSCE 5650 - Compiler Design (CSCE 4650)
- CSCE 5655 - Principles of Compiler Optimization (CSCE 4655)
- CSCE 5730 - Digital CMOS VLSI Design (CSCE 4730)
- CSCE 5810 - Bioinformatics Algorithms (CSCE 4810)

- CSCE 5820 - Advances in Bioinformatics (CSCE 4820)

All remaining courses for Computer Engineering, BS must be completed.

Computer Engineering, BS with grad track option leading to Electrical Engineering, MS

The Department of Electrical Engineering offers a grad track option for existing UNT undergraduate students enrolled in the Computer Engineering, BS program.

In this grad track option, the student can take a maximum of three (3) credit hours of graduate courses while completing the BS degree. After earning the BS degree, these credit hours can be counted toward the MS degree. Prior to registering for these courses, the student must be admitted to the grad track option and obtain approvals from the undergraduate and graduate coordinators of their respective programs.

Admission requirements

To be eligible to apply for grad track, students must have a cumulative GPA of 3.5 or higher at the time of application

To apply, students should submit the following to the grad track coordinator of the Department of Electrical Engineering, MS before the first semester of their senior year:

- A completed grad track application form, and
- An up-to-date official transcript

The students' application will be reviewed by the undergraduate coordinator in Computer Science and Engineering and the graduate coordinator in Electrical Engineering.

After a student is admitted to the grad track program, the student must apply to the Toulouse Graduate School during their senior year for admission to the Electrical Engineering, MS, which should follow the same application procedure, application deadlines, and admission requirements as the regular graduate applications for admission to the Electrical Engineering, MS.

Program policies

After being accepted into the grad track option, the student then can take graduate courses in their senior year as Computer Engineering, BS electives to meet the bachelor's degree requirements. In order for courses to be counted toward the MS degree, the student must meet the minimum grade requirements of the courses in the MS program. After being accepted into the grad track option, the student must complete the bachelor's degree within one year of the first graduate level course they take.

Students admitted to the program will be admitted into the MS program on a conditional basis. Once the student has satisfied all requirements for the bachelor's degree and maintained a GPA of 3.0 or higher, they will be fully admitted to the MS program.

The student must enroll in graduate school in the long semester within one year after receiving his or her bachelor's degree and should complete the remaining graduate courses in the following year(s) to receive the MS degree. If the student does not enroll in graduate school in the long semester within one year after finishing the BS degree, those graduate credit hours will not be counted toward the MS degree, even if the student comes back to graduate school in the future.

Program requirements

The student is allowed to take one of the graduate courses listed below in the senior year of the program for a total of 3 hours (may be changed only if approved by both the Computer Science and Engineering undergraduate and Electrical Engineering graduate coordinators):

- BMEN 5324 – Applications of Biomedical MEMS
- CSCE 5215 – Machine Learning
- CSCE 5290 – Natural Language Processing
- CSCE 5430 – Software Engineering
- CSCE 5640 – Operating System Design
- EENG 5310 - Control Systems Design
- EENG 5320 - Systems Modeling and Simulation
- EENG 5520 - Design and Testing of Digital Systems
- EENG 5530 - Analog Integrated Circuit Design
- EENG 5610 - Digital Signal Processing
- EENG 5810 - Digital Communications
- MEEN 5440 – Finite Element Analysis
- MEEN 5610 – Sensors and Actuators
- MTSE 5100 – Fundamental Concepts of Materials Science
- MTSE 5500 – Electronic, Optical, and Magnetic Materials
- MTSE 5550 – Materials and Mechanics for MEMS Devices
- MTSE 5560 – Compound Semiconductor Materials and Devices

In the senior year, in addition to the approved graduate courses, the student is required to take all remaining courses required for the Computer Engineering, BS.

After receiving his or her bachelor's degree and being enrolled in the graduate program, the student is required to take all remaining courses required for the MS degree with a major in electrical engineering (*see Graduate Catalog*).

Computer Engineering, BS with grad track option leading to Materials Science and Engineering, MS

Admission requirements

Students applying to the grad track option should be majors in the Computer Engineering, BS program. Students are eligible to apply to the grad track option during their junior year, after completing at least 75 credit hours. Other requirements include:

- A cumulative GPA of 3.5 or higher is required at the time of application
- A personal statement, curriculum vitae and two letters of recommendation from materials science and engineering faculty members

The student's application will be reviewed by both undergraduate and graduate advisors in the respective BS and MS programs. Once approved, the student must apply to the Toulouse Graduate School within the first semester of their senior year.

Program policies

After completing at least 90 credit hours and after authorization from undergraduate and graduate advisors, the student may begin taking graduate courses as electives for the BS requirements. Students should earn a B or higher in these graduate courses to be counted toward the MS degree.

Students admitted to the grad track option will be admitted to the MS on a conditional basis. Once the student has satisfied all course work for the BS degree and maintained a GPA of 3.0 or higher, they will be fully admitted to the MS program with all the rights and privileges of a graduate student.

The student must enroll in the graduate school in the long semester after finishing the BS degree and should take the remaining graduate courses in the following year(s) to complete the MS degree. If the student does not enroll in the graduate school in the long semester after finishing the BS degree, those graduate course credit hours will not be counted for the MS degree, even if the student comes back for graduate school in the future.

The student will be awarded the BS degree immediately upon successful completion of the requirements for the undergraduate degree.

Program requirements

Students in the grad track option may choose 9 hours from the following graduate-level courses to replace electives in the BS degree with the approval of the undergraduate coordinator and advisor in the Department of Computer Science and Engineering and the graduate coordinator in the Department of Materials Science and Engineering.

- BMEN 5324 – Applications of Biomedical MEMS
- CSCE 5210 – Fundamentals of Artificial Intelligence
- CSCE 5215 – Machine Learning
- CSCE 5380 – Data Mining
- MEEN 5140 – Advanced Mathematical Methods for Engineers
- MEEN 5300 – Advanced Thermodynamics
- MEEN 5310 – Conduction and Radiation Heat Transfer
- MEEN 5440 – Finite Element Analysis
- MEEN 5520 – Advanced Manufacturing
- MEEN 5610 – Sensors and Actuators
- MTSE 5000 – Thermodynamics of Materials
- MTSE 5010 – Bonding, Structure, and Crystallography
- MTSE 5020 – Mechanical Properties of Materials
- MTSE 5070 – Tribology of Materials
- MTSE 5100 – Fundamental Concepts of Materials Science
- MTSE 5200 – Advanced Concepts of Metallurgical Science
- MTSE 5210 – Corrosion and Oxidation of Materials
- MTSE 5300 – Science and Technology of Modern Ceramics
- MTSE 5400 – Advanced Polymer Physics and Chemistry
- MTSE 5500 – Electronic, Optical, and Magnetic Materials
- MTSE 5520 – Physical and Chemical Based Integrated Circuit Fabrication
- MTSE 5550 – Materials and Mechanics for MEMS Devices
- MTSE 5560 – Compound Semiconductor Materials and Devices
- MTSE 5600 – Materials Characterization
- MTSE 5610 – Fundamentals of Surface Thin Film Analysis
- MTSE 5620 – Scanning Electronic and Ion Microscopy
- MTSE 5710 – Computational Materials Science

If the student wishes to take other graduate courses to satisfy the grad track option requirements, he or she will need to obtain approval from both the undergraduate advisor in Computer Science and Engineering and graduate advisor in Materials Science and Engineering. Students should earn a B or higher in these courses in order to be counted toward the MS degree.

All remaining courses for the Computer Engineering, BS must be completed according to the catalog.

Computer Science, BS with grad track option leading to Artificial Intelligence, MS

Admission requirements and program policies

Admission Requirements

Students applying to the grad track option should be majors in the department's Computer Science, BS program. Students are eligible for acceptance at the end of their junior year. Approval will be considered once a student has completed at least 75 credit hours. One benchmark is whether or not the student is ready for CSE Senior Design in the following fall semester. Other requirements include:

- A minimum cumulative GPA of 3.5 or higher is required at the time of application;
- A minimum cumulative GPA of 3.5 for all computer science core courses; and
- A statement of purpose.

The students' application will be reviewed by an undergraduate and a graduate coordinator in computer science and engineering. Once approved by the CSE coordinators, the student must apply to the Toulouse Graduate School within the first semester of the senior year.

Program policies

After completing at least 90 credit hours, the student can start taking the accepted graduate courses as technical electives for the BS degree. If the student wants to take other graduate courses for grad track credits, they will need to obtain approvals from both the undergraduate and graduate CSE coordinators. For these graduate courses to be counted for the MS degree, the student must earn a grade of B or higher for each course. Courses cross-listed as graduate/undergraduate must be taken at the graduate level to be counted for graduate credit.

Students admitted to the grad track option will be admitted into the MS program on a conditional basis. Once the student has satisfied all coursework for the BS degree and maintained a 3.0 GPA or higher, they will be fully admitted to the graduate program. Undergraduate students who have been accepted into a grad track program should complete all of the bachelor's degree requirements and graduate within 12 months of the first day of the semester for which they began taking graduate courses, or enrollment in graduate-level coursework will be suspended.

Students must enroll in graduate school in the long semester after finishing the BS degree and should take the remaining graduate courses in the following year(s) to complete the MS degree. If the student does not enroll in graduate school in the long semester after finishing the BS degree, those graduate course credit hours will not be counted for the MS degree, even if the student comes back for graduate school in the future.

Program Requirements

The student is required to take three of the courses listed below in the fourth year of their bachelor's degree program:

- CSCE 5200 - Information Retrieval and Web Search
- CSCE 5210 - Fundamentals of Artificial Intelligence
- CSCE 5215 - Machine Learning
- CSCE 5290 - Natural Language Processing

- CSCE 5380 - Data Mining

All remaining courses for Computer Science, BS must be completed.

Computer Science, BS with grad track option leading to Biomedical Engineering, MS

Admission requirements

1. Student should be a major in the UNT Computer Science, BS program.
2. Students can apply for the grad track option his/her junior year (following completion of at least 75 credit hours; a benchmark is if the student is ready for Senior Design in the following fall semester).
3. Minimum of 3.5 or higher cumulative GPA required at the time of application submission, with a minimum GPA of 3.5.
4. The student should provide two recommendation letters from faculty members with their application.
5. Application will be reviewed by both the undergraduate advisor in Computer Science and Engineering and graduate advisor in Biomedical Engineering.
6. Once approved by the respective advisors, the student must apply to the Toulouse Graduate School within the first semester of the senior year.

Program policies

1. After being admitted to the grad track program and completion of at least 90 credit hours, the student can start taking the graduate courses as technical electives for the BS degree requirement. For the graduate courses to be counted for the MS degree, the student should get a B or above for the courses.
2. The student in the grad track program will be advised and monitored by both the undergraduate coordinator (prior to completion of the BS) and the graduate advisor (after completion of the BS).
3. The student should choose a major research advisor in the semester that the student begins taking graduate courses.
4. There will be an annual review of each student's academic progress in meeting both bachelor's and master's degree requirements. If the student fails to meet degree requirements, the student will be placed in a probationary period for one semester. If the student continues to not meet the degree requirements in the probationary period, the student will be expelled from the grad track program (they will still be in the general biomedical engineering BS program if all general biomedical engineering BS degree requirements are met).
5. Undergraduate students who have been accepted to a grad track option should complete all of their bachelor's degree requirements and graduate within 12 months of the first day of the semester in which they begin taking graduate courses or enrollment in graduate level course work will be suspended.
6. The students admitted to the grad track option will be admitted into the MS program on a conditional basis. Once the student has satisfied all course work for the BS degree and maintained a 3.0 or higher GPA, they will be fully admitted to the MS program.
7. The student must enroll in graduate school in the long semester after finishing their BS degree and should take the remaining graduate courses in the following years to complete his/her biomedical engineering master's degree. If the student did not enroll in graduate school in the long semester after finishing his/her BS degree those graduate course credit hours will not be counted toward the MS degree, even if the student comes back for graduate school in the future.

Program requirements

The student is required to take three of the courses listed below in the fourth year of their bachelor's degree program. BMEN courses that apply to the grad track, with corresponding undergraduate courses in parenthesis:

- BMEN 5007 - Research Methods in Biomedical Engineering (BMEN 4007 - Biomedical Experimental Design and Data Analysis)

- BMEN 5310 - Clinical Instrumentation (BMEN 4311 - Biomedical Instrumentation II)
- BMEN 5313 - Bioengineering of Cellular Systems (BMEN 4313 - Cellular Engineering)
- BMEN 5314 - Advanced Tissue Engineering and Regenerative Medicine (BMEN 4314 - Tissue Engineering)
- BMEN 5315 - Computational Methods in Biomedical Engineering (BMEN 4310 - Biomedical Modeling)
- BMEN 5319 - Cardiovascular Fluid Dynamics (BMEN 4319 - Cardiovascular Flows)
- BMEN 5323 - Advanced Biomedical Optics (BMEN 4321 - Biophotonics)
- BMEN 5325 - Biomedical Nanotechnology Compatibility (BMEN 4325 - Biomedical Nanotechnology)
- BMEN 5326 - Biomolecular Engineering (BMEN 4326 - Principles of Biomolecular Engineering)
- CSCE 5050 – Applications of Cryptography
- CSCE 5200 – Information Retrieval and Web Search
- CSCE 5210 – Fundamentals of Artificial Intelligence
- CSCE 5215 – Machine Learning
- CSCE 5220 – Computer Graphics
- CSCE 5225 – Digital Image Processing
- CSCE 5290 – Natural Language Processing
- CSCE 5350 – Fundamentals of Database Systems
- CSCE 5380 – Data Mining
- CSCE 5400 – Formal Languages, Automata, and Computability
- CSCE 5430 – Software Engineering
- CSCE 5450 – Programming Languages
- CSCE 5460 – Software Testing and Empirical Methodologies
- CSCE 5510 – Wireless Communications
- CSCE 5520 – Wireless Networks and Protocols
- CSCE 5550 – Introduction to Computer Security
- CSCE 5555 – Computer Forensics
- CSCE 5560 – Secure Electronic Commerce
- CSCE 5585 – Network Security
- CSCE 5610 – Computer System Architecture
- CSCE 5620 – Real-Time Operating Systems
- CSCE 5650 – Compiler Design
- CSCE 5655 – Principles of Compiler Optimization
- CSCE 5730 – Digital CMOS VLSI Design
- CSCE 5810 – Bioinformatics Algorithms
- CSCE 5820 – Advances in Bioinformatics
- EENG 5310 – Control Systems Design
- EENG 5320 – Systems Modeling and Simulation
- EENG 5520 – Design and Testing of Digital Systems
- EENG 5530 – Analog Integrated Circuit Design
- EENG 5610 – Digital Signal Processing
- EENG 5810 – Digital Communications
- MEEN 5000 – Energy: The Fundamentals
- MEEN 5110 – Renewable Energy
- MEEN 5112 – Nuclear Energy
- MEEN 5140 – Advanced Mathematical Methods for Engineers
- MEEN 5150 – Thermal Energy Storage System and Applications
- MEEN 5152 – Mechanics of Composites And Foams For Lightweight Energy Efficient Structures
- MEEN 5220 – Computational Fluid Dynamics and Heat Transfer

- MEEN 5300 – Advanced Thermodynamics
- MEEN 5310 – Conduction and Radiation Heat Transfer
- MEEN 5311 – Convection Heat Transfer II
- MEEN 5315 – Nanoscale Energy Transport
- MEN 5330 – Combustion Science and Engineering
- MEEN 5332 – Air Pollution Control Engineering
- MEEN 5340 – Advanced Fluid Mechanics
- MEEN 5410 – Advanced Solid Mechanics
- MEEN 5440 – Finite Element Analysis
- MEEN 5510 – Manufacturing Process for Biocomposites
- MEEN 5520 – Advanced Manufacturing
- MEEN 5600 – Feedback Control of Dynamical Systems
- MEEN 5610 – Sensors and Actuators
- MEEN 5640 – Applied Engineering Vibrations
- MEEN 5800 – Topics in Mechanical and Energy Engineering
- MSET 5020 – Design of Experiments
- MSET 5030 – Product Design and Development
- MSET 5040 – Analytical Methods in Engineering Technology
- MSET 5120 – Computer-Integrated Manufacturing
- MSET 5150 – Applications of Electron Microscopy and Failure Analysis
- MSET 5160 – Creep and Fatigue in Engineering Design and Systems Performance
- MSET 5200 – Advanced Construction Scheduling
- MSET 5220 – Building Information Modeling
- MSET 5230 – Risk Management in Construction
- MSET 5800 – Studies in Engineering Technology
- MTSE 5000 – Thermodynamics of Materials
- MTSE 5010 – Bonding, Structure, and Crystallography
- MTSE 5020 – Mechanical Properties of Materials
- MTSE 5070 – Tribology of Materials
- MTSE 5100 – Fundamental Concepts of Materials Science
- MTSE 5200 – Advanced Concepts of Metallurgical Science
- MTSE 5210 – Corrosion and Oxidation of Materials
- MTSE 5300 – Science and Technology of Modern Ceramics
- MTSE 5400 – Advanced Polymer, Physics, and Chemistry
- MTSE 5500 – Electronic, Optical, and Magnetic Materials
- MTSE 5520 – Physical and Chemical Based Integrated Circuit Fabrication
- MTSE 5550 – Materials and Mechanics for MEMS Devices
- MTSE 5560 – Compound Semiconductor Materials and Devices
- MTSE 5600 – Materials Characterization
- MTSE 5610 – Fundamentals of Surface Thin Film Analysis
- MTSE 5620 – Scanning Electron and Ion Microscopy
- MTSE 5710 – Computational Materials Science

All remaining courses required for the Computer Science, BS must also be completed. Other graduate courses, including BMEN 5800, BMEN 5810, may be applied to the Computer Science, BS and Biomedical Engineering, MS with consent of the departments.

Computer Science, BS with grad track option leading to Computer Engineering, MS

Admission requirements

Students applying to the grad track option should be majors in the department's Computer Science, BS. Students are eligible for acceptance at the end of their junior year. Approval will be considered once a student has completed at least 75 credit hours. One benchmark is whether or not the student is ready for CSE Senior Design in the following fall semester. Other requirements include:

- A minimum cumulative GPA of 3.5 or higher is required at the time of application;
- A minimum cumulative GPA of 3.5 for all computer science core courses; and
- A statement of purpose.

The students' application will be reviewed by an undergraduate and a graduate coordinator in computer science and engineering. Once approved by the CSE coordinators, the student must apply to the Toulouse Graduate School within the first semester of the senior year.

Program policies

After completing at least 90 credit hours, the student can start taking the accepted graduate courses as technical electives for the BS degree. If the student wants to take other graduate courses for grad track credits, they will need to obtain approvals from both the undergraduate and graduate CSE coordinators. For these graduate courses to be counted for the MS degree, the student must earn a grade of B or higher for each course. Courses cross-listed as graduate/undergraduate must be taken at the graduate level to be counted for graduate credit.

Students admitted to the grad track option will be admitted into the MS program on a conditional basis. Once the student has satisfied all coursework for the BS degree and maintained a 3.0 GPA or higher, they will be fully admitted to the graduate program. Undergraduate students who have been accepted into a grad track program should complete all of the bachelor's degree requirements and graduate within 12 months of the first day of the semester for which they began taking graduate courses, or enrollment in graduate-level coursework will be suspended.

Students must enroll in graduate school in the long semester after finishing the BS degree and should take the remaining graduate courses in the following year(s) to complete the MS degree. If the student does not enroll in graduate school in the long semester after finishing the BS degree, those graduate course credit hours will not be counted for the MS degree, even if the student comes back for graduate school in the future.

Program requirements

The student is required to take three of the courses listed below in the fourth year of their bachelor's degree program:

- CSCE 5050 - Applications of Cryptography (CSCE 4050)
- CSCE 5200 - Information Retrieval and Web Search (CSCE 4200)
- CSCE 5200 - Information Retrieval and Web Search (CSCE 4930)
- CSCE 5210 - Fundamentals of Artificial Intelligence (CSCE 4201)
- CSCE 5215 - Machine Learning (CSCE 4930)
- CSCE 5220 - Computer Graphics (CSCE 4230)
- CSCE 5225 - Digital Image Processing (CSCE 4240)
- CSCE 5250 - Introduction to Game Programming (CSCE 4210)
- CSCE 5255 - Programming Math and Physics for Games (CSCE 4255)

- CSCE 5260 - 3D Game Programming (CSCE 4220)
- CSCE 5265 - Advanced Topics in Game Development (CSCE 4250)
- CSCE 5290 - Natural Language Processing (CSCE 4290)
- CSCE 5350 - Fundamentals of Database Systems (CSCE 4350)
- CSCE 5380 - Data Mining
- CSCE 5400 - Formal Languages, Automata and Computability (CSCE 4115)
- CSCE 5430 - Software Engineering (CSCE 3444)
- CSCE 5450 - Programming Languages (CSCE 4430)
- CSCE 5460 - Software Testing and Empirical Methodologies (CSCE 4460)
- CSCE 5510 - Wireless Communications (CSCE 4510)
- CSCE 5520 - Wireless Networks and Protocols (CSCE 4520)
- CSCE 5550 - Introduction to Computer Security
- CSCE 5555 - Computer Forensics
- CSCE 5560 - Secure Electronic Commerce (CSCE 4560)
- CSCE 5585 - Network Security (CSCE 4930)
- CSCE 5610 - Computer System Architecture (CSCE 4610)
- CSCE 5620 - Real-Time Operating Systems (CSCE 4620)
- CSCE 5640 - Operating Systems Design (CSCE 4600)
- CSCE 5650 - Compiler Design (CSCE 4650)
- CSCE 5655 - Principles of Compiler Optimization (CSCE 4655)
- CSCE 5730 - Digital CMOS VLSI Design (CSCE 4730)
- CSCE 5810 - Bioinformatics Algorithms (CSCE 4810)
- CSCE 5820 - Advances in Bioinformatics (CSCE 4820)

All remaining courses for Computer Science, BS must be completed.

Computer Science, BS with grad track option leading to Computer Science and Engineering, PhD

This grad track option is a BS to PhD accelerated program for computer science and computer engineering undergraduate students. The student can take a maximum of 12 credit hours of graduate courses while completing the BS degree. These credits will be counted first toward the BS degree and then, upon graduation, be transferred to the PhD degree.

The following is the step-by-step process:

1. A student applies for the grad track option in the junior year (having completed at least 75 credit hours with a GPA of 3.5 or higher).
2. After the application is approved and the student has completed at least 90 credit hours, the student can start taking graduate courses that are approved for the grad track option as CSE electives for the BS degree requirements. For the graduate courses to be counted toward the PhD degree later, the student should earn a grade of B or higher for the courses.
3. The student applies to the Toulouse Graduate School within the first semester of the senior year. Once the student satisfies all course work for the BS degree and having maintained a 3.5 or higher GPA, the student will submit three recommendation letters from faculty members and a statement of purpose to be considered for entry into the PhD program.
4. The student must enroll in graduate school in the long semester after finishing his/her BS degree and should take the remaining graduate courses in the following year(s) to complete his/her PhD degree. If the student does not enroll in graduate school in the long semester after finishing his/her BS degree, those graduate course credit hours will no longer be counted for the PhD degree, even if the student comes back for graduate school in the future.

5. Once admitted to the PhD program, the students will have higher priority for funding (research and teaching assistantship) to support PhD study.
6. TGS will be consulted for cases when students enrolled in the BS program with the BS-to-MS grad track option are transferred to the program with the BS-to-PhD grad track option.

Program requirements

Students may choose up to 12 hours from the following list of courses.

- CSCE 5050 - Applications of Cryptography (for CSCE 4050)
- CSCE 5200 - Information Retrieval and Web Search (for CSCE 4200)
- CSCE 5210 - Fundamentals of Artificial Intelligence (for CSCE 4201)
- CSCE 5215 - Machine Learning (for CSCE 4930 when topic is "Machine Learning")
- CSCE 5220 - Computer Graphics (for CSCE 4230)
- CSCE 5225 - Digital Image Processing (for CSCE 4240)
- CSCE 5250 - Introduction to Game Programming (for CSCE 4210)
- CSCE 5255 - Programming Math and Physics for Games (for CSCE 4255)
- CSCE 5260 - 3D Game Programming (for CSCE 4220)
- CSCE 5265 - Advanced Topics in Game Development (for CSCE 4250)
- CSCE 5290 - Natural Language Processing (for CSCE 4290)
- CSCE 5350 - Fundamentals of Database Systems (for CSCE 4350)
- CSCE 5400 - Formal Languages, Automata and Computability (for CSCE 4115)
- CSCE 5430 - Software Engineering (for CSCE 3444)
- CSCE 5450 - Programming Languages (for CSCE 4430)

- CSCE 5810 - Bioinformatics Algorithms (for CSCE 4810)
- CSCE 5820 - Advances in Bioinformatics (for CSCE 4820)

All remaining courses for Computer Science, BS must be completed.

Computer Science, BS with grad track option leading to Computer Science, MS

The Department of Computer Science and Engineering offers a grad track option for existing UNT undergraduate students majoring in computer science.

In this grad track option, the student can take a maximum of nine (9) credit hours of graduate courses while completing the BS degree. After earning the BS degree, these credit hours can be counted toward the MS degree. Prior to registering for these

courses, the student must be admitted to the grad track option and obtain approvals from the undergraduate and graduate coordinators.

Admission requirements and program policies

Admission requirements

Students applying to the grad track option should be majors in the department's Computer Science, BS program. Students are eligible for acceptance at the end of their junior year. Approval will be considered once a student has completed at least 75 credit hours (one benchmark is whether or not the student is ready for CSE Senior Design in the following fall semester). Other requirements include:

- A minimum cumulative GPA of 3.5 or higher is required at the time of application;
- An average minimum GPA of 3.5 for all computer science core courses (CSCE 2610, CSCE 3110, CSCE 3600); and
- A statement of purpose is required.

The students' application will be reviewed by an undergraduate and a graduate coordinator in computer science and engineering. Once approved by the CSE coordinators, the student must apply to the Toulouse Graduate School within the first semester of the senior year.

Program policies

After completing at least 90 credit hours, the student can start taking the accepted graduate courses as technical electives for the BS degree. If the student wants to take other graduate courses for grad track credits, he or she will need to obtain approvals from both the undergraduate and graduate CSE coordinators. For these graduate courses to be counted for the MS degree, the student must earn a grade of B or higher for each course. Courses cross-listed as graduate/undergraduate must be taken at the graduate level to be counted for graduate credit.

Students admitted to the grad track option will be admitted into the MS program on a conditional basis. Once the student has satisfied all course work for the BS degree and maintained a 3.0 GPA or higher, he or she will be fully admitted. Undergraduate students who have been accepted to a grad track program should complete all of the bachelor's degree requirements and graduate within 12 months of the first day of the semester for which they began taking graduate courses, or enrollment in graduate level course work will be suspended.

Students must enroll in graduate school in the long semester after finishing the BS degree and should take the remaining graduate courses in the following year(s) to complete the MS degree. If the student does not enroll in graduate school in the long semester after finishing the BS degree, those graduate course credit hours will not be counted for the MS degree, even if the student comes back for graduate school in the future.

Program requirements

The student is required to take 3 of the courses listed below in the fourth year of the program:

- CSCE 5050 - Applications of Cryptography
- CSCE 5200 - Information Retrieval and Web Search
- CSCE 5210 - Fundamentals of Artificial Intelligence
- CSCE 5215 - Machine Learning
- CSCE 5220 - Computer Graphics
- CSCE 5250 - Introduction to Game Programming

- CSCE 5255 - Programming Math and Physics for Games
- CSCE 5260 - 3D Game Programming
- CSCE 5265 - Advanced Topics in Game Development
- CSCE 5290 - Natural Language Processing
- CSCE 5350 - Fundamentals of Database Systems
- CSCE 5380 - Data Mining
- CSCE 5400 - Formal Languages, Automata and Computability
- CSCE 5430 - Software Engineering
- CSCE 5450 - Programming Languages
- CSCE 5510 - Wireless Communications
- CSCE 5520 - Wireless Networks and Protocols
- CSCE 5555 - Computer Forensics
- CSCE 5560 - Secure Electronic Commerce
- CSCE 5610 - Computer System Architecture
- CSCE 5620 - Real-Time Operating Systems
- CSCE 5640 - Operating System Design
- CSCE 5650 - Compiler Design
- CSCE 5655 - Principles of Compiler Optimization
- CSCE 5730 - Digital CMOS VLSI Design
- CSCE 5810 - Bioinformatics Algorithms
- CSCE 5820 - Advances in Bioinformatics

All remaining courses for the Computer Science, BS must be completed.

Computer Science, BS with grad track option leading to Cybersecurity, MS

Admission requirements

Students applying to the grad track option should be majors in the department's Computer Science, BS. Students are eligible for acceptance at the end of their junior year. Approval will be considered once a student has completed at least 75 credit hours. One benchmark is whether or not the student is ready for CSE Senior Design in the following fall semester. Other requirements include:

- A minimum cumulative GPA of 3.5 or higher is required at the time of application;
- A minimum cumulative GPA of 3.5 for all computer science core courses; and
- A statement of purpose.

The students' application will be reviewed by an undergraduate and a graduate coordinator in computer science and engineering. Once approved by the CSE coordinators, the student must apply to the Toulouse Graduate School within the first semester of the senior year.

Program policies

After completing at least 90 credit hours, the student can start taking the accepted graduate courses as technical electives for the BS degree. - CSCE 5640 - Operating System Design (CSCE 4600)
- CSCE 5650 - Compiler Design (CSCE 4650)
- CSCE 5655 - Principles of Compiler Optimization (CSCE 4655)
- CSCE 5730 - Digital CMOS VLSI Design (CSCE 4730)
- CSCE 5810 - Bioinformatics Algorithms (CSCE 4810)
- CSCE 5820 - Advances in Bioinformatics (CSCE 4820)

All remaining courses for Computer Science, BS must be completed.

Computer Science, BS with grad track option leading to Electrical Engineering, MS

The Department of Electrical Engineering offers a grad track option for existing UNT undergraduate students enrolled in the Computer Science, BS program.

In this grad track option, the student can take a maximum of three (3) credit hours of graduate courses while completing the BS degree. After earning the BS degree, these credit hours can be counted toward the MS degree. Prior to registering for these courses, the student must be admitted to the grad track option and obtain approvals from the undergraduate and graduate coordinators of their respective programs.

Admission requirements

To be eligible to apply for grad track, students must have a cumulative GPA of 3.5 or higher at the time of application

To apply, students should submit the following to the grad track coordinator of the Department of Electrical Engineering, MS before the first semester of their senior year:

- A completed grad track application form, and
- An up-to-date official transcript

The students' application will be reviewed by the undergraduate coordinator in Computer Science and Engineering and the graduate coordinator in Electrical Engineering.

After a student is admitted to the grad track program, the student must apply to the Toulouse Graduate School during their senior year for admission to the Electrical Engineering, MS, which should follow the same application procedure, application deadlines, and admission requirements as the regular graduate applications for admission to the Electrical Engineering, MS.

Program policies

After being accepted into the grad track option, the student then can take graduate courses in their senior year as Computer Science, BS electives to meet the bachelor's degree requirements. In order for courses to be counted toward the MS degree, the student must meet the minimum grade requirements of the courses in the MS program. After being accepted into the grad track option, the student must complete the bachelor's degree within one year of the first graduate level course they take.

Students admitted to the program will be admitted into the MS program on a conditional basis. Once the student has satisfied all requirements for the bachelor's degree and maintained a GPA of 3.0 or higher, they will be fully admitted to the MS program.

The student must enroll in graduate school in the long semester within one year after receiving his or her bachelor's degree and should complete the remaining graduate courses in the following year(s) to receive the MS degree. If the student does not enroll in graduate school in the long semester within one year after finishing the BS degree, those graduate credit hours will not be counted toward the MS degree, even if the student comes back to graduate school in the future.

Program requirements

The student is allowed to take one of the graduate courses listed below in the senior year of the program for a total of 3 hours (may be changed only if approved by both the Computer Science and Engineering undergraduate and Electrical Engineering graduate coordinators):

- BMEN 5324 – Applications of Biomedical MEMS
- CSCE 5215 – Machine Learning
- CSCE 5290 – Natural Language Processing
- CSCE 5430 – Software Engineering
- CSCE 5640 – Operating System Design
- EENG 5310 - Control Systems Design
- EENG 5320 - Systems Modeling and Simulation
- EENG 5520 - Design and Testing of Digital Systems
- EENG 5530 - Analog Integrated Circuit Design
- EENG 5610 - Digital Signal Processing
- EENG 5810 - Digital Communications
- MEEN 5440 – Finite Element Analysis
- MEEN 5610 – Sensors and Actuators
- MTSE 5100 – Fundamental Concepts of Materials Science
- MTSE 5500 – Electronic, Optical, and Magnetic Materials
- MTSE 5550 – Materials and Mechanics for MEMS Devices
- MTSE 5560 – Compound Semiconductor Materials and Devices

In the senior year, in addition to the approved graduate courses, the student is required to take all remaining courses required for the Computer Science, BS.

After receiving his or her bachelor's degree and being enrolled in the graduate program, the student is required to take all remaining courses required for the MS degree with a major in electrical engineering (*see Graduate Catalog*).

Computer Science, BS with grad track option leading to Materials Science and Engineering, MS

Admission requirements

Students applying to the grad track option should be majors in the Computer Science, BS program. Students are eligible to apply to the grad track option during their junior year, after completing at least 75 credit hours. Other requirements include:

- A cumulative GPA of 3.5 or higher is required at the time of application
- A personal statement, curriculum vitae and two letters of recommendation from materials science and engineering faculty members

The student's application will be reviewed by both undergraduate and graduate advisors in the respective BS and MS programs. Once approved, the student must apply to the Toulouse Graduate School within the first semester of their senior year.

Program policies

After completing at least 90 credit hours and after authorization from undergraduate and graduate advisors, the student may begin taking graduate courses as electives for the BS requirements. Students should earn a B or higher in these graduate courses to be counted toward the MS degree.

Students admitted to the grad track option will be admitted to the MS on a conditional basis. Once the student has satisfied all course work for the BS degree and maintained a GPA of 3.0 or higher, they will be fully admitted to the MS program with all the rights and privileges of a graduate student.

The student must enroll in the graduate school in the long semester after finishing the BS degree and should take the remaining graduate courses in the following year(s) to complete the MS degree. If the student does not enroll in the graduate school in the long semester after finishing the BS degree, those graduate course credit hours will not be counted for the MS degree, even if the student comes back for graduate school in the future.

The student will be awarded the BS degree immediately upon successful completion of the requirements for the undergraduate degree.

Program requirements

Students in the grad track option may choose 9 hours from the following graduate-level courses to replace electives in the BS degree with the approval of the undergraduate coordinator and advisor in the Department of Computer Science and Engineering and the graduate coordinator in the Department of Materials Science and Engineering.

- BMEN 5324 – Applications of Biomedical MEMS
- CSCE 5210 – Fundamentals of Artificial Intelligence
- CSCE 5215 – Machine Learning
- CSCE 5380 – Data Mining
- MEEN 5140 – Advanced Mathematical Methods for Engineers
- MEEN 5300 – Advanced Thermodynamics
- MEEN 5310 – Conduction and Radiation Heat Transfer
- MEEN 5440 – Finite Element Analysis
- MEEN 5520 – Advanced Manufacturing
- MEEN 5610 – Sensors and Actuators
- MTSE 5000 – Thermodynamics of Materials
- MTSE 5010 – Bonding, Structure, and Crystallography
- MTSE 5020 – Mechanical Properties of Materials
- MTSE 5070 – Tribology of Materials
- MTSE 5100 – Fundamental Concepts of Materials Science

- MTSE 5200 – Advanced Concepts of Metallurgical Science
- MTSE 5210 – Corrosion and Oxidation of Materials
- MTSE 5300 – Science and Technology of Modern Ceramics
- MTSE 5400 – Advanced Polymer Physics and Chemistry
- MTSE 5500 – Electronic, Optical, and Magnetic Materials
- MTSE 5520 – Physical and Chemical Based Integrated Circuit Fabrication
- MTSE 5550 – Materials and Mechanics for MEMS Devices
- MTSE 5560 – Compound Semiconductor Materials and Devices
- MTSE 5600 – Materials Characterization
- MTSE 5610 – Fundamentals of Surface Thin Film Analysis
- MTSE 5620 – Scanning Electronic and Ion Microscopy
- MTSE 5710 – Computational Materials Science

If the student wishes to take other graduate courses to satisfy the grad track option requirements, he or she will need to obtain approval from both the undergraduate advisor in Computer Science and Engineering and graduate advisor in Materials Science and Engineering. Students should earn a B or higher in these courses in order to be counted toward the MS degree.

All remaining courses for the Computer Science, BS must be completed according to the catalog.

Cybersecurity, BS with grad track option leading to Artificial Intelligence, MS

Admission requirements

Students applying to the grad track option should be majors in the department's Cybersecurity, BS. Students are eligible for acceptance at the end of their junior year. Approval will be considered once a student has completed at least 75 credit hours. One benchmark is whether or not the student is ready for CSE Senior Design in the following fall semester. Other requirements include:

- A minimum cumulative GPA of 3.5 or higher is required at the time of application;
- A minimum cumulative GPA of 3.5 for all computer science core courses; and
- A statement of purpose.

The students' application will be reviewed by an undergraduate and a graduate coordinator in computer science and engineering. Once approved by the CSE coordinators, the student must apply to the Toulouse Graduate School within the first semester of the senior year.

Program policies

After completing at least 90 credit hours, the student can start taking the accepted graduate courses as technical electives for the BS degree. If the student wants to take other graduate courses for grad track credits, they will need to obtain approvals from both the undergraduate and graduate CSE coordinators. For these graduate courses to be counted for the MS degree, the student must earn a grade of B or higher for each course. Courses cross-listed as graduate/undergraduate must be taken at the graduate level to be counted for graduate credit.

Students admitted to the grad track option will be admitted into the MS program on a conditional basis. Once the student has satisfied all coursework for the BS degree and maintained a 3.0 GPA or higher, they will be fully admitted to the graduate program. Undergraduate students who have been accepted into a grad track program should complete all of the bachelor's degree requirements and graduate within 12 months of the first day of the semester for which they began taking graduate courses, or enrollment in graduate-level coursework will be suspended.

Students must enroll in graduate school in the long semester after finishing the BS degree and should take the remaining graduate courses in the following year(s) to complete the MS degree. If the student does not enroll in graduate school in the long semester after finishing the BS degree, those graduate course credit hours will not be counted for the MS degree, even if the student comes back for graduate school in the future.

Program requirements

The student is required to take three of the courses listed below in the fourth year of their bachelor's degree program:

- CSCE 5050 - Applications of Cryptography (CSCE 4050)
- CSCE 5200 - Information Retrieval and Web Search (CSCE 4200)
- CSCE 5200 - Information Retrieval and Web Search (CSCE 4930)
- CSCE 5210 - Fundamentals of Artificial Intelligence (CSCE 4201)
- CSCE 5215 - Machine Learning (CSCE 4930)
- CSCE 5220 - Computer Graphics (CSCE 4230)
- CSCE 5225 - Digital Image Processing (CSCE 4240)
- CSCE 5250 - Introduction to Game Programming (CSCE 4210)
- CSCE 5255 - Programming Math and Physics for Games (CSCE 4255)
- CSCE 5260 - 3D Game Programming (CSCE 4220)
- CSCE 5265 - Advanced Topics in Game Development (CSCE 4250)
- CSCE 5290 - Natural Language Processing (CSCE 4290)
- CSCE 5350 - Fundamentals of Database Systems (CSCE 4350)
- CSCE 5380 - Data Mining
- CSCE 5400 - Formal Languages, Automata and Computability (CSCE 4115)
- CSCE 5430 - Software Engineering (CSCE 3444)
- CSCE 5450 - Programming Languages (CSCE 4430)
- CSCE 5460 - Software Testing and Empirical Methodologies (CSCE 4460)
- CSCE 5510 - Wireless Communications (CSCE 4510)
- CSCE 5520 - Wireless Networks and Protocols (CSCE 4520)
- CSCE 5550 - Introduction to Computer Security
- CSCE 5555 - Computer Forensics
- CSCE 5560 - Secure Electronic Commerce (CSCE 4560)
- CSCE 5585 - Network Security (CSCE 4930)
- CSCE 5610 - Computer System Architecture (CSCE 4610)
- CSCE 5620 - Real-Time Operating Systems (CSCE 4620)
- CSCE 5640 - Operating System Design (CSCE 4600)
- CSCE 5650 - Compiler Design (CSCE 4650)
- CSCE 5655 - Principles of Compiler Optimization (CSCE 4655)
- CSCE 5730 - Digital CMOS VLSI Design (CSCE 4730)
- CSCE 5810 - Bioinformatics Algorithms (CSCE 4810)
- CSCE 5820 - Advances in Bioinformatics (CSCE 4820)

All remaining courses for Cybersecurity, BS must be completed.

Cybersecurity, BS with grad track option leading to Biomedical Engineering, MS

Admission requirements

1. Student should be a major in the UNT Cybersecurity, BS program.
2. Students can apply for the grad track option his/her junior year (following completion of at least 75 credit hours; a benchmark is if the student is ready for Senior Design in the following fall semester).
3. Minimum of 3.5 or higher cumulative GPA required at the time of application submission, with a minimum GPA of 3.5.
4. The student should provide two recommendation letters from faculty members with their application.
5. Application will be reviewed by both the undergraduate advisor in Computer Science and Engineering and graduate advisor in Biomedical Engineering.
6. Once approved by the respective advisors, the student must apply to the Toulouse Graduate School within the first semester of the senior year.

Program policies

1. After being admitted to the grad track program and completion of at least 90 credit hours, the student can start taking the graduate courses as technical electives for the BS degree requirement. For the graduate courses to be counted for the MS degree, the student should get a B or above for the courses.
2. The student in the grad track program will be advised and monitored by both the undergraduate coordinator (prior to completion of the BS) and the graduate advisor (after completion of the BS).
3. The student should choose a major research advisor in the semester that the student begins taking graduate courses.
4. There will be an annual review of each student's academic progress in meeting both bachelor's and master's degree requirements. If the student fails to meet degree requirements, the student will be placed in a probationary period for one semester. If the student continues to not meet the degree requirements in the probationary period, the student will be expelled from the grad track program (they will still be in the general biomedical engineering BS program if all general biomedical engineering BS degree requirements are met).
5. Undergraduate students who have been accepted to a grad track option should complete all of their bachelor's degree requirements and graduate within 12 months of the first day of the semester in which they begin taking graduate courses or enrollment in graduate level course work will be suspended.
6. The students admitted to the grad track option will be admitted into the MS program on a conditional basis. Once the student has satisfied all course work for the BS degree and maintained a 3.0 or higher GPA, they will be fully admitted to the MS program.
7. The student must enroll in graduate school in the long semester after finishing their BS degree and should take the remaining graduate courses in the following years to complete his/her biomedical engineering master's degree. If the student did not enroll in graduate school in the long semester after finishing his/her BS degree those graduate course credit hours will not be counted toward the MS degree, even if the student comes back for graduate school in the future.

Program requirements

The student is required to take three of the courses listed below in the fourth year of their bachelor's degree program. The following courses may apply to the grad track with approval of the undergraduate and graduate coordinators of the respective programs.

- BMEN 5007 - Research Methods in Biomedical Engineering (BMEN 4007 - Biomedical Experimental Design and Data Analysis)
- BMEN 5310 - Clinical Instrumentation (BMEN 4311 - Biomedical Instrumentation II)
- BMEN 5313 - Bioengineering of Cellular Systems (BMEN 4313 - Cellular Engineering)
- BMEN 5314 - Advanced Tissue Engineering and Regenerative Medicine (BMEN 4313 - Cellular Engineering)

All remaining courses required for the Cybersecurity, BS must also be completed. Other graduate courses may be applied to the Cybersecurity, BS and Biomedical Engineering, MS with consent of the departments.

Cybersecurity, BS with grad track option leading to Computer Engineering, MS

Admission requirements

Students applying to the grad track option should be majors in the department's Cybersecurity, BS. Students are eligible for acceptance at the end of their junior year. Approval will be considered once a student has completed at least 75 credit hours. One

benchmark is whether or not the student is ready for CSE Senior Design in the following fall semester. Other requirements include:

- A minimum cumulative GPA of 3.5 or higher is required at the time of application;
- A minimum cumulative GPA of 3.5 for all computer science core courses; and
- A statement of purpose.

The students' application will be reviewed by an undergraduate and a graduate coordinator in computer science and engineering. Once approved by the CSE coordinators, the student must apply to the Toulouse Graduate School within the first semester of the senior year.

Program policies

After completing at least 90 credit hours, the student can start taking the accepted graduate courses as technical electives for the BS degree. If the student wants to take other graduate courses for grad track credits, they will need to obtain approvals from both the undergraduate and graduate CSE coordinators. For these graduate courses to be counted for the MS degree, the student must earn a grade of B or higher for each course. Courses cross-listed as graduate/undergraduate must be taken at the graduate level to be counted for graduate credit.

Students admitted to the grad track option will be admitted into the MS program on a conditional basis. Once the student has satisfied all coursework for the BS degree and maintained a 3.0 GPA or higher, they will be fully admitted to the graduate program. Undergraduate students who have been accepted into a grad track program should complete all of the bachelor's degree requirements and graduate within 12 months of the first day of the semester for which they began taking graduate courses, or enrollment in graduate-level coursework will be suspended.

Students must enroll in graduate school in the long semester after finishing the BS degree and should take the remaining graduate courses in the following year(s) to complete the MS degree. If the student does not enroll in graduate school in the long semester after finishing the BS degree, those graduate course credit hours will not be counted for the MS degree, even if the student comes back for graduate school in the future.

Program requirements

The student is required to take three of the courses listed below in the fourth year of their bachelor's degree program:

- CSCE 5050 - Applications of Cryptography (CSCE 4050)
- CSCE 5200 - Information Retrieval and Web Search (CSCE 4200)
- CSCE 5200 - Information Retrieval and Web Search (CSCE 4930)
- CSCE 5210 - Fundamentals of Artificial Intelligence (CSCE 4201)
- CSCE 5215 - Machine Learning (CSCE 4930)
- CSCE 5220 - Computer Graphics (CSCE 4230)
- CSCE 5225 - Digital Image Processing (CSCE 4240)
- CSCE 5250 - Introduction to Game Programming (CSCE 4210)
- CSCE 5255 - Programming Math and Physics for Games (CSCE 4255)
- CSCE 5260 - 3D Game Programming (CSCE 4220)
- CSCE 5265 - Advanced Topics in Game Development (CSCE 4250)
- CSCE 5290 - Natural Language Processing (CSCE 4290)
- CSCE 5350 - Fundamentals of Database Systems (CSCE 4350)
- CSCE 5380 - Data Mining
- CSCE 5400 - Formal Languages, Automata and Computability (CSCE 4115)
- CSCE 5430 - Software Engineering (CSCE 3444)
- CSCE 5450 - Programming Languages (CSCE 4430)

- CSCE 5460 - Software Testing and Empirical Methodologies (CSCE 4460)
- CSCE 5510 - Wireless Communications (CSCE 4510)
- CSCE 5520 - Wireless Networks and Protocols (CSCE 4520)
- CSCE 5550 - Introduction to Computer Security
- CSCE 5555 - Computer Forensics
- CSCE 5560 - Secure Electronic Commerce (CSCE 4560)
- CSCE 5585 - Network Security (CSCE 4930)
- CSCE 5610 - Computer System Architecture (CSCE 4610)
- CSCE 5620 - Real-Time Operating Systems (CSCE 4620)
- CSCE 5640 - Operating Systems Design (CSCE 4600)
- CSCE 5650 - Compiler Design (CSCE 4650)
- CSCE 5655 - Principles of Compiler Optimization (CSCE 4655)
- CSCE 5730 - Digital CMOS VLSI Design (CSCE 4730)
- CSCE 5810 - Bioinformatics Algorithms (CSCE 4810)
- CSCE 5820 - Advances in Bioinformatics (CSCE 4820)

All remaining courses for Cybersecurity, BS must be completed.

Cybersecurity, BS with grad track option leading to Computer Science and Engineering, PhD

Admission requirements and program policies

This grad track option is a BS to PhD accelerated program for computer science and computer engineering undergraduate students. The student can take a maximum of 12 credit hours of graduate courses while completing the BS degree. These credits will be counted first toward the BS degree and then, upon graduation, be transferred to the PhD degree.

The following is the step-by-step process:

1. A student applies for the grad track option in the junior year (having completed at least 75 credit hours with a GPA of 3.5 or higher).
2. After the application is approved and the student has completed at least 90 credit hours, the student can start taking graduate courses that are approved for the grad track option as CSE electives for the BS degree requirements. For the graduate courses to be counted toward the PhD degree later, the student should earn a grade of B or higher for the courses.
3. The student applies to the Toulouse Graduate School within the first semester of the senior year. Once the student satisfies all course work for the BS degree and having maintained a 3.5 or higher GPA, the student will submit three recommendation letters from faculty members and a statement of purpose to be considered for entry into the PhD program.
4. The student must enroll in graduate school in the long semester after finishing his/her BS degree and should take the remaining graduate courses in the following year(s) to complete his/her PhD degree. If the student does not enroll in graduate school in the long semester after finishing his/her BS degree, those graduate course credit hours will no longer be counted for the PhD degree, even if the student comes back for graduate school in the future.
5. Once admitted to the PhD program, the students will have higher priority for funding (research and teaching assistantship) to support PhD study.
6. TGS will be consulted for cases when students enrolled in the BS program with the BS-to-MS grad track option are transferred to the program with the BS-to-PhD grad track option.

Program requirements

The student is required to take three of the courses listed below in the fourth year of their bachelor's degree program:

- CSCE 5050 - Applications of Cryptography (CSCE 4050)
- CSCE 5200 - Information Retrieval and Web Search (CSCE 4200)
- CSCE 5200 - Information Retrieval and Web Search (CSCE 4930)
- CSCE 5210 - Fundamentals of Artificial Intelligence (CSCE 4201)
- CSCE 5215 - Machine Learning (CSCE 4930)
- CSCE 5220 - Computer Graphics (CSCE 4230)
- CSCE 5225 - Digital Image Processing (CSCE 4240)
- CSCE 5250 - Introduction to Game Programming (CSCE 4210)
- CSCE 5255 - Programming Math and Physics for Games (CSCE 4255)
- CSCE 5260 - 3D Game Programming (CSCE 4220)
- CSCE 5265 - Advanced Topics in Game Development (CSCE 4250)
- CSCE 5290 - Natural Language Processing (CSCE 4290)
- CSCE 5350 - Fundamentals of Database Systems (CSCE 4350)
- CSCE 5380 - Data Mining
- CSCE 5400 - Formal Languages, Automata and Computability (CSCE 4115)
- CSCE 5430 - Software Engineering (CSCE 3444)
- CSCE 5450 - Programming Languages (CSCE 4430)
- CSCE 5460 - Software Testing and Empirical Methodologies (CSCE 4460)
- CSCE 5510 - Wireless Communications (CSCE 4510)
- CSCE 5520 - Wireless Networks and Protocols (CSCE 4520)
- CSCE 5550 - Introduction to Computer Security
- CSCE 5555 - Computer Forensics
- CSCE 5560 - Secure Electronic Commerce (CSCE 4560)
- CSCE 5585 - Network Security (CSCE 4930)
- CSCE 5610 - Computer System Architecture (CSCE 4610)
- CSCE 5620 - Real-Time Operating Systems (CSCE 4620)

- CSCE 5820 - Advances in Bioinformatics (CSCE 4820)

All remaining courses for Cybersecurity, BS must be completed.

Cybersecurity, BS with grad track option leading to Electrical Engineering, MS

The Department of Electrical Engineering offers a grad track option for existing UNT undergraduate students enrolled in the Cybersecurity, BS program.

In this grad track option, the student can take a maximum of three (3) credit hours of graduate courses while completing the BS degree. After earning the BS degree, these credit hours can be counted toward the MS degree. Prior to registering for these courses, the student must be admitted to the grad track option and obtain approvals from the undergraduate and graduate coordinators of their respective programs.

Admission requirements

To be eligible to apply for grad track, students must have a cumulative GPA of 3.5 or higher at the time of application

To apply, students should submit the following to the grad track coordinator of the Department of Electrical Engineering, MS before the first semester of their senior year:

- A completed grad track application form, and
- An up-to-date official transcript

The students' application will be reviewed by the undergraduate coordinator in Computer Science and Engineering and the graduate coordinator in Electrical Engineering.

After a student is admitted to the grad track program, the student must apply to the Toulouse Graduate School during their senior year for admission to the Electrical Engineering, MS, which should follow the same application procedure, application deadlines, and admission requirements as the regular graduate applications for admission to the Electrical Engineering, MS.

Program policies

After being accepted into the grad track option, the student then can take graduate courses in their senior year as Cybersecurity, BS electives to meet the bachelor's degree requirements. In order for courses to be counted toward the MS degree, the student

must meet the minimum grade requirements of the courses in the MS program. After being accepted into the grad track option, the student must complete the bachelor's degree within one year of the first graduate level course they take.

Students admitted to the program will be admitted into the MS program on a conditional basis. Once the student has satisfied all requirements for the bachelor's degree and maintained a GPA of 3.0 or higher, they will be fully admitted to the MS program.

The student must enroll in graduate school in the long semester within one year after receiving his or her bachelor's degree and should complete the remaining graduate courses in the following year(s) to receive the MS degree. If the student does not enroll in graduate school in the long semester within one year after finishing the BS degree, those graduate credit hours will not be counted toward the MS degree, even if the student comes back to graduate school in the future.

Program requirements

The student is allowed to take one of the graduate courses listed below in the senior year of the program for a total of 3 hours (may be changed only if approved by both the Computer Science and Engineering undergraduate and Electrical Engineering graduate coordinators):

- BMEN 5324 – Applications of Biomedical MEMS
- CSCE 5215 – Machine Learning
- CSCE 5290 – Natural Language Processing
- CSCE 5430 – Software Engineering
- CSCE 5640 – Operating System Design
- EENG 5310 - Control Systems Design
- EENG 5320 - Systems Modeling and Simulation
- EENG 5520 - Design and Testing of Digital Systems
- EENG 5530 - Analog Integrated Circuit Design
- EENG 5610 - Digital Signal Processing
- EENG 5810 - Digital Communications
- MEEN 5440 – Finite Element Analysis
- MEEN 5610 – Sensors and Actuators
- MTSE 5100 – Fundamental Concepts of Materials Science
- MTSE 5500 – Electronic, Optical, and Magnetic Materials
- MTSE 5550 – Materials and Mechanics for MEMS Devices
- MTSE 5560 – Compound Semiconductor Materials and Devices

In the senior year, in addition to the approved graduate courses, the student is required to take all remaining courses required for the Cybersecurity, BS.

After receiving his or her bachelor's degree and being enrolled in the graduate program, the student is required to take all remaining courses required for the MS degree with a major in electrical engineering (*see Graduate Catalog*).

Cybersecurity, BS with grad track option leading to Materials Science and Engineering, MS

Admission requirements

Students applying to the grad track option should be majors in the Cybersecurity, BS program. Students are eligible to apply to the grad track option during their junior year, after completing at least 75 credit hours. Other requirements include:

- A cumulative GPA of 3.5 or higher is required at the time of application

- A personal statement, curriculum vitae and two letters of recommendation from materials science and engineering faculty members

The student's application will be reviewed by both undergraduate and graduate advisors in the respective BS and MS programs. Once approved, the student must apply to the Toulouse Graduate School within the first semester of their senior year.

Program policies

After completing at least 90 credit hours and after authorization from undergraduate and graduate advisors, the student may begin taking graduate courses as electives for the BS requirements. Students should earn a B or higher in these graduate courses to be counted toward the MS degree.

Students admitted to the grad track option will be admitted to the MS on a conditional basis. Once the student has satisfied all course work for the BS degree and maintained a GPA of 3.0 or higher, they will be fully admitted to the MS program with all the rights and privileges of a graduate student.

The student must enroll in the graduate school in the long semester after finishing the BS degree and should take the remaining graduate courses in the following year(s) to complete the MS degree. If the student does not enroll in the graduate school in the long semester after finishing the BS degree, those graduate course credit hours will not be counted for the MS degree, even if the student comes back for graduate school in the future.

The student will be awarded the BS degree immediately upon successful completion of the requirements for the undergraduate degree.

Program requirements

Students in the grad track option may choose 9 hours from the following graduate level courses to replace electives in the BS degree with approval of the undergraduate coordinator and advisor in the Department of Computer Science and Engineering and the graduate coordinator in the Department of Materials Science and Engineering.

- BMEN 5324 – Applications of Biomedical MEMS
- CSCE 5210 – Fundamentals of Artificial Intelligence
- CSCE 5215 – Machine Learning
- CSCE 5380 – Data Mining
- MEEN 5140 – Advanced Mathematical Methods for Engineers
- MEEN 5300 – Advanced Thermodynamics
- MEEN 5310 – Conduction and Radiation Heat Transfer
- MEEN 5440 – Finite Element Analysis
- MEEN 5520 – Advanced Manufacturing
- MEEN 5610 – Sensors and Actuators
- MTSE 5000 – Thermodynamics of Materials
- MTSE 5010 – Bonding, Structure, and Crystallography
- MTSE 5020 – Mechanical Properties of Materials
- MTSE 5070 – Tribology of Materials
- MTSE 5100 – Fundamental Concepts of Materials Science
- MTSE 5200 – Advanced Concepts of Metallurgical Science
- MTSE 5210 – Corrosion and Oxidation of Materials
- MTSE 5300 – Science and Technology of Modern Ceramics
- MTSE 5400 – Advanced Polymer Physics and Chemistry
- MTSE 5500 – Electronic, Optical, and Magnetic Materials
- MTSE 5520 – Physical and Chemical Based Integrated Circuit Fabrication

- MTSE 5550 – Materials and Mechanics for MEMS Devices
- MTSE 5560 – Compound Semiconductor Materials and Devices
- MTSE 5600 – Materials Characterization
- MTSE 5610 – Fundamentals of Surface Thin Film Analysis
- MTSE 5620 – Scanning Electronic and Ion Microscopy
- MTSE 5710 – Computational Materials Science

If the student wishes to take other graduate courses to satisfy the grad track option requirements, he or she will need to obtain approval from both the undergraduate advisor in Computer Science and Engineering and graduate advisor in Materials Science and Engineering. Students should earn a B or higher in these courses in order to be counted toward the MS degree.

All remaining courses for the Cybersecurity, BS must be completed according to the catalog.

Information Technology, BS with grad track option leading to Artificial Intelligence, MS

Admission requirements and program policies

Admission requirements

Students applying to the grad track option should be majors in the department's Information Technology, BS program. Students are eligible for acceptance at the end of their junior year. Approval will be considered once a student has completed at least 75 credit hours. One benchmark is whether or not the student is ready for CSE Senior Design in the following fall semester. Other requirements include:

- A minimum cumulative GPA of 3.5 or higher is required at the time of application.
- A minimum cumulative GPA of 3.5 for all information technology core courses.
- A statement of purpose.

The students' application will be reviewed by an undergraduate and a graduate coordinator in computer science and engineering. Once approved by the CSE coordinators, the student must apply to the Toulouse Graduate School within the first semester of the senior year.

Program policies

After completing at least 90 credit hours, the student can start taking the accepted graduate courses as technical electives for the BS degree. If the student wants to take other graduate courses for grad track credits, they will need to obtain approvals from both the undergraduate and graduate CSE coordinators. For these graduate courses to be counted for the MS degree, the student must earn a grade of B or higher for each course. Courses cross-listed as graduate/undergraduate must be taken at the graduate level to be counted for graduate credit.

Students admitted to the grad track option will be admitted into the MS program on a conditional basis. Once the student has satisfied all coursework for the BS degree and maintained a 3.0 GPA or higher, they will be fully admitted to the graduate program. Undergraduate students who have been accepted into a grad track program should complete all of the bachelor's degree requirements and graduate within 12 months of the first day of the semester for which they began taking graduate courses, or enrollment in graduate-level coursework will be suspended.

Students must enroll in graduate school in the long semester after finishing the BS degree and should take the remaining graduate courses in the following year(s) to complete the MS degree. If the student does not enroll in graduate school in the long semester after finishing the BS degree, those graduate course credit hours will not be counted for the MS degree, even if the student comes back for graduate school in the future.

Program requirements

The student is required to take three of the courses listed below in the fourth year of their bachelor's degree program.

- CSCE 5200 - Information Retrieval and Web Search
- CSCE 5210 - Fundamentals of Artificial Intelligence
- CSCE 5215 - Machine Learning
- CSCE 5290 - Natural Language Processing
- CSCE 5380 - Data Mining

All remaining courses for Information Technology, BS must be completed.

Information Technology, BS with grad track option leading to Biomedical Engineering, MS

Admission requirements

1. Student should be a major in the UNT Information Technology, BS program.
2. Students can apply for the grad track option his/her junior year (following completion of at least 75 credit hours; a benchmark is if the student is ready for Senior Design in the following fall semester).
3. Minimum of 3.5 or higher cumulative GPA required at the time of application submission, with a minimum GPA of 3.5.
4. The student should provide two recommendation letters from faculty members with their application.
5. Application will be reviewed by both the undergraduate advisor in Computer Science and Engineering and graduate advisor in Biomedical Engineering.
6. Once approved by the respective advisors, the student must apply to the Toulouse Graduate School within the first semester of the senior year.

Program policies

1. After being admitted to the grad track program and completion of at least 90 credit hours, the student can start taking the graduate courses as technical electives for the BS degree requirement. For the graduate courses to be counted for the MS degree, the student should get a B or above for the courses.
2. The student in the grad track program will be advised and monitored by both the undergraduate coordinator (prior to completion of the BS) and the graduate advisor (after completion of the BS).
3. The student should choose a major research advisor in the semester that the student begins taking graduate courses.
4. There will be an annual review of each student's academic progress in meeting both bachelor's and master's degree requirements. If the student fails to meet degree requirements, the student will be placed in a probationary period for one semester. If the student continues to not meet the degree requirements in the probationary period, the student will be expelled from the grad track program (they will still be in the general biomedical engineering BS program if all general biomedical engineering BS degree requirements are met).
5. Undergraduate students who have been accepted to a grad track option should complete all of their bachelor's degree requirements and graduate within 12 months of the first day of the semester in which they begin taking graduate courses or enrollment in graduate level course work will be suspended.
6. The students admitted to the grad track option will be admitted into the MS program on a conditional basis. Once the student has satisfied all course work for the BS degree and maintained a 3.0 or higher GPA, they will be fully admitted to the MS program.

7. The student must enroll in graduate school in the long semester after finishing their BS degree and should take the remaining graduate courses in the following years to complete his/her biomedical engineering master's degree. If the student did not enroll in graduate school in the long semester after finishing his/her BS degree those graduate course credit hours will not be counted toward the MS degree, even if the student comes back for graduate school in the future.

Program requirements

The student is required to take three of the courses listed below in the fourth year of their bachelor's degree program. BMEN courses that apply to the grad track, with corresponding undergraduate courses in parenthesis:

- BMEN 5007 - Research Methods in Biomedical Engineering (BMEN 4007 - Biomedical Experimental Design and Data Analysis)
- BMEN 5310 - Clinical Instrumentation (BMEN 4311 - Biomedical Instrumentation II)
- BMEN 5313 - Bioengineering of Cellular Systems (BMEN 4313 - Cellular Engineering)
- BMEN 5314 - Advanced Tissue Engineering and Regenerative Medicine (BMEN 4314 - Tissue Engineering)
- BMEN 5315 - Computational Methods in Biomedical Engineering (BMEN 4310 - Biomedical Modeling)
- BMEN 5319 - Cardiovascular Fluid Dynamics (BMEN 4319 - Cardiovascular Flows)
- BMEN 5323 - Advanced Biomedical Optics (BMEN 4321 - Biophotonics)
- BMEN 5325 - Biomedical Nanotechnology Compatibility (BMEN 4325 - Biomedical Nanotechnology)
- BMEN 5326 - Biomolecular Engineering (BMEN 4326 - Principles of Biomolecular Engineering)
- CSCE 5050 – Applications of Cryptography
- CSCE 5200 – Information Retrieval and Web Search
- CSCE 5210 – Fundamentals of Artificial Intelligence
- CSCE 5215 – Machine Learning
- CSCE 5220 – Computer Graphics
- CSCE 5225 – Digital Image Processing
- CSCE 5290 – Natural Language Processing
- CSCE 5350 – Fundamentals of Database Systems
- CSCE 5380 – Data Mining
- CSCE 5400 – Formal Languages, Automata, and Computability
- CSCE 5430 – Software Engineering
- CSCE 5450 – Programming Languages
- CSCE 5460 – Software Testing and Empirical Methodologies
- CSCE 5510 – Wireless Communications
- CSCE 5520 – Wireless Networks and Protocols
- CSCE 5550 – Introduction to Computer Security
- CSCE 5555 – Computer Forensics
- CSCE 5560 – Secure Electronic Commerce
- CSCE 5585 – Network Security
- CSCE 5610 – Computer System Architecture
- CSCE 5620 – Real-Time Operating Systems
- CSCE 5650 – Compiler Design
- CSCE 5655 – Principles of Compiler Optimization
- CSCE 5730 – Digital CMOS VLSI Design
- CSCE 5810 – Bioinformatics Algorithms
- CSCE 5820 – Advances in Bioinformatics
- EENG 5310 – Control Systems Design
- EENG 5320 – Systems Modeling and Simulation

- EENG 5520 – Design and Testing of Digital Systems
- EENG 5530 – Analog Integrated Circuit Design
- EENG 5610 – Digital Signal Processing
- EENG 5810 – Digital Communications
- MEEN 5000 – Energy: The Fundamentals
- MEEN 5110 – Renewable Energy
- MEEN 5112 – Nuclear Energy
- MEEN 5140 – Advanced Mathematical Methods for Engineers
- MEEN 5150 – Thermal Energy Storage System and Applications
- MEEN 5152 – Mechanics of Composites and Foams for Lightweight Energy Efficient Structures
- MEEN 5220 – Computational Fluid Dynamics and Heat Transfer
- MEEN 5300 – Advanced Thermodynamics
- MEEN 5310 – Conduction and Radiation Heat Transfer
- MEEN 5311 – Convection of Heat Transfer II
- MEEN 5315 – Nanoscale Energy Transport
- MEN 5330 – Combustion Science and Engineering
- MEEN 5332 – Air Pollution Control Engineering
- MEEN 5340 – Advanced Fluid Mechanics
- MEEN 5410 – Advanced Solid Mechanics
- MEEN 5440 – Finite Element Analysis
- MEEN 5510 – Manufacturing Process for Biocomposites
- MEEN 5520 – Manufacturing Concepts for Mechanical Engineering
- MEEN 5600 – Feedback Control of Dynamical Systems
- MEEN 5610 – Sensors and Actuators
- MEEN 5640 – Applied Engineering Vibrations
- MEEN 5800 – Topics in Mechanical and Energy Engineering
- MSET 5020 – Design of Experiments
- MSET 5030 – Product Design and Development
- MSET 5040 – Analytical Methods in Engineering Technology
- MSET 5120 – Computer-Integrated Manufacturing
- MSET 5150 – Applications of Electron Microscopy and Failure Analysis
- MSET 5160 – Creep and Fatigue in Engineering Design and Systems Performance
- MSET 5200 – Advanced Construction Scheduling
- MSET 5220 – Building Information Modeling
- MSET 5230 – Risk Management in Construction
- MSET 5800 – Studies in Engineering Technology
- MTSE 5000 – Thermodynamics of Materials
- MTSE 5010 – Bonding, Structure, and Crystallography
- MTSE 5020 – Mechanical Properties of Materials
- MTSE 5070 – Tribology of Materials
- MTSE 5100 – Fundamental Concepts of Materials Science
- MTSE 5200 – Advanced Concepts of Metallurgical Science
- MTSE 5210 – Corrosion and Oxidation of Materials
- MTSE 5300 – Science and Technology of Modern Ceramics
- MTSE 5400 – Advanced Polymer, Physics, and Chemistry
- MTSE 5500 – Electronic, Optical, and Magnetic Materials
- MTSE 5520 – Physical and Chemical Based Integrated Circuit Fabrication

- MTSE 5550 – Materials and Mechanics for MEMS Devices
- MTSE 5560 – Compound Semiconductor Materials and Devices
- MTSE 5600 – Materials Characterization
- MTSE 5610 – Fundamentals of Surface Thin Film Analysis
- MTSE 5620 – Scanning Electron and Ion Microscopy
- MTSE 5710 – Computational Materials Science

All remaining courses required for the Information Technology, BS must also be completed. Other graduate courses may be applied to the Information Technology, BS and Biomedical Engineering, MS with consent of the departments.

Information Technology, BS with grad track option leading to Computer Engineering, MS

Admission requirements

Students applying to the grad track option should be majors in the department's Information Technology, BS. Students are eligible for acceptance at the end of their junior year. Approval will be considered once a student has completed at least 75 credit hours. One benchmark is whether or not the student is ready for CSE Senior Design in the following fall semester. Other requirements include:

- A minimum cumulative GPA of 3.5 or higher is required at the time of application.
- A minimum cumulative GPA of 3.5 for all computer science core courses.
- A statement of purpose.

The students' application will be reviewed by an undergraduate and a graduate coordinator in computer science and engineering. Once approved by the CSE coordinators, the student must apply to the Toulouse Graduate School within the first semester of the senior year.

Program policies

After completing at least 90 credit hours, the student can start taking the accepted graduate courses as technical electives for the BS degree. If the student wants to take other graduate courses for grad track credits, they will need to obtain approvals from both the undergraduate and graduate CSE coordinators. For these graduate courses to be counted for the MS degree, the student must earn a grade of B or higher for each course. Courses cross-listed as graduate/undergraduate must be taken at the graduate level to be counted for graduate credit.

Students admitted to the grad track option will be admitted into the MS program on a conditional basis. Once the student has satisfied all coursework for the BS degree and maintained a 3.0 GPA or higher, they will be fully admitted to the graduate program. Undergraduate students who have been accepted into a grad track program should complete all of the bachelor's degree requirements and graduate within 12 months of the first day of the semester for which they began taking graduate courses, or enrollment in graduate-level coursework will be suspended.

Students must enroll in graduate school in the long semester after finishing the BS degree and should take the remaining graduate courses in the following year(s) to complete the MS degree. If the student does not enroll in graduate school in the long semester after finishing the BS degree, those graduate course credit hours will not be counted for the MS degree, even if the student comes back for graduate school in the future.

Program requirements

The student is required to take three of the courses listed below in the fourth year of their bachelor's degree program:

- CSCE 5050 - Applications of Cryptography (CSCE 4050)
- CSCE 5200 - Information Retrieval and Web Search (CSCE 4200)
- CSCE 5200 - Information Retrieval and Web Search (CSCE 4930)
- CSCE 5210 - Fundamentals of Artificial Intelligence (CSCE 4201)
- CSCE 5215 - Machine Learning (CSCE 4930)
- CSCE 5220 - Computer Graphics (CSCE 4230)
- CSCE 5225 - Digital Image Processing (CSCE 4240)
- CSCE 5250 - Introduction to Game Programming (CSCE 4210)
- CSCE 5255 - Programming Math and Physics for Games (CSCE 4255)
- CSCE 5260 - 3D Game Programming (CSCE 4220)
- CSCE 5265 - Advanced Topics in Game Development (CSCE 4250)
- CSCE 5290 - Natural Language Processing (CSCE 4290)
- CSCE 5350 - Fundamentals of Database Systems (CSCE 4350)
- CSCE 5380 - Data Mining
- CSCE 5400 - Formal Languages, Automata and Computability (CSCE 4115)
- CSCE 5430 - Software Engineering (CSCE 3444)
- CSCE 5450 - Programming Languages (CSCE 4430)
- CSCE 5460 - Software Testing and Empirical Methodologies (CSCE 4460)
- CSCE 5510 - Wireless Communications (CSCE 4510)
- CSCE 5520 - Wireless Networks and Protocols (CSCE 4520)
- CSCE 5550 - Introduction to Computer Security
- CSCE 5555 - Computer Forensics
- CSCE 5560 - Secure Electronic Commerce (CSCE 4560)
- CSCE 5585 - Network Security (CSCE 4930)
- CSCE 5610 - Computer System Architecture (CSCE 4610)
- CSCE 5620 - Real-Time Operating Systems (CSCE 4620)
- CSCE 5640 - Operating Systems Design (CSCE 4600)
- CSCE 5650 - Compiler Design (CSCE 4650)
- CSCE 5655 - Principles of Compiler Optimization (CSCE 4655)
- CSCE 5730 - Digital CMOS VLSI Design (CSCE 4730)
- CSCE 5810 - Bioinformatics Algorithms (CSCE 4810)
- CSCE 5820 - Advances in Bioinformatics (CSCE 4820)

All remaining courses for Information Technology, BS must be completed.

Information Technology, BS with grad track option leading to Computer Science and Engineering, PhD

Admission requirements and program policies

This grad track option is a BS to PhD accelerated program for computer science and computer engineering undergraduate students. The student can take a maximum of 12 credit hours of graduate courses while completing the BS degree. These credits will be counted first toward the BS degree and then, upon graduation, be transferred to the PhD degree.

The following is the step-by-step process:

1. A student applies for the grad track option in the junior year (having completed at least 75 credit hours with a GPA of 3.5 or higher).
2. After the application is approved and the student has completed at least 90 credit hours, the student can start taking graduate courses that are approved for the grad track option as CSE electives for the BS degree requirements. For the graduate courses to be counted toward the PhD degree later, the student should earn a grade of B or higher for the courses.
3. The student applies to the Toulouse Graduate School within the first semester of the senior year. Once the student satisfies all course work for the BS degree and having maintained a 3.5 or higher GPA, the student will submit three recommendation letters from faculty members and a statement of purpose to be considered for entry into the PhD program.
4. The student must enroll in graduate school in the long semester after finishing his/her BS degree and should take the remaining graduate courses in the following year(s) to complete his/her PhD degree. If the student does not enroll in graduate school in the long semester after finishing his/her BS degree, those graduate course credit hours will no longer be counted for the PhD degree, even if the student comes back for graduate school in the future.
5. Once admitted to the PhD program, the students will have higher priority for funding (research and teaching assistantship) to support PhD study.
6. TGS will be consulted for cases when students enrolled in the BS program with the BS-to-MS grad track option are transferred to the program with the BS-to-PhD grad track option.

Program requirements

The student is required to take three of the courses listed below in the fourth year of their bachelor's degree program:

- CSCE 5050 - Applications of Cryptography (CSCE 4050)
- CSCE 5200 - Information Retrieval and Web Search (CSCE 4200)
- CSCE 5200 - Information Retrieval and Web Search (CSCE 4930)
- CSCE 5210 - Fundamentals of Artificial Intelligence (CSCE 4201)
- CSCE 5215 - Machine Learning (CSCE 4930)
- CSCE 5220 - Computer Graphics (CSCE 4230)
- CSCE 5225 - Digital Image Processing (CSCE 4240)
- CSCE 5250 - Introduction to Game Programming (CSCE 4210)
- CSCE 5255 - Programming Math and Physics for Games (CSCE 4255)
- CSCE 5260 - 3D Game Programming (CSCE 4220)
- CSCE 5265 - Advanced Topics in Game Development (CSCE 4250)
- CSCE 5290 - Natural Language Processing (CSCE 4290)
- CSCE 5350 - Fundamentals of Database Systems (CSCE 4350)
- CSCE 5380 - Data Mining
- CSCE 5400 - Formal Languages, Automata and Computability (CSCE 4115)
- CSCE 5430 - Software Engineering (CSCE 3444)
- CSCE 5450 - Programming Languages (CSCE 4430)
- CSCE 5460 - Software Testing and Empirical Methodologies (CSCE 4460)
- CSCE 5510 - Wireless Communications (CSCE 4510)
- CSCE 5520 - Wireless Networks and Protocols (CSCE 4520)
- CSCE 5550 - Introduction to Computer Security
- CSCE 5555 - Computer Forensics
- CSCE 5560 - Secure Electronic Commerce (CSCE 4560)
- CSCE 5585 - Network Security (CSCE 4930)
- CSCE 5610 - Computer System Architecture (CSCE 4610)
- CSCE 5620 - Real-Time Operating Systems (CSCE 4620)
- CSCE 5640 - Operating System Design (CSCE 4600)

- CSCE 5650 - Compiler Design (CSCE 4650)
- CSCE 5655 - Principles of Compiler Optimization (CSCE 4655)
- CSCE 5730 - Digital CMOS VLSI Design (CSCE 4730)
- CSCE 5810 - Bioinformatics Algorithms (CSCE 4810)
- CSCE 5820 - Advances in Bioinformatics (CSCE 4820)

All remaining courses for Information Technology, BS must be completed.

Information Technology, BS with grad track option leading to Computer Science, MS

Admission requirements

Students applying to the grad track option should be majors in the department's Information Technology, BS. Students are eligible for acceptance at the end of their junior year. Approval will be considered once a student has completed at least 75 credit hours. One benchmark is whether or not the student is ready for CSE Senior Design in the following fall semester. Other requirements include:

- A minimum cumulative GPA of 3.5 or higher is required at the time of application.
- A minimum cumulative GPA of 3.5 for all computer science core courses.
- A statement of purpose.

The students' application will be reviewed by an undergraduate and a graduate coordinator in computer science and engineering. Once approved by the CSE coordinators, the student must apply to the Toulouse Graduate School within the first semester of the senior year.

Program policies

After completing at least 90 credit hours, the student can start taking the accepted graduate courses as technical electives for the BS degree. If the student wants to take other graduate courses for grad track credits, they will need to obtain approvals from both the undergraduate and graduate CSE coordinators. For these graduate courses to be counted for the MS degree, the student must earn a grade of B or higher for each course. Courses cross-listed as graduate/undergraduate must be taken at the graduate level to be counted for graduate credit.

Students admitted to the grad track option will be admitted into the MS program on a conditional basis. Once the student has satisfied all coursework for the BS degree and maintained a 3.0 GPA or higher, they will be fully admitted to the graduate program. Undergraduate students who have been accepted into a grad track program should complete all of the bachelor's degree requirements and graduate within 12 months of the first day of the semester for which they began taking graduate courses, or enrollment in graduate-level coursework will be suspended.

Students must enroll in graduate school in the long semester after finishing the BS degree and should take the remaining graduate courses in the following year(s) to complete the MS degree. If the student does not enroll in graduate school in the long semester after finishing the BS degree, those graduate course credit hours will not be counted for the MS degree, even if the student comes back for graduate school in the future.

Program requirements

The student is required to take three of the courses listed below in the fourth year of their bachelor's degree program:

- CSCE 5050 - Applications of Cryptography (CSCE 4050)

- CSCE 5200 - Information Retrieval and Web Search (CSCE 4200)
- CSCE 5200 - Information Retrieval and Web Search (CSCE 4930)

- CSCE 5520 - Wireless Networks and Protocols (CSCE 4520)
- CSCE 5550 - Introduction to Computer Security
- CSCE 5555 - Computer Forensics
- CSCE 5560 - Secure Electronic Commerce (CSCE 4560)
- CSCE 5585 - Network Security (CSCE 4930)
- CSCE 5610 - Computer System Architecture (CSCE 4610)
- CSCE 5620 - Real-Time Operating Systems (CSCE 4620)
- CSCE 5640 - Operating System Design (CSCE 4600)
- CSCE 5650 - Compiler Design (CSCE 4650)
- CSCE 5655 - Principles of Compiler Optimization (CSCE 4655)
- CSCE 5730 - Digital CMOS VLSI Design (CSCE 4730)
- CSCE 5810 - Bioinformatics Algorithms (CSCE 4810)
- CSCE 5820 - Advances in Bioinformatics (CSCE 4820)

All remaining courses for Information Technology, BS must be completed.

Information Technology, BS with grad track option leading to Cybersecurity, MS

Admission requirements

Students applying to the grad track option should be majors in the department's Information Technology, BS. Students are eligible for acceptance at the end of their junior year. Approval will be considered once a student has completed at least 75 credit hours. One benchmark is whether or not the student is ready for CSE Senior Design in the following fall semester. Other requirements include:

- A minimum cumulative GPA of 3.5 or higher is required at the time of application.
- A minimum cumulative GPA of 3.5 for all computer science core courses.
- A statement of purpose.

The student's application will be reviewed by an undergraduate and a graduate coordinator in computer science and engineering. Once approved by the CSE coordinators, the student must apply to the Toulouse Graduate School within the first semester of the senior year.

Program Policies

After completing at least 90 credit hours, the student can start taking the accepted graduate courses as technical electives for the BS degree. If the student wants to take other graduate courses for grad track credits, they will need to obtain approvals from both the undergraduate and graduate CSE coordinators. For these graduate courses to be counted for the MS degree, the student must earn a grade of B or higher for each course. Courses cross-listed as graduate/undergraduate must be taken at the graduate level to be counted for graduate credit.

Students admitted to the grad track option will be admitted into the MS program on a conditional basis. Once the student has satisfied all coursework for the BS degree and maintained a 3.0 GPA or higher, they will be fully admitted to the graduate program. Undergraduate students who have been accepted into a grad track program should complete all of the bachelor's degree requirements and graduate within 12 months of the first day of the semester for which they began taking graduate courses, or enrollment in graduate-level coursework will be suspended.

Students must enroll in graduate school in the long semester after finishing the BS degree and should take the remaining graduate courses in the following year(s) to complete the MS degree. If the student does not enroll in graduate school in the long semester after finishing the BS degree, those graduate course credit hours will not be counted for the MS degree, even if the student comes back for graduate school in the future.

Program requirements

The student is required to take three of the courses listed below in the fourth year of their bachelor's degree program:

- CSCE 5050 - Applications of Cryptography (CSCE 4050)
- CSCE 5200 - Information Retrieval and Web Search (CSCE 4200)
- CSCE 5200 - Information Retrieval and Web Search (CSCE 4930)
- CSCE 5210 - Fundamentals of Artificial Intelligence (CSCE 4201)
- CSCE 5215 - Machine Learning (CSCE 4930)
- CSCE 5220 - Computer Graphics (CSCE 4230)
- CSCE 5225 - Digital Image Processing (CSCE 4240)
- CSCE 5250 - Introduction to Game Programming (CSCE 4210)
- CSCE 5255 - Programming Math and Physics for Games (CSCE 4255)
- CSCE 5260 - 3D Game Programming (CSCE 4220)
- CSCE 5265 - Advanced Topics in Game Development (CSCE 4250)
- CSCE 5290 - Natural Language Processing (CSCE 4290)
- CSCE 5350 - Fundamentals of Database Systems (CSCE 4350)
- CSCE 5380 - Data Mining
- CSCE 5400 - Formal Languages, Automata and Computability (CSCE 4115)
- CSCE 5430 - Software Engineering (CSCE 3444)
- CSCE 5450 - Programming Languages (CSCE 4430)
- CSCE 5460 - Software Testing and Empirical Methodologies (CSCE 4460)
- CSCE 5510 - Wireless Communications (CSCE 4510)
- CSCE 5520 - Wireless Networks and Protocols (CSCE 4520)
- CSCE 5550 - Introduction to Computer Security
- CSCE 5555 - Computer Forensics
- CSCE 5560 - Secure Electronic Commerce (CSCE 4560)

- CSCE 5585 - Network Security (CSCE 4930)
- CSCE 5610 - Computer System Architecture (CSCE 4610)
- CSCE 5620 - Real-Time Operating Systems (CSCE 4620)
- CSCE 5640 - Operating Systems Design (CSCE 4600)
- CSCE 5650 - Compiler Design (CSCE 4650)
- CSCE 5655 - Principles of Compiler Optimization (CSCE 4655)
- CSCE 5730 - Digital CMOS VLSI Design (CSCE 4730)
- CSCE 5810 - Bioinformatics Algorithms (CSCE 4810)
- CSCE 5820 - Advances in Bioinformatics (CSCE 4820)

All remaining courses for Information Technology, BS must be completed.

- CSCE 5510 - Wireless Communications (CSCE 4510)
- CSCE 5520 - Wireless Networks and Protocols (CSCE 4520)
- CSCE 5550 - Introduction to Computer Security
- CSCE 5555 - Computer Forensics
- CSCE 5560 - Secure Electronic Commerce (CSCE 4560)
- CSCE 5585 - Network Security (CSCE 4930)
- CSCE 5610 - Computer System Architecture (CSCE 4610)
- CSCE 5620 - Real-Time Operating Systems (CSCE 4620)
- CSCE 5640 - Operating System Design (CSCE 4600)
- CSCE 5650 - Compiler Design (CSCE 4650)
- CSCE 5655 - Principles of Compiler Optimization (CSCE 4655)
- CSCE 5730 - Digital CMOS VLSI Design (CSCE 4730)
- CSCE 5810 - Bioinformatics Algorithms (CSCE 4810)
- CSCE 5820 - Advances in Bioinformatics (CSCE 4820)

All remaining courses for Information Technology, BS must be completed.

Information Technology, BS with grad track option leading to Electrical Engineering, MS

The Department of Electrical Engineering offers a grad track option for existing UNT undergraduate students enrolled in the Information Technology, BS program.

In this grad track option, the student can take a maximum of three (3) credit hours of graduate courses while completing the BS degree. After earning the BS degree, these credit hours can be counted toward the MS degree. Prior to registering for these courses, the student must be admitted to the grad track option and obtain approvals from the undergraduate and graduate coordinators of their respective programs.

Admission requirements

To be eligible to apply for grad track, students must have a cumulative GPA of 3.5 or higher at the time of application

To apply, students should submit the following to the grad track coordinator of the Department of Electrical Engineering, MS before the first semester of their senior year:

- A completed grad track application form, and
- An up-to-date official transcript

The students' application will be reviewed by the undergraduate coordinator in Computer Science and Engineering and the graduate coordinator in Electrical Engineering.

After a student is admitted to the grad track program, the student must apply to the Toulouse Graduate School during their senior year for admission to the Electrical Engineering, MS, which should follow the same application procedure, application deadlines, and admission requirements as the regular graduate applications for admission to the Electrical Engineering, MS.

Program policies

After being accepted into the grad track option, the student then can take graduate courses in their senior year as Information Technology, BS electives to meet the bachelor's degree requirements. In order for courses to be counted toward the MS degree, the student must meet the minimum grade requirements of the courses in the MS program. After being accepted into the grad track option, the student must complete the bachelor's degree within one year of the first graduate level course they take.

Students admitted to the program will be admitted into the MS program on a conditional basis. Once the student has satisfied all requirements for the bachelor's degree and maintained a GPA of 3.0 or higher, they will be fully admitted to the MS program.

The student must enroll in graduate school in the long semester within one year after receiving his or her bachelor's degree and should complete the remaining graduate courses in the following year(s) to receive the MS degree. If the student does not enroll in graduate school in the long semester within one year after finishing the BS degree, those graduate credit hours will not be counted toward the MS degree, even if the student comes back to graduate school in the future.

Program requirements

The student is allowed to take one of the graduate courses listed below in the senior year of the program for a total of 3 hours (may be changed only if approved by both the Computer Science and Engineering undergraduate and Electrical Engineering graduate coordinators):

- BMEN 5324 – Applications of Biomedical MEMS
- CSCE 5215 – Machine Learning
- CSCE 5290 – Natural Language Processing
- CSCE 5430 – Software Engineering
- CSCE 5640 – Operating System Design
- EENG 5310 - Control Systems Design
- EENG 5320 - Systems Modeling and Simulation
- EENG 5520 - Design and Testing of Digital Systems
- EENG 5530 - Analog Integrated Circuit Design
- EENG 5610 - Digital Signal Processing
- EENG 5810 - Digital Communications
- MEEN 5440 – Finite Element Analysis
- MEEN 5610 – Sensors and Actuators
- MTSE 5100 – Fundamental Concepts of Materials Science

- MTSE 5500 – Electronic, Optical, and Magnetic Materials
- MTSE 5550 – Materials and Mechanics for MEMS Devices
- MTSE 5560 – Compound Semiconductor Materials and Devices

In the senior year, in addition to the approved graduate courses, the student is required to take all remaining courses required for the Information Technology, BS.

After receiving his or her bachelor's degree and being enrolled in the graduate program, the student is required to take all remaining courses required for the MS degree with a major in electrical engineering (*see Graduate Catalog*).

Information Technology, BS with grad track option leading to Materials Science and Engineering, MS

Admission requirements

Students applying to the grad track option should be majors in the Information Technology, BS program. Students are eligible to apply to the grad track option during their junior year, after completing at least 75 credit hours. Other requirements include:

- A cumulative GPA of 3.5 or higher is required at the time of application
- A personal statement, curriculum vitae and two letters of recommendation from materials science and engineering faculty members

The student's application will be reviewed by both undergraduate and graduate advisors in the respective BS and MS programs. Once approved, the student must apply to the Toulouse Graduate School within the first semester of their senior year.

Program policies

After completing at least 90 credit hours and after authorization from undergraduate and graduate advisors, the student may begin taking graduate courses as electives for the BS requirements. Students should earn a B or higher in these graduate courses to be counted toward the MS degree.

Students admitted to the grad track option will be admitted to the MS on a conditional basis. Once the student has satisfied all course work for the BS degree and maintained a GPA of 3.0 or higher, they will be fully admitted to the MS program with all the rights and privileges of a graduate student.

The student must enroll in the graduate school in the long semester after finishing the BS degree and should take the remaining graduate courses in the following year(s) to complete the MS degree. If the student does not enroll in the graduate school in the long semester after finishing the BS degree, those graduate course credit hours will not be counted for the MS degree, even if the student comes back for graduate school in the future.

The student will be awarded the BS degree immediately upon successful completion of the requirements for the undergraduate degree.

Program requirements

Students in the grad track option may choose 9 hours from the following graduate-level courses to replace electives in the BS degree with the approval of the undergraduate coordinator and advisor in the Department of Computer Science and Engineering and the graduate coordinator in the Department of Materials Science and Engineering.

- BMEN 5324 – Applications of Biomedical MEMS
- CSCE 5210 – Fundamentals of Artificial Intelligence
- CSCE 5215 – Machine Learning

- CSCE 5380 – Data Mining
- MEEN 5140 – Advanced Mathematical Methods for Engineers
- MEEN 5300 – Advanced Thermodynamics
- MEEN 5310 – Conduction and Radiation Heat Transfer
- MEEN 5440 – Finite Element Analysis
- MEEN 5520 – Advanced Manufacturing
- MEEN 5610 – Sensors and Actuators
- MTSE 5000 – Thermodynamics of Materials
- MTSE 5010 – Bonding, Structure, and Crystallography
- MTSE 5020 – Mechanical Properties of Materials
- MTSE 5070 – Tribology of Materials
- MTSE 5100 – Fundamental Concepts of Materials Science
- MTSE 5200 – Advanced Concepts of Metallurgical Science
- MTSE 5210 – Corrosion and Oxidation of Materials
- MTSE 5300 – Science and Technology of Modern Ceramics
- MTSE 5400 – Advanced Polymer Physics and Chemistry
- MTSE 5500 – Electronic, Optical, and Magnetic Materials
- MTSE 5520 – Physical and Chemical Based Integrated Circuit Fabrication
- MTSE 5550 – Materials and Mechanics for MEMS Devices
- MTSE 5560 – Compound Semiconductor Materials and Devices
- MTSE 5600 – Materials Characterization
- MTSE 5610 – Fundamentals of Surface Thin Film Analysis
- MTSE 5620 – Scanning Electronic and Ion Microscopy
- MTSE 5710 – Computational Materials Science

If the student wishes to take other graduate courses to satisfy the grad track option requirements, he or she will need to obtain approval from both the undergraduate advisor in Computer Science and Engineering and graduate advisor in Materials Science and Engineering. Students should earn a B or higher in these courses in order to be counted toward the MS degree.

All remaining courses for the Information Technology, BS must be completed according to the catalog.

Minors

Computer Science and Engineering minor

A minor in computer science and engineering consists of a minimum of 19 semester hours of computer science and engineering courses, including 6 advanced hours. The student is responsible to maintain a C or better in each required course.

Six hours of advanced courses must be taken at UNT.

Required courses

- CSCE 1030 - Computer Science I and
- CSCE 1040 - Computer Science II
- or
- CSCE 1035 - Computer Programming I and
- CSCE 1045 - Computer Programming II
- CSCE 2100 - Foundations of Computing

- CSCE 2110 - Foundations of Data Structures

Cybersecurity minor

The minor in cybersecurity requires 19 hours of course work.

Required courses, 19 hours

- CSCE 1035 - Computer Programming I
- CSCE 1045 - Computer Programming II
- CSCE 2110 - Foundations of Data Structures
- CSCE 3550 - Foundations of Cybersecurity
- CSCE 3560 - Cloud Security
- CSCE 3600 - Principles of Systems Programming

Secondary Teacher Certification

Computer Science teacher certification

Requirements utilizing the BS with a major in information technology

- CSCE 1010 - Discovering Computer Science
- CSCE 1015 - Computing Tools and Techniques Laboratory
- CSCE 1030 - Computer Science I
- CSCE 1040 - Computer Science II
- CSCE 2100 - Foundations of Computing
- CSCE 2110 - Foundations of Data Structures
- CSCE 3055 - IT Project Management
- CSCE 3220 - Human Computer Interfaces
- CSCE 3420 - Internet Programming
- CSCE 3444 - Software Engineering
- CSCE 3530 - Introduction to Computer Networks
- CSCE 3550 - Foundations of Cybersecurity
- CSCE 3600 - Principles of Systems Programming
- CSCE 4010 - Social Issues in Computing
- CSCE 4350 - Fundamentals of Database Systems
- CSCE 4905 - Information Technology Capstone I
- CSCE 4925 - Information Technology Capstone II

Additional requirements

See Information Technology, BS for additional course work and GPA requirements.

Upon completing the BA with a major in information technology program that includes a supporting area of 22 hours of TNT courses, the student will be eligible to take the state computer science teacher certification exam. Computer science option students can also become eligible for this exam by completing the same CSE courses and completing a Mathematics and Science

Secondary Teaching minor and meeting all GPA requirements to apply for state certification. Students should contact the Teach North Texas program office for more information on enrolling in the certification courses.

All state certification requirements and information on required examinations are available on the web site of the State Board for Educator Certification (SBEC), www.tea.state.tx.us.

Requirements utilizing the BS with a major in computer science

- CSCE 1010 - Discovering Computer Science
- CSCE 1015 - Computing Tools and Techniques Laboratory
- CSCE 1030 - Computer Science I
- CSCE 1040 - Computer Science II
- CSCE 2100 - Foundations of Computing
- CSCE 2110 - Foundations of Data Structures
- CSCE 2610 - Assembly Language and Computer Organization
- CSCE 3444 - Software Engineering
- CSCE 3550 - Foundations of Cybersecurity
- CSCE 3600 - Principles of Systems Programming
- CSCE 4010 - Social Issues in Computing
- CSCE 4110 - Algorithms

- CSCE 4901 - Software Development Capstone I
- CSCE 4902 - Software Development Capstone II
- Plus 6 hours chosen from CSCE Advanced Elective Courses
OR
- CSCE 4999 - Senior Thesis
Plus 6 hours chosen from CSCE Advanced Elective Courses

CSCE core, 6 hours

- CSCE 3530 - Introduction to Computer Networks
- CSCE 4115 - Formal Languages, Automata and Computability
- CSCE 4430 - Programming Languages
- CSCE 4600 - Introduction to Operating Systems
- CSCE 4650 - Introduction to Compilation Techniques

CSCE breadth courses, 6 hours

- CSCE 4201 - Introduction to Artificial Intelligence
- CSCE 4210 - Game Programming I
- CSCE 4230 - Introduction to Computer Graphics
- CSCE 4240 - Introduction to Digital Image Processing
- CSCE 4290 - Introduction to Natural Language Processing
- CSCE 4350 - Fundamentals of Database Systems
- CSCE 4460 - Software Testing and Empirical Methodologies

Additional Requirements

See Computer Science, BS for additional course work and GPA requirements.

Students must also complete the required 22 hours for the Mathematics and Science Secondary Teaching minor and meet all GPA requirements to apply for state certification. Students should contact the Teach North Texas program office for more information on enrolling in the certification courses.

All state certification requirements and information on required examinations is available on the web site of the State Board for Educator Certification (SBEC), www.tea.state.tx.us.

Undergraduate Academic Certificates

Artificial Intelligence certificate

A 12-hour professional certificate in artificial intelligence.

Required courses

- CSCE 3201 - Applied Artificial Intelligence
- CSCE 3214 - Software Development for Artificial Intelligence

Choose two courses from the following:

- CSCE 4205 - Introduction to Machine Learning
- CSCE 4290 - Introduction to Natural Language Processing
- CSCE 4300 - Intro to Big Data and Data Science
- CSCE 4890 - Directed Study

Game Programming certificate

The certificate in game programming is designed to prepare undergraduate students to launch careers as programmers in the video game industry.

Required courses, 12 hours

- CSCE 4210 - Game Programming I
- CSCE 4220 - Game Programming II
- CSCE 4250 - Topics in Game Development
- CSCE 4255 - Programming Math and Physics for Games

Security certificate

This academic certificate is offered by the Department of Computer Science and Engineering the University of North Texas. It provides students with skills needed to work in the area of cyber security.

Undergraduate students can request this certificate to be added to their degree plan by an academic advisor. This certificate will appear on the student's transcript upon graduation. This certificate is open to all majors in accordance with UNT catalog requirements.

NOTE: Additional prerequisite courses may be required.

Courses, 18 hours

Students must obtain a grade of C or better.

- CSCE 2610 - Assembly Language and Computer Organization
- CSCE 3530 - Introduction to Computer Networks
- CSCE 3550 - Foundations of Cybersecurity
- CSCE 4350 - Fundamentals of Database Systems
- CSCE 4560 - Secure Electronic Commerce
- CSCE 4600 - Introduction to Operating Systems

Shengli Fu, Chair

Faculty

The Department of Electrical Engineering at the University of North Texas provides an innovative program in electrical engineering, combining cognitive skills, industry-university joint projects and business skills with courses that form the foundation of the electrical engineering discipline. Combining theory and practice, the curriculum is designed to serve the citizens and industries in Texas, particularly the North Texas region, and the nation.

The department is housed in a facility designed to promote intellectual and scholarly endeavors of faculty and students. The department currently offers a Bachelor of Science degree, a Master of Science degree and a Doctor of Philosophy degree, each with a major in electrical engineering. In conjunction with Texas Woman's University, the department offers a dual Bachelor of Science degree with majors in electrical engineering and mathematics. It also offers an undergraduate minor in electrical engineering. Research interests of the faculty include digital signal processing; image processing; pattern recognition; wireless sensor networks; systems and control; analog, RF and mixed signal design; VLSI design; wireless communication.

The department received support from the National Science Foundation to offer an "Innovative Design- and Project-Oriented Electrical Engineering Program" under the Department-Level Reform initiative.

The electrical engineering program is accredited by the Engineering Accreditation Commission of ABET (415 North Charles Street, Baltimore, MD 21201; 410-347-7700).

Mission

The Department of Electrical Engineering constantly strives to further the mission of the University of North Texas. The program educational objectives of the Bachelor of Science with a major in electrical engineering program (BSEE program) have been developed to accomplish the university mission.

Program Educational Objectives

1. Our graduates will be productive and valuable professionals in electrical engineering and related fields.
2. Our graduates will engage in life-long learning demonstrated by advanced education/degrees, professional development activities, and/or other career-enhancing activities.
3. Our graduates will be successful in taking leadership roles at various levels in their professional careers in academia or industry.

Our innovative bachelor's program is designed to satisfy the ABET criteria for accreditation of engineering programs.

Student outcomes

Upon completion of the Bachelor of Science with a major in electrical engineering program, students will be able to achieve the following outcomes:

1. identify, formulate, and solve complex engineering problems by applying principles of engineering, science and mathematics;
2. apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors;
3. communicate effectively with a range of audiences;
4. recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts;
5. function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives;
6. develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions; and
7. acquire and apply new knowledge as needed, using appropriate learning strategies.

The BSEE program curriculum is designed to ensure that each undergraduate course achieves one or more of the above outcomes, and the curriculum, as a whole, achieves all student outcomes. Additionally, the undergraduate curriculum aims to enrich our students' educational experience at UNT.

Research and scholarship

In order to accomplish the objectives in pursuing excellence in scholarly and applied research, the faculty of the department is committed to:

- establishing high standards for research and scholarship,
- fostering excellence and diversity in research,
- creating an inspiring academic environment for the students through integration of research and education, and
- serving the society and the profession through technological advances in basic and applied research.

Majors

Electrical Engineering, BS

The Bachelor of Science with a major in electrical engineering program provides an innovative and project-oriented curriculum that incorporates the best practices of a real-world engineering education from areas including electronics,

control systems, communication systems, computer systems, very large-scale integration design, electromagnetics and signal processing.

The Bachelor of Science degree with a major in electrical engineering is an innovative undergraduate program designed to combine the best practices in electrical engineering education. This design- and project-oriented program integrates concepts, analysis, design and development of state-of-the-art electrical and electronic systems. Through course work, students have "learning-to-learn" experiences and work on hands-on design projects every semester. This active learning experience emphasizes knowledge and skills so that students can solve real-world electrical engineering problems. The one-year sequence of business and marketing courses encourages students to develop a global markets outlook.

The courses in the program are designed to cover both the breadth and depth of electrical engineering. The breadth of the curriculum is provided through course work in circuits, signals and systems, logic design, electromagnetics, electronics, communications, and analog and digital design projects. The depth of the curriculum is provided through courses in electronics, computer organization, computer networks, VLSI design and advanced elective courses. Project courses in digital signal processing and communication system design provide additional depth. The design projects are integrated into the course work so that students can learn to solve practical engineering problems in a creative and relevant setting. In addition, project courses ensure that students have an opportunity to solve multidisciplinary engineering problems by working in teams and to develop effective oral and written communication skills.

The program also puts a strong emphasis on studies in art, business, management, humanities, physics and chemistry, social sciences, professionalism and engineering ethics, which fulfill objectives appropriate to the electrical engineering profession.

The Bachelor of Science degree with a major in electrical engineering is accredited by the Engineering Accreditation Commission (EAC) of ABET (www.abet.org), (415 North Charles Street, Baltimore, MD 21201; 410-347-7700).

Degree requirements

Hours required and general/college requirements

A minimum of 128 semester hours, of which 42 must be advanced courses, and fulfillment of degree requirements for the Bachelor of Science degree as specified in the General University Requirements and the University Core Curriculum in the Academic policies section of this catalog and in the College of Engineering section of this catalog.

Major requirements

A minimum of 39 semester hours of coursework, including:

- EENG 2610 - Circuit Analysis
- EENG 2620 - Signals and Systems
- EENG 2710 - Digital Logic Design
- EENG 3410 - Engineering Electromagnetics
- EENG 3510 - Electronics I (Devices and Materials)
- EENG 3520 - Electronics II
- EENG 3710 - Computer Organization
- EENG 3810 - Communications Systems

Five EENG 4000-level electives chosen from:

- EENG 4010 - Topics in Electrical Engineering
- EENG 4210 - Machine Learning

- EENG 4310 - Control Systems Design
- EENG 4320 - Systems Modeling and Simulation
- EENG 4330 - Environmental Systems
- EENG 4340 - Environmental Monitoring
- EENG 4350 - Renewable Electrical Power Systems
- EENG 4410 - Microwave Engineering
- EENG 4450 - Micro-Electro-Mechanical-Systems (MEMS)
- EENG 4510 - Digital Communications
- EENG 4520 - Image and Video Communications
- EENG 4530 - Analog Integrated Circuit Design
- EENG 4580 - Power Electronics
- EENG 4610 - Digital Signal Processing
- EENG 4710 - VLSI Design
- EENG 4720 - Embedded Controller Organization
- EENG 4740 - Digital Circuit Design Techniques
- EENG 4760 - Reconfigurable Computing
- EENG 4810 - Computer Networks
- EENG 4820 - Wireless Communications
- EENG 4850 - Computer Vision and Image Analysis
- EENG 4900 - Special Problems in Electrical Engineering

Project and Laboratory courses, 27 hours

- EENG 1910 - Introduction to Electrical Engineering
- EENG 2611 - Circuit Analysis Lab
- EENG 2621 - Signals and Systems Lab
- EENG 2711 - Digital Logic Design Lab
- EENG 2905 - Engineering Tools
- EENG 2920 - Analog and Digital Circuit Design Project
- EENG 3411 - Engineering Electromagnetics Lab
- EENG 3511 - Electronics I Lab
- EENG 3811 - Communication Systems Lab
- EENG 3910 - Embedded System Design Project
- EENG 3920 - Modern Communication System Design Project
- EENG 4910 - Senior Design I
- EENG 4990 - Senior Design II

Other required courses

- CHEM 1410 - General Chemistry I for Science Majors and
- CHEM 1430 - Laboratory Sequence for General Chemistry I
or
- CHEM 1415 - General Chemistry for Engineering Majors and
- CHEM 1435 - General Chemistry Laboratory for Engineering Majors
- CSCE 1030 - Computer Science I
and

- CSCE 1015 - Computing Tools and Techniques Laboratory
- MATH 1710 - Calculus I
- MATH 1720 - Calculus II
- MATH 2700 - Linear Algebra and Vector Geometry
- MATH 2730 - Multivariable Calculus
- MATH 3180 - Probability for Engineers
- MATH 3410 - Differential Equations I
- PHYS 1710 - Mechanics and
- PHYS 1730 - Laboratory in Mechanics
- PHYS 2220 - Electricity and Magnetism and
- PHYS 2240 - Laboratory in Electricity and Magnetism
- TECM 2700 - Technical Writing

Minor

Optional.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information, see an academic advisor in the College of Engineering.

Other requirements

Department policies

Policy on Academic Performance, Progression and Dismissal in the College of Engineering

Students in the College of Engineering will conduct themselves in a professional manner in their interaction with their peers, faculty, staff and the community in general. A student may be dismissed from the college for inappropriate conduct (please refer to the Code of Student Conduct).

A minimum grade of C is required in all courses required in a student's major for degree completion. Courses include, but are not limited to, engineering, computing, mathematics, laboratory sciences, supporting area, technical elective, technical option, energy elective and specialization courses.

A student must maintain good academic standing within the university. Please see "Academic status" and "Regulations governing students under academic suspension" in the Academics section of this catalog."

Certificates

Electrical Engineering students MAY choose a specific area to focus on during their undergraduate studies. (12 hours minimum)

COMMUNICATION SYSTEMS

- EENG 3920 - Modern Communication System Design Project (required)

And choose THREE of the following courses:

- EENG 4610 - Digital Signal Processing
- EENG 4510 - Digital Communications
- EENG 4820 - Wireless Communications
- EENG 4520 - Image and Video Communication
- EENG 4810 - Computer Networks
- Other 4000-level EENG courses MAY be approved by the departmental undergraduate faculty advisor

SIGNAL PROCESSING AND CONTROL

- EENG 3910 - DSP System Design Project (required)

And choose THREE of the following:

- EENG 4210 - Machine Learning
- EENG 4310 - Control Systems Design
- EENG 4320 - Systems Modeling and Simulation
- EENG 4610 - Digital Signal Processing
- EENG 4850 EENG 4850 - Computer Vision and Image Analysis
- Other 4000-level EENG courses MAY be approved by the departmental undergraduate faculty advisor

RF AND CIRCUIT DESIGN

- EENG 3520 - Electronics II (required)

And choose THREE of the following:

- EENG 4410 - Microwave Engineering
- EENG 4450 - Micro-electrical-mechanical Systems
- EENG 4530 - Analog Integrated Circuit Design
- EENG 4580 - Power Electronics
- EENG 4710 - VLSI Design
- Other 4000-level EENG courses MAY be approved by the departmental undergraduate faculty advisor

DIGITAL SYSTEMS

- EENG 3910 - DSP System Project (required)

And choose THREE of the following:

- EENG 4710 - VLSI Design
- EENG 4720 - Embedded Controller Organization
- EENG 4740 - Digital Circuit Design Techniques
- EENG 4760 - Reconfigurable Computing
- Other 4000-level EENG courses MAY be approved by the departmental undergraduate faculty advisor

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

Year 1

Semester 1		Semester 2	
CSCE 1015 - Computing Tools and Techniques Laboratory	1 hour	DSCI 2710 - Data Analysis with Spreadsheets	3 hours
CSCE 1030 - Computer Science I	3 hours	EENG 2711 - Digital Logic Design Lab	1 hour
EENG 1910 - Introduction to Electrical Engineering	3 hours	MATH 1720 - Calculus II	3 hours
MATH 1710 - Calculus I	4 hours	PHYS 1710 - Mechanics	3 hours
Communication Core	3 hours	PHYS 1730 - Laboratory in Mechanics	1 hour
CHEM selection*	4 hours	TECM 2700 - Technical Writing	3 hours
		Language, Philosophy and Culture core	3 hours
Total	18 hours	Total	17 hours

Year 2

Semester 1		Semester 2	
EENG 2610 - Circuit Analysis	3 hours	EENG 2620 - Signals and Systems	3 hours
EENG 2611 - Circuit Analysis Lab	1 hour	EENG 2621 - Signals and Systems Lab	1 hour
MATH 2700 - Linear Algebra and Vector Geometry	3 hours	EENG 2920 - Analog and Digital Circuit Design Project	3 hours
MATH 3410 - Differential Equations I	3 hours	MATH 2730 - Multivariable Calculus	3 hours
PHYS 2220 - Electricity and Magnetism	3 hours	American History core	3 hours
PHYS 2240 - Laboratory in Electricity and Magnetism	1 hour	Political Science core	3 hours
Total	14 hours	Total	16 hours

Year 3

Semester 1		Semester 2	
EENG 3410 - Engineering Electromagnetics	3 hours	EENG 3520 - Electronics II	3 hours
EENG 3411 - Engineering Electromagnetics Lab	1 hour	EENG 3710 - Computer Organization	3 hours
EENG 3510 - Electronics I (Devices and Materials)	3 hours	EENG 3810 - Communications Systems	3 hours
EENG 3511 - Electronics I Lab	1 hour	EENG 3811 - Communication Systems Lab	1 hour
EENG 3910 - Embedded System Design Project	3 hours	EENG 3920 - Modern Communication System Design Project	3 hours
MATH 3180 - Probability for Engineers	3 hours	American History core	3 hours
Creative Arts core	3 hours		
Total	17 hours	Total	16 hours

Year 4

Semester 1		Semester 2	
EENG 4910 - Senior Design I	3 hours	EENG 2905 - Engineering Tools	3 hours
Political Science core	3 hours	EENG 4990 - Senior Design II	3 hours
EENG elective-4000 level	3 hours	Social and Behavioral Sciences core	3 hours
EENG elective-4000 level	3 hours	EENG elective-4000 level	3 hours
EENG elective-4000 level	3 hours	EENG elective-4000 level	3 hours
Total	15 hours	Total	15 hours

Notes

*See "Other required courses" above.

Grad Track Options

Electrical Engineering, BS with grad track option leading to Biomedical Engineering, MS

Admission requirements

1. Student should be a major in the UNT Electrical Engineering, BS program.
2. Students can apply for the grad track option his/her junior year (following completion of at least 75 credit hours; a benchmark is if the student is ready for Senior Design in the following fall semester).
3. Minimum of 3.5 or higher cumulative GPA required at the time of application submission, with a minimum GPA of 3.5.
4. The student should provide two recommendation letters from faculty members with their application.
5. Application will be reviewed by both the undergraduate advisor in Electrical Engineering and graduate advisor in Biomedical Engineering.
6. Once approved by the respective advisors, the student must apply to the Toulouse Graduate School within the first semester of the senior year.

Program policies

1. After being admitted to the grad track program and completion of at least 90 credit hours, the student can start taking the graduate courses as technical electives for the BS degree requirement. For the graduate courses to be counted for the MS degree, the student should get a B or above for the courses.
2. The student in the grad track program will be advised and monitored by both the undergraduate coordinator (prior to completion of the BS) and the graduate advisor (after completion of the BS).
3. The student should choose a major research advisor in the semester that the student begins taking graduate courses.
4. There will be an annual review of each student's academic progress in meeting both bachelor's and master's degree requirements. If the student fails to meet degree requirements, the student will be placed in a probationary period for one semester. If the student continues to not meet the degree requirements in the probationary period, the student will be expelled from the grad track program (they will still be in the general biomedical engineering BS program if all general biomedical engineering BS degree requirements are met).
5. Undergraduate students who have been accepted to a grad track option should complete all of their bachelor's degree requirements and graduate within 12 months of the first day of the semester in which they begin taking graduate courses or enrollment in graduate level course work will be suspended.
6. The students admitted to the grad track option will be admitted into the MS program on a conditional basis. Once the student has satisfied all course work for the BS degree and maintained a 3.0 or higher GPA, they will be fully admitted to the MS program.
7. The student must enroll in graduate school in the long semester after finishing their BS degree and should take the remaining graduate courses in the following years to complete his/her biomedical engineering master's degree. If the student did not enroll in graduate school in the long semester after finishing his/her BS degree those graduate course credit hours will not be counted toward the MS degree, even if the student comes back for graduate school in the future.

Program requirements

The student is required to take three of the courses listed below in the fourth year of their bachelor's degree program. The following courses may apply to the grad track, with approval from the undergraduate and graduate coordinators of the respective programs.

- BMEN 5007 - Research Methods in Biomedical Engineering (BMEN 4007 - Biomedical Experimental Design and Data Analysis)
- BMEN 5310 - Clinical Instrumentation (BMEN 4311 - Biomedical Instrumentation II)
- BMEN 5313 - Bioengineering of Cellular Systems (BMEN 4313 - Cellular Engineering)
- BMEN 5314 - Advanced Tissue Engineering and Regenerative Medicine (BMEN 4314 - Tissue Engineering)
- BMEN 5315 - Computational Methods in Biomedical Engineering (BMEN 4310 - Biomedical Modeling)
- BMEN 5319 - Cardiovascular Fluid Dynamics (BMEN 4319 - Cardiovascular Flows)
- BMEN 5323 - Advanced Biomedical Optics (BMEN 4321 - Biophotonics)
- BMEN 5325 - Biomedical Nanotechnology Compatibility (BMEN 4325 - Biomedical Nanotechnology)
- BMEN 5326 - Biomolecular Engineering (BMEN 4326 - Principles of Biomolecular Engineering)

- CSCE 5050 – Applications of Cryptography
- CSCE 5200 – Information Retrieval and Web Search
- CSCE 5210 – Fundamentals of Artificial Intelligence
- CSCE 5215 – Machine Learning
- CSCE 5220 – Computer Graphics
- CSCE 5225 – Digital Image Processing
- CSCE 5290 – Natural Language Processing
- CSCE 5350 – Fundamentals of Database Systems
- CSCE 5380 – Data Mining
- CSCE 5400 – Formal Languages, Automata, and Computability
- CSCE 5430 – Software Engineering
- CSCE 5450 – Programming Languages
- CSCE 5460 – Software Testing and Empirical Methodologies
- CSCE 5510 – Wireless Communications
- CSCE 5520 – Wireless Networks and Protocols
- CSCE 5550 – Introduction to Computer Security
- CSCE 5555 – Computer Forensics
- CSCE 5560 – Secure Electronic Commerce
- CSCE 5585 – Network Security
- CSCE 5610 – Computer System Architecture
- CSCE 5620 – Real-Time Operating Systems
- CSCE 5650 – Compiler Design
- CSCE 5655 – Principles of Compiler Optimization
- CSCE 5730 – Digital CMOS VLSI Design
- CSCE 5810 – Bioinformatics Algorithms
- CSCE 5820 – Advances in Bioinformatics
- EENG 5310 – Control Systems Design
- EENG 5320 – Systems Modeling and Simulation
- EENG 5520 – Design and Testing of Digital Systems
- EENG 5530 – Analog Integrated Circuit Design
- EENG 5610 – Digital Signal Processing
- EENG 5810 – Digital Communications
- MEEN 5000 – Energy: The Fundamentals
- MEEN 5110 – Renewable Energy
- MEEN 5112 – Nuclear Energy
- MEEN 5140 – Advanced Mathematical Methods for Engineers
- MEEN 5150 – Thermal Energy Storage System and Applications
- MEEN 5152 – Mechanics of Composites and Foams for Lightweight Energy Efficient Structures
- MEEN 5220 – Computational Fluid Dynamics and Heat Transfer
- MEEN 5300 – Advanced Thermodynamics
- MEEN 5310 – Conduction and Radiation Heat Transfer
- MEEN 5311 – Convection of Heat Transfer II
- MEEN 5315 – Nanoscale Energy Transport
- MEEN 5330 – Combustion Science and Engineering
- MEEN 5332 – Air Pollution Control Engineering
- MEEN 5340 – Advanced Fluid Mechanics
- MEEN 5410 – Advanced Solid Mechanics

- MEEN 5440 – Finite Element Analysis
- MEEN 5510 – Manufacturing Process for Biocomposites
- MEEN 5520 – Manufacturing Concepts for Mechanical Engineering
- MEEN 5600 – Feedback Control of Dynamical Systems
- MEEN 5610 – Sensors and Actuators
- MEEN 5640 – Applied Engineering Vibrations
- MEEN 5800 – Topics in Mechanical and Energy Engineering
- MSET 5020 – Design of Experiments
- MSET 5030 – Product Design and Development
- MSET 5040 – Analytical Methods in Engineering Technology
- MSET 5120 – Computer-Integrated Manufacturing
- MSET 5150 – Applications of Electron Microscopy and Failure Analysis
- MSET 5160 – Creep and Fatigue in Engineering Design and Systems Performance
- MSET 5200 – Advanced Construction Scheduling
- MSET 5220 – Building Information Modeling
- MSET 5230 – Risk Management in Construction
- MSET 5800 – Studies in Engineering Technology
- MTSE 5000 – Thermodynamics of Materials
- MTSE 5010 – Bonding, Structure, and Crystallography
- MTSE 5020 – Mechanical Properties of Materials
- MTSE 5070 – Tribology of Materials
- MTSE 5100 – Advanced Manufacturing Processes and Technologies
- MTSE 5200 – Advanced Concepts of Metallurgical Science
- MTSE 5210 – Corrosion and Oxidation of Materials
- MTSE 5300 – Science and Technology of Modern Ceramics
- MTSE 5400 – Advanced Polymer, Physics, and Chemistry
- MTSE 5500 – Electronic, Optical, and Magnetic Materials
- MTSE 5520 – Physical and Chemical Based Integrated Circuit Fabrication
- MTSE 5550 – Materials and Mechanics for MEMS Devices
- MTSE 5560 – Compound Semiconductor Materials and Devices
- MTSE 5600 – Materials Characterization
- MTSE 5610 – Fundamentals of Surface Thin Film Analysis
- MTSE 5620 – Scanning Electron and Ion Microscopy
- MTSE 5710 – Computational Materials Science

All remaining courses required for the Electrical Engineering, BS must also be completed. Other graduate courses may be applied to the Electrical Engineering, BS and Biomedical Engineering, MS with consent of the departments.

Electrical Engineering, BS with grad track option leading to Electrical Engineering, MS

The Department of Electrical Engineering offers a grad track option for existing UNT undergraduate students majoring in electrical engineering.

In this grad track option, the student can take a maximum of nine (9) credit hours of graduate courses while completing the BS degree. After earning the BS degree, these credit hours can be counted toward the MS degree. Prior to registering for these courses, the student must be admitted to the grad track option and obtain approvals from the undergraduate and graduate coordinators.

Admission requirements and program policies

Admission requirements

- A cumulative GPA of 3.5 or higher is required at the time of application

To apply, students should submit the following to the grad track coordinator of the department before the first semester of their senior year:

- A completed grad track application form, and
- An up-to-date official transcript

The students' application will be reviewed by the undergraduate and graduate coordinators.

After a student is admitted to the grad track program, the student must apply to the Toulouse Graduate School during their senior year for admission to the MS program in electrical engineering, which should follow the same application procedure, application deadlines, and admission requirements as the regular graduate applications for admission to the MS program in electrical engineering.

Program policies

After being accepted into the grad track option, the student then can take graduate courses in their senior year as EE electives to meet the BS degree requirements. In order for courses to be counted toward the MS degree, the student must meet the minimum grade requirements of the courses in the MS program. After being accepted into the grad track option, the student must complete the BS within one year of the first graduate level course he or she takes.

Students admitted to the program will be admitted into the MS program on a conditional basis. Once the student has satisfied all requirements for the BS degree and maintained a GPA of 3.0 or higher, he or she will be fully admitted to the MS program.

The student must enroll in graduate school in the long semester within one year after receiving his or her BS degree and should complete the remaining graduate courses in the following year(s) to receive the MS degree. If the student does not enroll in graduate school in the long semester within one year after finishing the BS degree, those graduate credit hours will not be counted anymore for the MS degree even if the student comes back to graduate school in the future.

Program requirements

The student is required to take any three graduate courses from the courses listed below in the senior year of the program (may be changed only if approved by both the EE undergraduate and graduate coordinators):

- EENG 5310 - Control Systems Design
- EENG 5320 - Systems Modeling and Simulation
- EENG 5520 - Design and Testing of Digital Systems
- EENG 5530 - Analog Integrated Circuit Design
- EENG 5610 - Digital Signal Processing
- EENG 5810 - Digital Communications

In the senior year, in addition to the approved graduate courses, the student is required to take all remaining courses required for the Electrical Engineering, BS.

After receiving his or her BS degree and being enrolled in the graduate program, the student is required to take all remaining courses required for the MS degree with a major in electrical engineering (*see Graduate Catalog*).

Electrical Engineering, BS with grad track option leading to Electrical Engineering, PhD

Admission requirements

The following is the step-by-step process:

1. Students should apply for the Super Grad Track option in the junior year (completed at least 75 credit hours with GPA of 3.5 or higher).
2. After the application is approved and have completed at least 90 credit hours, the students can start taking the graduate courses that are approved for Super Grad Track as EE electives for the BS degree requirement. For the graduate courses to be counted for the PhD degree later, the student must meet the minimum grade requirements of the courses in the PhD program.
3. The student should apply to Toulouse Graduate School within the first semester of the senior year. The student needs to submit online application and all required documents for admission in the PhD in EE program.
4. The students must enroll in graduate school in the long semester after finishing his/her BS degree and should take the remaining graduate courses in the following year(s) to complete his/her PhD degree. If the student did not enroll in graduate school in the long semester after finishing his/her BS degree, those graduate course credit hours will not be counted anymore for the PhD degree even if the student comes back for graduate school in the future.
5. Students in Grad Track program can apply to transfer to Super Grad Track program anytime with departmental approval.
6. Once admitted to the PhD program, the students will have higher priority for funding (research and teaching assistantships) to support PhD study.

Minors

Electrical Engineering minor

A minor in electrical engineering requires a total of 18 semester hours of electrical engineering courses, including 6 hours of advanced courses. Six hours of advanced courses must be taken at UNT.

Required courses

- EENG 2610 - Circuit Analysis
- EENG 2611 - Circuit Analysis Lab
- EENG 2620 - Signals and Systems
- EENG 2621 - Signals and Systems Lab
- EENG 2710 - Digital Logic Design
- EENG 2711 - Digital Logic Design Lab
- EENG 3510 - Electronics I (Devices and Materials)
- One EE elective. (EE electives are defined as 4000-level organized EE courses, including EENG 4010 and EENG 4900 but excluding EENG 4910, EENG 4920, EENG 4951 and EENG 4990.)

Undergraduate Academic Certificates

Communication Systems certificate

This certificate provides students with an opportunity to explore areas ranging from computer networks to digital signal processing to digital, wireless, image and video communications. The courses covered under this certificate will help students have a thorough understanding of the overall design and working of communications systems, provide in-depth knowledge of wireless and mobile networks, network layers and protocols, design and analysis of digital communication systems, modern digital signal processing theory and techniques, and video coding, motion estimation, source and channel coding.

Requirements

Communication Systems

- EENG 3920 - Modern Communication System Design Project (required)
And chose THREE of the following courses:
 - EENG 4510 - Digital Communications
 - EENG 4520 - Image and Video Communications
 - EENG 4610 - Digital Signal Processing
 - EENG 4810 - Computer Networks
 - EENG 4820 - Wireless Communications
- Other 4000-level EENG courses MAY be approved by the departmental undergraduate faculty advisor.

Digital Systems certificate

This certificate provides students with an opportunity to explore areas ranging from digital circuit design to embedded systems to VLSI design to reconfigurable computing. The courses covered under this certificate will help students have a thorough understanding of modern digital circuit implementation technologies, embedded systems, memory systems, CMOS design, circuit characterization, fine-grained and coarse-grained reconfigurable architectures.

Requirements

Digital Systems

- EENG 3910 - Embedded System Design Project (required)
And choose THREE of the following:
 - EENG 4710 - VLSI Design
 - EENG 4720 - Embedded Controller Organization
 - EENG 4740 - Digital Circuit Design Techniques
 - EENG 4760 - Reconfigurable Computing
- Other 4000-level EENG courses MAY be approved by the department undergraduate faculty advisor.

RF and Circuit Design certificate

This certificate provides students with an opportunity to explore areas ranging from digital and analog integrated circuit design to microwave engineering to VLSI Design to micro-electro-mechanical systems (MEMS) to power electronics. The courses covered under this certificate will help students have a thorough understanding of design and analysis of digital, analog and mixed-signal integrated circuits, design and fabrication of RF/microwave circuits, MEMS structures and devices and their applications.

Requirements

RF and Circuit Design

- EENG 3520 - Electronics II (required)
And choose THREE of the following:
- EENG 4410 - Microwave Engineering
- EENG 4450 - Micro-Electro-Mechanical-Systems (MEMS)
- EENG 4530 - Analog Integrated Circuit Design
- EENG 4580 - Power Electronics
- EENG 4710 - VLSI Design

Other 4000-level EENG courses MAY be approved by the departmental undergraduate faculty advisor.

Signal Processing and Control certificate

This certificate provides students with an opportunity to explore areas ranging from digital signal processing to control system design to systems modeling to machine learning. The courses covered under this certificate will help students have a thorough understanding of modern digital signal processing theory and techniques, linear and non-linear systems, optimal control, system stability, theory and practice of machine learning, mathematical principles of computer vision and applications.

Required courses

- EENG 3910 - Embedded System Design Project (required)
And choose THREE of the following:
- EENG 4210 - Machine Learning
- EENG 4310 - Control Systems Design
- EENG 4320 - Systems Modeling and Simulation
- EENG 4610 - Digital Signal Processing
- EENG 4850 - Computer Vision and Image Analysis

Other 4000-level EENG courses MAY be approved by the departmental undergraduate faculty advisor.

Vijay Vasudevan, Chair

Faculty

The Department of Materials Science and Engineering addresses the education and technological challenges of creating, applying and characterizing new materials for the 21st century. The Department of Materials Science and Engineering is committed to training students at the undergraduate and graduate levels in all aspects of modern materials including metals, ceramics,

polymers, electronic and optical materials, and materials characterization. Students have opportunities for hands-on instruction and research with modern equipment and facilities. The department has strong collaborative programs with industries in the Dallas–Fort Worth region and with universities both locally and throughout the world.

The department offers bachelor's, master's and doctoral degrees, all with a major in materials science and engineering. Presently, the department has 18 tenured or tenure track faculty who divide their time between teaching and research in the different areas mentioned above. Research support comes from a variety of federal, state and industrial entities. The department has one of the most advanced analytical characterization facilities in the country, and both undergraduate and graduate students receive training on state-of-the-art equipment. Finally, the department has strong connections with industry and national research laboratories for cooperative education experiences and internships so that students can receive practical training in addition to classroom and laboratory instruction.

Students who graduate with a Bachelor of Science with a major in materials science and engineering can expect a very healthy job market and relatively high starting salaries in a variety of industries. In fact, materials science and engineering graduates are heavily sought after by industries of all types, including automotive, chemical, aerospace, microelectronics, magnetic storage, medical, transportation, sports, defense, forensics and manufacturing. A BS with a major in materials science and engineering also prepares students for continuing their education with a master's or a doctoral degree either in materials science and engineering or in a related field.

The materials science and engineering program is accredited by the Engineering Accreditation Commission of ABET (415 North Charles Street, Baltimore, MD 21201; 410-347-7700).

Vision and mission

The vision of the Department of Materials Science and Engineering at the University of North Texas is to have a world-class materials science and engineering research program with local, national and international scientific and technological impact; to provide an outstanding educational experience for a diverse student population; and to provide a collegial environment for students, staff and faculty.

The mission of the Department of Materials Science and Engineering is to provide a high-quality engineering education to our diverse student population by maintaining a balance between the theoretical and applied aspects of materials science and engineering through course work, laboratories and independent research topics. The department provides national and international leadership in research and scholarship, and strives to build mutually beneficial partnerships with both internal and external collaborators, with alumni and with the professional and business communities. The department mission is aligned with the mission of the University of North Texas. Finally, the department facilitates a collegial atmosphere that is conducive to the intellectual and scholarly pursuits of its faculty and students.

Program educational objectives

1. Graduates will have successful careers in materials science and engineering or related disciplines.
2. Graduates will successfully participate in continuing education or education towards advanced degrees.

Student outcomes

Our student outcomes mirror the ABET outcomes:

1. An ability to identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics. (ABET 1)
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors. (ABET 2)
3. An ability to communicate effectively with a range of audiences. (ABET 3)

4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts. (ABET 4)
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives (ABET 5)
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions (ABET 6)
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies. (ABET 7)

Research

The department has an active and robust research portfolio that ranges from fundamental studies to application-oriented development programs. These research activities span economic sectors ranging from aerospace applications to electronic devices to biomaterials, and integrate both computational and experimental approaches. The department strives to create a learning environment, which includes multiple opportunities for research with integration of education and research activities. Students develop and practice teamwork and leadership skills and expand their professional networks for future employment through research and internship programs with industry and national laboratories. In these programs, it is common to find both undergraduate and graduate students engaged together in diverse research teams in laboratories and centers/institutes, including the following.

Laboratories

- The Laboratory of Polymers and Composites
- Laboratory for Moving Mechanical Assemblies
- Laboratory for Laser Materials Synthesis and Fabrication
- Laboratory for Computational Materials Modeling
- Laboratory for Electronic Materials and Devices
- Advanced Metallic Materials and Manufacturing Processes (AM3P) Laboratory
- The Materials Synthesis and Processing Laboratory
- The Optoelectronic and Thin Films Laboratory
- Structural Metallic Materials Laboratory

Centers/Institutes

- Advanced Materials and Manufacturing Processing Institute
- Additive Manufacturing Laboratory
- NSF Center for Friction Stir Welding
- UNT Materials Research Facility
- ARL South Campus Research Center

Majors

Materials Science and Engineering, BS

A Bachelor of Science with a major in materials science and engineering from the University of North Texas will prepare you to enter fast-emerging fields with relatively high starting salaries. Students who earn the degree enjoy being part of a close-knit professional community that bridges disciplines, such as applied physics and chemistry, in order to solve complex engineering problems.

The Bachelor of Science degree with a major in materials science and engineering is designed to provide students with the fundamental principles of how materials are made, how they behave during application, how their structure and properties are measured and quantified, and how to improve the performance of these materials. This information is then used in "materials-specific" courses and hands-on laboratories where students then learn to apply these principles to the different materials classes, namely, metals, ceramics, polymers, electronic materials and biomaterials. Students also learn about nanotechnology and how it is impacting the materials science and engineering discipline. During their last year, students are required to do a senior project with one of the faculty members who specialize in their primary area of interest. Students work either individually or in small groups on projects that provide them with research experiences that help them determine whether they feel better suited to finish their education and go to industry or continue on to graduate school. The course work instills in students ethical and environmental issues and standards expected by industry and society.

The Bachelor of Science degree with a major in materials science and engineering is accredited by the Engineering Accreditation Commission of ABET (www.abet.org), (415 North Charles Street, Baltimore, MD 21201; 410-347-7700).

Degree requirements

Hours required and general/college requirements

A minimum of 120 semester hours, of which 45 must be advanced, and fulfillment of degree requirements for the Bachelor of Science degree as specified in the University Core Curriculum in the Academic policies section of this catalog and the College of Engineering requirements.

Major requirements, 53 hours

- MTSE 1100 - Discover How and Why Materials "Matter"
- MTSE 3010 - Bonding and Structure
- MTSE 3020 - Microstructure and Characterization of Materials
- MTSE 3030 - Thermodynamics and Phase Diagrams
- MTSE 3040 - Transport Phenomena in Materials
- MTSE 3050 - Mechanical Properties of Materials
- MTSE 3060 - Phase Transformations in Materials
- MTSE 3070 - Electrical, Optical and Magnetic Properties of Materials
- MTSE 3080 - Materials Processing
- MTSE 3090 - Materials Science and Engineering Laboratory I
- MTSE 3100 - Materials Science and Engineering Laboratory II
- MTSE 3110 - Materials Aspects of Quantum Mechanics
- MTSE 4010 - Physical Metallurgy Principles
- MTSE 4030 - Ceramic Science and Engineering
- MTSE 4050 - Polymer Science and Engineering
- MTSE 4060 - Materials Selection and Performance
- MTSE 4090 - Senior Design I
- MTSE 4100 - Senior Capstone Project
- MTSE electives chosen from MTSE 4020, MTSE 4040, MTSE 4070 (6 hours)

Other required courses

- CHEM 1410 - General Chemistry I for Science Majors
- CHEM 1420 - General Chemistry II for Science Majors

- CHEM 1430 - Laboratory Sequence for General Chemistry I
- ENGR 2301 - Statics
- MATH 1710 - Calculus I
- MATH 1720 - Calculus II
- MATH 2730 - Multivariable Calculus
- MATH 3410 - Differential Equations I
- MTSE 3000 - Fundamentals of Materials Science and Engineering - I
- MTSE 3001 - Fundamentals of Materials Science and Engineering - II
- PHYS 1710 - Mechanics
- PHYS 1730 - Laboratory in Mechanics
- PHYS 2220 - Electricity and Magnetism
- PHYS 2240 - Laboratory in Electricity and Magnetism
- TECM 2700 - Technical Writing

Minor

Optional.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (45) and/or the minimum total hours required for the degree. For specific information, see an academic advisor in the College of Engineering.

Other requirements

Department policies

Policy on Academic Performance, Progression, and Dismissal in the College of Engineering

Students in the College of Engineering will conduct themselves in a professional manner in their interaction with their peers, faculty, staff and the community in general. A student may be dismissed from the college for inappropriate conduct (please refer to the Code of Student Conduct).

A minimum grade of C is required in all courses required in a student's major for degree completion. Courses include, but are not limited to, engineering, computing, mathematics, laboratory sciences, supporting area, technical elective, technical option, energy elective, and specialization courses.

A minimum grade of C is required in all courses required in a student's major for prerequisite completion. Courses include, but are not limited to, engineering, computing, mathematics, laboratory sciences, supporting area, technical elective, technical option, energy elective, and specialization courses.

A student making grades lower than C two times in the same course in any course required by the major is subject to dismissal from the College of Engineering, pending a review by the Associate Dean for Undergraduate Studies in the College of Engineering.

A student must maintain good academic standing within the university. Please see "Academic status" and "Regulations governing students under academic suspension" in the Academics section of this catalog.

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

Year 1

Semester 1		Semester 2	
CHEM 1410 - General Chemistry I for Science Majors	3 hours	CHEM 1420 - General Chemistry II for Science Majors	3 hours
CHEM 1430 - Laboratory Sequence for General Chemistry I	1 hour	MATH 1720 - Calculus II	3 hours
MATH 1710 - Calculus I	4 hours	PHYS 1710 - Mechanics	3 hours
MTSE 1100 - Discover How and Why Materials "Matter"	3 hours	PHYS 1730 - Laboratory in Mechanics	1 hour
Communication Core	3 hours	TECM 2700 - Technical Writing	3 hours
		Language, Philosophy and Culture core	3 hours
Total	14 hours	Total	16 hours

Year 2

Semester 1		Semester 2	
ENGR 2301 - Statics	3 hours	MATH 3410 - Differential Equations I	3 hours
MATH 2730 - Multivariable Calculus	3 hours	MTSE 3001 - Fundamentals of Materials Science and Engineering - II	3 hours
MTSE 3000 - Fundamentals of Materials Science and Engineering - I	3 hours	MTSE 3110 - Materials Aspects of Quantum Mechanics	3 hours
PHYS 2220 - Electricity and Magnetism	3 hours	American History core	3 hours
PHYS 2240 - Laboratory in Electricity and Magnetism	1 hour	Political Science core	3 hours
Creative Arts core	3 hours		
Total	16 hours	Total	15 hours

Year 3

Semester 1		Semester 2	
MTSE 3010 - Bonding and Structure	3 hours	MTSE 3050 - Mechanical Properties of Materials	3 hours
MTSE 3020 - Microstructure and Characterization of Materials	3 hours	MTSE 3060 - Phase Transformations in Materials	3 hours
MTSE 3030 - Thermodynamics and Phase Diagrams	3 hours	MTSE 3070 - Electrical, Optical and Magnetic Properties of Materials	3 hours
MTSE 3040 - Transport Phenomena in Materials	3 hours	MTSE 3080 - Materials Processing	3 hours
MTSE 3090 - Materials Science and Engineering Laboratory I	1 hour	MTSE 3100 - Materials Science and Engineering Laboratory II	1 hour
American History core	3 hours	Political Science core	3 hours
Total	16 hours	Total	16 hours

Year 4

Semester 1		Semester 2	
MTSE 4010 - Physical Metallurgy Principles	3 hours	MTSE 4050 - Polymer Science and Engineering	3 hours
MTSE 4030 - Ceramic Science and Engineering	3 hours	MTSE 4100 - Senior Capstone Project	3 hours
MTSE 4060 - Materials Selection and Performance	3 hours	MTSE elective	3 hours
MTSE 4090 - Senior Design I	3 hours	MTSE elective	3 hours
Social and Behavioral Sciences core	3 hours		
Total	15 hours	Total	12 hours

Grad Track Options**Materials Science and Engineering, BS with grad track option leading to Biomedical Engineering, MS****Admission requirements**

1. Student should be a major in the UNT Materials Science and Engineering, BS program.

2. Students can apply for the grad track option his/her junior year (following completion of at least 75 credit hours; a benchmark is if the student is ready for Senior Design in the following fall semester).
3. Minimum of 3.5 or higher cumulative GPA required at the time of application submission, with a minimum GPA of 3.5.
4. The student should provide two recommendation letters from faculty members with their application.
5. Application will be reviewed by both the undergraduate advisor in Materials Science and Engineering and graduate advisor in Biomedical Engineering.
6. Once approved by the respective advisors, the student must apply to the Toulouse Graduate School within the first semester of the senior year.

Program policies

1. After being admitted to the grad track program and completion of at least 90 credit hours, the student can start taking the graduate courses as technical electives for the BS degree requirement. For the graduate courses to be counted for the MS degree, the student should get a B or above for the courses.
2. The student in the grad track program will be advised and monitored by both the undergraduate coordinator (prior to completion of the BS) and the graduate advisor (after completion of the BS).
3. The student should choose a major research advisor in the semester that the student begins taking graduate courses.
4. There will be an annual review of each student's academic progress in meeting both bachelor's and master's degree requirements. If the student fails to meet degree requirements, the student will be placed in a probationary period for one semester. If the student continues to not meet the degree requirements in the probationary period, the student will be expelled from the grad track program (they will still be in the general biomedical engineering BS program if all general biomedical engineering BS degree requirements are met).
5. Undergraduate students who have been accepted to a grad track option should complete all of their bachelor's degree requirements and graduate within 12 months of the first day of the semester in which they begin taking graduate courses or enrollment in graduate level course work will be suspended.
6. The students admitted to the grad track option will be admitted into the MS program on a conditional basis. Once the student has satisfied all course work for the BS degree and maintained a 3.0 or higher GPA, they will be fully admitted to the MS program.
7. The student must enroll in graduate school in the long semester after finishing their BS degree and should take the remaining graduate courses in the following years to complete his/her biomedical engineering master's degree. If the student did not enroll in graduate school in the long semester after finishing his/her BS degree those graduate course credit hours will not be counted toward the MS degree, even if the student comes back for graduate school in the future.

Program requirements

The student is required to take three of the courses listed below in the fourth year of their bachelor's degree program. The following courses may apply to the grad track, with approval from the undergraduate and graduate coordinators from the respective programs.

- BMEN 5007 - Research Methods in Biomedical Engineering (BMEN 4007 - Biomedical Experimental Design and Data Analysis)
- BMEN 5310 - Clinical Instrumentation (BMEN 4311 - Biomedical Instrumentation II)
- BMEN 5313 - Bioengineering of Cellular Systems (BMEN 4313 - Cellular Engineering)
- BMEN 5314 - Advanced Tissue Engineering and Regenerative Medicine (BMEN 4314 - Tissue Engineering)
- BMEN 5315 - Computational Methods in Biomedical Engineering (BMEN 4310 - Biomedical Modeling)
- BMEN 5319 - Cardiovascular Fluid Dynamics (BMEN 4319 - Cardiovascular Flows)
- BMEN 5323 - Advanced Biomedical Optics (BMEN 4321 - Biophotonics)
- BMEN 5325 - Biomedical Nanotechnology Compatibility (BMEN 4325 - Biomedical Nanotechnology)
- BMEN 5326 - Biomolecular Engineering (BMEN 4326 - Principles of Biomolecular Engineering)
- CSCE 5050 – Applications of Cryptography

- CSCE 5200 – Information Retrieval and Web Search
- CSCE 5210 – Fundamentals of Artificial Intelligence
- CSCE 5215 – Machine Learning
- CSCE 5220 – Computer Graphics
- CSCE 5225 – Digital Image Processing
- CSCE 5290 – Natural Language Processing
- CSCE 5350 – Fundamentals of Database Systems
- CSCE 5380 – Data Mining
- CSCE 5400 – Formal Languages, Automata, and Computability
- CSCE 5430 – Software Engineering
- CSCE 5450 – Programming Languages
- CSCE 5460 – Software Testing and Empirical Methodologies
- CSCE 5510 – Wireless Communications
- CSCE 5520 – Wireless Networks and Protocols
- CSCE 5550 – Introduction to Computer Security
- CSCE 5555 – Computer Forensics
- CSCE 5560 – Secure Electronic Commerce
- CSCE 5585 – Network Security
- CSCE 5610 – Computer System Architecture
- CSCE 5620 – Real-Time Operating Systems
- CSCE 5650 – Compiler Design
- CSCE 5655 – Principles of Compiler Optimization
- CSCE 5730 – Digital CMOS VLSI Design
- CSCE 5810 – Biocomputing
- CSCE 5820 – Computational Epidemiology
- EENG 5310 – Control Systems Design
- EENG 5320 – Systems Modeling and Simulation
- EENG 5520 – Design and Testing of Digital Systems
- EENG 5530 – Analog Integrated Circuit Design
- EENG 5610 – Digital Signal Processing
- EENG 5810 – Digital Communications
- MEEN 5000 – Energy: The Fundamentals
- MEEN 5110 – Alternative Energy
- MEEN 5112 – Nuclear Energy
- MEEN 5140 – Advanced Mathematical Methods for Engineers
- MEEN 5150 – Thermal Energy Storage System and Applications
- MEEN 5152 – Mechanics of Composites
- MEEN 5220 – Computational Fluid Dynamics and Heat Transfer
- MEEN 5300 – Advanced Thermodynamics
- MEEN 5310 – Conduction and Radiation Heat Transfer
- MEEN 5311 – Convective Heat Transfer II
- MEEN 5315 – Nanoscale Energy Transport
- MEEN 5330 – Combustion Science and Engineering
- MEEN 5332 – Air Pollution Control Engineering
- MEEN 5340 – Advanced Fluid Mechanics
- MEEN 5410 – Solid Mechanics
- MEEN 5440 – Finite Element Analysis

- MEEN 5510 – Manufacturing Process for Biocomposites
- MEEN 5520 – Advanced Manufacturing
- MEEN 5600 – Feedback Control of Dynamical Systems
- MEEN 5610 – Sensors and Actuators
- MEEN 5640 – Applied Engineering Vibrations
- MEEN 5800 – Topics in Mechanical Engineering
- MSET 5020 – Design of Experiments
- MSET 5030 – Product Design and Development
- MSET 5040 – Analytical Methods in Engineering Technology
- MSET 5120 – Computer-Integrated Manufacturing
- MSET 5150 – Applications of Electron Microscopy and Failure Analysis
- MSET 5160 – Creep and Fatigue in Engineering Design and Systems Performance
- MSET 5200 – Advanced Construction Scheduling
- MSET 5220 – Building Information Modeling
- MSET 5230 – Risk Management in Construction
- MSET 5800 – Studies in Engineering Technology
- MTSE 5000 – Thermodynamics of Materials
- MTSE 5010 – Bonding, Structure, and Crystallography
- MTSE 5020 – Mechanical Properties of Materials
- MTSE 5070 – Tribology of Materials
- MTSE 5100 – Fundamental Concepts of Materials Science
- MTSE 5200 – Advanced Concepts of Metallurgical Science
- MTSE 5210 – Corrosion and Oxidation of Materials
- MTSE 5300 – Science and Technology of Modern Ceramics
- MTSE 5400 – Advanced Polymer, Physics, and Chemistry
- MTSE 5500 – Electronic, Optical, and Magnetic Materials
- MTSE 5520 – Physical and Chemical Based Integrated Circuit Fabrication
- MTSE 5550 – Materials and Mechanics for MEMS Devices
- MTSE 5560 – Compound Semiconductor Materials and Devices
- MTSE 5600 – Materials Characterization
- MTSE 5610 – Fundamentals of Surface Thin Film Analysis
- MTSE 5620 – Scanning Electron and Ion Microscopy
- MTSE 5710 – Computational Materials Science

All remaining courses required for the Materials Science and Engineering, BS must also be completed. Other graduate courses may be applied to the Materials Science and Engineering, BS and Biomedical Engineering, MS with consent of the departments.

Materials Science and Engineering, BS with grad track option leading to Electrical Engineering, MS

The Department of Electrical Engineering offers a grad track option for existing UNT undergraduate students enrolled in the Materials Science and Engineering, BS program.

In this grad track option, the student can take a maximum of three (3) credit hours of graduate courses while completing the BS degree. After earning the BS degree, these credit hours can be counted toward the MS degree. Prior to registering for these courses, the student must be admitted to the grad track option and obtain approvals from the undergraduate and graduate coordinators of their respective programs.

Admission requirements

To be eligible to apply for grad track, students must have a cumulative GPA of 3.5 or higher at the time of application

To apply, students should submit the following to the grad track coordinator of the Department of Electrical Engineering, MS before the first semester of their senior year:

- A completed grad track application form, and
- An up-to-date official transcript

The students' application will be reviewed by the undergraduate coordinator in Materials Science and Engineering and the graduate coordinator in Electrical Engineering.

After a student is admitted to the grad track program, the student must apply to the Toulouse Graduate School during their senior year for admission to the Electrical Engineering, MS, which should follow the same application procedure, application deadlines, and admission requirements as the regular graduate applications for admission to the Electrical Engineering, MS.

Program policies

After being accepted into the grad track option, the student then can take graduate courses in their senior year as Materials Science and Engineering, BS electives to meet the bachelor's degree requirements. In order for courses to be counted toward the MS degree, the student must meet the minimum grade requirements of the courses in the MS program. After being accepted into the grad track option, the student must complete the bachelor's degree within one year of the first graduate level course they take.

Students admitted to the program will be admitted into the MS program on a conditional basis. Once the student has satisfied all requirements for the bachelor's degree and maintained a GPA of 3.0 or higher, they will be fully admitted to the MS program.

The student must enroll in graduate school in the long semester within one year after receiving his or her bachelor's degree and should complete the remaining graduate courses in the following year(s) to receive the MS degree. If the student does not enroll in graduate school in the long semester within one year after finishing the BS degree, those graduate credit hours will not be counted toward the MS degree, even if the student comes back to graduate school in the future.

Program requirements

The student is allowed to take one of the graduate courses listed below in the senior year of the program for a total of 3 hours (may be changed only if approved by both the Materials Science and Engineering undergraduate and Electrical Engineering graduate coordinators):

- BMEN 5324 – Applications of Biomedical MEMS
- CSCE 5215 – Machine Learning
- CSCE 5290 – Natural Language Processing
- CSCE 5430 – Software Engineering
- CSCE 5640 – Operating System Design
- EENG 5310 - Control Systems Design
- EENG 5320 - Systems Modeling and Simulation
- EENG 5520 - Design and Testing of Digital Systems
- EENG 5530 - Analog Integrated Circuit Design
- EENG 5610 - Digital Signal Processing
- EENG 5810 - Digital Communications
- MEEN 5440 – Finite Element Analysis
- MEEN 5610 – Sensors and Actuators
- MTSE 5100 – Fundamental Concepts of Materials Science
- MTSE 5500 – Electronic, Optical, and Magnetic Materials
- MTSE 5550 – Materials and Mechanics for MEMS Devices

- MTSE 5560 – Compound Semiconductor Materials and Devices

In the senior year, in addition to the approved graduate courses, the student is required to take all remaining courses required for the Materials Science and Engineering, BS.

After receiving his or her bachelor's degree and being enrolled in the graduate program, the student is required to take all remaining courses required for the MS degree with a major in electrical engineering (*see Graduate Catalog*).

Materials Science and Engineering, BS with grad track option leading to Materials Science and Engineering, MS

The Department of Materials Science and Engineering offers a grad track option for currently enrolled UNT undergraduate students majoring in materials science and engineering.

In this grad track option, the student can take a maximum of nine (9) credit hours of graduate courses while completing the BS degree. After earning the BS degree, these credit hours can be counted toward the MS degree. Prior to registering for these courses, the student must be admitted to the grad track option and obtain approvals from the undergraduate and graduate coordinators.

Admission requirements and program policies

Admission requirements

Students applying to the grad track option should be majors in the materials science and engineering BS program. Students are eligible to apply to the grad track option during their junior year, after completing at least 75 credit hours. Other requirements include:

- A cumulative GPA of 3.3 or higher is required at the time of application
- An average GPA of 3.5 or higher for materials science core courses taken (MTSE 3010, MTSE 3030, MTSE 3050 and MTSE 3070)
- A personal statement, curriculum vitae and two letters of recommendation from materials science and engineering faculty members

The student's application will be reviewed by both undergraduate and graduate advisors. Once approved, the student must apply to the Toulouse Graduate School within the first semester of their senior year.

Program policies

After completing at least 90 credit hours and after authorization from undergraduate and graduate advisors, the student may begin taking graduate courses as electives for the BS requirements. Students should earn a B or higher in these graduate courses to be counted toward the MS degree.

Students admitted to the grad track option will be admitted to the MS on a conditional basis. Once the student has satisfied all course work for the BS degree and maintained a GPA of 3.0 or higher, he or she will be fully admitted to the MS program with all the rights and privileges of a graduate student.

The student must enroll in the graduate school in the long semester after finishing the BS degree and should take the remaining graduate courses in the following year(s) to complete the MS degree. If the student does not enroll in the graduate school in the long semester after finishing the BS degree, those graduate course credit hours will not be counted for the MS degree, even if the student comes back for graduate school in the future.

The student will be awarded the BS degree immediately upon successful completion of the requirements for the undergraduate degree.

Program requirements

Students in the grad track option may choose 9 hours from the following graduate level courses to replace electives in the BS degree:

- MTSE 5070 - Tribology of Materials
- MTSE 5200 - Advanced Concepts of Metallurgical Science
- MTSE 5300 - Science and Technology of Modern Ceramics
- MTSE 5400 - Advanced Polymer Physics and Chemistry
- MTSE 5560 - Compound Semiconductor Materials and Devices
- MTSE 5620 - Scanning Electron and Ion Microscopy
- MTSE 5710 - Computational Materials Science

If the student wishes to take other graduate courses to satisfy the grad track option requirements, he or she will need to obtain approval from both the undergraduate and graduate advisors in materials science and engineering. Students should earn a B or higher in these courses in order to be counted toward the MS degree.

All remaining courses for Materials Science and Engineering, BS must be completed.

Materials Science and Engineering, BS with grad track option leading to Materials Science and Engineering, PhD

This grad track option is a BS to PhD accelerated program for undergraduate students. The students can take a maximum of 12 credit hours of graduate courses while completing the BS degree. These credits will be counted toward first the BS and then, following graduation, be transferred to the PhD degree.

The following is the step-by-step process:

1. Student applies for the grad track to PhD option in the junior year (having completed at least 75 credit hours with a GPA of 3.5 or higher).
2. After the application is approved and the student has completed at least 90 credit hours, the student can start taking the graduate courses that are approved for the grad track to PhD option as MTSE electives for the BS degree requirement. For the graduate courses to be counted toward the PhD degree later, the student must meet the minimum grade requirements of the courses in the PhD program.
3. The student applies to the Toulouse Graduate School within the first semester of the senior year. The student needs to submit online application and all required documents for admission to the PhD MTSE program.
4. The student must enroll in the graduate school in the long semester after finishing his/her BS degree and should take the remaining graduate courses in the following year(s) to complete his/her PhD degree. If the student did not enroll in the graduate school in the long semester after finishing his/her BS degree, those graduate course credit hours will no longer be counted for the PhD degree even if the student comes back for graduate school in the future.
5. Students in the BS-to-MS grad track program can apply to transfer to the BS-to-PhD grad track program any time with departmental approval.
6. Once admitted to the PhD program, the student will have higher priority for funding (research and teaching assistantships) to support PhD study.

Program requirements

Students may choose up to 12 hours from the following list of courses:

- MTSE 5000 - Thermodynamics of Materials
- MTSE 5010 - Bonding, Structure and Crystallography

- MTSE 5020 - Mechanical Properties of Materials
- MTSE 5070 - Tribology of Materials
- MTSE 5200 - Advanced Concepts of Metallurgical Science
- MTSE 5300 - Science and Technology of Modern Ceramics
- MTSE 5400 - Advanced Polymer Physics and Chemistry
- MTSE 5500 - Electronic, Optical and Magnetic Materials
- MTSE 5520 - Physical and Chemical Basis of Integrated Circuit Fabrication
- MTSE 5560 - Compound Semiconductor Materials and Devices
- MTSE 5610 - Fundamentals of Surface and Thin Film Analysis
- MTSE 5620 - Scanning Electron and Ion Microscopy
- MTSE 5710 - Computational Materials Science

All remaining courses for Materials Science and Engineering, BS must be completed.

Minors

Materials Science and Engineering minor

The minor in materials science and engineering requires a total of 18 semester credit hours:

Required

- MTSE 3000 - Fundamentals of Materials Science and Engineering - I
- Plus 15 hours of materials science and engineering courses, at least 6 of which should be chosen from the four core courses:

Core courses

- MTSE 3010 - Bonding and Structure
- MTSE 3030 - Thermodynamics and Phase Diagrams
- MTSE 3050 - Mechanical Properties of Materials
- MTSE 3070 - Electrical, Optical and Magnetic Properties of Materials

Additional requirements

The remaining hours can be from any other 3000- or 4000-level materials science engineering courses.

Faculty

The Department of Mechanical Engineering at the University of North Texas was created in the fall of 2020 when the Department of Engineering Technology merged with the Department of Mechanical and Energy Engineering. The Department of Mechanical Engineering is committed to academic excellence in undergraduate and graduate education and research in all areas pertinent to the discipline of mechanical engineering and in particular to construction engineering, energy and engineering management. The goals of the department and its faculty are: (1) to provide high quality and innovative educational programs at the undergraduate and graduate levels; (2) to foster lifelong learning by promoting professionalism and ethical standards and helping students develop leadership qualities; (3) to pursue excellence in scholarly research in areas of mechanical engineering; and (4) to collaborate with engineers in industry, national laboratories, and government agencies in finding the solutions to national and global problems.

Degree programs

The department offers several undergraduate programs leading to the following degrees:

- Bachelor of Science in Engineering Technology (BSET) with a major in construction engineering technology
- Bachelor of Science (BS) with a major in construction management
- Bachelor of Science (BS) with a major in mechanical and energy engineering
- Bachelor of Science in Engineering Technology (BSET) with a major in mechanical engineering technology

Majors**Construction Engineering Technology, BSET**

A Bachelor of Engineering Technology with a major in construction engineering technology is an applied degree for a career in engineering featuring a unique 50/50 mix of construction engineering and construction management to make you competitive in today's construction industry. Build a full-scale modular house during your first year. Expand your Senior-Year Capstone project and consider the Grad-Track option to earn the BSET and MSET in 5 years.

The construction engineering technology major provides educational experiences for the development of technical knowledge and skills necessary in today's construction industry. The program offers education in both the management and technical aspects, thus providing outstanding opportunities for sustainable employment. The program builds on a strong foundation in mathematics, science, engineering and general education. Knowledge and skills relative to the construction field such as surveying, cost estimating, construction materials, project scheduling, BIM, contracts and management, safety, and structures are acquired. Technical and management skills are enhanced through courses offered by other engineering technology programs and the College of Business. The development of technical communication and presentation skills is a requirement throughout the curriculum.

Construction engineering technology is accredited by the Engineering Technology Accreditation Commission of ABET (www.abet.org)

Program Education Objectives

Graduates will demonstrate strong leadership, management, communication, and teamwork skills while applying their acquired knowledge of mathematics, engineering and technology to identify, analyze, and solve problems pertaining to construction projects. These capabilities will be demonstrated as follows:

1. Students in graduate school
2. Employment in Construction Industry
3. Position in Construction Related Engineering Design Firms
4. Management Position in Construction Industry
5. Achievement of Professional Designation, i.e., Professional Engineer; LEED AP; Certified Professional Contractor
6. Officer of Professional Association related to Construction Industry

Student Outcomes

1. An ability to apply knowledge, techniques, skills and modern tools of mathematics, science, engineering, and technology to solve broadly-defined engineering problems appropriate to the discipline. (ABET SO1)
2. An ability to design systems, components, or processes meeting specified needs for broadly-defined engineering problems appropriate to the discipline. (ABET SO2)
3. An ability to apply written, oral, and graphical communication in broadly-defined technical and non-technical environments; and an ability to identify and use appropriate technical literature. (ABET SO3)
4. An ability to conduct standard tests, measurements, and experiments and to analyze and interpret the results to improve processes. (ABET SO4)
5. An ability to function effectively as a member as well as a leader on technical teams. (ABET SO5)

Degree requirements

The following requirements must be satisfied for a Bachelor of Science in Engineering Technology with a major in construction engineering technology.

Hours required and general/college requirements

A minimum of 123 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Science degree as specified in the "University Core Curriculum" in the Academics section of this catalog and the College of Engineering requirements.

Major requirements, 74 hours

74 hours, chosen with the advice of an academic advisor within the department.

- ACCT 2010 - Accounting Principles I (Financial Accounting)
- BLAW 3430 - Legal and Ethical Environment of Business
- BLAW 4770 - Real Estate Law and Contracts
- CNET 1160 - Construction Methods and Materials *
- CNET 2180 - Building Construction Techniques *
- CNET 2300 - Construction Graphics and Modeling *
- CNET 3150 - Construction Contract Documents
- CNET 3160 - Construction Cost Estimating
- CNET 3190 - Construction Scheduling
- CNET 3410 - Occupational Safety and Liability
- CNET 3430 - Structural Analysis
- CNET 3440 - Steel Structures

- CNET 3460 - Soils and Foundations
- CNET 3480 - Structural Design with Concrete, Timber and Other Materials
- CNET 4170 - Construction Management
- CNET 4180 - Problems in Project Management
- CNET 4190 - Quality Management in Construction
- CNET 4620 - Advanced Design in Cold-Formed Steel Structures
- CNET 4780 - Senior Design I
- CNET 4790 - Senior Design II
- DSCI 2710 - Data Analysis with Spreadsheets
- ECON 1100 - Principles of Microeconomics
- ENGR 2301 - Statics
- ENGR 2332 - Mechanics of Materials
- 4 hours of technical electives

Other requirements

- A grade of C or better is required for all major courses and elective courses counting toward the major.
- Courses taken to satisfy the technical options in the major must be approved by the academic advisor.

Minor

Optional.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information, see an academic advisor in the College of Engineering.

Other requirements

The mathematics courses needed are listed below:

- CHEM 1410 - General Chemistry I for Science Majors **
- CHEM 1430 - Laboratory Sequence for General Chemistry I
- ENGR 1030 - Technological Systems ***
- MATH 1710 - Calculus I
- MATH 1720 - Calculus II
- PHYS 1710 - Mechanics *** and
- PHYS 1730 - Laboratory in Mechanics
- PHYS 2220 - Electricity and Magnetism **
- PHYS 2240 - Laboratory in Electricity and Magnetism

- **TECM 2700 - Technical Writing *** (required instead of ENGL 1320)

Foundation course

CNET foundation courses are MATH 1710, PHYS 1710, PHYS 1730, ENGR 1030, TECM 2700, CNET 1160, CNET 2180, and CNET 2300.

Successful completion of foundation courses is based on achieving a C or higher in each course.

Major transfer policy

Students enrolled at UNT can transfer into Construction Engineering Technology if they have completed the following courses with a C or better and a cumulative GPA of at least 2.5. The courses are: MATH 1710, CNET 1160, ENGR 1030, PHYS 1710/PHYS 1730, CNET 2180, and TECM 2700.

Successful completion of foundation courses is based on achieving a C or higher in each course.

Department policies

Policy on Academic Performance, Progression, and Dismissal in the College of Engineering

Students in the College of Engineering will conduct themselves in a professional manner in their interaction with their peers, faculty, staff and the community in general. A student may be dismissed from the college for inappropriate conduct (please refer to the Code of Student Conduct).

Each semester, students are required to take engineering foundation courses and/or prerequisites to the engineering foundation courses until all foundation courses are successfully completed.

Successful completion of the foundation courses is required for enrollment in all 3000 and 4000 level courses.

A minimum grade of C is required in all courses required in a student's major for degree completion. Courses include, but are not limited to, engineering, computing, mathematics, laboratory sciences, supporting area, technical elective, technical option, energy elective, and specialization courses.

A minimum grade of C is required in all courses required in a student's major for prerequisite completion. Courses include, but are not limited to, engineering, computing, mathematics, laboratory sciences, supporting area, technical elective, technical option, energy elective, and specialization courses.

A student making grades lower than C two times in the same course in any College of Engineering foundation course or in any course required by the major is subject to dismissal from the College of Engineering, pending a review by the Associate Dean for Undergraduate Studies in the College of Engineering.

A student must maintain good academic standing within the university. Please see "Academic status" and "Regulations governing students under academic suspension" in the Academics section of this catalog."

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

Year 1

Semester 1		Semester 2	
MATH 1710 - Calculus I	4 hours	MATH 1720 - Calculus II	3 hours
CHEM 1410 - General Chemistry I for Science Majors	3 hours	PHYS 1710 - Mechanics	3 hours
CHEM 1430 - Laboratory Sequence for General Chemistry I	1 hour	PHYS 1730 - Laboratory in Mechanics	1 hour
CNET 1160 - Construction Methods and Materials	3 hours	TECM 2700 - Technical Writing	3 hours
ENGR 1030 - Technological Systems	3 hours	CNET 2180 - Building Construction Techniques	3 hours
Communication Core	3 hours	American History core	3 hours
Total	17 hours	Total	16 hours

Year 2

Semester 1		Semester 2	
PHYS 2220 - Electricity and Magnetism	3 hours	ACCT 2010 - Accounting Principles I (Financial Accounting)	3 hours
PHYS 2240 - Laboratory in Electricity and Magnetism	1 hour	CNET 4190 - Quality Management in Construction	3 hours
CNET 2300 - Construction Graphics and Modeling	3 hours	DSCI 2710 - Data Analysis with Spreadsheets	3 hours
ECON 1100 - Principles of Microeconomics	3 hours	ENGR 2332 - Mechanics of Materials	3 hours
ENGR 2301 - Statics	3 hours	Government & Political Science core	3 hours
American History core	3 hours		
Total	16 hours	Total	15 hours

Year 3

Semester 1		Semester 2	
CNET 3150 - Construction Contract Documents	3 hours	CNET 3190 - Construction Scheduling	3 hours

CNET 3160 - Construction Cost Estimating	3 hours	CNET 3440 - Steel Structures	3 hours
CNET 3430 - Structural Analysis	3 hours	CNET 3460 - Soils and Foundations	3 hours
BLAW 3430 - Legal and Ethical Environment of Business	3 hours	CNET 3410 - Occupational Safety and Liability	3 hours
Government & Political Science core	3 hours	Language, Philosophy & Culture core	3 hours
Total	15 hours	Total	15 hours

Year 4

Semester 1		Semester 2	
CNET 3480 - Structural Design with Concrete, Timber and Other Materials	3 hours	CNET 4180 - Problems in Project Management	3 hours
CNET 4170 - Construction Management	3 hours	CNET 4620 - Advanced Design in Cold-Formed Steel Structures	3 hours
CNET 4780 - Senior Design I	1 hour	CNET 4790 - Senior Design II	3 hours
BLAW 4770 - Real Estate Law and Contracts	3 hours	CNET Technical Elective selection	4 hours
Creative Arts core	3 hours	Elective	3 hours
Total	13 hours	Total	16 hours

Construction Management, BS

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Science degree as specified in the University Core Curriculum in the Academics section of this catalog and the College of Engineering requirements.

Major requirements

Major of 53 hours, including:

- CNET 1160 - Construction Methods and Materials
- CNET 2180 - Building Construction Techniques
- CNET 2200 - Surveying for Construction
- CNET 2300 - Construction Graphics and Modeling
- CNET 3150 - Construction Contract Documents
- CNET 3160 - Construction Cost Estimating

- CNET 3190 - Construction Scheduling
- CNET 3410 - Occupational Safety and Liability
- CNET 3435 - Structural Analysis
- CNET 3445 - Steel Structures
- CNET 3465 - Soils and Foundations
- CNET 3485 - Structural Design with Concrete, Timber and other Materials
- CNET 4170 - Construction Management
- CNET 4180 - Problems in Project Management
- CNET 4190 - Quality Management in Construction
- CNET 4630 - Construction Management for Mechanical, Electrical and Plumbing (MEP) Systems
- CNET 4785 - Senior Design I
- CNET 4795 - Senior Design II
- CNET 4920 - Cooperative Education Internship

Other course requirements

- ACCT 2010 - Accounting Principles I (Financial Accounting)
- BLAW 3430 - Legal and Ethical Environment of Business
- BLAW 4770 - Real Estate Law and Contracts
- ECON 1100 - Principles of Microeconomics
- ENGR 1030 - Technological Systems
- ENGR 2304 - Statics and Strength of Materials
- MATH 1190 - Business Calculus
or
- MATH 1710 - Calculus I
- MGMT 3820 - Management Concepts
- MGMT 3850 - Foundations of Entrepreneurship
- PHYS 1410 - General Physics I and
- PHYS 1430 - General Physics Laboratory I
or
- PHYS 1710 - Mechanics and
- PHYS 1730 - Laboratory in Mechanics
- PHYS 1420 - General Physics II and
- PHYS 1440 - General Physics Laboratory II
or
- PHYS 2220 - Electricity and Magnetism and
- PHYS 2240 - Laboratory in Electricity and Magnetism
- 3 additional hours of tech elective in consultation with advisor

Minor

No minor is required.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information see an academic advisor in the College of Engineering.

Other requirements

A grade of C or better is required for all major courses and elective courses counting toward the major.

Department policies

Policy on Academic Performance, Progression, and Dismissal in the College of Engineering

Students in the College of Engineering will conduct themselves in a professional manner in their interaction with their peers, faculty, staff and the community in general. A student may be dismissed from the college for inappropriate conduct (please refer to the Code of Student Conduct).

Each semester, students are required to take engineering foundation courses and/or prerequisites to the engineering foundation courses until all foundation courses are successfully completed. Successful completion is a 2.5 GPA for all engineering foundation courses with a C or better in each course.

Successful completion of the foundation courses is required for enrollment in all 3000 and 4000 level courses.

Mechanical and Energy Engineering, BS

The Bachelor of Science with a major in mechanical and energy engineering combines the fundamentals of mechanical engineering with a broad specialization in subjects related to energy, manufacturing and design.

The Bachelor of Science degree with a major in mechanical and energy engineering follows an interdisciplinary and innovative curriculum that combines the essentials of the classical discipline of mechanical engineering with the deeper knowledge of the dynamic field of energy studies. Thus, the BS degree combines the fundamentals of mechanical engineering with a broad specialization on subjects related to energy production, management and distribution. The goal of the mechanical and energy engineering department is to provide a curriculum and course of training that will prepare undergraduates not only for today's challenges, but also for future challenges in a fast-paced, global, and diverse society. As a consequence, this program emphasizes the fundamentals, modern methods, processes and technologies of engineering science. It also gives students the tools to learn by themselves and to pursue lifelong learning. Graduates of this program are well-prepared for industry careers and pursuit of advanced engineering degrees.

The mechanical and energy engineering curriculum is very broad. It is similar to a traditional mechanical engineering curriculum with the notable addition of several required energy-related courses and elective courses that emphasize energy applications and materials. In their first year, students in this program will take preparatory courses in mathematics and the basic sciences, including physics and chemistry. The required upper-division engineering courses are in the broad areas of energy-thermal-fluid science; mechanics and materials; dynamics, design and controls; and environmental impact of energy production and use. Technical elective courses range from alternative energy to nuclear power. The program also emphasizes studies in the humanities and social sciences, artistic ingenuity, professionalism, technical communication and engineering ethics.

The department also offers unique curriculum-integrated enrichment opportunities including undergraduate research, co-ops and study abroad exchanges with international partner schools. Minors that provide breadth of experience from other disciplines, including mathematics and hospitality management, can also be integrated seamlessly into the department's four-year bachelor's degree plan.

The Bachelor of Science degree with a major in mechanical and energy engineering is accredited by the Engineering Accreditation Commission (EAC) of ABET (abet.org), (111 Market Place, Suite 1050, Baltimore, MD 21202; 410-347-7700).

Program educational objectives

1. Graduates are successfully employed in mechanical and/or energy engineering positions and other related fields.
2. Graduates engage in lifelong learning demonstrated by advanced education, professional development activities and/or other career-appropriate options.
3. Graduates are prepared to successfully demonstrate technical and leadership competence through ethical conduct, teaming, communication and/or problem-solving skills learned in our program.

Student outcomes

Upon completion of the Bachelor of Science with a major in mechanical and energy engineering, students are enabled to achieve the following outcomes:

1. an ability to identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies

Degree requirements

Hours required and general/college requirements

A minimum of 127 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Science degree as specified in the University Core Curriculum in the Academic policies section of this catalog and the College of Engineering requirements.

Major requirements

Engineering fundamentals requirements, 10 hours

- ENGR 1304 - Engineering Graphics
- ENGR 2405 - Circuit Analysis
or
- EENG 2610 - Circuit Analysis
- ENGR 3450 - Engineering Materials

Major requirements

A minimum of 50 credit hours, including:

- ENGR 2301 - Statics
- ENGR 2302 - Dynamics
- ENGR 2332 - Mechanics of Materials
- MEEN 1000 - Discover Mechanical and Energy Engineering
- MEEN 2110 - Engineering Data Analysis
- MEEN 2210 - Thermodynamics I
- MEEN 2240 - Programming for Mechanical Engineers

- MEEN 3100 - Manufacturing Processes
- MEEN 3110 - Thermodynamics II
- MEEN 3120 - Fluid Mechanics
- MEEN 3130 - Machine Elements
- MEEN 3210 - Heat Transfer
- MEEN 3230 - System Dynamics and Control
- MEEN 3240 - Mechanical and Energy Engineering Laboratory I
- MEEN 3242 - Mechanical and Energy Engineering Laboratory II
- MEEN 3250 - Numerical Methods for MEE Engineers
- MEEN 4150 - Mechanical and Energy Engineering Systems Design I
- MEEN 4250 - Capstone Design in Mechanical and Energy Engineering

Energy engineering electives

6 credit hours from the following courses:

- MEEN 3125 - Thermal Engineering Projects
- MEEN 4110 - Renewable Energy
- MEEN 4112 - Fundamentals of Nuclear Engineering
- MEEN 4300 - Intermediate Thermodynamics
- MEEN 4310 - Intermediate Heat Transfer
- MEEN 4315 - Nanoscale Energy Transport Process
- MEEN 4320 - Building Energy Systems
- MEEN 4330 - Introduction to Combustion Science and Engineering
- MEEN 4332 - Fundamentals of Air Pollution Engineering
- MEEN 4335 - Computational Simulation of Building Energy Systems
- MEEN 4340 - Energy Efficiencies and Green Building Design for Commercial Buildings
- MEEN 4350 - Energy Efficiencies and Green Building for Residential Buildings
- MEEN 4410 - Energy Harvesting System Design
- MEEN 4810 - Topics in Mechanical and Energy Engineering

Technical electives

6 credit hours from the following courses:

- MEEN 4120 - Aerospace Fundamentals
- MEEN 4130 - Failure of Deformable Bodies
- MEEN 4140 - Finite Element Analysis
- MEEN 4151 - Manufacturing of Renewable Biocomposites for Lightweight Energy Efficient Structure
- MEEN 4152 - Composites and Lightweight Structures
- MEEN 4160 - Mechanical Vibrations
- MEEN 4415 - Smart Materials and Structures
- MEEN 4488 - Introduction to Microfluidics
- MEEN 4510 - Electronic Manufacturing Technologies
- MEEN 4800 - Topics in Mechanical and Energy Engineering
- MEEN 4930 - Undergraduate Research
- MFET 4190 - Quality Assurance

Other required courses

- CHEM 1410 - General Chemistry I for Science Majors
or
- CHEM 1415 - General Chemistry for Engineering Majors

- CHEM 1430 - Laboratory Sequence for General Chemistry I
or
- CHEM 1435 - General Chemistry Laboratory for Engineering Majors

- MATH 1710 - Calculus I
- MATH 1720 - Calculus II
- MATH 2700 - Linear Algebra and Vector Geometry
- MATH 2730 - Multivariable Calculus
- MATH 3410 - Differential Equations I

- PHYS 1710 - Mechanics and
- PHYS 1730 - Laboratory in Mechanics

- PHYS 2220 - Electricity and Magnetism and
- PHYS 2240 - Laboratory in Electricity and Magnetism

- TECM 2700 - Technical Writing

Minor

None required.

Other requirements

Department policies

Policy on Academic Performance, Progression, and Dismissal in the College of Engineering

Students in the College of Engineering will conduct themselves in a professional manner in their interaction with their peers, faculty, staff and the community in general. A student may be dismissed from the college for inappropriate conduct (please refer to the Code of Student Conduct).

Each semester, students are required to take engineering foundation courses and/or prerequisites to the engineering foundation courses until all foundation courses are successfully completed. Successful completion for all engineering foundation courses is a C or better in each course.

Successful completion of the foundation courses is required for enrollment in all 3000 and 4000 level courses.

A minimum grade of C is required in all courses required in a student's major for degree completion. Courses include, but are not limited to, engineering, computing, mathematics, laboratory sciences, supporting area, technical elective, technical option, energy elective, and specialization courses.

A minimum grade of C is required in all courses required in a student's major for prerequisite completion. Courses include, but are not limited to, engineering, computing, mathematics, laboratory sciences, supporting area, technical elective, technical option, energy elective, and specialization courses.

A student making grades lower than C two times in the same course in any College of Engineering foundation course or in any course required by the major is subject to dismissal from the College of Engineering, pending a review by the Associate Dean for Undergraduate Studies in the College of Engineering.

A student must maintain good academic standing within the university. Please see "Academic status" and "Regulations governing students under academic suspension" in the Academics section of this catalog. "

Mechanical Engineering Technology, BSET

A Bachelor of Science in Engineering Technology with a major in mechanical engineering technology is an applied degree for a career in engineering, mechanical systems, materials, and manufacturing. Earn a certificate in manufacturing engineering technology or in nuclear power technology and be even more competitive for a wider array of job opportunities with engineering firms. Expand your capstone project and consider the Grad-Track option to earn the BSET and MSET in 5 years.

The mechanical engineering technology major is built upon a strong foundation of science, mathematics and technical course work designed to meet the diverse needs of the mechanical engineer. Mechanical engineering technology concepts are used in all types of industry and are applied directly to product and tool design and to assist in the manufacturing process. Courses in computer-aided design, product design and development, manufacturing processes and materials, fluid and thermal sciences and quality assurance provide the student with a broad range of applications for the pursuit of a career in mechanical engineering technology.

Mechanical engineering technology is accredited by the Engineering Technology Accreditation Commission of ABET (abet.org), (111 Market Place, Suite 1050, Baltimore, MD 21202; 410-347-7700).

Program Education Objectives

1. Graduates are expected to perform all functions assigned to a Mechanical Engineering Technologist in the following areas of mechanical engineering practice including mechanical, thermal and fluid systems design, materials and manufacturing processes.
2. Graduates are expected to demonstrate an ability to define, formulate and solve mechanical engineering problems through the application of competent technical and ethical capabilities.
3. Graduates are expected to exercise communication and teamwork skills, demonstrate an appreciation of local and global social values, and display an understanding of the social, technical and environmental implications of technology.
4. Graduates are expected to demonstrate continued professional advancement through life-long learning opportunities, in-service training and engagement with professional organizations.

Student Outcomes

1. an ability to apply knowledge, techniques, skills and modern tools of mathematics, science, engineering, and technology to solve broadly-defined engineering problems appropriate to the discipline;
2. an ability to design systems, components, or processes meeting specified needs for broadly-defined engineering problems appropriate to the discipline;
3. an ability to apply written, oral, and graphical communication in broadly-defined technical and non-technical environments; and an ability to identify and use appropriate technical literature;
4. an ability to conduct standard tests, measurements, and experiments and to analyze and interpret the results to improve processes; and,
5. an ability to function effectively as a member as well as a leader on technical teams.

Degree requirements

Hours required and general/college requirements

A minimum of 122 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Science degree as specified in the University Core Curriculum in the Academic policies section of this catalog and the College of Engineering requirements.

Major requirements, 73 hours

73 hours, chosen with the advice of an academic advisor within the department.

- CSCE 1030 - Computer Science I
- EENG 2610 - Circuit Analysis
- EENG 2611 - Circuit Analysis Lab
- ENGR 1304 - Engineering Graphics *
- ENGR 2301 - Statics *
- ENGR 2302 - Dynamics
- ENGR 2332 - Mechanics of Materials
- ENGR 3450 - Engineering Materials
- MEET 3550 - Geometrical Dimensioning and Tolerancing
- MEET 3650 - Design of Mechanical Components
- MEET 3940 - Fluid Mechanics Applications
- MEET 3980 - Digital Control of Industrial Processes
- MEET 3990 - Applied Thermodynamics
- MEET 4050 - Mechanical Design
- MEET 4350 - Heat Transfer Applications
- MEET 4360 - Experimental Thermal Sciences
- MEET 4780 - Senior Design I
- MEET 4790 - Senior Design II
- MFET 3110 - Machining Principles and Processes
- MFET 4190 - Quality Assurance
- MFET 4200 - Engineering Cost Analysis
- MFET 4210 - CAD/CAM System Operations
- 3 hours of technical electives
- 6 hours of advanced technical electives

Other course requirements

The mathematics courses needed are listed below:

- CHEM 1410 - General Chemistry I for Science Majors ** and
- CHEM 1430 - Laboratory Sequence for General Chemistry I
- ENGR 1030 - Technological Systems **
- MATH 1710 - Calculus I *
- MATH 1720 - Calculus II
- PHYS 1710 - Mechanics *** and
- PHYS 1730 - Laboratory in Mechanics *
- PHYS 2220 - Electricity and Magnetism ** and
- PHYS 2240 - Laboratory in Electricity and Magnetism
- TECM 2700 - Technical Writing * is required instead of ENGL 1320

Notes

* satisfies MEET foundations requirement

** may be used to satisfy a portion of the University Core Curriculum

*** satisfies MEET foundations requirement; also may be used to satisfy a portion of the University Core Curriculum

Minor

Optional.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information, see an academic advisor in the College of Engineering.

Other requirements

Foundation courses

MEET foundation courses include ENGR 1304, ENGR 2301, ENGL 1310 or TECM 1700, MATH 1710, PHYS 1710, PHYS 1730, TECM 2700.

Successful completion of foundation courses is based on achieving a C or higher in each course.

Major transfer policy

Students enrolled at UNT can transfer into mechanical engineering technology if they have completed the following courses with a C or better. The courses are: ENGR 1304, ENGL 1310 or TECM 1700, MATH 1710, PHYS 1710, PHYS 1730, TECM 2700.

Department policies

Policy on Academic Performance, Progression, and Dismissal in the College of Engineering

Students in the College of Engineering will conduct themselves in a professional manner in their interaction with their peers, faculty, staff and the community in general. A student may be dismissed from the college for inappropriate conduct (please refer to the Code of Student Conduct).

Each semester, students are required to take engineering foundation courses and/or prerequisites to the engineering foundation courses until all foundation courses are successfully completed.

Successful completion of the foundation courses is required for enrollment in all 3000 and 4000 level courses.

A minimum grade of C is required in all courses required in a student's major for prerequisite completion. Courses include, but are not limited to, engineering, computing, mathematics, laboratory sciences, supporting area, technical elective, technical option, energy elective and specialization courses.

A student making grades lower than C two times in the same course in any College of Engineering foundation course or in any course required by the major is subject to dismissal from the College of Engineering, pending a review by the Associate Dean for Undergraduate Studies in the College of Engineering.

A student must maintain good academic standing within the university. Please see "Academic status" and "Regulations governing students under academic suspension" in the Academic policies section of this catalog.

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

Year 1

Semester 1		Semester 2	
CHEM 1410 - General Chemistry I for Science Majors	3 hours	MATH 1720 - Calculus II	3 hours
CHEM 1430 - Laboratory Sequence for General Chemistry I	1 hour	PHYS 1710 - Mechanics	3 hours
ENGR 1030 - Technological Systems	3 hours	PHYS 1730 - Laboratory in Mechanics	1 hour
ENGR 1304 - Engineering Graphics	3 hours	TECM 2700 - Technical Writing	3 hours
MATH 1710 - Calculus I	4 hours	American History core	3 hours
Communication core	3 hours	Government/Political Science core	3 hours
Total	17 hours	Total	16 hours

Year 2

Semester 1		Semester 2	
CSCE 1030 - Computer Science I	3 hours	EENG 2610 - Circuit Analysis	3 hours
ENGR 2301 - Statics	3 hours	EENG 2611 - Circuit Analysis Lab	1 hour
PHYS 2220 - Electricity and Magnetism	1 hour	ENGR 2302 - Dynamics	3 hours
PHYS 2240 - Laboratory in Electricity and Magnetism	1 hour	ENGR 2332 - Mechanics of Materials	3 hours
American History core	3 hours	MEET Technical Elective	3 hours
Elective	3 hours		
Total	14 hours	Total	13 hours

Year 3

Semester 1		Semester 2	
ENGR 3450 - Engineering Materials	4 hours	MEET 3550 - Geometrical Dimensioning and Tolerancing	3 hours
MEET 3940 - Fluid Mechanics Applications	3 hours	MEET 3650 - Design of Mechanical Components	3 hours
MEET 3990 - Applied Thermodynamics	3 hours	MEET 3980 - Digital Control of Industrial Processes	3 hours
MFET 3110 - Machining Principles and Processes	3 hours	MFET 4190 - Quality Assurance	3 hours
Social and Behavioral Sciences core	3 hours	MFET 4210 - CAD/CAM System Operations	3 hours
Total	16 hours	Total	15 hours

Year 4

Semester 1		Semester 2	
MEET 4050 - Mechanical Design	3 hours	MEET 4360 - Experimental Thermal Sciences	3 hours
MEET 4350 - Heat Transfer Applications	3 hours	MEET 4790 - Senior Design II	3 hours
MEET 4780 - Senior Design I	1 hour	Government/Political Science core	3 hours
MFET 4200 - Engineering Cost Analysis	3 hours	Language, Philosophy and Culture core	3 hours
Creative Arts core	3 hours	MEET Advanced Technical Elective	3 hours
MEET Advanced Technical Elective	3 hours		
Total	16 hours	Total	15 hours

Grad Track Options

Construction Engineering Technology, BSET with grad track option leading to Engineering Management, MS

In this grad track option, the Construction Engineering Technology, BSET student can take a maximum of nine (9) credit hours of graduate courses while completing the bachelor's degree. After earning the bachelor's degree, these credit hours can be counted toward the Engineering Management, MS. Prior to registering for these courses, the student must be admitted to the grad track option and obtain approvals from the undergraduate and graduate coordinators.

Admission requirements and program policies

Application requirements

- Construction Engineering Technology, BSET major.
- Junior status (must have completed at least 75 credit hours and be ready to enroll in the Senior Design course the following fall semester).
- Minimum cumulative GPA of 3.5 at the time of application submission, with an average grade of 3.5 or higher in Construction Engineering Technology, BSET core courses.
- Two letters of recommendation from ME faculty members.
- The student's application will be reviewed by both the ME undergraduate advisor and the ME graduate advisor.
- Once the application is approved by the ME advisors, the student must apply to the Toulouse Graduate School within the first semester of the senior year.

Application procedures

The student must earn a grade of B or higher in each graduate course for the course to be counted toward the master's degree.

- After being admitted to the grad track program and having completed at least 90 credit hours, the student can start taking the specified graduate courses in place of the technical electives in the bachelor's program.
- The student admitted to the grad track option will be admitted into the master's program on a conditional basis.
- Once the student has satisfied all course work for the bachelor's degree and maintained a 3.0 GPA or higher, they will be fully admitted into the master's program.

Program policies

Policies related to completion of programs

- The students accepted to the grad track option should complete all requirements for the bachelor's degree and graduate within 12 months from the beginning of the semester in which they first enrolled in a graduate course. If requirements are not completed within 12 months, enrollment in graduate-level courses will be suspended.
- The student must enroll in the graduate program the long semester after finishing the bachelor's degree and should take the remaining graduate-level courses in the following year(s) to complete the Engineering Management, MS. If the student does not enroll in the graduate program the long semester immediately following completion of the bachelor's degree, the graduate-level courses applied to the undergraduate degree may not be counted toward the Master of Science even if the student returns to UNT for graduate school in the future.

Program requirements

Graduate courses that may be applied to the bachelor's degree should be selected with the approval of the ME undergraduate coordinator and graduate advisor.

Grad track students can take six (6) credit hours of graduate courses from the following Engineering Management, MS [core courses](#) that can be used as electives towards their bachelor's degree.

- EMGT 5020-Design of Experiments
- EMGT 5040-Product Reliability and Quality
- EMGT 5050-Project Management for Engineers
- EMGT 5060-Technology Innovation

- EMGT 5070-Management in Human and Societal Development

Additionally, grad-track students can take three (3) credit hours of graduate courses that can be used as electives towards both their bachelor's degree and the Engineering Management, MS degree.

All remaining courses for the Construction Engineering Technology, BSET program must be completed.

Construction Management, BS with grad track option leading to Engineering Management, MS

In this grad track option, the Construction Management, BS student can take a maximum of nine (9) credit hours of graduate courses while completing the bachelor's degree. After earning the bachelor's degree, these credit hours can be counted toward the Engineering Management, MS. Prior to registering for these courses, the student must be admitted to the grad track option and obtain approvals from the undergraduate and graduate coordinators. Admission requirements and program policies

Admission requirements and program policies

Application requirements

- Construction Management, BS major.
- Junior status (must have completed at least 75 credit hours and be ready to enroll in the Senior Design course the following fall semester).
- Minimum cumulative GPA of 3.5 at the time of application submission, with an average grade of 3.5 or higher in Construction Management, BS core courses.
- Two letters of recommendation from ME faculty members.
- The student's application will be reviewed by both the ME undergraduate advisor and the ME graduate advisor.
- Once the application is approved by the ME advisors, the student must apply to the Toulouse Graduate School within the first semester of the senior year.

Program policies

Policies related to completion of programs

- The students accepted to the grad track option should complete all requirements for the bachelor's degree and graduate within 12 months from the beginning of the semester in which they first enrolled in a graduate course. If requirements are not completed within 12 months, enrollment in graduate-level courses will be suspended.
- The student must enroll in the graduate program the long semester after finishing the bachelor's degree and should take the remaining graduate-level courses in the following year(s) to complete the Engineering Management, MS. If the student does not enroll in the graduate program the long semester immediately following completion of the bachelor's

degree, the graduate-level courses applied to the undergraduate degree may not be counted toward the Master of Science even if the student returns to UNT for graduate school in the future.

Program requirements

Graduate courses that may be applied to the bachelor's degree should be selected with the approval of the ME undergraduate coordinator and graduate advisor.

Grad track students can take six (6) credit hours of graduate courses from the following Engineering Management, MS core courses that can be used as electives towards their bachelor's degree.

- EMGT 5020-Design of Experiments
- EMGT 5040-Product Reliability and Quality
- EMGT 5050-Project Management for Engineers
- EMGT 5060-Technology Innovation
- EMGT 5070-Management in Human and Societal Development

Additionally, grad-track students can take three (3) credit hours of graduate courses that can be used as elective towards both their bachelor's degree and the Engineering Management, MS degree.

All remaining courses for the Construction Management, BS program must be completed.

Mechanical and Energy Engineering, BS with grad track option leading to Biomedical Engineering, MS

Admission requirements

1. Student should be a major in the UNT Mechanical and Energy Engineering, BS program.
2. Students can apply for the grad track option his/her junior year (following completion of at least 75 credit hours; a benchmark is if the student is ready for Senior Design in the following fall semester).
3. Minimum of 3.5 or higher cumulative GPA required at the time of application submission, with a minimum GPA of 3.5.
4. The student should provide two recommendation letters from faculty members with their application.
5. Application will be reviewed by both the undergraduate advisor in Mechanical Engineering and graduate advisor in Biomedical Engineering.
6. Once approved by the respective advisors, the student must apply to the Toulouse Graduate School within the first semester of the senior year.

Program policies

1. After being admitted to the grad track program and completion of at least 90 credit hours, the student can start taking the graduate courses as technical electives for the BS degree requirement. For the graduate courses to be counted for the MS degree, the student should get a B or above for the courses.
2. The student in the grad track program will be advised and monitored by both the undergraduate coordinator (prior to completion of the BS) and the graduate advisor (after completion of the BS).
3. The student should choose a major research advisor in the semester that the student begins taking graduate courses.
4. There will be an annual review of each student's academic progress in meeting both bachelor's and master's degree requirements. If the student fails to meet degree requirements, the student will be placed in a probationary period for one semester. If the student continues to not meet the degree requirements in the probationary period, the student will be expelled from the grad track program (they will still be in the general biomedical engineering BS program if all general biomedical engineering BS degree requirements are met).

5. Undergraduate students who have been accepted to a grad track option should complete all of their bachelor's degree requirements and graduate within 12 months of the first day of the semester in which they begin taking graduate courses or enrollment in graduate level course work will be suspended.
6. The students admitted to the grad track option will be admitted into the MS program on a conditional basis. Once the student has satisfied all course work for the BS degree and maintained a 3.0 or higher GPA, they will be fully admitted to the MS program.
7. The student must enroll in graduate school in the long semester after finishing their BS degree and should take the remaining graduate courses in the following years to complete his/her biomedical engineering master's degree. If the student did not enroll in graduate school in the long semester after finishing his/her BS degree those graduate course credit hours will not be counted toward the MS degree, even if the student comes back for graduate school in the future.

Program requirements

The student is required to take three of the courses listed below in the fourth year of their bachelor's degree program. The following courses may apply to the grad track, with approval of the undergraduate and graduate coordinators from the respective programs.

- BMEN 5007 - Research Methods in Biomedical Engineering (BMEN 4007 - Biomedical Experimental Design and Data Analysis)
- BMEN 5310 - Clinical Instrumentation (BMEN 4311 - Biomedical Instrumentation II)
- BMEN 5313 - Bioengineering of Cellular Systems (BMEN 4313 - Cellular Engineering)
- BMEN 5314 - Advanced Tissue Engineering and Regenerative Medicine (BMEN 4314 - Tissue Engineering)
- BMEN 5315 - Computational Methods in Biomedical Engineering (BMEN 4310 - Biomedical Modeling)
- BMEN 5319 - Cardiovascular Fluid Dynamics (BMEN 4319 - Cardiovascular Flows)
- BMEN 5323 - Advanced Biomedical Optics (BMEN 4321 - Biophotonics)
- BMEN 5325 - Biomedical Nanotechnology Compatibility (BMEN 4325 - Biomedical Nanotechnology)
- BMEN 5326 - Biomolecular Engineering (BMEN 4326 - Principles of Biomolecular Engineering)
- CSCE 5050 – Applications of Cryptography
- CSCE 5200 – Information Retrieval and Web Search
- CSCE 5210 – Fundamentals of Artificial Intelligence
- CSCE 5215 – Machine Learning
- CSCE 5220 – Computer Graphics
- CSCE 5225 – Digital Image Processing
- CSCE 5290 – Natural Language Processing
- CSCE 5350 – Fundamentals of Database Systems
- CSCE 5380 – Data Mining
- CSCE 5400 – Formal Languages, Automata, and Computability
- CSCE 5430 – Software Engineering
- CSCE 5450 – Programming Languages
- CSCE 5460 – Software Testing and Empirical Methodologies
- CSCE 5510 – Wireless Communications
- CSCE 5520 – Wireless Networks and Protocols
- CSCE 5550 – Introduction to Computer Security
- CSCE 5555 – Computer Forensics
- CSCE 5560 – Secure Electronic Commerce
- CSCE 5585 – Network Security
- CSCE 5610 – Computer System Architecture
- CSCE 5620 – Real-Time Operating Systems
- CSCE 5650 – Compiler Design

- CSCE 5655 – Principles of Compiler Optimization
- CSCE 5730 – Digital CMOS VLSI Design
- CSCE 5810 – Bioinformatics Algorithms
- CSCE 5820 – Advances in Bioinformatics
- EENG 5310 – Control Systems Design
- EENG 5320 – Systems Modeling and Simulation
- EENG 5520 – Design and Testing of Digital Systems
- EENG 5530 – Analog Integrated Circuit Design
- EENG 5610 – Digital Signal Processing
- EENG 5810 – Digital Communications
- MEEN 5000 – Energy: The Fundamentals
- MEEN 5110 – Renewable Energy
- MEEN 5112 – Nuclear Energy
- MEEN 5140 – Advanced Mathematical Methods for Engineers
- MEEN 5150 – Thermal Energy Storage System and Applications
- MEEN 5152 – Mechanics of Composites and Foams for Lightweight Energy Efficient Structures
- MEEN 5220 – Computational Fluid Dynamics and Heat Transfer
- MEEN 5300 – Advanced Thermodynamics
- MEEN 5310 – Conduction and Radiation Heat Transfer
- MEEN 5311 – Convection of Heat Transfer II
- MEEN 5315 – Nanoscale Energy Transport
- MEEN 5330 – Combustion Science and Engineering
- MEEN 5332 – Air Pollution Control Engineering
- MEEN 5340 – Advanced Fluid Mechanics
- MEEN 5410 – Advanced Solid Mechanics
- MEEN 5440 – Finite Element Analysis
- MEEN 5510 – Manufacturing Process for Biocomposites
- MEEN 5520 – Manufacturing Concepts for Mechanical Engineering
- MEEN 5600 – Feedback Control of Dynamical Systems
- MEEN 5610 – Sensors and Actuators
- MEEN 5640 – Applied Engineering Vibrations
- MEEN 5800 – Topics in Mechanical and Energy Engineering
- MSET 5020 – Design of Experiments
- MSET 5030 – Product Design and Development
- MSET 5040 – Analytical Methods in Engineering Technology
- MSET 5120 – Computer-Integrated Manufacturing
- MSET 5150 – Applications of Electron Microscopy and Failure Analysis
- MSET 5160 – Creep and Fatigue in Engineering Design and Systems Performance
- MSET 5200 – Advanced Construction Scheduling
- MSET 5220 – Building Information Modeling
- MSET 5230 – Risk Management in Construction
- MSET 5800 – Studies in Engineering Technology
- MTSE 5000 – Thermodynamics of Materials
- MTSE 5010 – Bonding, Structure, and Crystallography
- MTSE 5020 – Mechanical Properties of Materials
- MTSE 5070 – Tribology of Materials
- MTSE 5100 – Fundamental Concepts of Materials Science

- MTSE 5200 – Advanced Concepts of Metallurgical Science
- MTSE 5210 – Corrosion and Oxidation of Materials
- MTSE 5300 – Science and Technology of Modern Ceramics
- MTSE 5400 – Advanced Polymer, Physics, and Chemistry
- MTSE 5500 – Electronic, Optical, and Magnetic Materials
- MTSE 5520 – Physical and Chemical Based Integrated Circuit Fabrication
- MTSE 5550 – Materials and Mechanics for MEMS Devices
- MTSE 5560 – Compound Semiconductor Materials and Devices
- MTSE 5600 – Materials Characterization
- MTSE 5610 – Fundamentals of Surface Thin Film Analysis
- MTSE 5620 – Scanning Electron and Ion Microscopy
- MTSE 5710 – Computational Materials Science

All remaining courses required for the Mechanical and Energy Engineering, BS must also be completed. Other graduate courses may be applied to the Mechanical and Energy Engineering, BS and Biomedical Engineering, MS with consent of the departments.

Mechanical and Energy Engineering, BS with grad track option leading to Electrical Engineering, MS

The Department of Electrical Engineering offers a grad track option for existing UNT undergraduate students enrolled in the Mechanical and Energy Engineering, BS program.

In this grad track option, the student can take a maximum of three (3) credit hours of graduate courses while completing the BS degree. After earning the BS degree, these credit hours can be counted toward the MS degree. Prior to registering for these courses, the student must be admitted to the grad track option and obtain approvals from the undergraduate and graduate coordinators of their respective programs.

Admission requirements

To be eligible to apply for grad track, students must have a cumulative GPA of 3.5 or higher at the time of application

To apply, students should submit the following to the grad track coordinator of the Department of Electrical Engineering, MS before the first semester of their senior year:

- A completed grad track application form, and
- An up-to-date official transcript

The student's application will be reviewed by the undergraduate coordinator in Mechanical Engineering and the graduate coordinator in Electrical Engineering.

After a student is admitted to the grad track program, the student must apply to the Toulouse Graduate School during their senior year for admission to the Electrical Engineering, MS, which should follow the same application procedure, application deadlines, and admission requirements as the regular graduate applications for admission to the Electrical Engineering, MS.

Program policies

After being accepted into the grad track option, the student then can take graduate courses in their senior year as Mechanical and Energy Engineering, BS electives to meet the bachelor's degree requirements. In order for courses to be counted toward the MS degree, the student must meet the minimum grade requirements of the courses in the MS program. After being accepted into the grad track option, the student must complete the bachelor's degree within one year of the first graduate level course they take.

Students admitted to the program will be admitted into the MS program on a conditional basis. Once the student has satisfied all requirements for the bachelor's degree and maintained a GPA of 3.0 or higher, they will be fully admitted to the MS program.

The student must enroll in graduate school in the long semester within one year after receiving his or her bachelor's degree and should complete the remaining graduate courses in the following year(s) to receive the MS degree. If the student does not enroll in graduate school in the long semester within one year after finishing the BS degree, those graduate credit hours will not be counted toward the MS degree, even if the student comes back to graduate school in the future.

Program requirements

The student is allowed to take one of the graduate courses listed below in the senior year of the program for a total of 3 hours (may be changed only if approved by both the Mechanical Engineering undergraduate and Electrical Engineering graduate coordinators):

- BMEN 5324 – Applications of Biomedical MEMS
- CSCE 5215 – Machine Learning
- CSCE 5290 – Natural Language Processing
- CSCE 5430 – Software Engineering
- CSCE 5640 – Operating System Design
- EENG 5310 - Control Systems Design
- EENG 5320 - Systems Modeling and Simulation
- EENG 5520 - Design and Testing of Digital Systems
- EENG 5530 - Analog Integrated Circuit Design
- EENG 5610 - Digital Signal Processing
- EENG 5810 - Digital Communications
- MEEN 5440 – Finite Element Analysis
- MEEN 5610 – Sensors and Actuators
- MTSE 5100 – Fundamental Concepts of Materials Science
- MTSE 5500 – Electronic, Optical, and Magnetic Materials
- MTSE 5550 – Materials and Mechanics for MEMS Devices
- MTSE 5560 – Compound Semiconductor Materials and Devices

In the senior year, in addition to the approved graduate courses, the student is required to take all remaining courses required for the Mechanical and Energy Engineering, BS.

After receiving his or her bachelor's degree and being enrolled in the graduate program, the student is required to take all remaining courses required for the MS degree with a major in electrical engineering (*see Graduate Catalog*).

Mechanical and Energy Engineering, BS with grad track option leading to Engineering Management, MS

In this grad track option, the Mechanical and Energy Engineering, BS student can take a maximum of nine (9) credit hours of graduate courses while completing the bachelor's degree. After earning the bachelor's degree, these credit hours can be counted toward the Engineering Management, MS. Prior to registering for these courses, the student must be admitted to the grad track option and obtain approvals from the undergraduate and graduate coordinators.

Admission requirements and program policies

Application requirements

- Mechanical and Energy Engineering, BS major.
- Junior status (must have completed at least 75 credit hours and be ready to enroll in the Senior Design course the following fall semester).
- Minimum cumulative GPA of 3.5 at the time of application submission, with an average grade of 3.5 or higher in Mechanical and Energy Engineering, BS core courses.
- Two letters of recommendation from ME faculty members.
- The student's application will be reviewed by both the ME undergraduate advisor and the ME graduate advisor.
- Once the application is approved by the ME advisors, the student must apply to the Toulouse Graduate School within the first semester of the senior year.

Application procedures

The student must earn a grade of B or higher in each graduate course for the course to be counted toward the master's degree.

- After being admitted to the grad track program and having completed at least 90 credit hours, the student can start taking the specified graduate courses in place of the technical electives in the bachelor's program.
- The student admitted to the grad track option will be admitted into the master's program on a conditional basis.
- Once the student has satisfied all course work for the bachelor's degree and maintained a 3.0 GPA or higher, they will be fully admitted into the master's program.

Program policies

Policies related to completion of programs

- The students accepted to the grad track option should complete all requirements for the bachelor's degree and graduate within 12 months from the beginning of the semester in which they first enrolled in a graduate course. If requirements are not completed within 12 months, enrollment in graduate-level courses will be suspended.
- The student must enroll in the graduate program the long semester after finishing the bachelor's degree and should take the remaining graduate-level courses in the following year(s) to complete the Engineering Management, MS. If the student does not enroll in the graduate program the long semester immediately following completion of the bachelor's degree, the graduate-level courses applied to the undergraduate degree may not be counted toward the Master of Science even if the student returns to UNT for graduate school in the future.

Program requirements

Graduate courses that may be applied to the bachelor's degree should be selected with the approval of the ME undergraduate coordinator and graduate advisor.

Grad track students can take six (6) credit hours of graduate courses from the following Engineering Management, MS core courses that can be used as electives towards their bachelor's degree.

- EMGT 5020-Design of Experiments
- EMGT 5040-Product Reliability and Quality
- EMGT 5050-Project Management for Engineers
- EMGT 5060-Technology Innovation
- EMGT 5070-Management in Human and Societal Development

Additionally, grad-track students can take three (3) credit hours of graduate courses that can be used as elective towards both their bachelor's degree and the Engineering Management, MS degree.

All remaining courses for the Mechanical and Energy Engineering, BS program must be completed.

Mechanical and Energy Engineering, BS with grad track option leading to Materials Science and Engineering, MS

Admission requirements

Students applying to the grad track option should be majors in the Mechanical and Energy Engineering, BS program. Students are eligible to apply to the grad track option during their junior year, after completing at least 75 credit hours. Other requirements include:

- A cumulative GPA of 3.5 or higher is required at the time of application
- A personal statement, curriculum vitae and two letters of recommendation from materials science and engineering faculty members

The student's application will be reviewed by both undergraduate and graduate advisors in the respective BS and MS programs. Once approved, the student must apply to the Toulouse Graduate School within the first semester of their senior year.

Program policies

After completing at least 90 credit hours and after authorization from undergraduate and graduate advisors, the student may begin taking graduate courses as electives for the BS requirements. Students should earn a B or higher in these graduate courses to be counted toward the MS degree.

Students admitted to the grad track option will be admitted to the MS on a conditional basis. Once the student has satisfied all course work for the BS degree and maintained a GPA of 3.0 or higher, they will be fully admitted to the MS program with all the rights and privileges of a graduate student.

The student must enroll in the graduate school in the long semester after finishing the BS degree and should take the remaining graduate courses in the following year(s) to complete the MS degree. If the student does not enroll in the graduate school in the long semester after finishing the BS degree, those graduate course credit hours will not be counted for the MS degree, even if the student comes back for graduate school in the future.

The student will be awarded the BS degree immediately upon successful completion of the requirements for the undergraduate degree.

Program requirements

Students in the grad track option may choose 9 hours from the following graduate-level courses to replace electives in the BS degree with the approval of the undergraduate coordinator and advisor in the Department of Mechanical Engineering and the graduate coordinator in the Department of Materials Science and Engineering.

- BMEN 5324 – Applications of Biomedical MEMS
- CSCE 5210 – Fundamentals of Artificial Intelligence
- CSCE 5215 – Machine Learning
- CSCE 5380 – Data Mining
- MEEN 5140 – Advanced Mathematical Methods for Engineers
- MEEN 5300 – Advanced Thermodynamics
- MEEN 5310 – Conduction and Radiation Heat Transfer
- MEEN 5440 – Finite Element Analysis
- MEEN 5520 – Advanced Manufacturing
- MEEN 5610 – Sensors and Actuators
- MTSE 5000 – Thermodynamics of Materials

- MTSE 5010 – Bonding, Structure, and Crystallography
- MTSE 5020 – Mechanical Properties of Materials
- MTSE 5070 – Tribology of Materials
- MTSE 5100 – Fundamental Concepts of Materials Science
- MTSE 5200 – Advanced Concepts of Metallurgical Science
- MTSE 5210 – Corrosion and Oxidation of Materials
- MTSE 5300 – Science and Technology of Modern Ceramics
- MTSE 5400 – Advanced Polymer Physics and Chemistry
- MTSE 5500 – Electronic, Optical, and Magnetic Materials
- MTSE 5520 – Physical and Chemical Based Integrated Circuit Fabrication
- MTSE 5550 – Materials and Mechanics for MEMS Devices
- MTSE 5560 – Compound Semiconductor Materials and Devices
- MTSE 5600 – Materials Characterization
- MTSE 5610 – Fundamentals of Surface Thin Film Analysis
- MTSE 5620 – Scanning Electronic and Ion Microscopy
- MTSE 5710 – Computational Materials Science

If the student wishes to take other graduate courses to satisfy the grad track option requirements, he or she will need to obtain approval from both the undergraduate advisor in Mechanical Engineering and graduate advisor in Materials Science and Engineering. Students should earn a B or higher in these courses in order to be counted toward the MS degree.

All remaining courses for the Mechanical and Energy Engineering, BS must be completed according to the catalog.

Mechanical and Energy Engineering, BS with grad track option leading to Mechanical and Energy Engineering, MS

In this grad track option, the Mechanical and Energy Engineering, BS student can take a maximum of nine (9) credit hours of graduate courses while completing the bachelor's degree. After earning the bachelor's degree, these credit hours can be counted toward the Mechanical and Energy Engineering, MS. Prior to registering for these courses, the student must be admitted to the grad track option and obtain approvals from the undergraduate and graduate coordinators.

Admission requirements and program policies

Application requirements

- Mechanical and Energy Engineering, BS major.
- Junior status (must have completed at least 75 credit hours and be ready to enroll in the Senior Design course the following fall semester).
- Minimum cumulative GPA of 3.3 at the time of application submission, with an average grade of 3.5 or higher for MEEN core courses (MEEN 2210, MEEN 3110, MEEN 3120, MEEN 3250).
- Two letters of recommendation from ME faculty members.
- The student's application will be reviewed by both the ME undergraduate advisor and the ME graduate advisor.
- Once the application is approved by the ME advisors, the student must apply to the Toulouse Graduate School within the first semester of the senior year.

Application procedures

The student must earn a grade of B or higher in each graduate course for the course to be counted toward the master's degree.

- After being admitted to the grad track program and having completed at least 90 credit hours, the student can start taking the specified graduate courses in place of the technical electives or energy electives in the bachelor's program.
- The student admitted to the grad track option will be admitted into the master's program on a conditional basis.
- Once the student has satisfied all course work for the bachelor's degree and maintained a 3.0 GPA or higher, they will be fully admitted into the master's program.

Program policies

Policies related to completion of programs

- The students accepted to the grad track option should complete all requirements for the bachelor's degree and graduate within 12 months from the beginning of the semester in which they first enrolled in a graduate course. If requirements are not completed within 12 months, enrollment in graduate-level courses will be suspended.
- The student must enroll in the graduate program the long semester after finishing the bachelor's degree and should take the remaining graduate-level courses in the following year(s) to complete the Mechanical and Energy Engineering, MS. If the student does not enroll in the graduate program the long semester immediately following completion of the bachelor's degree, the graduate-level courses applied to the undergraduate degree may not be counted toward the Master of Science even if the student returns to UNT for graduate school in the future.

Program requirements

Graduate courses that may be applied to the bachelor's degree should be selected with the approval of the ME undergraduate coordinator and graduate advisor.

Grad track students can take six (6) credit hours of graduate courses from the following Mechanical and Energy Engineering, MS core courses that can be used as electives towards their bachelor's degree.

- MEEN 5140 - Advanced Mathematical Methods for Engineers
- MEEN 5410 - Advanced Solid Mechanics
- MEEN 5520 - Manufacturing Concepts for Mechanical Engineers
- MEEN 5440 - Finite Element Analysis
- MEEN 5600 - Feedback Control of Dynamic Systems
- MEEN 5740 - Robotics and Automation
- MEEN 5610 - Sensors and Actuators
- MEEN 5300 - Advanced Thermodynamics
- MEEN 5311 - Convective Heat Transfer II
- MEEN 5340 - Advanced Fluid Mechanics
- MEEN 5000 - Energy: The Fundamentals
- MEEN 5110 - Renewable Energy
- MEEN 5150 - Thermal Energy Storage Systems and Applications

Additionally, grad-track students can take three (3) credit hours of graduate courses that can be used as elective toward both their bachelor's degree and the Mechanical and Energy Engineering, MS degree.

All remaining courses for Mechanical and Energy Engineering, BS must be completed.

Mechanical and Energy Engineering, BS with grad track option leading to Mechanical and Energy Engineering, PhD

The following is the step-by-step process:

1. Students apply for the grad track with the BS to PhD grad track option in the junior year (having completed at least 75 credit hours with a GPA of 3.5 or higher).
2. After the application is approved and have completed at least 90 credit hours, the student can start taking the graduate courses that are approved for grad track with the BS to PhD grad track option as MEE electives for the BS degree requirement. For the graduate courses to be counted for the PhD degree later, the student must meet the minimum grade requirements of the courses in the PhD program.
3. The student applies to the Toulouse Graduate School within the first semester of the senior year. The student needs to submit an online application and all required documents for admission to the PhD in MEE program.
4. The student must enroll in graduate school in the long semester after finishing his/her BS degree and should take the remaining graduate courses in the following year(s) to complete his/her PhD degree. If the student did not enroll in graduate school in the long semester after finishing his/her BS degree, those graduate course credit hours will no longer be counted for the PhD degree, even if the student comes back for graduate school in the future.
5. Students in the BS-to-MS grad track option can apply to transfer to the BS-to-PhD grad track option any time with departmental approval.
6. TGS will be consulted for cases when students enrolled in the BS program with the BS-to-MS grad track option are transferred to the program with the BS-to-PhD grad track option.
7. Once admitted to the PhD program, the student will have higher priority for funding (research and teaching assistantships) to support PhD study.

Program requirements

Students may choose up to 12 hours from the following list of courses.

1. Materials and Manufacturing (Material Reliability and Manufacturing)

Required core courses

- MEEN 5410 - Advanced Solid Mechanics
- MEEN 5520 - Advanced Manufacturing (or Bioproducts or Automotive Manufacturing)
- MEEN 5800 - Topics in Mechanical and Energy Engineering
- MTSE 5100 - Fundamental Concepts of Materials Science or MEEN 5440 Finite Element Analysis

Electives

- MEEN 5152 - Mechanics of Composites and Foams for Lightweight Energy Efficient Structures
- MEEN 5440 - Finite Element Analysis
- MEEN 6050- Continuum Mechanics
- MTSE 5020 - Mechanical Properties of Materials
- MTSE 5400 - Advanced Polymer Physics and Chemistry
- MTSE 5550 - Materials and Mechanics for MEMS Devices
- MTSE 5710 - Computational Materials Science
- MTSE 6110 - Applied Fracture Mechanics

2. Mechanical Systems and Design

Required core courses

- MEEN 5140 - Advanced Mathematical Methods for Engineers
- MEEN 5410 - Advanced Solid Mechanics
- MEEN 5600 - Feedback Control of Dynamic Systems

- MEEN 5640 - Applied Engineering Vibration* (Cross listed as MFET 5140)

Electives

- MEEN 5152 - Mechanics of Composites and Foams for Lightweight Energy Efficient Structures
- MEEN 5440 - Finite Element Analysis
- MEEN 5610 - Sensors and Actuators
- MEEN 5800 - Topics in Mechanical and Energy Engineering: Experimental Design
- MEEN 5800 - Topics in Mechanical and Energy Engineering: Geothermal Heat Pumps
- MEEN 6200 - Theory of Elasticity
- MTSE 6110 - Applied Fracture Mechanics

3. Modeling and Simulation

Required core courses

- MEEN 5140 - Advanced Mathematical Methods for Engineers
- MEEN 5220 - Computational Fluid Dynamics and Heat Transfer*
- MEEN 5440 - Finite Element Analysis
- MEEN 6000 - Advanced Numerical Methods (or MTSE 5710 or CSCE 5230)

Electives

- CSCE 5160 - Parallel Processing and Algorithms
- CSCE 5230 - Methods of Numerical Computation
- CSCE 5420 - Software Development
- CSCE 5810 - Biocomputing
- MEEN 5311 - Convection Heat Transfer II*
- MEEN 5340 - Advanced Fluid Mechanics*
- MEEN 5410 - Advance Solid Mechanics
- MEEN 5420 - Continuum Mechanics**
- MEEN 5315 - Nanoscale Energy Transport
- MTSE 5710 - Computational Materials Science**

Note: Every student under the Modeling and Simulation track will pick from electives a group of courses either in the area of mechanics (**) or in the area of thermal-fluid sciences (*), or both.

4. Thermal-Fluid Systems

Required core courses

- MEEN 5140 - Advanced Mathematical Methods for Engineers
- MEEN 5300 - Advanced Thermodynamics
- MEEN 5311 - Convective Heat Transfer II
- MEEN 5340 - Advanced Fluid Mechanics

Electives

- MEEN 5000 - Energy: The Fundamentals
- MEEN 5110 - Renewable Energy
- MEEN 5200 - Principles of HVAC
- MEEN 5220 - Computational Fluid Dynamics and Heat Transfer
- MEEN 5310 - Conduction and Radiation Heat Transfer
- MEEN 5315 - Nanoscale Energy Transport
- MEEN 5330 - Combustion Science and Engineering

- MEEN 5800 - Topics in Mechanical and Energy Engineering: Geothermal Heat Pumps

5. Energy

Required core courses

- MEEN 5000 - Energy: The Fundamentals
- MEEN 5110 - Renewable Energy
- MEEN 5140 - Advanced Mathematical Methods for Engineers
- MEEN 5800 - Energy Harvesting

Electives

- BIOL 6341 - Advanced Environmental Impact Assessment
- EENG 5940 - Advanced Topics in Electrical Engineering
- MEEN 5112 - Nuclear Energy
- MEEN 5150 - Thermal Energy Storage Systems and Applications
- MEEN 5200 - Principles of HVAC
- MEEN 5210 - Solar Energy
- MEEN 5240 - Energy: A World Perspective
- MEEN 5310 - Conduction and Radiation Heat Transfer
- MEEN 5330 - Combustion Science and Engineering
- MEEN 5332 - Air Pollution Control Engineering
- MEEN 5800 - Topics in Mechanical and Energy Engineering: Geothermal Heat Pumps

All remaining courses for the Mechanical and Energy Engineering, BS must be completed.

Mechanical Engineering Technology, BSET with grad track option leading to Biomedical Engineering, MS

Admission requirements

1. Student should be a major in the UNT Mechanical Engineering Technology, BSET program.
2. Students can apply for the grad track option his/her junior year (following completion of at least 75 credit hours; a benchmark is if the student is ready for Senior Design in the following fall semester).
3. Minimum of 3.5 or higher cumulative GPA required at the time of application submission, with a minimum GPA of 3.5.
4. The student should provide two recommendation letters from faculty members with their application.
5. Application will be reviewed by both the undergraduate advisor in Mechanical Engineering and graduate advisor in Biomedical Engineering.
6. Once approved by the respective advisors, the student must apply to the Toulouse Graduate School within the first semester of the senior year.

Program policies

1. After being admitted to the grad track program and completion of at least 90 credit hours, the student can start taking the graduate courses as technical electives for the BS degree requirement. For the graduate courses to be counted for the MS degree, the student should get a B or above for the courses.
2. The student in the grad track program will be advised and monitored by both the undergraduate coordinator (prior to completion of the BS) and the graduate advisor (after completion of the BS).
3. The student should choose a major research advisor in the semester that the student begins taking graduate courses.

4. There will be an annual review of each student's academic progress in meeting both bachelor's and master's degree requirements. If the student fails to meet degree requirements, the student will be placed in a probationary period for one semester. If the student continues to not meet the degree requirements in the probationary period, the student will be expelled from the grad track program (they will still be in the general biomedical engineering BS program if all general biomedical engineering BS degree requirements are met).
5. Undergraduate students who have been accepted to a grad track option should complete all of their bachelor's degree requirements and graduate within 12 months of the first day of the semester in which they begin taking graduate courses or enrollment in graduate level course work will be suspended.
6. The students admitted to the grad track option will be admitted into the MS program on a conditional basis. Once the student has satisfied all course work for the BS degree and maintained a 3.0 or higher GPA, they will be fully admitted to the MS program.
7. The student must enroll in graduate school in the long semester after finishing their BS degree and should take the remaining graduate courses in the following years to complete his/her biomedical engineering master's degree. If the student did not enroll in graduate school in the long semester after finishing his/her BS degree those graduate course credit hours will not be counted toward the MS degree, even if the student comes back for graduate school in the future.

Program requirements

The student is required to take three of the courses listed below in the fourth year of their bachelor's degree program. The following courses may apply to the grad track, with approval from the undergraduate and graduate coordinators from the respective programs.

- BMEN 5007 - Research Methods in Biomedical Engineering (BMEN 4007 - Biomedical Experimental Design and Data Analysis)
- BMEN 5310 - Clinical Instrumentation (BMEN 4311 - Biomedical Instrumentation II)
- BMEN 5313 - Bioengineering of Cellular Systems (BMEN 4313 - Cellular Engineering)
- BMEN 5314 - Advanced Tissue Engineering and Regenerative Medicine (BMEN 4314 - Tissue Engineering)
- BMEN 5315 - Computational Methods in Biomedical Engineering (BMEN 4310 - Biomedical Modeling)
- BMEN 5319 - Cardiovascular Fluid Dynamics (BMEN 4319 - Cardiovascular Flows)
- BMEN 5323 - Advanced Biomedical Optics (BMEN 4321 - Biophotonics)
- BMEN 5325 - Biomedical Nanotechnology Compatibility (BMEN 4325 - Biomedical Nanotechnology)
- BMEN 5326 - Biomolecular Engineering (BMEN 4326 - Principles of Biomolecular Engineering)
- CSCE 5050 – Applications of Cryptography
- CSCE 5200 – Information Retrieval and Web Search
- CSCE 5210 – Fundamentals of Artificial Intelligence
- CSCE 5215 – Machine Learning
- CSCE 5220 – Computer Graphics
- CSCE 5225 – Digital Image Processing
- CSCE 5290 – Natural Language Processing
- CSCE 5350 – Fundamentals of Database Systems
- CSCE 5380 – Data Mining
- CSCE 5400 – Formal Languages, Automata, and Computability
- CSCE 5430 – Software Engineering
- CSCE 5450 – Programming Languages
- CSCE 5460 – Software Testing and Empirical Methodologies
- CSCE 5510 – Wireless Communications
- CSCE 5520 – Wireless Networks and Protocols
- CSCE 5550 – Introduction to Computer Security
- CSCE 5555 – Computer Forensics
- CSCE 5560 – Secure Electronic Commerce

- CSCE 5585 – Network Security
- CSCE 5610 – Computer System Architecture
- CSCE 5620 – Real-Time Operating Systems
- CSCE 5650 – Compiler Design
- CSCE 5655 – Principles of Compiler Optimization
- CSCE 5730 – Digital CMOS VLSI Design
- CSCE 5810 – Bioinformatics Algorithms
- CSCE 5820 – Advances in Bioinformatics
- EENG 5310 – Control Systems Design
- EENG 5320 – Systems Modeling and Simulation
- EENG 5520 – Design and Testing of Digital Systems
- EENG 5530 – Analog Integrated Circuit Design
- EENG 5610 – Digital Signal Processing
- EENG 5810 – Digital Communications
- MEEN 5000 – Energy: The Fundamentals
- MEEN 5110 – Renewable Energy
- MEEN 5112 – Nuclear Energy
- MEEN 5140 – Advanced Mathematical Methods for Engineers
- MEEN 5150 – Thermal Energy Storage System and Applications
- MEEN 5152 – Mechanics of Composites and Foams for Lightweight Energy Efficient Structures
- MEEN 5220 – Computational Fluid Dynamics and Heat Transfer
- MEEN 5300 – Advanced Thermodynamics
- MEEN 5310 – Conduction and Radiation Heat Transfer
- MEEN 5311 – Convection of Heat Transfer II
- MEEN 5315 – Nanoscale Energy Transport
- MEEN 5330 – Combustion Science and Engineering
- MEEN 5332 – Air Pollution Control Engineering
- MEEN 5340 – Advanced Fluid Mechanics
- MEEN 5410 – Advanced Solid Mechanics
- MEEN 5440 – Finite Element Analysis
- MEEN 5510 – Manufacturing Process for Biocomposites
- MEEN 5520 – Advanced Manufacturing
- MEEN 5600 – Feedback Control of Dynamical Systems
- MEEN 5610 – Sensors and Actuators
- MEEN 5640 – Applied Engineering Vibrations
- MEEN 5800 – Topics in Mechanical and Energy Engineering
- MSET 5020 – Design of Experiments
- MSET 5030 – Product Design and Development
- MSET 5040 – Analytical Methods in Engineering Technology
- MSET 5120 – Computer-Integrated Manufacturing
- MSET 5150 – Applications of Electron Microscopy and Failure Analysis
- MSET 5160 – Creep and Fatigue in Engineering Design and Systems Performance
- MSET 5200 – Advanced Construction Scheduling
- MSET 5220 – Building Information Modeling
- MSET 5230 – Risk Management in Construction
- MSET 5800 – Studies in Engineering Technology
- MTSE 5000 – Thermodynamics of Materials

- MTSE 5010 – Bonding, Structure, and Crystallography
- MTSE 5020 – Mechanical Properties of Materials
- MTSE 5070 – Tribology of Materials
- MTSE 5100 – Fundamental Concepts of Materials Science
- MTSE 5200 – Advanced Concepts of Metallurgical Science
- MTSE 5210 – Corrosion and Oxidation of Materials
- MTSE 5300 – Science and Technology of Modern Ceramics
- MTSE 5400 – Advanced Polymer, Physics, and Chemistry
- MTSE 5500 – Electronic, Optical, and Magnetic Materials
- MTSE 5520 – Physical and Chemical Based Integrated Circuit Fabrication
- MTSE 5550 – Materials and Mechanics for MEMS Devices
- MTSE 5560 – Compound Semiconductor Materials and Devices
- MTSE 5600 – Materials Characterization
- MTSE 5610 – Fundamentals of Surface Thin Film Analysis
- MTSE 5620 – Scanning Electron and Ion Microscopy
- MTSE 5710 – Computational Materials Science

All remaining courses required for the Mechanical Engineering Technology, BSET must also be completed. Other graduate courses may be applied to the Mechanical Engineering Technology, BSET and Biomedical Engineering, MS with consent of the departments.

Mechanical Engineering Technology, BSET with grad track option leading to Engineering Management, MS

In this grad track option, the Mechanical Engineering Technology, BSET student can take a maximum of nine (9) credit hours of graduate courses while completing the bachelor's degree. After earning the bachelor's degree, these credit hours can be counted toward the Engineering Management, MS. Prior to registering for these courses, the student must be admitted to the grad track option and obtain approvals from the undergraduate and graduate coordinators.

Admission requirements and program policies

Application requirements

- Mechanical Engineering Technology, BSET major.
- Junior status (must have completed at least 75 credit hours and be ready to enroll in the Senior Design course the following fall semester).
- Minimum cumulative GPA of 3.5 at the time of application submission, with an average grade of 3.5 or higher in Mechanical Engineering Technology, BSET core courses.
- Two letters of recommendation from ME faculty members.
- The student's application will be reviewed by both the ME undergraduate advisor and the ME graduate advisor.
- Once the application is approved by the ME advisors, the student must apply to the Toulouse Graduate School within the first semester of the senior year.

Application procedures

The student must earn a grade of B or higher in each graduate course for the course to be counted toward the master's degree.

- After being admitted to the grad track program and having completed at least 90 credit hours, the student can start taking the specified graduate courses in place of the technical electives in the bachelor's program.

- The student admitted to the grad track option will be admitted into the master's program on a conditional basis.
- Once the student has satisfied all course work for the bachelor's degree and maintained a 3.0 GPA or higher, they will be fully admitted into the master's program.

Program policies

Policies related to completion of programs

- The students accepted to the grad track option should complete all requirements for the bachelor's degree and graduate within 12 months from the beginning of the semester in which they first enrolled in a graduate course. If requirements are not completed within 12 months, enrollment in graduate-level courses will be suspended.
- The student must enroll in the graduate program the long semester after finishing the bachelor's degree and should take the remaining graduate-level courses in the following year(s) to complete the Engineering Management, MS. If the student does not enroll in the graduate program the long semester immediately following completion of the bachelor's degree, the graduate-level courses applied to the undergraduate degree may not be counted toward the Master of Science even if the student returns to UNT for graduate school in the future.

Program requirements

Graduate courses that may be applied to the bachelor's degree should be selected with the approval of the ME undergraduate coordinator and graduate advisor.

Grad track students can take six (6) credit hours of graduate courses from the following Engineering Management, MS core courses that can be used as electives towards their bachelor's degree.

- EMGT 5020-Design of Experiments
- EMGT 5040-Product Reliability and Quality
- EMGT 5050-Project Management for Engineers
- EMGT 5060-Technology Innovation
- EMGT 5070-Management in Human and Societal Development

Additionally, grad-track students can take three (3) credit hours of graduate courses that can be used as elective towards both their bachelor's degree and the Engineering Management, MS degree.

All remaining courses for the Mechanical Engineering Technology, BSET program must be completed.

Minors

Construction Management minor

Students are required to take 18 semester hours (6 advanced) from the approved course list.

Required courses, 6 hours

- CNET 1160 - Construction Methods and Materials
- CNET 2180 - Building Construction Techniques

Plus 12 hours from:

- CNET 2300 - Construction Graphics and Modeling
- CNET 3150 - Construction Contract Documents
- CNET 3160 - Construction Cost Estimating
- CNET 3190 - Construction Scheduling
- CNET 3410 - Occupational Safety and Liability
- CNET 4170 - Construction Management
- CNET 4180 - Problems in Project Management
- CNET 4190 - Quality Management in Construction
- CNET 4630 - Construction Management for Mechanical, Electrical and Plumbing (MEP) Systems

General Engineering Technology minor

The minor in general engineering technology requires 18 semester hours (6 advanced), chosen with approval of the engineering technology department chair.

Contact the Department of Mechanical Engineering for information on pre-approved minors in construction, electronics, mechanical and nuclear engineering technology.

Mechanical and Energy Engineering minor

The minor in mechanical and energy engineering requires a total of 18 semester credit hours.

Required courses, 9 hours

- MEEN 2210 - Thermodynamics I
- MEEN 2302 - Mechanics II
or
- ENGR 2302 - Dynamics
- MEEN 2332 - Mechanics III
or
- ENGR 2332 - Mechanics of Materials

Additional courses, 9 hours

Chosen from the following:

- MEEN 3100 - Manufacturing Processes
- MEEN 3110 - Thermodynamics II
- MEEN 3120 - Fluid Mechanics
- MEEN 3130 - Machine Elements
- MEEN 3210 - Heat Transfer
- MEEN 3230 - System Dynamics and Control
- MEEN 3240 - Mechanical and Energy Engineering Laboratory I
- MEEN 3242 - Mechanical and Energy Engineering Laboratory II
- MEEN 4110 - Renewable Energy
- MEEN 4140 - Finite Element Analysis

- Or other 3000- or 4000-level MEEN courses with the approval of MEEN undergraduate advisor

Certificates

Energy Assessment of Buildings professional certificate

This professional certificate program provides both traditional students and practicing professionals with a learning experience that enhances their capabilities in building energy assessment. The program focuses on both basic engineering science and practical applications of building energy assessment methods. The program will help students gain knowledge required towards certification for a building energy modeling professional by ASHRAE, AEE or other professional organizations. Interested applicants must contact the department chairperson or the coordinator prior to registering for the program.

The certificate will be awarded to students who successfully demonstrate competency in the following courses (some of which may require prerequisites or permission of the program coordinator):

Required courses, 15 hours

- MEEN 3220 - Thermal-Fluid Science for Buildings
- MEEN 4320 - Building Energy Systems
- MEEN 4335 - Computational Simulation of Building Energy Systems
- MEEN 4340 - Energy Efficiencies and Green Building Design for Commercial Buildings
- MEEN 4350 - Energy Efficiencies and Green Building for Residential Buildings

Undergraduate Academic Certificates

Electromechanical Systems and Mechatronics certificate

Electromechanical systems and mechatronics covers from basic circuits topic to controls.

Students who receive this certificate will have fundamental knowledge in controlling electromechanical systems. The certificate will be administered by the College of Engineering and is open to all majors on campus.

Requirements, 12 hours

Students will need to complete 4 of the following courses to receive the certificate:

- EENG 2620 - Signals and Systems
- EENG 3510 - Electronics I (Devices and Materials)
- EENG 3520 - Electronics II
- EENG 4310 - Control Systems Design
- MEEN 2302 - Mechanics II
- MEEN 3130 - Machine Elements
- MEEN 3230 - System Dynamics and Control
- MEEN 4760 - Introduction to Robotics and Automation

Manufacturing Engineering Technologies certificate

Certificate requirements, 15 hours

Required courses

- MFET 3110 - Machining Principles and Processes
- MFET 4190 - Quality Assurance
- MFET 4200 - Engineering Cost Analysis
- MFET 4210 - CAD/CAM System Operations

Electives

Select one elective out of the following four courses:

- MEET 3550 - Geometrical Dimensioning and Tolerancing
- MEET 3750 - Digital Manufacturing
- MEET 4100 - Fundamentals of Product and Process Design Development
- MFET 4220 - CNC Programming and Operation

Nicole Dash, Dean

Jody Sundt, Academic Associate Dean
Tristan Wu, Associate Dean for Research

Faculty

The College of Health and Public Service is composed of seven academic departments and several centers and community-based programs. Undergraduate and graduate degree programs focus primarily on applied behavioral and professional disciplines. Degree programs are designed to integrate theory and practice and include a strong emphasis on student participation in the Dallas–Fort Worth region and beyond. Graduates are prepared to address diverse and complex social issues such as aging, disability, disaster management and recovery, criminal justice, health disparities and public safety, and find solutions to challenges in public administration, public health, and urban design. We have seven academic departments with undergraduate and graduate programs, the Center for Public Management, the UNT Speech and Hearing Center, UNT WISE, UNT ELEVAR and several professional development and clinical training programs to facilitate careers to address a global society. Further information on graduate degrees is available in the Graduate Catalog.

HPS students are trained to lead nonprofits, become educators, researchers and professionals who strengthen the diverse communities we serve, with thoughtful, inclusive, and equitable practices as audiologists, behavior analysts, city managers, emergency managers, health care administrators, public safety administrators, public health specialists, rehabilitation counselors, speech language pathologists, social workers, urban planners and more.

Fields of study include alternative dispute resolution, audiology, behavior analysis, criminal justice, emergency administration and planning, gerontology, nonprofit studies, public administration, public health, rehabilitation, social work, speech-language pathology, and urban policy and planning.

Degree programs in the College of Health and Public Service require specific courses contained in parts of the University Core Curriculum (see University Core Curriculum in the Academic policies section of this catalog) to satisfy degree requirements. Students may consult academic advisors for a list of required courses. Students may be required to take extra courses if they fail to take these courses.

Academic advising

Students who select a major leading to an undergraduate degree within the College of Health and Public Service should contact HPS Undergraduate Advising to schedule an appointment at hps.unt.edu/advising.

Advisors help students select courses and answer questions concerning degree plans, application of transfer credit, individual career needs, and general academic requirements, policies, and procedures.

Programs of study

The college offers undergraduate programs in the following areas:

- Bachelor of Arts
- Bachelor of Science
- Bachelor of Social Work

Degree requirements and the University Core Curriculum

Occasionally a course required for a degree may also satisfy a requirement of the University Core Curriculum. In addition to taking the required course, a student may elect to take a different course from among those available to fulfill that core requirement; doing so, however, may add to the total number of hours required for the degree. Students who have questions regarding degree requirements and core requirements should consult an academic advisor.

Bachelor of Arts

Candidates for the Bachelor of Arts must meet the following requirements:

1. Hours required and general/college requirements: a minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Arts degree as specified in the University Core Curriculum in the Academics section of this catalog and the College of Health and Public Service requirements.
2. Major requirements: completion of all requirements for a major as specified by the respective department.
3. Other course requirements: see individual program.
4. Minor requirements: completion of all requirements for a minor as specified by the respective department.
5. Electives: varies with individual program. Any approved UNT courses the student and advisor deem appropriate to the degree may be selected. Caution must be exercised to ensure the student fulfills the university requirement of 42 hours of advanced-level course work.
6. Other requirements: at least 24 hours of upper-division work in residence.

Bachelor of Science

Requirements for the Bachelor of Science degree include the following:

1. Hours required and general/college requirements: a minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Science degree as specified in the University Core Curriculum in the Academics section of this catalog and the College of Health and Public Service requirements.
2. Major requirements: completion of all requirements for a major as specified by the respective department.
3. Other course requirements: see individual program.
4. Minor requirements: a minor, where required, of not fewer than 18 hours, including 6 hours of advanced work.
5. Electives: varies with individual program. Any approved UNT courses the student and advisor deem appropriate to the degree may be selected. Caution must be exercised to ensure the student fulfills the university requirement of 42 hours of advanced-level course work.
6. Other requirements: at least 24 hours of upper-division work in residence.

Bachelor of Social Work

Requirements for the Bachelor of Social Work degree include the following:

1. Hours required and general/college requirements: a minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Social Work degree as specified in the University Core Curriculum in the Academics section of this catalog and the College of Public Affairs and Community Service requirements.
2. Major requirements: completion of all requirements for a major as specified by the respective department.
3. Other course requirements: see individual program.
4. Minor requirements: completion of all requirements for a minor as specified by the respective department.
5. Electives: any approved UNT courses the student and advisor deem appropriate to the degree may be selected. Caution must be exercised to ensure the student fulfills the university requirement of 42 hours of advanced-level course work.
6. Other requirements: at least 24 hours of upper-division work in residence.

Department of Audiology and Speech-Language Pathology

Main Departmental Office
907 W. Sycamore

Erin C. Schafer, Chair

Faculty

The disciplines of audiology and speech-language pathology emphasize the scientific study of human auditory-verbal communication with reference to disorders involving hearing, language and speech. The emphasis of the department is to provide an educational and research setting where students learn models and theories of normal communicative function and appropriate rationale, techniques and procedures for the evaluation and management of people with hearing, language and speech disorders.

In addition to classroom instruction in the area of normal and disordered communication, the department maintains a clinical facility for students to acquire practical observation and experience through clinical services offered to clients by the UNT Speech and Hearing Center. Concomitant research labs are integral to the learning process of students.

Programs of study

Programs offered by the department are listed below.

The BS degree in audiology and speech-language pathology offers an avenue for students to obtain licensure in Texas as an assistant in audiology or assistant in speech-language pathology and pursue graduate degrees in speech-pathology, audiology or other health professions, including teaching, psychology, medicine, gerontology, etc. An assistant has a limited scope of practice and is under the supervision of a licensed and certified speech-language pathologist or audiologist. The master's degree in speech-language pathology is required for licensure in Texas and for clinical certification by the American Speech-Language-Hearing Association (ASHA) to practice as a speech-language pathologist. A doctoral degree in audiology is required for licensure in Texas and for clinical certification by ASHA to be an audiologist.

The program provides basic preparation in the normal development and functioning of speech, language and hearing, and introductory courses concerned with communication disorders. Undergraduates are introduced to the clinical aspects of speech-

language pathology and audiology through course work, clinical experiences and laboratory work at the University of North Texas Speech and Hearing Center. All course selections must be approved by an undergraduate advisor or the department chair.

UNT Speech and Hearing Center

The UNT Speech and Hearing Center is open throughout the year for services to all UNT students and the public. The center provides professional evaluation and remediation of disorders of articulation, fluency, language and voice. Services also include hearing testing, fitting hearing aids and hearing protection devices, and aural rehabilitation for persons with hearing loss or other auditory disorders.

Based on the availability of clinical supervisory personnel and clinic scheduling options at the time of service requests, hearing screenings as well as assessment and treatment services for speech and language disorders are provided free of charge to full-time UNT students with any one or combination of the following disorders: articulation and speech production, fluency, language-learning disability, receptive and expressive language ability, cognitive communication, social-pragmatic language, swallowing, voice. Services are also provided for students desiring to improve English competency skills and UNT transgender students requesting guidance and direct training for voice and communication modifications.

Majors

Audiology and Speech-Language Pathology, BS

A Bachelor of Science with a major in audiology/speech-language pathology gives a person the skills needed to assess and treat people with speech, language and hearing disorders, through a curriculum centered on practical experience.

Degree requirements

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Science degree as specified in the "University Core Curriculum" in the Academics section of this catalog.

Major requirements, 39 hours

Completion of at least 39 hours including:

- ASLP 2015 - Nature of Communication Disorders *
- ASLP 2020 - Phonetics *
- ASLP 3010 - Clinical Methods in Audiology and Speech-Language Pathology I
- ASLP 3025 - Anatomical Bases of Speech and Hearing
- ASLP 3030 - Speech and Hearing Sciences
- ASLP 3035 - Language Development
- ASLP 3040 - Introduction to Audiology
- ASLP 4035 - Speech Sound Disorders
- ASLP 4040 - Introduction to Language Disorders
- ASLP 4045 - Basic Rehabilitative Audiology
- ASLP 4050 - Neurological Bases of Speech and Hearing
- ASLP 4060 - Clinical Methods in Audiology and Speech-Language Pathology II
- ASLP 4070 - Topics in Speech-Language Pathology and Audiology

Other course requirements

The following courses must be completed with a grade of C or better before enrolling in ASLP 3030 and the subsequent numbered courses and each course may only be retaken once.

- MATH 1680 - Elementary Probability and Statistics
- BIOL 1112 - Contemporary Biology
- PHYS 1270 - Science and Technology of Musical Sound
or
- PHYS 1315 - Introduction to the World of Physics

Additional requirements

Laboratory science, 3–4 hours in addition to the University Core Curriculum

Choose one from the following:

- BIOL 2301 - Human Anatomy and Physiology I and
- BIOL 2311 - Human Anatomy and Physiology I Laboratory
or
- CHEM 1360 - Context of Chemistry

Foreign language

Attain 2040 and 2050 level in one foreign language or pass appropriate proficiency exams through the Department of World Languages, Literatures and Cultures (Arabic, American Sign Language, Chinese, French, German, Hebrew, Italian, Japanese, Latin, Portuguese, Russian or Spanish).

18 additional hours

Students majoring in audiology and speech-language pathology are required to complete 18 hours outside of the department. Students may elect one of the following:

- a. A minor of at least 18 hours, including at least 6 advanced hours;
- b. 18 hours, including 9 advanced, selected from two or more departments outside the Department of Audiology and Speech-Language Pathology (selected in consultation with the student's faculty advisor); or
- c. Choose one of the following interdisciplinary specializations totaling 18 hours:

Global disorders

- ANTH 4200 - Health, Healing and Culture: Medical Anthropology
- EDSP 3210 - Educational Aspects of Exceptional Learners
- PSYC 3620 - Developmental Psychology
- PSYC 4620 - Child Psychopathology
- RHAB 3100 - Disability and Society
- RHAB 4200 - Physical and Psychosocial Aspects of Disability

Child

- BEHV 2300 - Behavior Principles I
- HDFS 2033 - Parenting
- HDFS 3123 - Child Development for Non-Majors
- PSYC 3620 - Developmental Psychology
- PSYC 4620 - Child Psychopathology
- RHAB 3000 - Active Listening in the Helping Professions

Adult

- ANTH 4200 - Health, Healing and Culture: Medical Anthropology
- PSYC 3480 - Adult Development and Aging
- RHAB 3000 - Active Listening in the Helping Professions
- RHAB 3100 - Disability and Society
- SOCI 1510 - Introduction to Sociology
- SOCI 4550 - Sociology of Aging

Lifespan

- AGER 4800 - The Social Context of Aging: Global Perspectives
- HDFS 3113 - Infant and Child Development
- HDFS 3123 - Child Development for Non-Majors
- HDFS 4133 - Adolescence and Emerging Adulthood
- SOCI 1510 - Introduction to Sociology
- SOCI 4550 - Sociology of Aging

Health Professions Student Certificate

Students choosing to complete the Health Professions Student Development certificate complete 18 hours of courses and the other requirements as detailed in the certificate requirements.

See the ASLP advisor in the HPS advising office for specific instructions on completing the requirements.

Minor

See "Additional Requirements" above.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information see an academic advisor in the College of Health and Public Service.

Other requirements

Major should be declared and degree audit prepared with the ASLP Advisor in the HPS Advising Office.

To graduate with a major in audiology and speech-language, a student must:

- Maintain a GPA of 2.5 in the major.
- Earn a grade of C or better in all ASLP courses. Students earning less than a C in any one of the ASLP courses will be allowed to retake that course only once.

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

Year 1

Semester 1		Semester 2	
ASLP 2015 - Nature of Communication Disorders	3 hours	ASLP 2020 - Phonetics	3 hours
BIOL 1112 - Contemporary Biology	3 hours	MATH 1680 - Elementary Probability and Statistics	3 hours
Communication core	3 hours	Communication core	3 hours
Government/Political Science core	3 hours	Government/Political Science core	3 hours
Social and Behavioral Sciences core	3 hours	Language, Philosophy and Culture core	3 hours
Total	15 hours	Total	15 hours

Year 2

Semester 1		Semester 2	
ASLP 3010 - Clinical Methods in Audiology and Speech-Language Pathology I	3 hours	ASLP 3025 - Anatomical Bases of Speech and Hearing	3 hours
ASLP 3035 - Language Development	3 hours	American History core	3 hours
American History core	3 hours	Component Area Option B core	3 hours
Elementary Foreign Language I core	3 hours	Elementary Foreign Language II core	3 hours
ASLP Laboratory Science	3 hours	ASLP minor	3 hours
Total	15 hours	Total	15 hours

Year 3

Semester 1		Semester 2	
Creative Arts core	3 hours	ASLP 3030 - Speech and Hearing Sciences	3 hours
Intermediate Foreign Language I core	3 hours	ASLP 3040 - Introduction to Audiology	3 hours
ASLP Laboratory Science	3 hours	Intermediate Foreign Language II core	3 hours
ASLP minor	3 hours	ASLP minor	3 hours
ASLP minor	3 hours	Elective	3 hours
Total	15 hours	Total	15 hours

Year 4

Semester 1		Semester 2	
ASLP 4035 - Speech Sound Disorders	3 hours	ASLP 4040 - Introduction to Language Disorders	3 hours
ASLP 4045 - Basic Rehabilitative Audiology	3 hours	ASLP 4050 - Neurological Bases of Speech and Hearing	3 hours
ASLP 4060 - Clinical Methods in Audiology and Speech-Language Pathology II	3 hours	ASLP 4070 - Topics in Speech-Language Pathology and Audiology	3 hours
Component Area Option A core	3 hours	ASLP minor - advanced	3 hours

Total	15 hours	Total	15 hours

Grad Track Options

Audiology and Speech-Language Pathology, BS with grad track option leading to Speech-Language Pathology, MS

Admission requirements

The Grad Track in Speech-Language Pathology program provides an academic and clinical professional education to prepare you as a clinician working in educational and medical settings. In the Grad Track program, in lieu of undergraduate classes and/or electives, you will begin taking graduate courses the senior year of your undergraduate studies.

Applicants must meet the following criteria to apply to the Grad Track program:

1. Be in their junior year of undergrad to apply
2. Have a minimum of 75 completed semester credit hours

3. Have a GPA of 3.5 or higher

See department website (<https://hps.unt.edu/aslp/department-audiology-speech-language-pathology>) for specific information about the application and deadlines.

Email aslpadvising@unt.edu for questions about the Grad Track program.

Course Requirements, 12 hours

- ASLP 5780 - Diagnostics Speech Pathology in lieu of ASLP 4070 - Topics in Speech-Language Pathology and Audiology
- ASLP 5825 - Pediatric Speech Sound Disorders in lieu of ASLP 4035 - Speech Sound Disorders
- ASLP 5830 - Language Disorders I in lieu of ASLP 4040 - Introduction to Language Disorders
- ASLP 5835 - Language Disorders II

All remaining courses required for the Audiology and Speech-Language Pathology, BS must also be completed.

Minors

Audiology and Speech-Language Pathology minor

Minors must observe the system of prerequisites for courses.

The Audiology and Speech-Language Pathology Undergraduate Director is available for consultation on the minor in audiology and speech-language pathology.

Courses

A minor in audiology and speech-language pathology requires a total of 18 semester hours from the following:

- ASLP 2015 - Nature of Communication Disorders
- ASLP 2020 - Phonetics
- ASLP 3010 - Clinical Methods in Audiology and Speech-Language Pathology I
- ASLP 3025 - Anatomical Bases of Speech and Hearing
- ASLP 3030 - Speech and Hearing Sciences
- ASLP 3035 - Language Development
- ASLP 3040 - Introduction to Audiology
- ASLP 4035 - Speech Sound Disorders
- ASLP 4040 - Introduction to Language Disorders
- ASLP 4045 - Basic Rehabilitative Audiology
- ASLP 4050 - Neurological Bases of Speech and Hearing

Department of Behavior Analysis

Main Office
Chilton Hall, Room 360

Mailing address:
1155 Union Circle #310919
Denton, TX 76203-5017

940-565-2274

Web site: hps.unt.edu/behv/welcome-behavior-analysis

Karen Rader Toussaint, Chair

Faculty

The department offers a major in applied behavior analysis and a minor in behavior analysis for students interested in learning to apply behavioral principles to produce positive change in individual behavior and social systems.

The department promotes a humanistic application of behavioral principles through consultation with area agencies and institutions. The department offers students experience in laboratory and applied research and practical experience in the application of behavior technology.

Majors

Applied Behavior Analysis, BS

People with a BS in applied behavior analysis are competitive for positions in a variety of fields. These jobs generally involve working directly with client populations or helping more experienced behavior analysts to analyze and modify behavior to improve individual or organizational outcomes, often in settings such as education, healthcare, business, or human services.

Candidates for the Bachelor of Science with a major in applied behavior analysis must meet the following requirements.

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Science degree as specified in the University Core Curriculum in the Academic policies section of this catalog and the College of Health and Public Service requirements.

Major requirements

Major of 34 semester hours, including:

- BEHV 2300 - Behavior Principles I
- BEHV 2700 - Behavior Principles II
- BEHV 3300 - Organizational Behavior Management
- BEHV 3440 - Data Collection and Analysis
- BEHV 3550 - Behavior Change Techniques
- BEHV 3660 - Survey of Applied Behavior Analysis Literature
- BEHV 3770 - Building Skills with Behavior Technology
- BEHV 4010 - Functional Analysis and Problem Behavior
- BEHV 4300 - Culturally Responsive Ethics and Professionalism in Applied Behavior Analysis
- BEHV 4750 - Capstone Course in Applied Behavior Analysis

Minor

A minor of 18 hours is optional. Minors considered likely to give graduates of the program a competitive edge include, but are not limited to, aging, anthropology, biological sciences, business foundations, chemistry, computer science, criminal justice, emergency administration, health promotion, library and information sciences, rehabilitation and sociology.

Other course requirements

None.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information see an academic advisor in the College of Health and Public Service.

Other requirements

- Minimum GPA of 2.7 in behavior analysis courses.
- At least 30 hours must be completed at UNT.

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

Year 1

Semester 1		Semester 2	
BEHV 2300 - Behavior Principles I	3 hours	BEHV 2700 - Behavior Principles II	3 hours

Elective	2 hours	Elective	3 hours
Elective - advanced	3 hours	Elective - advanced	3 hours
Elective - advanced	3 hours		
Total	15 hours	Total	12 hours

Minors

Behavior Analysis minor

Undergraduate students majoring in a compatible field (e.g., rehabilitation, sociology, psychology, health promotion, hospitality management, merchandising, management or other service professions) may pursue a minor in behavior analysis.

Prerequisites for other courses

- BEHV 2300 - Behavior Principles I
- BEHV 2700 - Behavior Principles II
- BEHV 3440 - Data Collection and Analysis

Additional requirements

Any other undergraduate courses in behavior analysis may be taken to complete the minor of 18 hours. Six hours of the minor must be advanced.

Department of Criminal Justice

Main Office
Chilton Hall, Room 265

Mailing address:
1155 Union Circle #305130

Adam Trahan, Chair

Faculty

The Department of Criminal Justice educates students in the theoretical, practical and empirical aspects of criminal justice in preparation for professional service in both governmental and private entities and in preparation for graduate studies.

Criminal justice faculty come from a diverse range of educational and professional backgrounds reflecting the breadth of the criminal justice discipline, and they enhance the instructional process through their own research activities.

The department works with criminal justice agencies and organizations to promote knowledge and understanding of the people, processes and practices relevant to this dynamic field of study.

Undergraduate majors take a series of core criminal justice courses that provide a foundation regarding the key components of the criminal justice system, including law enforcement, criminal law, corrections, research methods and criminological theory. Students expand their knowledge in these areas and customize their curriculum by selecting from a broad range of criminal justice electives such as those regarding juvenile justice, computer crime and victimology. Internship and study abroad opportunities are available. Both campus-based and online criminal justice courses are offered.

Majors

Criminal Justice, BS

A Bachelor of Science with a major in criminal justice educates you in the theoretical, practical and empirical aspects of criminal justice in preparation for your career or for graduate studies.

Candidates for the Bachelor of Science degree with a major in criminal justice must meet the following requirements.

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Science degree as specified in the “University Core Curriculum” in the Academics section of this catalog and the College of Health and Public Service requirements.

Major requirements

42 hours, including 33 hours in criminal justice:

- CJUS 2100 - Crime and Justice in the United States
- CJUS 3500 - Inequality, Crime and Justice
- CJUS 3600 - Criminology
- CJUS 3900 - Research Methods in Criminal Justice
- CJUS 4600 - What is Justice?
- CJUS 4901 - Criminal Justice Capstone Experience
- 15 hours of criminal justice elective courses (which may be used to customize an area of interest)

Supporting courses, 9 hours

- PSYC 1630 - General Psychology I
- TECM 2700 - Technical Writing or its equivalent, may not be used in place of ENGL 1320
- MATH 1680 - Elementary Probability and Statistics

Minor

None required

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information, see an academic advisor in the College of Health and Public Service.

Other requirements

All students entering the Criminal Justice program must have a cumulative grade point average of at least 2.0 or otherwise be in good academic standing.

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

Year 1

Semester 1		Semester 2	
CJUS 2100 - Crime and Justice in the United States	3 hours	CJUS 3500 - Inequality, Crime and Justice	3 hours
ENGL 1310 - First-Year Writing I	3 hours	ENGL 1320 - First-Year Writing II	3 hours
HIST 2610 - United States History to 1865	3 hours	HIST 2620 - United States History Since 1865	3 hours
MATH 1680 - Elementary Probability and Statistics	3 hours	PSYC 1630 - General Psychology I	3 hours

Grad Track Options

Criminal Justice, BS with grad track option leading to Criminal Justice, MS

Students will apply by contacting the department. The graduate committee in the department will evaluate student eligibility. Eligible students must complete all application requirements and processes required of all students who apply to the Master of Science with a major in Criminal Justice.

Admission requirements

Students will apply by contacting the department. The graduate committee in the department will evaluate student eligibility. Eligible students must complete all application requirements and processes required of all students who apply to the Master of Science with a major in Criminal Justice.

Program requirements

- CJUS 5000 - Criminal Justice Policy (corresponds with CJUS 4901 - Criminal Justice Capstone Experience)
- CJUS 5200 - Legal Aspects of the Criminal Justice System (corresponds with CJUS 4200 - Criminal Procedure)
- CJUS 5500 - Seminar in Criminal Justice Administration (corresponds with CJUS 4500 - Administration of Criminal Justice Agencies)
- CJUS 5600 - Advanced Criminological Theory (corresponds with CJUS 3600 - Criminology)
- CJUS 5620 - Seminar in Victimology (corresponds with CJUS 4650 - Victimology)
- CJUS 5700 - Evaluation and Research Methodologies (corresponds with CJUS 3900 - Research Methods in Criminal Justice)
- CJUS 5900 - Special Problems (corresponds with CJUS 4900 - Special Problems)

For the remainder of the bachelor's degree requirements, please see Criminal Justice, BS.

Minors

Criminal Justice minor

A minor in criminal justice requires completion of 18 semester hours.

Required courses

- CJUS 2100 - Crime and Justice in the United States
- CJUS 2500 - Criminal Law
- CJUS 3600 - Criminology

Plus 9 hours

Nine additional hours of criminal justice courses.

Department of Emergency Management and Disaster Science

Main office
Chilton Hall, Room 302

Mailing address:
1155 Union Circle #310637
Denton, TX 76203-5017
940-369-7445
Web site: emds.hps.unt.edu

Laura Siebeneck, Chair

Faculty

The Department of Emergency Management and Disaster Science educates students in the theoretical and empirical underpinnings of emergency management. The department's programs aim to provide students with the knowledge and skills necessary to enter the emergency management profession and prepare them for graduate studies. Primary emphasis is placed upon the human dimensions of hazards and disasters and enhancing community and societal resilience to a wide range of threats.

The department is home to the emergency administration and planning program, which was established in 1983 as the nation's first bachelor's degree program in emergency management. Since the program's inception, the department has maintained close relationships with the Federal Emergency Management Agency (FEMA) Region 6 headquarters in Denton. Due to its close proximity to campus, students have opportunities to visit the facilities and FEMA representatives regularly serve as guest lecturers in classes.

The department's faculty come from diverse educational and professional backgrounds and bring a breadth of knowledge and experience to the classroom. They have written books on emergency management and they have been published in many of the top scholarly journals on hazards, disaster and emergency management. Importantly, faculty have received significant external funding for their research from numerous sources, including the National Science Foundation and the Texas Department of Public Safety.

Undergraduate majors take a series of core courses that provide a foundation for understanding the key phases of disasters, including preparedness, response, and mitigation. Students expand their knowledge in these areas by selecting from a broad range of emergency management electives on such topics as terrorism, floodplain management, private sector issues and international disasters. To apply knowledge and skills learned in classes, students also participate in an internship program, which gives them valuable hands-on experience working for various organizations in the public, private and non-profit sectors.

Majors

Emergency Administration and Planning, BS

A Bachelor of Science degree in emergency administration and planning helps you develop valuable skills in disaster planning, creative problem solving, critical thinking and interpersonal communication. These skills are essential in coordinating activities that promote public safety and community resilience to the impacts of natural and technological hazards.

Degree requirements

Candidates for the Bachelor of Science with a major in emergency administration and planning must meet the following requirements.

Hours required and general/college requirements

A minimum of 120 semester hours for all EADP students, 42 must be advanced. All students must fulfill the degree requirements for the Bachelor of Science degree as specified in the University Core Curriculum in the Academic policies section of this catalog and the College of Health and Public Service requirements: 42 hours in the university core, 48 hours in the major, plus electives to total 120 required semester hours.

Major requirements

Required courses for all EADP students are:

- EADP 3010 - Principles of Emergency Management
- EADP 3020 - Methods in Emergency Management
- EADP 3035 - Hazard Mitigation and Preparedness
- EADP 3045 - Disaster Response and Recovery
- EADP 3055 - EOC Design and Operations
- EADP 4050 - Social Vulnerability in Disasters
- EADP 4080 - Capstone Course in Emergency Management

The remaining hours for the major may be selected from

- BAAS 3000 - Pathways to Civic Engagement
- BIOL 3160 - Conservation Biology
- EADP 1010 - Exploring Disasters
- EADP 2020 - Images of Disasters in Film and Media
- EADP 2030 - Climate Change Resilience
- EADP 2700 - Current Issues in Emergency Management
- EADP 4000 - Hazardous Materials Planning and Management
- EADP 4010 - Public Health and Disasters
- EADP 4015 - Flood Plain Management
- EADP 4020 - Managing Disasters at the National Level
- EADP 4030 - Continuity Planning for Crises
- EADP 4040 - International Disasters
- EADP 4060 - Emerging Technology and Disasters
- EADP 4065 - Disaster Exercise Design
- EADP 4090 - Terrorism and Emergency Management
- GEOG 2180 - Geosystems, Environment and Society
- GEOG 3050 - Introduction to Cartography
- GEOG 3120 - Medical Geography
- GEOG 3500 - Introduction to Geographic Information Systems
- GEOG 4170 - Field Methods and Mapping
- GEOG 4240 - Meteorology
- MGMT 4180 - Workplace Health and Safety
- PADM 3000 - Public Administration
- PADM 3700 - Issues in Public Administration
- PADM 4210 - Introduction to Philanthropy and Fundraising
- PADM 4130 - American Intergovernmental Relations
- PADM 4220 - Proposal Writing and Grants Administration
- PADM 4230 - Social Evolution of Contemporary Volunteerism
- PADM 4240 - Volunteer Management Concepts and Applications
- PADM 4250 - Community Development and Collaborative Planning
- PADM 4260 - Volunteer Program Planning and Evaluation
- PADM 4450 - Public Policy Analysis
- RMIN 4600 - Corporate Risk Management
- SOCI 3550 - Social Movements
- SOCI 3560 - Sociology of Disasters

Other course requirements

- TECM 2700 - Technical Writing (may be used to satisfy the Communication [English Composition and Rhetoric] requirement of the University Core Curriculum)

Life and Physical Sciences requirement

Choose one of the following to satisfy 3 hours of the Life and Physical Sciences requirement of the University Core Curriculum.

- BIOL 1132 - Environmental Science
- GEOG 1710 - Earth Science
- GEOL 1610 - Introduction to Geology

Internship

Pre-career (students with no professionally relevant work experience) – A major of 48 hours; 42 hours plus 6 hours of internship classes (EADP 4800 and EADP 4810).

In-career (students with professionally relevant work experience) – A major of 42 hours. No internship required.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information see an academic advisor in the College of Health and Public Service.

Other requirements

- A grade of C or better and a minimum GPA of 2.5 on all courses in the major.
- At least 30 hours must be completed at UNT.
- A maximum of 18 hours of technical credit may be used toward the degree.

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites, have college credit from exams or dual enrollment, and/or elect to pursue a minor or certificate.

Year 1

Semester 1		Semester 2

Minors

Emergency Administration and Planning minor

Undergraduate students majoring in a compatible field (e.g., social and behavioral sciences, business, management, political science/public administration and geography) may pursue a minor in emergency administration and planning.

The minor requires 18 hours.

Requirements

All EADP minors will complete EADP 3010, EADP 3035 and EADP 3045.

- EADP 3010 - Principles of Emergency Management
- EADP 3035 - Hazard Mitigation and Preparedness
- EADP 3045 - Disaster Response and Recovery
- 9 additional hours are required for the minor, all of which must be selected from a list of selected EADP courses

Note

The remaining 9 hours may be chosen from any EADP-prefix course (except EADP 4080, EADP 4800 and EADP 4810).

Simon A. Andrew, Chair

Faculty

Programs of Study

The Department of Public Administration offers graduate programs leading to a PhD in public administration and management and a Master of Public Administration (MPA) degree. It also offers the BA in nonprofit leadership studies, the BA in urban

policy and planning and a minor in public administration, nonprofit leadership studies, urban policy and planning and conflict resolution. Additionally, the program offers two certificates: one in conflict resolution and the other in volunteer and community resource management. The curriculum in the MPA program emphasizes a combination of courses and practical experience leading to entry-level management positions for students beginning their professional careers and job advancement for students already in government service. All faculty members have experience in government and maintain contact with managers and professional associations, such as the International City/County Management Association and the American Society for Public Administration. *The MPA at the University of North Texas is accredited by the Network of Schools of Public Policy, Affairs, and Administration (1029 Vermont Avenue NW, Suite 1100, Washington, DC 20005; 202-628-8965).* The curriculum conforms to NASPAA standards. Detailed information on the MPA program may be found in the *Graduate Catalog*.

Undergraduate students may wish to select public administration, nonprofit management, urban policy and planning, or conflict resolution as a complement to most any major. These areas of concentration are vital to the success of any undergraduate. Students may choose a number of options, for instance, a major in geography with a minor in urban policy and planning, a major in political science or emergency administration and planning with a minor in public administration, a major in applied arts and sciences with public administration, nonprofit management or conflict resolution as one of the professional development areas, or a minor in any of these areas. Consult the appropriate sections in this catalog for specific details.

Graduate Study

Master's and doctoral degree programs are available in public administration. For more information, consult the *Graduate Catalog*.

Majors

Nonprofit Leadership Studies, BA

This program is designed for students who are looking for opportunities to pursue a professional career serving in the nonprofit sector. The program is structured to accommodate students who transfer to UNT from a community college or for those who start as freshmen. A major strength of the program is its close affiliation with nonprofit organizations within the Dallas-Fort Worth region.

Candidates for the Bachelor of Arts degree with a major in nonprofit leadership studies must meet the following requirements.

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Arts degree as specified in the University Core Curriculum in the Academic policies section of this catalog and the College of Health and Public Service requirements: 42 hours in the university core, 33 hours in the major, 15 hours in supporting courses for the major, plus electives to total 120 required semester hours.

Major requirements

Completion of a minimum of 33 hours from the nonprofit leadership studies curriculum, of which 27 must be advanced.

Students should complete 3000-level courses before enrolling in 4000-level courses. Prerequisites are given in course descriptions and in the online schedule of classes at registrar.unt.edu/registration/schedule-of-classes.

Nonprofit leadership studies, 33 hours

Students must complete all major course requirements. Some courses in the major may be used in the Volunteer and Community Resource Management certificate. Please check the certificate for more information.

- PADM 3010 - Foundations of Philanthropy and Nonprofits
- PADM 3020 - Public Management
- PADM 4050 - Negotiation
- PADM 4200 - Leadership Theory and Practice for Volunteer Managers
- PADM 4210 - Introduction to Philanthropy and Fundraising
- PADM 4220 - Proposal Writing and Grants Administration
- PADM 4240 - Volunteer Management Concepts and Applications
- PADM 4250 - Community Development and Collaborative Planning
- PADM 4260 - Volunteer Program Planning and Evaluation
- PADM 4300 - Nonprofit Leadership Capstone
- PADM 4310 - Community Service Internship

Supporting Courses for the Major, 15 Hours

Choose five from the following:

- COMM 2040 - Public Speaking
- JOUR 3410 - Public Relations for Non-Profits
- MGMT 3850 - Foundations of Entrepreneurship
or
- MGMT 4235 - Social Entrepreneurship
- PADM 2000 - Discover the City: Placemaking in the World
- PADM 2100 - Cultural Competency in Urban Governance
- PADM 2120 - Introduction to Urban and Regional Planning
- PADM 2200 - Introduction to Conflict Resolution
- PADM 3000 - Public Administration
- PADM 3030 - Topics in Human Services
- PADM 3100 - Workplace Conflict
- PADM 3200 - Creating Innovative Cities
- PADM 3210 - Population Demographics and Urban Planning
- PADM 3420 - Bureaucracy and Public Policy
- PADM 3700 - Issues in Public Administration
- PADM 4000 - Mediation
- PADM 4010 - Family Mediation
- PADM 4030 - Global Workplace Conflict
- PADM 4040 - Crisis Intervention
- PADM 4070 - Arbitration
- PADM 4130 - American Intergovernmental Relations
- PADM 4170 - Methods in Urban Planning Research and Analysis
- PADM 4230 - Social Evolution of Contemporary Volunteerism
- PADM 4450 - Public Policy Analysis
- PADM 4610 - Topics in Community Service
- SOWK 2430 - Policies, Issues and Programs in Social Welfare

- SOWK 3000 - Foundations of Interviewing and Interpersonal Skills

Other course requirements

Internship

The internship in the nonprofit leadership studies program is intended to prepare students for their careers by providing them real-world experience in the field. Experiential education is an ideal way to help students excel academically as well as professionally. Students register for PADM 4310 - Community Service Internship in either the fall or spring semester of their last year to gain hands-on experience in a supervised setting. Students must meet individual employer's requirements and obtain consent from the undergraduate program coordinator.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information see an academic advisor in the College of Health and Public Service.

Other requirements

- Must have a grade of C or better for entering the program
- A grade of C or better in all courses in the major
- Must have a minimum cumulative GPA of 2.0 for graduation

Minor

None required.

Urban Policy and Planning, BA

This program is designed for students who are looking for opportunities to pursue a professional career in urban policy and planning. The program is structured to accommodate students who transfer to UNT from a community college or for those who start as freshmen. A major strength of the program is its close affiliation with city planning departments within the Dallas-Fort Worth region.

Candidates for the Bachelor of Arts degree with a major in urban policy and planning must meet the following requirements.

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Arts degree as specified in the University Core Curriculum in the Academic policies section of this catalog and the College of Health and Public Service requirements.

Requirements: 42 hours in the university core, 33 hours in the major, 12 hours of Urban Policy and Planning electives, plus 33 hours of free electives to total 120 required semester hours.

Major requirements, 10 courses or 33 hours

Completion of a minimum of 33 hours from the urban policy and planning curriculum.

Students should complete 2000 and 3000-level courses before enrolling in 4000-level courses. Prerequisites are given in course descriptions and in the online schedule of classes at registrar.unt.edu.

- GEOG 3500 - Introduction to Geographic Information Systems
- PADM 2120 - Introduction to Urban and Regional Planning
- PADM 3210 - Population Demographics and Urban Planning
- PADM 3220 - Land Use and Transportation Planning
- PADM 3410 - Financial Aspects of Government
- PADM 4170 - Methods in Urban Planning Research and Analysis
- PADM 4180 - Urban Planning Studio
- PADM 4220 - Proposal Writing and Grants Administration
- PADM 4250 - Community Development and Collaborative Planning
- PADM 4450 - Public Policy Analysis

General urban policy and planning electives, 12 hours

Select 4 courses or 12 hours from the following list:

- COMM 2040 - Public Speaking
- EADP 3035 - Hazard Mitigation and Preparedness
- EADP 4015 - Flood Plain Management
- GEOG 3010 - Economic Geography
- GEOG 3100 - United States and Canada: Economies, Cities and Sustainability
- GEOG 4210 - Urban Geography
- GEOG 4220 - Applied Retail Geography
- GEOG 4230 - Location Intelligence: Business GIS Concepts and Applications
- GEOG 4590 - Advanced GIS Programming
- PADM 2000 - Discover the City: Placemaking in the World
- PADM 2100 - Cultural Competency in Urban Governance

Minors

Conflict Resolution minor

A minor in conflict resolution requires a total of 18 hours.

Four required courses

- PADM 2200 - Introduction to Conflict Resolution
- PADM 3100 - Workplace Conflict
- PADM 4000 - Mediation
- PADM 4050 - Negotiation

Plus two courses from the following list

Chosen in consultation with an academic advisor in the conflict resolution program:

- CJUS 3210 - Judicial and Legal Systems
- COMM 3320 - Communication and Conflict Management
- MGMT 3720 - Organizational Behavior
- PADM 4030 - Global Workplace Conflict
- PADM 4040 - Crisis Intervention
- PADM 4060 - Mediation Practicum
- PADM 4070 - Arbitration
- PADM 4610 - Topics in Community Service
- PSCI 3200 - The American Legal System
- PSCI 4827 - Negotiation and Diplomacy

Nonprofit Leadership Studies minor

A minor in Nonprofit Leadership Studies minor requires 18 semester credit hours (6 courses).

In addition to earning a minor, students also have the opportunity to earn a certificate in volunteer and community resource management and prepare for a certificate in non-profit management leadership. Students wishing to minor in Nonprofit Leadership Studies should consult the HPS academic advisor for specific program requirements.

Field courses, 18 hours

Students select 18 hours from the list of courses below.

- JOUR 3410 - Public Relations for Non-Profits
- PADM 3010 - Foundations of Philanthropy and Nonprofits
- PADM 3020 - Public Management
- PADM 4050 - Negotiation
- PADM 4200 - Leadership Theory and Practice for Volunteer Managers **
- PADM 4210 - Introduction to Philanthropy and Fundraising
- PADM 4220 - Proposal Writing and Grants Administration
- PADM 4240 - Volunteer Management Concepts and Applications **
- PADM 4250 - Community Development and Collaborative Planning **
- PADM 4260 - Volunteer Program Planning and Evaluation **
- PADM 4300 - Nonprofit Leadership Capstone
- PADM 4310 - Community Service Internship
- SOWK 2430 - Policies, Issues and Programs in Social Welfare
- SOWK 3000 - Foundations of Interviewing and Interpersonal Skills

Notes

**Students pursuing the 12 semester credit hour certificate in Volunteer and Community Resource Management must take PADM 4240, PADM 4250 and PADM 4260, in addition to PADM 4200.

Public Administration minor

A minor in public administration requires a total of 18 credit hours.

Courses, 18 hours

Select 18 credit hours from the courses listed below.

- PADM 2100 - Cultural Competency in Urban Governance
- PADM 2120 - Introduction to Urban and Regional Planning
- PADM 3000 - Public Administration
- PADM 3010 - Foundations of Philanthropy and Nonprofits
- PADM 3020 - Public Management
- PADM 3210 - Population Demographics and Urban Planning
- PADM 3410 - Financial Aspects of Government
- PADM 3420 - Bureaucracy and Public Policy
- PADM 3700 - Issues in Public Administration
- PADM 4130 - American Intergovernmental Relations
- PADM 4250 - Community Development and Collaborative Planning
- PADM 4450 - Public Policy Analysis

Urban Policy and Planning minor

This program is designed for students who are interested in planning, policy, local government issues, transportation planning, and a mixture of urban and suburban challenges.

A minor in urban policy and planning requires 18 semester credit hours, 9 hours of required courses plus 9 hours chosen from the courses listed below.

Requirements, 9 hours

- PADM 2120 - Introduction to Urban and Regional Planning
- PADM 4250 - Community Development and Collaborative Planning
- PADM 4450 - Public Policy Analysis

Plus 9 hours selected from the list below

- EADP 3035 - Hazard Mitigation and Preparedness
- GEOG 3500 - Introduction to Geographic Information Systems
- PADM 3020 - Public Management
- PADM 3210 - Population Demographics and Urban Planning
- PADM 3220 - Land Use and Transportation Planning
- PADM 3410 - Financial Aspects of Government
- PADM 4160 - Zoning and Land Use
- PADM 4220 - Proposal Writing and Grants Administration

Undergraduate Academic Certificates

Conflict Resolution certificate

A certificate in conflict resolution requires a total of 12 hours.

Required courses, 12 hours

- PADM 2200 - Introduction to Conflict Resolution
- PADM 3100 - Workplace Conflict
- PADM 4000 - Mediation
- PADM 4050 - Negotiation

Volunteer and Community Resource Management certificate

The volunteer and community resource management certificate is an official UNT credential that appears on a student's transcript. It is designed for students who are specifically interested in working with volunteers to help address a particular community issue or need.

To obtain the undergraduate certificate, a student must complete 12 hours of course work—9 hours of required courses and 3 hours of electives.

Individuals interested in obtaining this certificate must be enrolled at UNT and indicate their intention of completing the certificate with their academic advisor. For more information on this certificate, please contact the program advisor.

Students should apply to receive the certificate in the semester they successfully complete all the necessary course work. Successful completion means that students must have a cumulative average of 3.0 (B) or higher in their four certificate courses. Any course with a final grade less than a C will not count toward this credential irrespective of the cumulative grade point average in certificate courses.

Applications for the certificate are available in the College of Health and Public Service Advising Office in Chilton Hall. Applications are first reviewed by the Advising Office and then submitted to the Registrar's Office for processing.

Required courses, 9 hours

- PADM 4240 - Volunteer Management Concepts and Applications
- PADM 4250 - Community Development and Collaborative Planning
- PADM 4260 - Volunteer Program Planning and Evaluation

Elective course, 3 hours

3 hours chosen from:

- PADM 4200 - Leadership Theory and Practice for Volunteer Managers
- PADM 4220 - Proposal Writing and Grants Administration

Rachita Sharma, Chair

Faculty

The Department of Rehabilitation and Health Services offers three undergraduate degree programs in addiction studies, public health and a long-standing degree in rehabilitation studies. In addition to the BS degrees, the department offers minors in public health, rehabilitation studies, addiction studies, and applied gerontology. The department also offers two certificate programs: one in rehabilitation studies and the other in substance use treatment. Students who complete a BS in rehabilitation studies are eligible for the State of Texas Qualified Mental Health Provider-Community Services (QMHP-CS) credential. Comparatively, students who complete either the major or the minor in addiction studies are eligible to take the test for licensing as a chemical dependency counselor (LCDC) in the state of Texas.

Upon graduation, students are qualified for positions in a variety of nonprofit, governmental and for-profit programs serving individuals with mental health concerns, substance use disorders, intellectual and developmental disabilities and physical disabilities. Labor market trends forecast continued growth in human service professions. The undergraduate degrees also prepare students for entry into graduate programs in rehabilitation counseling, often with advanced standing if admitted to the Grad Track plan.

The department's undergraduate programs are structured to meet the needs and interests of students transferring from community colleges. Our majors are designed to allow students the opportunity to carefully select complimentary electives or to specialize in specific areas of rehabilitation, addiction, or public health services. Our college advisors can assist students in determining the best electives, minors and/or certificates available to meet their career objectives. Transfer students receive close advising to facilitate matriculation by maximizing their credits.

Extensive practical experience in community placements is combined with comprehensive classroom curricula to build an in-depth and well-rounded program. Students are able to receive highly individualized academic support from instructors. We require our students to engage in service learning and professional activities to gain experience and develop their skills. In all our undergraduate majors, students have the opportunity to participate in a practicum course that is designed to help them implement their academic learning in real-world settings.

A College of Health and Public Service degree program advisor plays a significant role in the development of a degree plan that meets the individual student's needs and interests. To find your major advisor, please visit the Advising webpage <https://hps.unt.edu/advising>

Programs of study

The department offers undergraduate majors in addiction studies, public health, and rehabilitation studies; minors; and undergraduate academic certificates. (See the complete list, below.)

Majors

- Addiction Studies, BS
- Public Health, BS
- Rehabilitation Studies, BS
- Rehabilitation Studies, BS with Grad Track option leading to Rehabilitation Counseling, MS

Minors

- Addiction Studies
- Applied Gerontology

- Public Health
- Rehabilitation Studies

Undergraduate Academic Certificates

- Applied Gerontology
- Rehabilitation Studies
- Substance Use Disorders Treatment

Rehabilitation scholarships

Students majoring in rehabilitation studies are eligible to apply for the Ken Miner Scholarship, the Fort Worth TRA Scholarship and the Dan Minahan Memorial Scholarship. Applications are available on the department website. Students interested in applying for these scholarships should contact the department.

Majors

Addiction Studies, BS

The BS in addiction studies prepares students and professionals who wish to continue career development to work directly with individuals with substance use disorders and process addictions (e.g., gambling, disordered eating, etc.) in order to facilitate long-term recovery, autonomy and improved quality of life.

Candidates for the Bachelor of Science degree with a major in addiction studies must meet the following requirements.

Hours required and general/college requirements

A minimum of 120 semester credit hours. Completion of 42 hours in the University Core Curriculum, 36 hours in the major and 12 hours in electives. Students should complete an additional 30 hours of free electives. Prerequisites are given in course descriptions and in the online schedule of classes at www.unt.edu/registrar.

Major requirements

Addiction studies, 30 hours

- ADDS 3975 - Addictions
- ADDS 4075 - Drugs and Alcohol
- ADDS 4175 - Addiction Treatment Models
- ADDS 4275 - Alcohol, Drugs and Disability
- ADDS 4375 - Addiction Counseling and Groups
- ADDS 4575 - Current Issues in Substance Use Disorders
- ADDS 4675 - Addictions Counseling Competencies
- ADDS 4775 - Ethical and Professional Issues in Addiction Practices
- ADDS 4881 - Addictions Practicum

Rehabilitation studies, 6 hours

- RHAB 3000 - Active Listening in the Helping Professions

- RHAB 4500 - Assessment in Rehabilitation

Other course requirements

None.

Minor

Minor is optional.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information see an academic advisor in the College of Health and Public Service.

Other requirements

- Completion of at least 300-hours of field work in ADDS Addictions Practicum.
- A minimum Grade Point Average of 2.3 is required for graduation.

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years and will serve as a guide for you to design your pathway to degree completion. Public Health, BS

Dr. Naomi Meier, Public Health Program Coordinator

This degree program prepares students interested in gaining the knowledge to identify, prevent and solve community health problems. Public health prepares students with knowledge and skills to promote health. It draws on knowledge from the social, behavioral and health sciences.

Our degree program is well suited for students invested in building health communities here in the DFW area, nationally and globally. We are situated in an academic department which promotes interdisciplinary solutions to health issues that affect diverse communities across the lifespan.

Degree requirements

The following requirements must be satisfied for a Bachelor of Science in public health.

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Science in public health degree as specified in the University Core Curriculum in the Academic policies section of this catalog and the College of Health and Public Service requirements.

Major requirements

Completion of 42 hours in the university core, 39 hours in the major, 9 hours in public health electives, plus 30 hours of general electives to total 120 required semester hours.

Prerequisites are given in course descriptions and in the online schedule of classes at registrar.unt.edu/registration/schedule-of-classes.

Public health core, 39 hours

- PUBH 1010 - Introduction to Public Health
- PUBH 2010 - Epidemiological Concepts and Methods for Public Health
- PUBH 2015 - Research Methods in Public Health
- PUBH 3010 - Social Justice and Behavioral Foundations in Public Health
- PUBH 3020 - Community Health Education
- PUBH 3025 - Environmental Health
- PUBH 3030 - Global Public Health
- PUBH 4015 - Ethics in Public Health
- PUBH 4020 - Biostatistics
- PUBH 4050 - Public Health and Health Policy
- PUBH 4060 - Public Health Management and Leadership
- PUBH 4070 - Public Health Informatics

- PUBH 4080 - Public Health Capstone

Public health electives, 9 hours

Choose 3 of the following courses:

- ADDS 4075 - Drugs and Alcohol
- ADDS 4275 - Alcohol, Drugs and Disability
- AGER 4020 - Psychology of Death and Dying
- AGER 4780 - Aging Programs and Services
- ANTH 4210 - Culture and Human Sexuality
- ANTH 4220 - Anthropology in Public Health
- ANTH 4400 - Environmental Anthropology
- COMM 3220 - Health Communication
- EADP 3010 - Principles of Emergency Management
- EADP 3045 - Disaster Response and Recovery
- EADP 4010 - Public Health and Disasters
- EADP 4050 - Social Vulnerability in Disasters
- EADP 4090 - Terrorism and Emergency Management
- GEOG 3120 - Medical Geography
- GEOG 4560 - Introduction to Python Programming
- GEOG 4580 - GIS in Health
- PADM 4200 - Leadership Theory and Practice for Volunteer Managers
- PHIL 2600 - Ethics in Science
- PHIL 3440 - Bioethics
- RHAB 3000 - Active Listening in the Helping Professions
- RHAB 3100 - Disability and Society
- RHAB 4200 - Physical and Psychosocial Aspects of Disability
- RHAB 4300 - Introduction to Psychiatric Rehabilitation
- SOCI 3120 - Sociology of Health and Illness
- SOCI 3560 - Sociology of Disasters
- SOWK 4430 - Applied Social Welfare Policy

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information see an academic advisor in the College of Health and Public Service.

Other requirements

Minimum major GPA of 2.5 required at the end of program in order to graduate. Students who do not have a minimum major GPA of 2.5 will take additional courses to bring up the GPA.

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

Rehabilitation Studies, BS

Dr. Bradley McDaniels, Coordinator of Undergraduate Rehabilitation Program

Students who graduate with a Bachelor of Science with a major in rehabilitation studies often pursue careers where they serve individuals who have physical, mental and emotional disabilities and help them become productive and active citizens. This program provides extensive practical experience in community placements.

Candidates for the Bachelor of Science degree with a major in rehabilitation studies must meet the following requirements:

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Science degree as specified in the University Core Curriculum in the Academic policies section of this catalog and the College of Health and Public Service requirements.

Major requirements

27 hours in rehabilitation studies:

- RHAB 3000 - Active Listening in the Helping Professions
- RHAB 3100 - Disability and Society
- RHAB 3900 - Case Management in Rehabilitation

- RHAB 4100 - Rehabilitation Service Delivery Systems
- RHAB 4200 - Physical and Psychosocial Aspects of Disability
- RHAB 4300 - Introduction to Psychiatric Rehabilitation
- RHAB 4500 - Assessment in Rehabilitation
- RHAB 4700 - Employment Services
- RHAB 4880 - Rehabilitation Practicum

Plus an addictions course, 3 hours

ADDS 4275 is recommended for all majors.

Other course requirements

None.

Minor requirements

Minor of 18 hours, of which 6 must be advanced, may be selected with the approval of the academic advisor. Students are advised to give careful consideration to career goals when selecting their minor area of study. A minor is not required.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information see an academic advisor in the College of Health and Public Service.

Other requirements

- Demonstration of at least 200 hours of field work and a minimum major grade point average of 2.3 is required for graduation

Students interested in majoring in rehabilitation studies should make an appointment with the rehabilitation studies academic advisor.

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

Grad Track Options

Rehabilitation Studies, BS with grad track option leading to Rehabilitation Counseling, MS

Rehabilitation studies undergraduate students accepted into the grad track pathway will first earn their BS with a major in rehabilitation studies and, following successful completion of the graduate program, their MS with a major in rehabilitation counseling.

Admission requirements and program policies

The admissions criteria for students applying to the grad track pathway is consistent with the admission processes and procedures for all applicants to our graduate program. Applicants are required to have completed at least 75 credit hours of their bachelor's degree.

Applicants to the grad track pathway will submit:

- An application designed for grad track pathway applicants;
- A signed copy of the Conditional Admission and Advisor Course Approval Form (available from the Toulouse Graduate School);
- A current copy of their unofficial transcript;
- A self-statement of purpose as to why they are interested in the grad track pathway, as well as addressing the rehabilitation counseling program required self-statement questions;
- A resume of their work experience;
- Two letters of recommendation (one academically-related and one employment-related); and
- Completion of an interview with two faculty members from our department.

Successful applicants will meet the definition of "Exceptional Undergraduate Student." They will be those students who:

1. Are in their junior year of the rehabilitation studies program and have completed 90 credit hours;
2. Have a cumulative GPA of 3.5 or higher at the time of their application; and
3. Whose resume, self-statement, letters of recommendation and demonstration of interpersonal and professional skills during the interview are considered to be of high quality by the faculty in the department.

As is the process for graduate program applicants, faculty will conduct a holistic review of each applicant to the grad track pathway. The holistic review is guided by a rubric created for graduate program applicants that provides an assessment of each applicant's:

1. Academic/intellectual merit (e.g., assessment of GPA, quality of letters of recommendation, quality of written self-statement);
2. Employment experience (e.g., employment-related letters of recommendation, work experience in the field), interview (demonstration of communication skills, professionalism, appropriate self-awareness, interpersonal skills and appropriate self-disclosure); and
3. Broader impact (e.g., potential to contribute to profession, discipline and/or society, and potential to advance diversity by broadening global understanding and/or diverse points of view).

Faculty who conduct the interview, review and rank the applicant's application as being in the top 5% (excellent), 10% (very good), 25% (good), 50% (average) or less than 50% (below average) and then present the application to the admission committee in the department. Only applicants to the grad track pathway program who rank in the top 5-10% and have the approval of the undergraduate and graduate coordinators, as well as the student's academic advisor and the majority of faculty present at the meeting in which applications are reviewed, will be accepted into the grad track pathway. Applications will be accepted until July 15 for the Fall semester grad track pathway classes and November 30 for the Spring semester grad track pathway courses.

Successful applicants are conditionally admitted to the grad track pathway after completing 90 credit hours in their undergraduate degree program. Acceptance to the grad track pathway does not imply that the student has been fully admitted into the graduate school, however, and the student must first complete his or her bachelor's degree before acceptance into the graduate program. Applicants will be provided with a document that explains the application process and will state that, if accepted into the grad track pathway, the student understands that he or she is only conditionally accepted into the graduate program and must maintain a 3.2 GPA and be in good standing in the program before being accepted into the graduate program. Students whose GPA falls to between a 3.2 and 2.8 will be required to submit a new application to the graduate program (including a new statement of purpose, letters of recommendation, resume and interview) as well as submit current GRE scores in order to be reconsidered for the graduate program.

Program requirements

- RHAB 5700 - Ethical and Professional Foundations in Rehabilitation Counseling (replaces RHAB 4100 - Rehabilitation Service Delivery Systems)
- RHAB 5732 - Principles of Psychiatric Rehabilitation and Recovery (replaces RHAB 4300 - Introduction to Psychiatric Rehabilitation)
- RHAB 5735 - Alcohol and Other Substance Use Counseling Models (replaces ADDS 4275 - Alcohol, Drugs and Disability)
- RHAB 5770 - Rehabilitation Research and Program Evaluation (replaces RHAB 4500 - Assessment in Rehabilitation)

Courses available for credit as an upper-level elective:

- RHAB 5715 - Disability Issues in Human Development (3 credit hours)
- RHAB 5718 - Transition Issues in Rehabilitation (3 credit hours)

All remaining courses for Rehabilitation Studies, BS must be completed.

Minors

Addiction Studies minor

The minor in addiction studies is designed for students interested in working with persons experiencing addictive disorders. The minor may fulfill the educational requirements for licensure as a chemical dependency counselor. Courses cover all levels of alcohol and drug use, as well as other behavioral addictions; their symptomatology, personal and social impacts, and treatment.

Effective September 1, 2017, HB 1508 created new laws that require entities that provide educational programs leading to an occupational license to notify all applicants and enrollees of the implications of a felony conviction which may make you ineligible for a license upon program completion. The law requires that this information be provided to all persons who are

enrolled or apply in a counseling or related program without regard to whether the person has been convicted of a criminal offense.

You may review current guidelines used by the Texas Education Agency to determine the eligibility of the person to be licensed on the TEA's website at https://tea.texas.gov/Texas_Educators/Investigations/National_Criminal_History_Checks-FAQs/. You also have a right to request a criminal history evaluation letter from the TEA and the process and form available online at https://tea.texas.gov/Texas_Educators/Investigations/Preliminary_Criminal_History_Evaluation-FAQs/

Required courses

- ADDS 3975 - Addictions
or
- ADDS 4075 - Drugs and Alcohol and
- ADDS 4175 - Addiction Treatment Models

Plus four of the following

- ADDS 4275 - Alcohol, Drugs and Disability
- ADDS 4375 - Addiction Counseling and Groups
- ADDS 4675 - Addictions Counseling Competencies
- RHAB 4500 - Assessment in Rehabilitation

Licensure

Students seeking licensure are strongly advised to take:

- ADDS 4375 - Addiction Counseling and Groups
- ADDS 4675 - Addictions Counseling Competencies
- RHAB 4500 - Assessment in Rehabilitation

Applied Gerontology minor

Undergraduate students majoring in such compatible fields as social and behavioral sciences; health sciences; public health; kinesiology; recreation; learning technologies; or business may develop a multidisciplinary minor (18 semester hours) in applied gerontology in consultation with an advisor.

Required courses

The minor is 18 hours. It includes 3 required courses.

- AGER 3480 - Psychology of Adult Development and Aging
- AGER 4550 - Sociology of Aging
- AGER 4780 - Aging Programs and Services

Public Health minor

The public health minor has been designed for students looking for an introduction to the field and its disciplines. The curriculum offers complementary studies to students who are on a pre-medical track; those majoring in fields that incorporate a health

focus, such as rehabilitation studies or kinesiology; or those interested in environmental science or public policy. The course work covers the concepts and applications of public health in a variety of the specific disciplines related to overall community health outcomes.

Requirements

The minor is 18 hours. It includes 5 required courses and one elective option.

- PUBH 1010 - Introduction to Public Health
- PUBH 2010 - Epidemiological Concepts and Methods for Public Health
- PUBH 3010 - Social Justice and Behavioral Foundations in Public Health
- PUBH 3025 - Environmental Health
- PUBH 4050 - Public Health and Health Policy

Elective options

Students must select one elective from the remaining public health core courses.

- PUBH 3020 - Community Health Education
- PUBH 3030 - Global Public Health
- PUBH 4015 - Ethics in Public Health
- PUBH 4020 - Biostatistics
- PUBH 4060 - Public Health Management and Leadership
- PUBH 4070 - Public Health Informatics
- PUBH 4080 - Public Health Capstone (may only be taken in last semester of senior year)
- PUBH 4900 - Special Problems

Rehabilitation Studies minor

Because of its compatibility with other human service fields, rehabilitation provides an appropriate minor for students majoring in such areas as psychology, social work, recreation, aging, health education and criminal justice.

Requirements

- RHAB 3100 - Disability and Society
- RHAB 4200 - Physical and Psychosocial Aspects of Disability
- RHAB 4700 - Employment Services
- Plus three other rehabilitation courses selected by the student and the advisor.

Undergraduate Academic Certificates

Applied Gerontology certificate

An undergraduate academic certificate in applied gerontology requires 12 hours.

Required courses, 12 hours

- AGER 4500 - Long-Term Care Case Management with Older Adults
- AGER 4550 - Sociology of Aging
- AGER 4750 - Sexuality and Aging
- AGER 4780 - Aging Programs and Services

Eligibility requirements

In order to qualify for the certificate in applied gerontology, a student must meet the following eligibility requirements. Contact the College of Health and Public Service advising office for more information.

1. Applicant must have completed two years of college.
2. Applicant must be accepted to UNT through Undergraduate Admissions.

Rehabilitation Studies certificate

The undergraduate academic certificate in rehabilitation studies provides students with the fundamental knowledge and skills for interaction with individuals with disabilities. This certificate is recommended for students in other disciplines who seek a basic understanding of the disability experience or who wish to add disability-related knowledge and skills to their professional preparation.

All courses are available online.

Required courses, 12 hours

Students must complete four courses, including:

- RHAB 3100 - Disability and Society
- RHAB 3900 - Case Management in Rehabilitation
- RHAB 4200 - Physical and Psychosocial Aspects of Disability
- RHAB 4700 - Employment Services

Substance Use Disorders Treatment certificate

The undergraduate academic certificate in substance use treatment provides a basic foundation for becoming a licensed chemical dependency counselor (for information about waivers of educational requirements under §140.405, visit www.hhs.texas.gov/business/licensing-credentialing-regulation/professional-licensing-certification-compliance/licensed-chemical-dependency-counselor-program and navigate to "Rules and Regulations"). Completion of the certificate also contributes to skills applicable in any human service field.

Required courses, 12 hours

- ADDS 4075 - Drugs and Alcohol
- ADDS 4175 - Addiction Treatment Models
- ADDS 4675 - Addictions Counseling Competencies
- RHAB 4500 - Assessment in Rehabilitation

Jody Sundt, Interim Chair

Faculty

Social work addresses societal concerns and the well-being of people to ensure they have equal access to resources, services and opportunities. Social workers encourage change by striving to end discrimination, oppression, poverty and other forms of social injustice. They work in many different settings, including:

- child welfare and family service agencies
- community mental health or substance abuse treatment centers
- nonprofit, government or private human service programs
- retirement centers, nursing homes or other aging programs for older people and their families
- school or community programs to meet the needs of children

Our programs provide a solid foundation in the knowledge, skills and values necessary for the social work field and prepares students for the required state licensing exam.

We offer many opportunities to work with the community, practice skills, and get involved in social work organizations and network. As part of our curriculum, we have service-learning projects in the introductory courses and practice courses that apply classroom knowledge to real-life situations.

Our faculty members are well-known researchers and practitioners with experience working in diverse areas. Their research has been published in recognized journals and presented regularly at national conferences.

The Social Work programs are accredited by the Council on Social Work Education (333 John Carlyle Street, Suite 400; Alexandria, VA 22314; telephone 703-683-8080). This accreditation means we meet or exceed strict academic standards for excellence in social work education.

Majors

Social Work, BSW

The Bachelor of Social Work degree program prepares students for a career in helping vulnerable populations. Students learn the professional skills necessary to assist people in overcoming challenges associated with abuse, poverty, homelessness, addiction, disability, illness and discrimination. Social workers practice in a variety of areas including health care, child welfare, substance abuse treatment, aging and criminal justice.

Program Requirements

Application to the major and pre-major courses

The Bachelor of Social Work degree program is fully accredited by the Council on Social Work Education (333 John Carlyle Street, Suite 400, Alexandria, VA 22314; 703-683-8080).

Students may indicate an intention of majoring in social work at any point during the early part of their academic career by declaring a pre-social work major. They may consult with the College of Health and Public Service social work advisors regarding degree requirements at any time. However, formal acceptance into the social work major occurs only after successful completion of the designated pre-major courses, degree audit, a semester-by-semester course plan with the social work advisor, and submission of a formal application for admission. Applications to the major are due on approximately the 30th calendar day of the term/semester in which pre-major courses are in process or are completed. Applications are accepted during the fall and spring terms/semesters only. The number of available slots is limited, so admission may be restricted. An application form and instructions are available on the website. Students must adhere to the program's course sequencing and prerequisite schedule. The degree program culminates with a field-based practicum that consists of a required 12-credit-hour block. During the practicum, students practice social work skills in an agency placement for approximately 32–35 hours per week over the course of one semester, for a total of no less than 480 hours of practice.

Pre-major courses, 9 hours

- SOWK 1450 - Introduction to Social Work (with a minimum grade of C)
- SOWK 2430 - Policies, Issues and Programs in Social Welfare (with a minimum grade of C)
- SOWK 3000 - Foundations of Interviewing and Interpersonal Skills (with a minimum grade of C)

Degree requirements

Candidates for the Bachelor of Social Work must meet the following requirements:

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Social Work degree as specified in the University Core Curriculum in the Academic policies section of this catalog and the College of Health and Public Service degree requirements.

Major requirements

The social work major consists of 54 hours in social work and related required courses.

Other course requirements

Students are required to follow social work course sequencing as outlined below; however, students may choose to also take outside courses while enrolled in the program.

Pre-major requirements

- Finish pre-major courses: SOWK 1450, SOWK 2430, SOWK 3000.
- Obtain a degree audit from the College of Health and Public Service advising office.
- Complete a semester-by-semester plan from social work program advisor.
- Submit application to the social work program.

First semester after admission to the major (junior year)

- SOWK 3500 - Human Behavior and the Social Environment I
- SOWK 3610 - Social Work Practice I
- SOWK 3870 - Social Work Research and Practice
- SOWK 4540 - Human Diversity for the Helping Professions

Second semester after admission to the major (junior year)

- SOWK 4000 - Ethics and Professionalism in Practice
- SOWK 4400 - Social Work Practice II
- SOWK 4500 - Human Behavior and the Social Environment II
- SOWK 4880 - Quantitative Methods of Social Research

Third semester after admission to the major (senior year)

- SOWK 4430 - Applied Social Welfare Policy
- SOWK 4610 - Social Work Practice III

Fourth semester after admission to the major (senior year)

- SOWK 4870 - Social Work Integrative Seminar
- SOWK 4875 - Social Work Field Practicum

Social Work Elective

Select one of the following:

- SOWK 3525 - Violence in Families
- SOWK 4325 - The Intersection of Trauma and Substance Use
- SOWK 4700 - Child Welfare Practice and Services
- SOWK 4725 - Theory and Practice in Mental Health

Minor

None required.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information see an academic advisor in the College of Health and Public Service.

Other requirements

- Must make formal application for acceptance to the program;
- Must have a minimum grade of C in all social work courses;
- Must have a minimum 2.5 GPA for admission to the major;

- Must adhere to program policies and course sequencing;
- Must adhere to the National Association of Social Workers (NASW) and State of Texas codes of ethics.

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

Minors

Human Services minor

Human services is an emerging professional identity and there is a high demand for trained human service workers in many settings.

Required courses

A minor in human services requires the completion of:

- RHAB 3000 - Active Listening in the Helping Professions

- SOWK 1450 - Introduction to Social Work

Plus four courses selected from

- ADDS 4075 - Drugs and Alcohol
- ADDS 4275 - Alcohol, Drugs and Disability
- RHAB 3100 - Disability and Society
- RHAB 3900 - Case Management in Rehabilitation
- RHAB 4100 - Rehabilitation Service Delivery Systems
- RHAB 4200 - Physical and Psychosocial Aspects of Disability
- SOWK 2430 - Policies, Issues and Programs in Social Welfare
- SOWK 3500 - Human Behavior and the Social Environment I
- SOWK 3870 - Social Work Research and Practice
- SOWK 4540 - Human Diversity for the Helping Professions

Area requirements

Students must take courses from at least two of the following areas: social work, addictions and rehabilitation studies.

Undergraduate Academic Certificates

Trauma-Informed Care certificate

Trauma is a major issue in society that results in increased risk across a number of societal concerns. Trauma-informed care is a powerful framework that offers hope in addressing these issues. It provides a means to better recognize the symptoms of trauma, understand its impact, and develop the knowledge base and skills to address the needs of individuals with trauma histories.

This certificate is interdisciplinary and can benefit a wide range of professions interacting with individuals who have experienced trauma (for example, social work, rehabilitation, psychology majors, criminal justice personnel, healthcare professionals, educators and many other professional domains). It consists of four required courses across the domains of mental health, substance use, child welfare and family violence (total of 12 credit hours).

Requirements

- SOWK 3525 - Violence in Families
- SOWK 4325 - The Intersection of Trauma and Substance Use
- SOWK 4700 - Child Welfare Practice and Services
- SOWK 4725 - Theory and Practice in Mental Health

Yunfei Du, Associate Dean of Academics

Faculty

The College of Information situates itself at the intersection of people, technology and information. Its faculty, staff and students invest in innovative research, collaborative partnerships and student-centered education to serve a global information society. The college is dedicated to serving state, regional, national and global communities by preparing information leaders and innovators; forging the creation of transformative and translational knowledge; and sharing knowledge that addresses information challenges and problems. The college's goals are to

- provide exemplary learning opportunities and instruction facilitated through varied formats, technology-rich environments and an accomplished faculty who embrace diversity in all college endeavors;
- contribute leading-edge research, scholarship and creative pursuits for a global informational society; and
- nurture the professional endeavors of faculty and staff, the university and the general public through outstanding leadership, consulting, community engagement and continuing education.

University Core Requirements and degree requirements

The University of North Texas core curriculum is listed in the "University Core Curriculum Requirements" in the Academics section of this catalog. Each program within the college requires specific courses to satisfy particular degree requirements. Students who have questions regarding degree requirements and course requirements should contact the College advising office at ci-advising@unt.edu, or consult a degree program advisor in the Department of Information Science, Department of Linguistics, or Department of Learning Technologies.

Programs of study

Programs of study are listed under each department.

Minors

Team Science minor

Team science is a multidisciplinary field that concentrates on the interpersonal, intrapersonal, organizational, physical, environmental, technological, societal and political contextual factors in the workplace. Team science touches on the collaborative functioning of teams and small groups in the workplace, often involving cross-disciplinary and cross-functional groups. The UNT-TSci program studies the antecedent conditions, collaborative processes and outcomes associated with teams and small groups. Topics studied within this program include: group dynamics, team processes, leadership, team leadership, team training, team evaluation, team cognition, intergroup conflict, change theory, complexity leadership theory, decision-making/problem-solving skills and systems thinking—along with a preview of the technologies used to support teams and small groups in the workplace.

24 hours required

Team science characteristics (12 hours)

- LTEC 3610 - Principles of Team Science
- LTEC 3620 - Team Building
- LTEC 3630 - Team Dynamics
- LTEC 3640 - Leadership and Team Leadership

Team science techniques (12 hours)

- LTEC 4610 - Team Cognition
- LTEC 4620 - Team Decision Making
- LTEC 4630 - Evaluation, Measurement and ROI
- LTEC 4640 - Team Coaching

Junhua Ding, Chair

Faculty

The Anuradha and Vikas Sinha Department of Data Science is a forward-thinking academic unit dedicated to advancing data-driven discovery, artificial intelligence, and applied analytics. The department provides students with a strong foundation in theoretical principles, computational skills, artificial intelligence, and software engineering, preparing them to excel in data science, machine learning, big data analytics, and AI-driven software development. By integrating cutting-edge research with hands-on learning, the department fosters innovation and prepares graduates for academic, industry, and government careers in the rapidly evolving world of data and AI-driven decision making.

Majors

Data Science, BS

The Bachelor of Science in data science is designed to meet the rising workforce demand on professional in data management, big data and data analytics fields. It prepares students for careers in the data science with a broad knowledge of the tools, techniques and methods needed to work with data and information in an information intensive environment. Some of the areas this program is concerned with include data management, data modeling, big data, data analytics, data and information visualization, information organization, Internet applications development, game design and technology. The program helps students to acquire the type of skills, critical thinking, and competencies needed in data science and digital data management, as well as one of the professional fields. The program will educate a new generation of information professionals, particularly those students with science background pursuing an analytic related field.

Hours required and general university requirements

A minimum of 120 semester hours, of which 42 must be advanced. See University Core Curriculum in the Academic policies section of this catalog.

Pre-data science requirements, 15 hours

- CSCE 1030 - Computer Science I
- CSCE 1040 - Computer Science II
- MATH 1650 - Pre-Calculus
- MATH 1680 - Elementary Probability and Statistics

Major requirements, 24 hours

- DTSC 3010 - Introduction to Data Science
- DTSC 3020 - Introduction to Computation with Python
- DTSC 4050 - Statistical Methods for Data Science and Analysis
- DTSC 4501 - Principles of Data Science and Analytics
- INFO 4670 - Data Analysis and Knowledge Discovery
- INFO 4707 - Data Modeling and Data Warehousing
- INFO 4730 - Digital Curation and Preservation
- INFO 4709 - Data Visualization

Professional field, 24 hours

A professional field of 24 hours from information science or a related field, such as business analytics, computer science, digital communications analytics, education analytics, health data analytics and statistics.

Information science professional field

- INFO 4080 - Research Methods and Evaluation
- INFO 4203 - Information Indexing and Organization
- INFO 4206 - Information Retrieval Systems
- INFO 4230 - Records Management Operations

- INFO 4306 - Project Management for Information Systems
- INFO 4307 - Knowledge Management Tools and Technologies
- INFO 4365 - Health Sciences Information Management
- INFO 4745 - Information Architecture

Business analytics professional field

- BCIS 3610 - Basic Information Systems
- DSCI 2710 - Data Analysis with Spreadsheets
- DSCI 3710 - Business Statistics with Spreadsheets
- DSCI 3870 - Management Science
- DSCI 4330 - Enterprise Applications of Business Intelligence/Analytics
- DSCI 4510 - Modeling for Business Intelligence
- DSCI 4520 - Introduction to Data Mining
- DSCI 4700 - Analytics for Decision Making

Minor

None.

Electives, 15 hours

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree.

Advanced courses in a related field such as business analytics, computer science, digital communications analytics, education analytics, health data analytics and statistics.

- BCIS 3615 - Visual Display of Business Information
- BCIS 3630 - Object-Oriented Programming for Business
- BCIS 3680 - Advanced Object-Oriented Programming for Business
- BCIS 4610 - Analysis of Business Information Systems
- BCIS 4620 - Introduction to Database Applications
- BCIS 4630 - Fundamentals of Information Technology Security
- BCIS 4660 - Introduction to Data Warehousing
- BCIS 4690 - Information Technology Management
- BCIS 4720 - Web-Based Information Technologies
- INFO 3901 - Data Science Internship Project

Other requirements

A grade of C or higher is required in all Pre-Data Science, Major courses, Professional field, and Supporting field courses. A 2.0 UNT, 2.0 Overall, and 2.7 Professional/Supporting Field GPA is required for graduation.

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years, and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

Year 1

Semester 1		Semester 2	
MATH 1650 - Pre-Calculus	5 hours	MATH 1680 - Elementary Probability and Statistics	3 hours
Communication core	3 hours	Communication core	3 hours
American History core	3 hours	Government/Political Science core	3 hours
Government/Political Science core	3 hours	Social and Behavioral Sciences core	3 hours
BCIS Elective	3 hours	BCIS Elective	3 hours
Total	17 hours	Total	15 hours

Year 2

Semester 1		Semester 2	
CSCE 1030 - Computer Science I	3 hours	CSCE 1040 - Computer Science II	3 hours
American History core	3 hours	MATH 1710 - Calculus I	4 hours
Language, Philosophy and Culture core	3 hours	Creative Arts core	3 hours
Life and Physical Sciences core	3 hours	Life and Physical Sciences core	3 hours
Data Science Professional Field	3 hours	Data Science Professional Field	3 hours
Total	15 hours	Total	16 hours

Year 3

Semester 1		Semester 2	
DTSC 3010 - Introduction to Data Science	3 hours	DTSC 4050 - Statistical Methods for Data Science and Analysis	3 hours
DTSC 3020 - Introduction to Computation with Python	3 hours	DTSC 4501 - Principles of Data Science and Analytics	3 hours
Component Area Option B core	3 hours	Data Science Professional Field	3 hours

Semester 1		Semester 2	
Data Science Professional Field	3 hours	BCIS Elective	3 hours
BCIS Elective	3 hours	BCIS Elective	3 hours
Total	15 hours	Total	15 hours

Year 4

Semester 1		Semester 2	
INFO 4670 - Data Analysis and Knowledge Discovery	3 hours	INFO 4730 - Digital Curation and Preservation	3 hours
INFO 4707 - Data Modeling and Data Warehousing	3 hours	Data Science Professional Field	3 hours
INFO 4709 - Data Visualization	3 hours	Data Science Professional Field	3 hours
Data Science Professional Field	3 hours	Elective	3 hours
Data Science Professional Field	3 hours		
Total	15 hours	Total	12 hours

Grad Track Options

Data Science, BS with grad track option leading to Data Science, MS

Application and registration process

- Declared Bachelor of Science in Data Science (BSDS) students with:
 - a cumulative GPA 3.5 or higher for the last 60 hours completed;
 - 75 or more credit hours completed; and
 - who are registered within the BSDS degree as pursuing one of the focus areas, may apply during their junior year.
- The following courses must be completed with a grade of C or higher or be in progress at the time of application:
 - MATH 1650 - Pre-Calculus
 - MATH 1680 - Elementary Probability and Statistics
 - CSCE 1030 - Computer Science I
 - CSCE 1040 - Computer Science II
- Students apply to the University of North Texas Toulouse Graduate School.
- Students apply to the College of Information, Department of Information Science.
- Students may not take a graduate class until 90 credit hours have been completed, and must complete their BSDS degree within one year of taking their first graduate course within the track in order to have the courses transferred to their graduate plan.

Admission process and standards

To be admitted to the program, students submit the following items as detailed in the College of Information, Department of Information Data Science application portal: <https://informationscience.unt.edu/admission-ms-data-science>

- Submit an experience write-up;
- resume or CV;
- Data Science application; and
- Two (2) recommendations.

Communication and monitoring

Students are given a copy of this process form by their BSDS advisor to

- clarify all application and admissions requirements;
- notify students that they remain undergraduates until all undergraduate degree requirements and their BSDS degree is posted to their transcript;
- notify students that they are not eligible for most graduate perquisites, including teaching and research assistantships and related health insurance, financial aid, or graduate award programs until their undergraduate degree is posted; and
- notify students that graduate courses successfully completed as a part of the grad track will be transferred officially as pass/fail credits to their graduate transcript, not factoring into the graduate GPA.

Student progress will be monitored through transcript and academic progress reports to the BADS faculty coordinator and the MS Data Science graduate coordinators after each term, provided by the advisor. *The cumulative GPA must remain above 3.0, with no course grades below C for the student to be considered to be making satisfactory academic progress in the grad track. A student who fails to meet this standard will be removed from the grad track program.*

Course options

Accepted students will complete two graduate courses (6 hours) to complete the focus area in Data Science within the BSDS degree program.

- INFO 5307 - Knowledge Management Tools and Technologies
- INFO 5503 - Knowledge Management Processes and Practices
- INFO 5707 - Data Modeling for Information Professionals
- INFO 5709 - Data Visualization and Communication
- INFO 5731 - Computational Methods for Information Systems
- INFO 5735 - Usability and User Experience Metrics
- INFO 5737 - Information and Cyber-Security
- INFO 5810 - Data Analysis and Knowledge Discovery

All remaining courses required for the Data Science, BS must also be completed.

Yunfei Du, Interim Chair

Faculty

The Bachelor of Science with a major in information science at the University of North Texas will equip graduates with the knowledge needed to build competencies in important and emerging areas such as:

- information organization,
- information architecture,
- information seeking and analysis,
- health informatics,
- knowledge management,
- digital content and digital curation, and
- information systems.

The BS with a major in information science prepares students for a career at the intersection of information, people and technology. Students earning this degree are able to customize their program by developing focused areas of study (concentrations) or by choosing a minor or certificate in another field.

Information has increased in importance, opening the door to exciting opportunities. A key component of the information science program is its flexibility. Courses are offered in a variety of formats, including face-to-face, online and blended, that allows you to balance classes with full-time or part-time employment.

Academic advising

Advising on courses, programs and related questions is available through the college advising office, Discovery Park, Room C232; 940-565-2445; ci-advising@unt.edu. All students should have an approved degree audit on file as early as possible, but not later than the beginning of the final 60 hours of courses. Out of state students must contact the college advising office for advising clearance before registering for classes. Calls and visits by prospective students are welcomed from 9 a.m. to 5 p.m. Monday through Friday.

Bachelor of Science with a major in information science

The bachelor's program goal is to provide general educational preparation for students planning to enter the information professions. The bachelor's program objectives are for students to demonstrate knowledge and skills related to:

- the roles and impacts of information policies, practices, and information itself on diverse populations in a rapidly changing technological and global information society;
- human information needs and behavior in order to develop and implement information systems and services that meet user needs;
- professional practices necessary to succeed in information-related occupations and to pursue the professional master's degree; and
- the philosophy, principles, and legal and ethical responsibilities of the field.

Requirements

Recognizing that each student is unique, with different interests and career goals, each application is reviewed on its own merit. Because the interdisciplinary nature of the profession attracts people with diverse backgrounds, students are encouraged to discuss their interests and concerns with an advisor from the department. Students must be admitted to the university in order to be accepted in the information science program.

To enroll in more than 6 hours of courses in the department, students must have the following:

- at least sophomore standing and
- a cumulative grade point average of at least 2.5.

For graduation, candidates to the Bachelor of Science with a major in information science must meet the following requirements:

University requirements

- A student must have completed a minimum of 120 semester hours, of which 42 must be upper level.
- See University Core Curriculum Requirements in the Academics section of this catalog for university core curriculum requirements.

Information science major requirements

- At least 33 hours including 18 hours of required courses in one of the program concentrations, and at least 15 additional hours selected with the approval of the department.
- Cross-functional—45 hours may be completed or transferred from related areas and programs as approved by the department. Students must contact an advisor in the information science program to determine the 45 hours of course work needed to complete the cross-functional area of the degree.
- A minimum grade point average of 2.5 is required on all courses counted toward the major.

Program Concentrations

Data Science

Data Science is an emerging field involving systematic and methodological approach to managing and manipulating large data sets. The concentration in Data Science is designed to help graduates gain skills and experiences in designing, implementing and transforming data sets into actionable knowledge. IT provides them with the knowledge and competencies needed to work with analytic tools and technologies.

Human Language Technology

Human Computer Technology is an evolving interdisciplinary field that includes computational linguistics, natural language processing, machine translation and artificial intelligence. The concentration provides graduates with the knowledge needed to work with language-based technologies such as speech recognition, speech synthesis, machine translation, search engines and computer assisted services. Graduates will have a better understanding of human computer interaction issues and interfaces.

Information science and knowledge organization

Provides graduates with the necessary skills and competencies associated with the collection, classification, storage, retrieval, manipulation, packaging and dissemination of information. It prepares graduates to work with information in a variety of formats and different organizational settings.

Project and knowledge management

Provides graduates with the knowledge and the understanding of the convergence of project management and knowledge management, including the use of associated tools and technologies. It prepares them to assume project management responsibilities including project initiation, planning, scheduling, implementation, knowledge retention and knowledge transfer.

Information management and health informatics

Provides graduates with the skills and competencies needed to work in a healthcare environment and work with health information such as patient information, medical records, medical imaging and clinical research data. Students in the program will explore how to effectively use technology to improve the efficiency and quality of healthcare including reducing cost, increasing patient access, and improving diagnosis and treatment.

Digital content and information systems

Provides graduates with practical knowledge needed to manage the increasingly growing volume of digital information. Graduates will have a better understanding of the tools and technologies needed to manage large amounts of data and complex information systems. Students enrolled in the program will have a better understanding of human–computer interaction issues and interfaces.

Scholarships

There are various scholarships for which information science majors who are entering freshmen, transfer students or continuing students may apply. For specific information and application forms, contact the department chair, administrative assistant, or visit the web page: <http://informationscience.unt.edu/scholarships-and-awards>.

Majors

Information Science with a concentration in Data Science, BS

The Bachelor of Science with a major in information science equips graduates with the knowledge, skills and abilities to work in a variety of current and emerging areas in the information field. Information science focuses on the intersection of people, information and technology. Students gain a foundation in the discipline and professional practice through a set of core courses, a selection of specializations and through multiple experiential learning experiences.

The Bachelor of Science with a major in information is recognized as a STEM undergraduate degree. It is a professional degree designed to prepare the student for a career and/or further studies in the practice and the discipline at the intersection of people, information and technology.

Program Goals

Program goals for the Bachelor of Science in information science:

1. To prepare learners with the knowledge, skills and abilities to construct and deliver solutions, services and processes at the intersection of people, information and technology.
2. To develop in learners their capabilities to analyze, design, implement, evaluate, manage and lead to address and meet social, organizational and individual information needs.
3. To provide learners with rigorous courses, experiential learning and real-world opportunities leading to successful and worthwhile careers in the information field.

Program Outcomes

Program outcomes for the Bachelor of Science in information science indicate specific, demonstrable (measurable) and learner-centered statements of the knowledge and skills graduates of the program will be able to demonstrate:

1. Collect, analyze and interpret data to identify and understand people's information needs and behaviors.
2. Design, implement and evaluate user-centered technical systems and applications to meet people's information needs and behaviors.
3. Use and/or construct processes and procedures to solve problems related to organizing, managing and preserving data, information and knowledge for diverse user groups.

4. Discuss and explain professional, social, policy, ethical, legal and security issues and responsibilities of information professionals and researchers.
5. Employ and practice excellent written and spoken communication and effective interpersonal skills whether working in teams or as an individual.
6. Recognize that you are responsible for your learning and demonstrate abilities to be an independent and life-long learner.

Degree requirements

Students must be admitted to the university prior to being accepted in the information science program. Students must meet all general requirements for admission to undergraduate study as stated in the Admission section of this catalog. To enroll for more than 6 hours of courses in the Department of Information Science, students must have the following:

- At least sophomore standing.
- At least junior standing is required to enroll for more than 12 hours in the department.
- A cumulative grade point average of at least 2.5.

Hours required and general/college requirements

A minimum of 120 semester hours, 42 must be advanced, and fulfillment of degree requirements for the Bachelor's degree as specified in General degree requirements and the requirements of this catalog: University Core Curriculum in the Academic policies section of this catalog.

Bachelor of Science degree requirements

Information science majors must complete 33 credit hours of coursework in the following categories:

- Five required core courses totaling 15 credit hours; these required courses cover the following main topics:
 - Introduction to information, information science and information technologies
 - Information organization and management
 - Information users and their needs
 - Data modeling and database design
 - Professional preparation and career development
- A required concentration comprising 6 required courses totaling 18 credit hours; current concentrations are:
 - Data Science
 - Digital Content and Information Systems
 - Human Language Technology
 - Information Management and Health Informatics
 - Information Science and Knowledge Organization
 - Project and Knowledge Management
- A capstone experience in the form of a 3 credit hour course as one of the six required courses for each concentration.

Concentration in data science

- DTSC 4050 - Statistical Methods for Data Science and Analysis
- DTSC 4501 - Principles of Data Science and Analytics
- INFO 4707 - Data Modeling and Data Warehousing
- INFO 4709 - Data Visualization
- INFO 4910 - Special Problems
- INFO 4970 - Information Science Seminar

Cross-functional

Cross-functional electives comprising 45 credit hours, with at least 9 credit hours at the upper level (courses numbered 3000 and above). Cross-functional elective are determined in consultation with the academic advisor.

Students should work closely with the director of the BS-IS program and the college advising office when choosing cross functional electives. The program recommends specific elective courses to enhance students' preparation for professional information work. These electives fulfill total number of hours required for degree and to meet advanced hour requirement.

Other requirements

Students must maintain a minimum grade point average (GPA) of 2.5 across all information science major courses taken.

Information Science with a concentration in Digital Content and Information Systems, BS

The Bachelor of Science with a major in information science equips graduates with the knowledge, skills and abilities to work in a variety of current and emerging areas in the information field. Information science focuses on the intersection of people, information and technology. Students gain a foundation in the discipline and professional practice through a set of core courses, a selection of specializations and through multiple experiential learning experiences.

The Bachelor of Science with a major in information is recognized as a STEM undergraduate degree. It is a professional degree designed to prepare the student for a career and/or further studies in the practice and the discipline at the intersection of people, information and technology.

Program Goals

Program goals for the Bachelor of Science in information science:

1. To prepare learners with the knowledge, skills and abilities to construct and deliver solutions, services and processes at the intersection of people, information and technology.
2. To develop in learners their capabilities to analyze, design, implement, evaluate, manage and lead to address and meet social, organizational, and individual information needs.
3. To provide learners with rigorous courses, experiential learning and real-world opportunities leading to successful and worthwhile careers in the information field.

Program Outcomes

Program outcomes for the Bachelor of Science in information science indicate specific, demonstrable (measurable) and learner-centered statements of the knowledge and skills graduates of the program will be able to demonstrate:

1. Collect, analyze and interpret data to identify and understand people's information needs and behaviors.
2. Design, implement and evaluate user-centered technical systems and applications to meet people's information needs and behaviors.
3. Use and/or construct processes and procedures to solve problems related to organizing, managing and preserving data, information, and knowledge for diverse user groups.
4. Discuss and explain professional, social, policy, ethical, legal and security issues and responsibilities of information professionals and researchers.
5. Employ and practice excellent written and spoken communication and effective interpersonal skills whether working in teams or as an individual.

6. Recognize that you are responsible for your learning and demonstrate abilities to be an independent and life-long learner.

Degree requirements

Students must be admitted to the university prior to being accepted in the information science program. Students must meet all general requirements for admission to undergraduate study as stated in the Admission section of this catalog. To enroll for more than 6 hours of courses in the Department of Information Science, students must have the following:

- At least sophomore standing
- At least junior standing is required to enroll for more than 12 hours in the department.
- A cumulative grade point average of at least 2.5.

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor's degree as specified in General University requirements and the requirements of this catalog: University Core Curriculum in the Academic policies section of this catalog.

Bachelor of Science degree requirements

Information science majors must complete 33 credit hours of coursework in the following categories:

Program Goals

Program goals for the Bachelor of Science in information science:

1. To prepare learners with the knowledge, skills and abilities to construct and deliver solutions, services, and processes at the intersection of people, information and technology.
2. To develop in learners their capabilities to analyze, design, implement, evaluate, manage and lead to address and meet social, organizational, and individual information needs.
3. To provide learners with rigorous courses, experiential learning and real-world opportunities leading to successful and worthwhile careers in the information field.

Program Outcomes

Program outcomes for the Bachelor of Science in information science indicate specific, demonstrable (measurable) and learner-centered statements of the knowledge and skills graduates of the program will be able to demonstrate:

1. Collect, analyze and interpret data to identify and understand people's information needs and behaviors.
2. Design, implement and evaluate user-centered technical systems and applications to meet people's information needs and behaviors.
3. Use and/or construct processes and procedures to solve problems related to organizing, managing and preserving data, information and knowledge for diverse user groups.
4. Discuss and explain professional, social, policy, ethical, legal and security issues and responsibilities of information professionals and researchers.
5. Employ and practice excellent written and spoken communication and effective interpersonal skills whether working in teams or as an individual.
6. Recognize that you are responsible for your learning and demonstrate abilities to be an independent and life-long learner.

Degree requirements

Students must be admitted to the university prior to being accepted in the information science program. Students must meet all general requirements for admission to undergraduate study as stated in the Admission section of this catalog. To enroll for more than 6 hours of courses in the Department of Information Science, students must have the following:

- At least sophomore standing
- At least junior standing is required to enroll for more than 12 hours in the department.
- A cumulative grade point average of at least 2.5.

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor's degree as specified in General Degree requirements and the requirements of this catalog: University Core Curriculum in the Academic policies section of this catalog.

Bachelor of science degree requirements

Information science majors must complete 33 credit hours of coursework in the following categories:

- Five required core courses totaling 15 credit hours; these required courses cover the following main topics:
 - Introduction to information, information science and information technologies
 - Information organization and management
 - Information users and their needs
 - Data modeling and database design
 - Professional preparation and career development
- A required concentration comprising 6 required courses totaling 18 credit hours; current concentrations are:
 - Data Science
 - Digital Content and Information Systems
 - Human Language Technology
 - Information Management and Health Informatics
 - Information Science and Knowledge Organization
 - Project and Knowledge Organization
- A capstone experience in the form of a 3 credit hour course as one of the six required courses for each concentration.

Concentration in information science and knowledge organization

- INFO 4203 - Information Indexing and Organization
- INFO 4206 - Information Retrieval Systems
- INFO 4223 - Introduction to Metadata for Information Organization
- INFO 4710 - Information Technology Management
- INFO 4910 - Special Problems
- INFO 4970 - Information Science Seminar

Cross-functional courses

Cross-functional electives comprising 45 credit hours, with at least 9 credit hours at the upper level (courses numbered 3000 and above). Cross-functional elective are determined in consultation with the academic advisor.

Students should work closely with the director of the BS-IS program and the college advising office when choosing cross functional electives. The program recommends specific elective courses to enhance students' preparation for professional information work. These electives fulfill total number of hours required for degree and to meet advanced hour requirement.

Other requirements

Students must maintain a minimum grade point average (GPA) of 2.5 across all Information Science major courses taken.

Information Science with a concentration in Project and Knowledge Management, BS

The Bachelor of Science with a major in information science equips graduates with the knowledge, skills and abilities to work in a variety of current and emerging areas in the information field. Information science focuses on the intersection of people, information and technology. Students gain a foundation in the discipline and professional practice through a set of core courses, a selection of specializations and through multiple experiential learning experiences.

The Bachelor of Science with a major in information is recognized as a STEM undergraduate degree. It is a professional degree designed to prepare the student for a career and/or further studies in the practice and the discipline at the intersection of people, information and technology.

Program Goals

Program goals for the Bachelor of Science in information science:

1. To prepare learners with the knowledge, skills and abilities to construct and deliver solutions, services, and processes at the intersection of people, information and technology.
2. To develop in learners their capabilities to analyze, design, implement, evaluate, manage and lead to address and meet social, organizational and individual information needs.
3. To provide learners with rigorous courses, experiential learning and real-world opportunities leading to successful and worthwhile careers in the information field.

Program Outcomes

Program outcomes for the Bachelor of Science in information science indicate specific, demonstrable (measurable) and learner-centered statements of the knowledge and skills graduates of the program will be able to demonstrate:

1. Collect, analyze and interpret data to identify and understand people's information needs and behaviors.
2. Design, implement and evaluate user-centered technical systems and applications to meet people's information needs and behaviors.
3. Use and/or construct processes and procedures to solve problems related to organizing, managing, and preserving data, information and knowledge for diverse user groups.
4. Discuss and explain professional, social, policy, ethical, legal and security issues and responsibilities of information professionals and researchers.
5. Employ and practice excellent written and spoken communication and effective interpersonal skills whether working in teams or as an individual.
6. Recognize that you are responsible for your learning and demonstrate abilities to be an independent and life-long learner.

Grad Track Options

Information Science, BS with grad track option leading to Information Science, MS

The Department of Information Science offers a grad track option for existing UNT undergraduate students with a major in information science (IS). In this grad track option, students can take a maximum of 9 credit hours of graduate courses while completing the information science BS degree. These credits will be counted toward first the bachelor's degree and then the Master of Science in information science.

Prior to registering for the specified graduate courses, the student must have been admitted to the grad track option and obtained approvals from the appropriate undergraduate and/or graduate advisors.

Admission requirements and program policies

Admission requirements

1. Students should be a major in the UNT information science Bachelor of Science program.
2. A student may apply for the grad track option during his/her junior year (and must have completed at least 75 credit hours at the time of application to grad track).
3. Minimum of 3.5 cumulative GPA required at the time of application submission.
4. The student will provide two recommendation forms from information science faculty members who can evaluate the student's ability to complete graduate level work.
5. The application will be reviewed by the College of Information (COI) advising and admissions student support services office and both the undergraduate and graduate advisors.
6. Once approved, the student must apply to Toulouse Graduate School within the first semester of the senior year.

Program policies

1. After completing 90 credit hours, the student can start taking the graduate courses as grad track electives for the BS degree requirement with a major in information science (IS). The accepted graduate courses for the IS grad track are listed below. If the student wants to take other graduate courses for the grad track credits, he/she needs to obtain approvals from the LIS department chair, or the graduate faculty advisor, and the director or assistant director of the College of Information (COI) advising and admissions student support services office. For these graduate courses to be counted toward requirements for the MS degree, the student should earn a B or above in the approved graduate courses.
2. The students admitted to the grad track option will be admitted into the MS program on a conditional basis. Once the student has satisfied all course work for the bachelor's degree and maintained a 3.0 or higher GPA on the specified graduate courses, he/she will be fully admitted to the MS program.
3. Undergraduate students who have been accepted to a grad track option should complete all of their bachelor's degree requirements and graduate within 12 months of the first day of the semester, in which they start taking graduate courses, or enrollment in graduate level course work will be suspended.
4. The student must enroll in graduate school in the next long semester after finishing his/her bachelor's degree and should take the remaining graduate courses in the following 12 months to complete his/her MS degree. If the student does not enroll in graduate school in the next long semester after finishing his/her bachelor's degree, those graduate course credit hours taken as part of grad track will not be applied to the MS degree, even if the student comes back for graduate school in the future.

Program requirements

- INFO 5080 - Research Methods and Analysis (replaces INFO 4080 - Research Methods and Evaluation)
- INFO 5230 - Documents and Records Management (replaces INFO 4230 - Records Management Operations)
- INFO 5305 - Systems Analysis and Design (replaces an INFO 3000/4000 elective)

- INFO 5615 - Electronic Databases and Information Services (replaces INFO 4615 - Electronic Information Services)
- INFO 5707 - Data Modeling for Information Professionals (replaces an INFO 3000/4000 elective)
- INFO 5814 - Web Content Development and Maintenance (replaces an INFO 3000/4000 elective)

All remaining courses for Information Science with a concentration in Information Management and Health Informatics, BS, Information Science with a concentration in Information Science and Knowledge Organization, BS, Information Science with a concentration in Project and Knowledge Management, BS, Information Science with a concentration in Human Language Technology, BS (INACTIVE: DELETED 10/2/2024, Information Science with a concentration in Data Science, BS or Information Science with a concentration in Digital Content and Information Systems, BS must be completed.

Information Science, BS with grad track option leading to Library Science, MS

The Department of Information Science offers a grad track option for existing UNT undergraduate students with a major in information science. In this grad track option, students can take a maximum of 9 credit hours of graduate courses while completing the information science BS. These credits will be counted toward first the BS degree and then the Master of Science in library science.

Prior to registering for the specified graduate courses, the student must have been admitted to the grad track option and obtained approvals from the appropriate undergraduate and/or graduate advisors.

Admission requirements and program policies

Admission requirements

1. Students should be a major in the UNT information science Bachelor of Science program.
2. A student may apply for the grad track option during his/her junior year (and must have completed at least 75 credit hours at the time of application to grad track).
3. Minimum of 3.5 cumulative GPA required at the time of application submission.
4. The student will provide two recommendation forms from information science faculty members who can evaluate the student's ability to complete graduate-level work.
5. The application will be reviewed by the College of Information (COI) advising and admissions student support services office and both the undergraduate and graduate advisors.
6. Once approved, the student must apply to Toulouse Graduate School within the first semester of the senior year.

Program policies

1. After completing 90 credit hours, the student can start taking the graduate courses as grad track electives for the information science degree requirement with a concentration in library science (LS). The accepted graduate courses for the LS grad track are listed below. If the student wants to take other graduate courses for the grad track credits, he/she needs to obtain approvals from the LIS department chair, or the graduate faculty advisor, and the director or assistant director of the College of Information (COI) advising and admissions student support services office. For these graduate courses to be counted toward requirements for the MS degree, the student should earn a B or above in the approved graduate courses.
2. The students admitted to the grad track option will be admitted into the MS program on a conditional basis. Once the student has satisfied all course work for the BS degree and maintained a 3.0 or higher GPA on the specified graduate courses, he/she will be fully admitted to the MS program.
3. Undergraduate students who have been accepted to a grad track option should complete all of their bachelor's degree requirements and graduate within 12 months of the first day of the semester in which they start taking graduate courses, or enrollment in graduate-level course work will be suspended.
4. The student must enroll in graduate school in the next long semester after finishing his/her BS degree and should take the remaining graduate courses in the following 12 months to complete his/her MS degree. If the student does not enroll in graduate school in the next long semester after finishing his/her BS degree, those graduate course credit hours taken as part of grad track will not be applied to the MS degree, even if the student comes back for graduate school in the future.

Program requirements

Minors

Digital Content and Information Systems minor

A minor in digital content and information systems requires 18 hours and is open to all majors. Courses offered by other departments may be applied to the minor if approved by the information science advisor. For more information, contact the main office at 940-565-3736.

Required courses, 18 hours

- INFO 4206 - Information Retrieval Systems
- INFO 4710 - Information Technology Management
- INFO 4730 - Digital Curation and Preservation
- INFO 4745 - Information Architecture
- INFO 4910 - Special Problems
- INFO 4970 - Information Science Seminar

Human Language Technology minor

Students must complete the following 18 hours to earn the human language technology minor.

Required courses

- INFO 4730 - Digital Curation and Preservation
- INFO 4900 - Special Problems
or
- LING 4900 - Special Problems
- LING 3070 - Introduction to Linguistics
- LING 4050 - Morphology
- LING 4130 - Discovering Language from Data
- LING 4140 - Computational Linguistics

Information Management and Health Informatics minor

A minor in information management and health informatics requires 18 hours and is open to all majors. Courses offered by other departments may be applied to the minor if approved by the information science advisor. For more information, contact the main office at 940-565-3736.

Required courses, 18 hours

- INFO 4365 - Health Sciences Information Management
- INFO 4637 - Medical Informatics
- INFO 4670 - Data Analysis and Knowledge Discovery
- INFO 4710 - Information Technology Management
- INFO 4910 - Special Problems
- INFO 4970 - Information Science Seminar

Information Science and Knowledge Organization minor

A minor in information science and knowledge organization requires 18 hours and is open to all majors. Courses offered by other departments may be applied to the minor if approved by the information science advisor. For more information, contact the main office at 940-565-3736.

Required courses, 18 hours

- INFO 4203 - Information Indexing and Organization
- INFO 4206 - Information Retrieval Systems
- INFO 4223 - Introduction to Metadata for Information Organization
- INFO 4710 - Information Technology Management
- INFO 4910 - Special Problems
- INFO 4970 - Information Science Seminar

Project and Knowledge Management minor

A minor in project and knowledge management requires 18 hours and is open to all majors. Courses offered by other departments may be applied to the minor if approved by the information science advisor. For more information, contact the main office at 940-565-3736.

Required courses, 18 hours

- INFO 4230 - Records Management Operations
- INFO 4306 - Project Management for Information Systems
- INFO 4307 - Knowledge Management Tools and Technologies
- INFO 4710 - Information Technology Management
- INFO 4910 - Special Problems
- INFO 4970 - Information Science Seminar

Undergraduate Academic Certificates

Cybersecurity for Data Scientists certificate

The Cybersecurity for Data Scientists certificate is part of the existing Bachelor of Science in Data Science, which prepares students for careers in data science through a broad knowledge of the tools, techniques, and methods needed to analyze and work with data and information to help drive effective decisions and strategy in organizations. The new certificate is part of a Department of Homeland Security (DHS) grant that is in line with UNT's strategic plan and objectives of increasing research expenditure, elevating national prominence, and preparing students for a competitive workplace. Existing course work in the bachelor's degree educates students in key areas such as data management, data modeling, big data, data analytics, data and information visualization, information organization, internet applications development, and game design and technology. The Cybersecurity for Data Scientists certificate will help students protect themselves from cyber threats and enable them to take countermeasures if an incident takes place.

Requirements

Completion of 4 required courses (3 credit hours each) for a total of 12 credit hours.

- DTSC 3030 - Cyber Ethics for Data Scientists
- DTSC 4410 - Network and Data Security for Data Scientists
- DTSC 4420 - Principles of Data Science Forensics
- DTSC 4430 - Cloud Security for Data Scientists (or CSCE 4570 - Information Privacy)

Rural Library Management certificate

Required courses, 12 hours

Students who are interested in earning an undergraduate academic certificate in rural library management must take the following four courses (12 hours):

- INFO 4325 - Advanced Topics in Rural Libraries
- INFO 4350 - Library Partnership and Community Outreach
- INFO 4615 - Electronic Information Services
- INFO 4750 - Managing Automation Projects

Note:

These four courses must be successfully completed within a four-year time frame.

All students pursuing an undergraduate academic certificate must meet regular UNT admission requirements. Candidates for admission to the undergraduate academic certificate program must meet the minimum academic standards for the academic discipline. Post-baccalaureate students are eligible to pursue an undergraduate academic certificate.

Department of Learning Technologies

Main Office
Discovery Park, Room G150

Mailing address:
3940 N. Elm Street

Xun Ge, Chair

Faculty

Learning technologies continue to change the face of learning and training internationally, nationally, regionally and statewide. The degree programs in the Department of Learning Technologies are nationally and internationally known for preparing future educators and technology professionals to advance knowledge of technology tools and their applications. Faculty members within the department continue this leadership role through scholarship, grant acquisition, teaching, and service activities.

Learning technologies graduates play key roles in a wide variety of educational and business settings such as principals of schools, technology coordinators, web designers and developers, technical consultants, higher education faculty, instructional designers, and researchers. Their impact on learning technologies will continue to evolve and expand over the next few decades. The vision of the learning technologies department is to provide students with knowledge and experience that add value to learning technologies through research, product development, and application of current tools to solve educational problems.

Academic advising

Advising on courses, programs and related questions is available through the college advising office, Discovery Park, Room C232; 940-565-2445; ci-advising@unt.edu. Students are encouraged to contact their advisors each term/semester for help with program decisions and enrollment. All students should have an approved degree audit on file as early as possible, but not later than the beginning of the final 30 hours of courses. See individual programs below for more information. Calls and visits by prospective students are also welcome from 8 a.m. to 5 p.m. Monday through Friday.

Learning technologies

The program in learning technologies offers a minor in computer education, as well as a number of elective and service courses designed to enhance the preparation of classroom teachers and corporate professionals by providing opportunities for them to learn about and integrate technology.

Majors

Learning Technologies, BAS

Hours required and general/college requirements

A minimum of 120 semester hours, of which 36 must be advanced, and fulfillment of degree requirements for the Bachelor of Applied Sciences degree as specified by the University Core Curriculum in the Academic policies section of this catalog and the College of Information requirements.

Major requirements, 66 hours

Broken down into area of specialization, technical and professional foundations, and technical and professional development concentrations.

Area of specialization, 21 hours

Comprised of courses related to a specific applied STEM occupation, field or subject. This component may include traditional or applied STEM courses completed for an Associate of Applied Science (AAS) degree at a community college. In addition, technical credit received by active-duty military or veterans may be applied to this degree plan. Other students who have not created an area of specialization through courses taken in a community college or in the military, may create one by selecting a primary STEM area of study in consultation with the appropriate advisors.

Technical and professional foundations, 21 hours

The four (4) required foundations courses include:

The four (4) required foundations courses include:

- LTEC 3000 - Foundations of Learning Technologies in STEM
- LTEC 3100 - New Horizons for Learning Technologies in STEM
- LTEC 3200 - Leadership and Ethical Practices for STEM Professionals
- LTEC 4741 - Learning Technologies Capstone

The remaining three (3) foundations courses may be selected from the following courses:

- INFO 4745 - Information Architecture
- LTEC 3220 - Computer Graphics in Education and Training
- LTEC 5420 - Web Authoring
- LTEC 3530 - Data Communications and Networking for Next Generation Learning
- LTEC 4040 - Organizational Development and Performance Improvement
- LTEC 4050 - Entrepreneurship and Performance Improvement
- LTEC 4060 - Project Management and Applied Technology Performance Improvement
- LTEC 4100 - Technology Integration
- LTEC 4160 - Advanced Computer Applications in Education and Training
- LTEC 4550 - Network Systems Administration
- LTEC 4560 - Internet Services Administration

Technical and professional development concentrations, 24 hours

Consists of one or two separate multidisciplinary STEM concentrations, developed in collaboration between the BAS program and other appropriate disciplinary units. Each concentration will consist of a minimum of 12 credit hours that serve to enhance the skills a student has acquired through prior education or are complementary to the student's career plans. Prerequisites and/or a series of prerequisite courses may be required for certain concentrations. This component may include traditional or applied STEM courses completed for an Associate of Applied Science (AAS) degree at a community college. In addition, technical credit received by active-duty military or veterans may be applied to this degree plan.

Minor requirements

None required.

Electives, 12 hours

Varies with individual program. Any approved UNT courses the student and the advisor deem appropriate to the degree may be selected. Caution must be exercised to ensure the student fulfills the university requirement of 36 hours of advanced-level

coursework. This component may include traditional or applied STEM courses completed for an Associate of Applied Science (AAS) degree at a community college. In addition, technical credit received by active-duty military or veterans may be applied to this degree plan.

Other requirements

- A total of 36 hours of upper-division work
- At least 24 hours of upper-division work in residence
- A total of 60 hours of applied or traditional STEM coursework (may come from major requirements or electives)

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years, and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

Year 1

Semester 1		Semester 2	
Communication core	3 hours	Communication core	3 hours

Technical and Professional Development Concentration	3 hours	Technical and Professional Development Concentration	3 hours
Technical and Professional Development Concentration	3 hours	Learning Tech Foundations	3 hours
Total	15 hours	Total	15 hours

Year 4

Semester 1		Semester 2	
Technical and Professional Development Concentration	3 hours	LTEC 4741 - Learning Technologies Capstone	3 hours
Technical and Professional Development Concentration	3 hours	Component Area Option B core	3 hours
Learning Tech Foundations	3 hours	Technical and Professional Development Concentration	3 hours
Elective	3 hours	Learning Tech Foundations	3 hours
Elective	3 hours	Elective - advanced	3 hours
Total	15 hours	Total	15 hours

Minors

Computer Education minor

A minor in computer education requires 18 semester hours.

Required courses, 9 hours

- LTEC 2100 - Surviving the Information Age
- LTEC 3220 - Computer Graphics in Education and Training
- LTEC 5420 - Web Authoring

Additional requirements

- The remaining 9 hours must be advanced LTEC courses at the 3000 or 4000 level.

William Salmon, Chair

Faculty

The linguistics department offers a BA with a major in linguistics as well as minors in linguistics, computational linguistics, and information science.

The Bachelor of Arts with a major in linguistics offers students a comprehensive overview of the history of the field and a strong foundation in the core areas of phonetics, phonology, morphology, syntax and semantics. A major goal of the BA program is to stimulate student curiosity about linguistic and cultural diversity. Of general interest to our students, but of special interest to those interested in teaching English as a second language, are courses on English grammar and the methods of teaching English. Courses are also offered on theories of second language acquisition and English language variation and change. Courses in computational linguistics can help prepare students for jobs in the tech industry or for further study in computational linguistics and/or natural language processing.

The BA with a major in linguistics provides students with opportunities for working with data with an eye to discovering predictable linguistic patterns (linguistic problem solving). Students learn how to read, write, and present syntheses of relevant published work and to arrive at their own original theoretical formulations. The Scientific Methods course and the Capstone course train students in original research, which includes evaluating and reporting on existing findings using appropriate citation methods and creating and reporting on original experiments and arguments. CNN lists linguistics as the second most overlooked job possibility for new graduates. A degree in linguistics makes students competitive for jobs in fields such as:

- language education
- language testing service
- teaching English as a Second/Foreign Language
- speech & hearing – language pathology and audiology
- language documentation/fieldwork
- natural language processing
- codes and code-breaking
- law – forensic linguistics

- translation/interpretation
- advertising
- marketing
- publishing

Because linguistics provides students with the skills to analyze language, companies like Microsoft, Google and Apple are also eager to hire students with linguistics degrees. Read more on the Linguistic Society of America web site (www.linguisticsociety.org).

The strengths of the linguistics program lie in our research areas of language variation and change, language documentation, computational linguistics, syntax, semantics and pragmatics. Since moving to the College of Information in Fall 2014, we have added a new research focus in language technology and language data curation. Our international collaborations currently are with Mexico, India, Pakistan and China. Our overall goal is to contribute to the global understanding of the nature of language, and to provide students with ample opportunities to conduct and disseminate original research. We strongly encourage and support student participation at conferences and public speaking venues.

Academic advising

Advising on courses, programs, and related questions is available through the college advising office, Discovery Park, Room C232; 940-565-2445; ci-advising@unt.edu. All students should have an approved degree plan audit on file as early as possible, but not later than the beginning of the final 60 hours of courses. Calls and visits by prospective students are welcomed from 8 a.m. to 5 p.m., Monday through Friday.

Majors

Linguistics with a concentration in Computational Linguistics, BA

A Bachelor of Arts with a major in linguistics ensures that you receive the proper training and knowledge to have a successful career in the field of linguistics. The curriculum allows you to immerse yourself in the study of language and to understand its structure, use, design and application.

Degree requirements

The following requirements must be satisfied for a Bachelor of Arts with a major in linguistics and a concentration in computational linguistics.

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Arts degree as specified by the University Core Curriculum in the Academic policies section of this catalog and the College of Information requirements.

Major requirements, 42 hours

Required courses, 18 hours

- LING 3070 - Introduction to Linguistics
- LING 3080 - Language and Society
- LING 4040 - Phonetics and Phonology: The Sound Patterns of Language

- LING 4055 - Syntax
- LING 4090 - Semantics and Pragmatics
- LING 4950 - Senior Capstone Field Experience and Methods

Computational linguistics, 9 hours

- LING 4130 - Discovering Language from Data
- LING 4135 - Python Programming for Text
- LING 4140 - Computational Linguistics

Plus 15 hours selected from

- LING 1020 - Speech for International Students
- LING 2040 - Endangered Languages
- LING 2050 - The Language of Now: Pop Culture, Technology and Society
- LING 2060 - Language and Computers
- LING 2070 - Language and Discrimination
- LING 3010 - African American English
- LING 3020 - Forensic Linguistics
- LING 3040 - The Politics of Language
- LING 3050 - Communication Across Species
- LING 3090 - Discourse Analysis: Talking and Telling
- LING 4010 - Language Variation
- LING 4050 - Morphology
- LING 4060 - Scientific Methods
- LING 4070 - History of the English Language
- LING 4100 - Poetics
- LING 4120 - Migration and Language Contact
- LING 4410 - World Englishes

Foreign language, 3-12 hours

Students must attain Intermediate II (2050) level (prerequisite for 2050 course is 2040; prerequisite for 2040 course is 1020; prerequisite for 1020 course is 1010).

Minor

Linguistics majors who would like to study cutting-edge practices and technologies managing linguistic data for computational and quantitative analysis may choose to minor in information science.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (36) and/or the minimum total hours required for the degree. For specific information, see an academic advisor in the College of Information.

Other requirements

A minimum grade point average of 2.5 is required on all courses counted toward the major.

Linguistics with a concentration in Language and Law, BA

A Bachelor of Arts with a major in linguistics ensures that you receive the proper training and knowledge to have a successful career in the field of linguistics. The curriculum allows you to immerse yourself in the study of language and to understand its structure, use, design and application.

Degree requirements

The following requirements must be satisfied for a Bachelor of Arts with a major in linguistics and a concentration in language and law.

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Arts degree as specified by the University Core Curriculum in the Academic policies section of this catalog and the College of Information requirements.

Major Requirements, 42 hours

Required courses, 18 hours

- LING 3070 - Introduction to Linguistics
- LING 3080 - Language and Society
- LING 4040 - Phonetics and Phonology: The Sound Patterns of Language
- LING 4055 - Syntax
- LING 4090 - Semantics and Pragmatics
- LING 4950 - Senior Capstone Field Experience and Methods

Language and Law Concentration, 9 hours

- LING 2080 - The Language of Courts and Crime
- LING 3020 - Forensic Linguistics
- LING 3090 - Discourse Analysis: Talking and Telling

Plus 15 hours selected from:

- LING 1020 - Speech for International Students
- LING 2040 - Endangered Languages
- LING 2050 - The Language of Now: Pop Culture, Technology and Society
- LING 2060 - Language and Computers
- LING 2070 - Language and Discrimination
- LING 3010 - African American English
- LING 3040 - The Politics of Language
- LING 3050 - Communication Across Species

- LING 4010 - Language Variation
- LING 4020 - Structure of Modern English
- LING 4030 - Acquisition of English as a Second Language
- LING 4050 - Morphology
- LING 4060 - Scientific Methods
- LING 4070 - History of the English Language
- LING 4080 - Teaching English as a Second Language
- LING 4100 - Poetics
- LING 4120 - Migration and Language Contact
- LING 4130 - Discovering Language from Data
- LING 4135 - Python Programming for Text
- LING 4140 - Computational Linguistics
- LING 4410 - World Englishes

Foreign language, 3-12 hours

Students must attain Intermediate II (2050) level (prerequisite for 2050 course is 2040; prerequisite for 2040 course is 1020; prerequisite for 1020 course is 1010).

Minor

Linguistics majors who would like to study cutting-edge practices and technologies managing linguistic data for computational and quantitative analysis may choose to minor in information science.

Grad Track Options

Linguistics, BA with grad track option leading to Linguistics, MS

Students must be current UNT linguistics majors to be considered for the grad track program. They must have completed 75 credit hours when they apply and 90 credit hours before taking graduate level courses. The student must have a GPA of 3.5 or higher to be considered for the grad track program. Additionally, the student will submit two letters of recommendation from linguistics faculty members who can attest to the student's ability to do graduate level coursework. Once approved, the student must apply to the MS program and Toulouse Graduate School during the first semester of their senior year.

The department will allow the full 12 hours of grad credit.

Requirements

- LING 5090 - Pedagogical English Grammar
- LING 5300 - Phonology I
- LING 5305 - Morphology
- LING 5310 - Syntax I
- LING 5330 - Sociolinguistics
- LING 5350 - Language Typology and Universals

- LING 5380 - Linguistic Field Methods
- LING 5410 - Foundations of Computational Linguistics
- LING 5415 - Special Topics in Computational Linguistics
- LING 5530 - Semantics and Pragmatics I
- LING 5550 - Corpus Linguistics
- LING 5580 - Language and Gender
- LING 5900 - Special Problems

All remaining courses for Linguistics, BA must be completed.

Minors

Computational Linguistics minor

To minor in computational linguistics, students must complete 18 hours.

Required courses

- LING 3070 - Introduction to Linguistics
- LING 4135 - Python Programming for Text
- LING 4140 - Computational Linguistics

Plus 9 hours selected from

- CSCE 4290 - Introduction to Natural Language Processing
- DTSC 3010 - Introduction to Data Science
- INFO 4709 - Data Visualization
- LING 2060 - Language and Computers
- LING 4130 - Discovering Language from Data
- LING 4050 - Morphology
- LING 4055 - Syntax
- LING 4090 - Semantics and Pragmatics

Linguistics minor

To minor in linguistics, students must complete 18 hours.

Required courses

- LING 3070 - Introduction to Linguistics
- LING 4040 - Phonetics and Phonology: The Sound Patterns of Language
- LING 4055 - Syntax
- LING 4090 - Semantics and Pragmatics

Plus 6 hours selected from

- LING 3090 - Discourse Analysis: Talking and Telling
- LING 4010 - Language Variation
- LING 4020 - Structure of Modern English
- LING 4050 - Morphology
- LING 4070 - History of the English Language
- LING 4130 - Discovering Language from Data
- LING 4140 - Computational Linguistics

Teaching English in a Global Context minor

To minor in linguistics, students must complete 18 hours.

Required courses

- LING 3070 - Introduction to Linguistics
- LING 4020 - Structure of Modern English
- LING 4800 - Special Seminar in Linguistics

Plus 9 hours selected from

- LING 2040 - Endangered Languages
- LING 2070 - Language and Discrimination
- LING 4010 - Language Variation
- LING 4130 - Discovering Language from Data
- LING 4410 - World Englishes

Undergraduate Academic Certificates

Language and Law certificate

The law is a profession of words, grammar, and linguistic acts. Statutes, jury instructions, and contracts are conveyed through language, as are crimes like threats, bribes, and perjury. Likewise, forensic linguistic evidence can play an important role in civil and criminal cases. The Language and Law certificate equips students to understand the nature of everyday communication, the more specialized linguistic acts found in legal contexts, and the ways in which linguistic evidence can be used in prosecution and defense. The certificate requires five courses. The first three courses are specific: LING 2080 - The Language of Courts and Crime, LING 3020 - Forensic Linguistics, and LING 3060 - Principles of Language Study. With the second two courses, students choose from a set of Linguistics electives, allowing them to tailor their experience to their specific interests in language and law: from language change to accent discrimination to computational linguistic methods and more. This certificate is suited for students planning careers in law enforcement and within the legal system, such as paralegals, translators, or interpreters, as well as attending law school or graduate studies in a wide variety of related fields

Required courses, 9 hours

- LING 2080 - The Language of Courts and Crime
- LING 3020 - Forensic Linguistics
- LING 3060 - Principles of Language Study

Choose two elective courses, 6 hours

- LING 2070 - Language and Discrimination
- LING 3040 - The Politics of Language
- LING 3080 - Language and Society
- LING 3090 - Discourse Analysis: Talking and Telling
- LING 4010 - Language Variation
- LING 4070 - History of the English Language
- LING 4090 - Semantics and Pragmatics
- LING 4135 - Python Programming for Text
- LING 4140 - Computational Linguistics
- LING 4410 - World Englishes

Faculty

The mission of the College of Liberal Arts and Social Sciences is to amplify human potential to propel transformation with a commitment to explore, discover and create meaningful impact. Students in the College of Liberal Arts and Social Sciences explore critically the interconnected worlds of self and society or a variety of careers.

Consistent with the goals of providing a comprehensive, relevant education, the College of Liberal Arts and Social Sciences prepares students to acquire key proficiencies:

1. written and oral communication;
2. working knowledge of a foreign language and foreign culture;
3. understanding and appreciation of the various fields of learning represented by historical inquiry, the visual and performing arts, the processes of thought in the humanities and philosophy, and the investigation of the causes and consequences of human actions pursued in the social sciences; and
4. knowledge and critical thinking in a chosen discipline and its method of inquiry.

Students in the College of Liberal Arts and Social Sciences will receive the intellectual stimulation and the conceptual framework to explore critically the interconnected worlds of self and society. They will acquire the necessary literacies and broad-based exposure to the main elements of human experience that initiate the lifelong process of being an educated person and, in most instances, also provide the means to enter graduate schools or a variety of careers.

The College of Liberal Arts and Social Sciences consists of the following divisions and areas of study:

Division of Communication, Media and Performance

Department of Communication Studies

Department of Dance and Theatre

Frank W. and Sue Mayborn School of Journalism

Department of Media Arts

Department of Technical Communication
Game Studies and Design program

Division of Social Sciences

Department of Anthropology
Department of Economics
Department of Geography and the Environment
Department of Political Science
Department of Psychology
Department of Sociology

Division of Humanities

Department of English
Department of History
Department of Philosophy and Religion
Department of Spanish
Department of World Languages, Literatures and Cultures

Interdisciplinary areas of study and other programs

Aerospace Studies
Integrative Studies
International Studies
Jewish Studies
Latino and Latin American Studies
Military Science
Women's and Gender Studies

Academic advising

Academic advisors and counselors are available in the College of Liberal Arts and Social Sciences Dean's Office for Undergraduates and Student Advising in the General Academic Building, Room 220, to assist students in the development and pursuit of meaningful educational goals.

The College of Liberal Arts and Social Sciences Dean's Office for Undergraduates and Student Advising has trained academic advisors who are assigned to specific majors. The academic advisors prepare students' degree audits, assist majors with core curriculum issues and requirements for their chosen major, and process graduation applications. Faculty advisors in the department assist the students in their major.

Students starting college at UNT after high school graduation are part of the Take Flight: CLASS First Year Advising program! These students are invited to use the CLASS-Y Scholar Suite in GAB 207 as a study lounge and hub for Academic Advising. The Take Flight Advising Team has four dedicated Academic Counselors for you who will meet with you for individual appointments, specialized academic workshops, and events.

Degree requirements

The basic structure of all bachelor's degrees consists of a large set of general education requirements common to all degrees (University Core Curriculum – 42 hours at UNT), a small set of requirements unique to the school or college offering the degree (college requirements), a set of requirements defining a major field of study as determined by a department (major/professional/concentration – a minimum of 24 hours, including 12 advanced hours earned at UNT), and electives chosen freely or in consultation with an advisor to reach the minimum number of hours required for the degree. A lesser field of study, a

minor (minimum of 18 hours), is optional unless specified in the degree requirements. All degrees require that 30 hours be earned at UNT and that at least 42 hours are at the advanced level (3000- and 4000-level courses).

Degree audit

A degree audit is an official document of the university that lists all the courses needed to complete a chosen degree and shows how all of the courses completed are applied toward the degree. Students should file for a degree audit when certain of their major by making an appointment with the faculty advisor in the major department. Transfer students will need to bring:

- copies of transfer transcripts;
- catalog descriptions of transfer courses; and
- the initial Core Curriculum Transfer Evaluation from orientation.

After the degree audit advising session with the faculty advisor, the degree audit request form is sent to the Dean's Office for Undergraduates and Student Advising (GAB, Room 220) for preparation of the degree audit. Within a few weeks, an official degree audit will be emailed to the student's official UNT email address. Students may view their degree audit online at mydegreeaudit.unt.edu anytime or obtain an updated copy each term/semester from GAB, Room 220. Academic advisors in GAB, Room 220, are available by appointment to assist students with questions that may arise as they chart their progress.

Programs of study

The college offers the following undergraduate degrees:

- Bachelor of Arts
- Bachelor of Science
- Bachelor of Science in Economics
- Minors in a variety of disciplines – see individual departments
- Academic certificates

Candidates for the Bachelor of Arts and Bachelor of Science degrees must satisfy all "General degree requirements" for the bachelor's degree listed in the Academics section of this catalog, and all requirements of the Liberal Arts and Social Sciences degree requirements listed below. Candidates for the Bachelor of Fine Arts degree must satisfy all requirements for the bachelor's degree listed in the Academics section of this catalog.

Degree requirements and the University Core Curriculum

Occasionally a course required for a degree may also satisfy a requirement of the University Core Curriculum. In addition to taking the required course, a student may elect to take a different course from among those available to fulfill that core requirement; doing so, however, may add to the total number of hours required for the degree. Students who have questions regarding degree requirements and core requirements should consult an academic advisor.

Bachelor of Arts degree requirements

Candidates for the Bachelor of Arts must meet the following requirements.

1. **Hours Required for the Degree:** Completion of a minimum of 120 total semester hours; 42 must be advanced.
2. **General University Requirements:** See "General Degree Requirements" in the Academics section of this catalog.
3. **College of Liberal Arts and Social Sciences Degree Requirements:** See "Liberal Arts and Social Sciences degree requirements" in this section of the catalog for specific requirements and list of approved courses. See specific degree audit for exact hours.
4. **Major Requirements:** A major as specified by the department with at least 24 semester hours; 12 hours of advanced work in the major must be completed at UNT.
5. **Minor:** See individual major.

6. **Electives:** See individual major.
7. **Other Course Requirements:** See individual major.
8. **Other Requirements:** Completion of all other requirements for a major and a minor as specified by the respective departments.

Bachelor of Science degree requirements

Candidates for the Bachelor of Science must meet the following requirements.

1. **Hours Required for the Degree:** Completion of a minimum of 120 total semester hours; 42 must be advanced.
2. **General University Requirements:** See "General Degree Requirements" in the Academics section of this catalog.
3. **Major Requirements:** A major as specified by the department with at least 24 semester hours; 12 hours of advanced work in the major must be completed at UNT.
4. **Minor:** See individual major.
5. **Electives:** See individual major.
6. **Other Course Requirements:** See individual major.
7. **Other Requirements:** Completion of all other requirements for a major and a minor as specified by the respective departments.

Core curriculum

Candidates for the Bachelor of Arts and Bachelor of Science degrees in the College of Liberal Arts and Social Sciences must complete the University Core and the college's degree requirements shown below. Candidates for the Bachelor of Science degree may have other options for the foreign language requirement. Candidates for the Bachelor of Fine Arts degree must satisfy the requirements of the University Core Curriculum. Students should see the departmental advisor for their major for more information.

University Core Curriculum

1. **Communication (English Composition and Rhetoric) (6 hours):** See approved list in the Academics section of this catalog.
2. **Mathematics (3 hours):** See "University Core Curriculum Requirements" in the Academic policies section of this catalog.
3. **Life and Physical Sciences (6 hours):** See "University Core Curriculum Requirements" in the Academic policies section of this catalog.
4. **American History (6 hours):** See approved list in the Academic policies section of this catalog.
5. **Government/Political Science (6 hours):** See approved list in the Academic policies section of this catalog.
6. **Creative Arts (3 hours):** See approved list in the Academic policies section of this catalog.
7. **Language, Philosophy and Culture (3 hours):** See approved list in the Academic policies section of this catalog.
8. **Social and Behavioral Sciences (3 hours):** See approved list in the Academic policies section of this catalog.
9. **Core Option Courses (6 hours):** See approved list in the Academic policies section of this catalog.

Liberal Arts and Social Sciences degree requirements

The following requirements are in addition to the University Core Curriculum requirements for Bachelor of Arts degrees. Students in the Mayborn School of Journalism follow the requirements listed under Mayborn School of Journalism Degree Requirements.

Foreign Language, 3–12 hours (or proficiency)

Must attain Intermediate II (2050) level (prerequisite for 2050 course is 2040; prerequisite for 2040 course is 1020; prerequisite for 1020 course is 1010). Majors in Content Strategy, Converged Broadcast Media, Media Arts and Theatre are not required to complete the Foreign Language requirement.

Distribution Requirement (6 hours)

Courses that will allow students to possess a greater understanding of cultural diversity and global issues, as well as communication and digital skills necessary to be competitive in the workforce.

Cultural Diversity and Global Issues (3 advanced hours in one course taken at UNT)

Courses focused on cultural diversity in regional, national or international contexts, depending on the nature of the course.

3 hours from an approved Study Abroad program can substitute for this requirement.

- ANTH 3140 - Latinos in the U.S.
- ANTH 3210 - Meso America
- ANTH 3400 - Peoples and Cultures of Africa
- ANTH 3700 - Peoples and Cultures of South Asia
- COMM 3320 - Communication and Conflict Management
- COMM 3620 - Intercultural Communication
- COMM 4260 - Performance and Culture
- COMM 4640 - Latin@ Rhetorics
- DANC 3800 - History of Concert Dance in the U.S.: 1900–Present
- ECON 3150 - Economics of Discrimination

Teacher certification

The College of Liberal Arts and Social Sciences encourages students to explore teaching as a career option. The student's departmental advisor or academic advisor in the Dean's Office for Undergraduates and Student Advising in GAB, Room 220, can assist students with course requirements for certification. Students seeking certification for grades 6–12 or EC–12 must also complete the required 21 hours in upper-level education courses (EDCI 3800, EDCI 3830, EDCI 4060, EDCI 4070, EDCI 4108, EDCI 4118, EDCI 4840) and meet all GPA requirements to apply for state certification. In order to enroll in the first required education courses, the student must make application to the certification program in the College of Education in Matthews Hall, Room 105. All state certification requirements and information on required examinations are available on the website of the State Board for Educator Certification (SBEC), tea.texas.gov/. Students interested in post-baccalaureate certification or pursuing a master's degree with certification must make application and meet all admission requirements of the Toulouse School of Graduate Studies.

Teacher certification areas

Scholarships

Dean's List Scholarship

An endowment fund to supporting undergraduate students enrolled in a degree program within the College of Liberal Arts and Social Sciences who have demonstrated academic promise. Applications are available during February and March.

The Eagles with Mettle Scholarship

A scholarship from Michael P. Murphy to provide for undergraduate College of Liberal Arts and Social Sciences students who qualify as middle income at the University of North Texas.

The Edges and Intersections Scholarship

A scholarship supporting students enrolled in a degree program within the College of Liberal Arts and Social Sciences who have demonstrated academic promise and have an interest in the intersection between art and technology.

The Charles T. and Mildred L. Newell Memorial Scholarship

A scholarship supporting undergraduate students enrolled in a degree program within the College of Liberal Arts and Social Sciences who have demonstrated academic promise.

The Fenton Wayne Robnett Endowed Scholarship in Social Sciences Teaching Certification

An endowment fund supporting undergraduate students enrolled in any social sciences at the University and pursuing a secondary teaching certificate.

The Finseth Hawkins Scholarship

A scholarship for undergraduate students whose gender identity is different than the sex assigned at birth and who are transitioning or have completed transition and are enrolled in the College of Liberal Arts and Social Sciences.

The Voertman-Ardoin Memorial Scholarship

A fund supporting students enrolled in a degree program within the College of Liberal Arts and Social Sciences; preference given to students enrolled in English or Philosophy and to first generation students. Applications are available during February and March.

Voertman-Ardoin Scholarship in Liberal Arts

A fund supporting students enrolled in a degree program within the College of Liberal Arts and Social Sciences.

AM Willis Endowed Scholarship

An endowment fund supporting a scholarship supporting undergraduate and graduate students enrolled in a degree program within the College of Liberal Arts and Social Sciences who have demonstrated academic promise.

Majors

Game Studies and Design, BS

A Game Studies and Design BS provides students with the knowledge and skills to follow a path related to games in the 21st century. As an interdisciplinary major, students experience hands-on experience making games using industry tools and processes as well as a social and theoretical education in matters related to game studies. This breadth enables Game Studies and Design majors to work toward their goals, whether it is game design and development, game criticism and journalism, or a future studying how games affect players and our culture.

The Concentration in Narrative Design within the Game Studies and Design major specifically prepares students for work in narrative development, script writing, social and cultural analysis, genre studies, creative writing, and more. Students develop narratives in collaborative environments to replicate studio work, engage in workshops and critiques, and study the importance of representation in game environments.

Hours required and general/college requirements

A minimum of 120 total semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Science degree as specified in the University Core Curriculum in the Academics section of this catalog and the College of Liberal Arts and Social Sciences requirements.

Major requirements

Students must complete 48 hours in the major, including 30 hours of core courses and 18 hours of a concentration in Narrative Design.

Required courses, 30 hours

Complete the following:

- CSCE 2210 - Introduction to Visual Scripting for Games
- ENGL 3500 - Beginning Game Writing Workshop: Storytelling Through Narrative Design
- GMSD 1800 - Survey of Game Studies and Design
- GMSD 3800 - Game Production Pipeline
- GMSD 4800 - Capstone 1 - Game Studio 1: Ideation and Prototyping

- GMSD 4801 - Capstone 2 - Game Studio 2: Iteration and Refinement
- MRTS 2300 - Digital Asset Creation and Animation
- MRTS 3250 - Introduction to Game Design
- ENGL 3225 - Games, Play, and Stories
or
- MRTS 3630 - Game Studies: Players, Culture and Industry
- ENGL 3203 - Rhetorical Play: Writing and Rhetoric in Video Games
or
- MRTS 4660 - Gender and Gaming
or
- PHIL 4200 - Science, Technology and Society

Narrative Design concentration, 18 hours

Six (6) courses from the list below:

Required courses, 6 hours

- MRTS 3260 - Introduction to Level Design
- ENGL 4140 - Advanced Narrative Design for Gaming

Complete 12 hours of Narrative Design support courses from the following:

- COMM 3260 - Storytelling, Narrative and Everyday Life
- ENGL 3140 - Beginning Fiction Writing
- ENGL 4145 - Worldbuilding and Mythopoesis
- ENGL 4665 - Studies in Science Fiction
- ENGL 4680 - Game Narratives as Literature
- MRTS 4810 - Directing Narrative Media

Minor

None.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information, see an academic advisor in the College of Liberal Arts and Social Sciences.

Integrative Studies, BA

A Bachelor of Arts with a major in integrative studies provides the flexibility to enroll in classes that align with your individual interests and enhance your career objectives. It gives you the opportunity to create a tailored major.

Degree requirements

The following requirements must be satisfied for a Bachelor of Arts with a major in integrative studies.

Hours required and general/college requirements

Students must complete a minimum of 120 semester hours, of which 42 must be advanced, and fulfill all degree requirements as specified in the University Core Curriculum in the Academic policies section of this catalog.

Major requirements

The 36-hour integrative studies major is comprised of 12 hours in each of three fields chosen by the student and approved by his or her academic counselor. A minimum of 6 advanced hours is required in each field.

- a. At least one field must be chosen from among those offered in the College of Liberal Arts and Social Sciences.
- b. If more than one field is chosen from outside the College of Liberal Arts and Social Sciences, both may not be selected from the same school or college.
- c. No more than one field may be selected from a single department within the College of Liberal Arts and Social Sciences.
- d. A minimum grade of C is required in each course counting toward the major.

Minor

None required.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information, see an academic counselor in the College of Liberal Arts and Social Sciences.

Additional information

For more information concerning this major, including how previously earned college credit will apply toward the degree, contact an academic counselor in the Dean's Office for Undergraduates and Student Advising, College of Liberal Arts and Social Sciences, GAB, Room 220.

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

Integrative Studies, BS

A Bachelor of Science with a major in integrative studies provides the flexibility to enroll in classes that align with your individual interests and enhance your career objectives. It gives you the opportunity to create a tailored major including communication and global perspectives necessary to be competitive in the workforce.

Degree requirements

The following requirements must be satisfied for a Bachelor of Science with a major in integrative studies.

Hours required and general/college requirements

Students must complete a minimum of 120 semester hours, of which 42 must be advanced, and fulfill all degree requirements for the Bachelor's degree as specified in the University Core Curriculum in the Academic policies section of this catalog.

Major requirements

The 36-hour integrative studies major is comprised of 12 hours in each of three fields chosen by the student and approved by his or her academic counselor. A minimum of 9 advanced hours is required in each field.

- At least one field must be chosen from among those offered in the College of Liberal Arts and Social Sciences.
- If more than one field is chosen from outside the College of Liberal Arts and Social Sciences, both may not be selected from the same school or college.
- No more than one field may be selected from a single department within the College of Liberal Arts and Social Sciences.
- A minimum grade of C is required in each course counting toward the major.

Other course requirements

In addition to 36 hours in the major, students must complete two courses (6 hours) from:

- Group 1: Technical, professional and scientific communication. An advanced level course that will significantly enhance the student's ability to communicate effectively in his or her field, with emphasis on practical written and verbal skills.

- Group 2: Global leadership and intercultural perspectives. An advanced level course that will emphasize large-scale connectivity by broadening the student's cultural and global leadership experience and understanding of global challenges and issues.

Courses must be chosen from a predetermined list, in consultation with an academic counselor (GAB 220) for inclusion in the student's degree audit. Note: With counselor approval, foreign language (2040 and 2050) may be substituted for this requirement.

Minor

None required.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree.

Additional information

For more information concerning this major, including how previously earned college credit will apply toward the degree, contact an academic counselor in the Dean's Office for Undergraduates and Student Advising, College of Liberal Arts and Social Sciences, GAB, Room 220.

Social Science (Social Studies teacher certification), BS

A Bachelor of Science with a major in social science (social studies secondary teacher certification) prepares you for a career in public or private education. Additionally, you will possess a greater understanding of cultural diversity and global issues, as well as communication and digital skills necessary to be competitive in the workforce.

Degree requirements

The following requirements must be satisfied for a Bachelor of Science with a major in social science (social studies teacher certification).

Hours required and general/college requirements

Students must complete a minimum of 120 semester hours, of which 42 must be advanced, and fulfill all degree requirements for the Bachelor's degree as specified in University Core Curriculum in the Academic policies section of this catalog.

Major requirements, 60 hours

The Bachelor of Science with a major in social science and a composite teaching field in social studies requires:

- ECON 1100 - Principles of Microeconomics
- ECON 1110 - Principles of Macroeconomics
- ECON 4100 - Comparative Economic Systems
or
- ECON 4850 - International Trade
- ECON 3050 - The Economics of Consumption
or
- FIPL 2770 - Show Me the Money - Lessons in Money Education
- GEOG 1200 - Global Societies
- GEOG 2170 - Culture, Environment and Society
- 3 hours of advanced Group B: Human Geography (see Department of Geography and the Environment section of this catalog for list of courses)
- HIST 1050 - World History to the Sixteenth Century
- HIST 1060 - World History from the Sixteenth Century
- HIST 2610 - United States History to 1865
- HIST 2620 - United States History Since 1865
- HIST 3700 - Texas History
- 3 hours of advanced Geographic Area: United States (see History, BA for list of courses)
- 3 hours of advanced Geographic Area: Europe (see History, BA for list of courses)
- 3 hours of advanced Geographic Area: Africa, Asia, Latin America and the Middle East history (see History, BA for list of courses)
- PSCI 2305 - US Political Behavior and Policy
- PSCI 2306 - US and Texas Constitutions and Institutions
- PSYC 1630 - General Psychology I
- SOCI 1510 - Introduction to Sociology

3 hours of advanced political science selected from

- PSCI 3110 - The Legislative Process
- PSCI 3160 - Mass Media in American Politics
- PSCI 3200 - The American Legal System
- PSCI 3210 - The U.S. Supreme Court
- PSCI 3600 - Governments and Politics around the World
- PSCI 4100 - Political Parties
- PSCI 4140 - The Presidency

Other course requirements

- UCRS 4700 - Social Studies Teaching Methods

Other requirements

Students must also complete the required 21 hours in upper-level education courses and meet all GPA requirements to apply for state certification. In order to progress through the required education courses, the student must make an application to the certification program in the College of Education's Educator Preparation Office in Matthews Hall, Room 119.

All state certification requirements and information on required examinations are available on the website of the State Board for Educator Certification (SBEC), www.tea.state.tx.gov.

- EDCI 3800 - Professional Issues in Teaching
- EDCI 3830 - Teaching/Learning Process and Evaluation
- EDCI 4060 - Content Area Reading
- EDCI 4070 - Teaching in a Multicultural Classroom
- EDCI 4108 - Student Teaching in the Secondary School
- EDCI 4118 - Student Teaching in the Secondary School
- EDCI 4840 - Instructional Strategies and Classroom Management

Minor

None required.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information, see an academic advisor in the College of Liberal Arts and Social Sciences.

Social Science, BS

After earning a Bachelor of Science with a major in social science, you will have a greater understanding of social systems, cultural diversity and individual responsibility. You will develop communication and professional skills necessary to be competitive in the workforce.

Degree requirements

The following requirements must be satisfied for a Bachelor of Science with a major in social science.

Hours required and general/college requirements

Students must complete a minimum of 120 semester hours, of which 42 must be advanced, and fulfill all degree requirements for the Bachelor's degree as specified in the University Core Curriculum in the Academic policies section of this catalog.

Major requirements

An interdisciplinary major in social science for the Bachelor of Science degree requires 48 semester hours in the social sciences, 27 of which must be advanced. The primary field must include 18 hours in one field, of which 12 hours must be advanced. The remaining 30 hours must be taken in at least two other of these fields. Fields must be chosen from anthropology, economics, geography (human geography only), history, philosophy, political science, psychology, social work or sociology.

MATH 1680 is the recommended course to satisfy the core mathematics requirement.

Other course requirements

In addition to the 48 hours in the major, students must complete two courses (6 hours) from:

- Group 1: Professional communication
- Group 2: Research and analytical methods

These courses must be chosen from a predetermined list, in consultation with an academic counselor (GAB 220) for inclusion in the student's degree audit.

Note: With counselor approval, foreign language (2040 and 2050) may be substituted for this requirement.

Minor/Academic certificate

Recommended but not required.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Students are advised to give careful consideration to their career goals when selecting electives, by considering minors and undergraduate academic certificates. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information, see an academic counselor in the College of Liberal Arts and Social Sciences.

Additional information

For more information concerning this major, contact an academic counselor in the Dean's Office for Undergraduates and Student Advising, College of Liberal Arts and Social Sciences GAB, Room 220.

Notes:

*Social Science Primary Field Selection: 18 hours from one chosen field, of which 12 hours must be advanced. See "Major Requirements" above for field selection options.

**Social Science Combined Field Selection: 30 hours from at least two other fields. See "Major Requirements" above for field selection options.

***See academic counselor for course options.

Minors

LGBTQ Studies minor

Our program facilitates students' interactions with faculty members across the university that are working on and studying LGBTQ related topics in a variety of disciplines. The courses they offer as part of the minor examine the diversity of global gender and sexual identities, communities, practices, and politics and develop students' abilities to critically engage LGBTQ+ identified individuals' complex relations to the culture and experience of a heterosexual majority.

Students interested in the minor should contact the Director of Women's and Gender Studies at:

General Academic Building, Room 117
 1155 Union Circle #305097
 Denton, TX 76203-5017
 E-mail: wmst@unt.edu

Requirements

A minor in LGBTQ studies may be earned by successfully completing 18 semester hours.

Required courses

- WGST 3100 - LGBTQ Studies (taught in Fall only)
- WGST 4150 - Queer Theory (taught in Spring only)
- 9 hours (any level) from approved list of courses
- 3 advanced hours (3000-4000 level) from approved list of courses

Electives courses

The electives are chosen from an inventory of courses representing a variety of disciplines in the university curriculum. All LGBTQ studies students are encouraged to meet with the director of women's and gender studies and the advising staff in order to design an academic plan that best complements the major interests of the student.

A comprehensive list of available courses, as well as extensive information on the LGBTQ studies program, can be found online at womensstudies.unt.edu.

Social Science minor

A minor in social science requires 6 hours in one department and 12 hours in another department, including 6 advanced hours. Courses may be chosen from the following areas: anthropology, economics, geography (human geography only), history, philosophy, political science, psychology, social work and sociology.

Women's and Gender Studies minor

A minor in women's and gender studies may be earned by successfully completing **18 semester hours**, including:

WGST 2100 - Introduction to Women's and Gender Studies;

WGST 4100 - Feminist and Womanist Theories (taught in Spring only); and

Four additional 3-hour courses approved for women's and gender studies credit.

Nine of the 18 hours taken must be **advanced hours**. The electives are chosen from an inventory of more than 60 gender-related courses representing nearly every discipline in the university curriculum. All women's and gender studies students are encouraged to meet with the director and the advising staff in order to design an academic plan that best complements the major interests of the student.

A comprehensive listing of available courses, as well as extensive information on the women's and gender studies program, can be found online at womensstudies.unt.edu.

Our program facilitates students' interactions with more than 40 members of the women's and gender studies affiliated faculty, expanding understandings of gender differences, cultural diversity and social changes while strengthening critical thinking and communication skills. Internships provide opportunities for students to experience working at a variety of non-profit organizations in the Denton and Dallas areas.

Students interested in this minor should contact the director of women's and gender studies at:

General Academic Building, Room 117

- SPAN 4010 - Aspects of Contemporary Mexican Culture
- SPAN 4385 - Hispanic Culture in the United States
- THEA 4370 - Contemporary Latinx Theatre
- and other courses as approved by advisor

For more information, please contact Dr. Valerie Martinez-Ebers, LMAS Director, at Valerie.Martinez-Ebers@unt.edu, or at (940) 565-2276; or the UNT College of Liberal Arts and Social Sciences, Integrative Studies Office, Student Advising at GAB 220 or (940) 565-2051.

Leadership Studies certificate

Students may receive a certificate in leadership studies by successfully completing the following courses:

Certificate requirements, 12 hours

Core course, 3 hours

- UCRS 3600 - Leadership in Practice

Ethics, 3 hours

Selected from:

- MGMT 3880 - Business Ethics and Social Responsibility
- PHIL 1400 - Ethics and Society
- PHIL 4700 - Environmental Philosophy
- PSCI 4360 - International Ethics
- (other courses as approved by program advisor)

Global issues, 3 hours

Selected from:

- EADP 4040 - International Disasters
- INST 4851 - International Security
- INST 4852 - Critical Issues in Global Economics Senior Seminar
- INST 4853 - Global Development: Issues and Challenges
- MGMT 4660 - International Management Perspectives
- MKTG 4280 - Global Marketing Issues and Practice
- PADM 4050 - Negotiation
- PSCI 3500 - Human Security
- PSCI 3810 - International Relations
- PSCI 4520 - International Human Rights
- PSCI 4800 - The Politics of International Organization
- PSCI 4820 - Contemporary International Problems
- PSCI 4821 - International Conflict
- PSCI 4823 - International Criminal Tribunals and War Crimes
- PSCI 4850 - Critical Issues in World Politics
- PSCI 4860 - International Political Economy
- SOCI 4750 - World Population Trends and Problems
- UCRS 4500 - Global Leadership through Service

Leadership in discipline, 3 hours

3 hours selected in consultation with advisor.

Experiential component

In order to complete the leadership certificate, students are required to complete an experiential component that allows them to put their learning and skill development from previous courses into practice. The experience must allow the student to actively engage in organizational/group leadership experiences, civic engagement or career development and must occur over a period of no less than three consecutive months. Experiences should be approved in advance by the program director. Upon completion of the experience, a reflection paper connecting the experiences and course learning must be submitted to the program director for review <https://www.unt.edu/academics/programs/leadership-studies-certificate.html>.

UNT Peace Corps Prep Certificate

UNT's Peace Corps Prep certificate prepares students for international development fieldwork and potential Peace Corps service in one of the following Peace Corps work sectors:

- Education
- Health
- Environment
- Agriculture
- Youth in Development, or
- Community Economic Development.

To accomplish this, students will build four core competencies:

1. Training and experience in a work sector
2. Intercultural competence
3. Professional and leadership development, and
4. Foreign language skills (optional).

Students create an ePortfolio to synthesize and reflect upon their UNT Peace Corps Prep experiences.

Requirements, 18 hours

1. Nine advanced semester credit hours aligned with Peace Corps Training and Experience work sector in consultation with the advisor.
2. Nine hours of Intercultural Competence courses: 3 hours from the list of Core Intercultural Competence courses and 6 additional hours from the list of Elective Intercultural Competence courses. Additional courses may be approved in consultation with the advisor.
3. Professional and Leadership Development: Resume, Interview Preparation, and participation in a "significant" leadership experience (coordinated in conjunction with the Career Center & Center for Leadership and Service).
4. At least 50 hours of hands-on volunteer/service learning/internship experience in same work sector (coordinated in conjunction with the Career Center & Center for Leadership and Service). Students are encouraged to participate in a study abroad program or international volunteer work to meet some of these requirements.

Intercultural Competence, 9 hours

Core Intercultural Competence

3 hours from:

- ANTH 1100 - World Cultures
- ANTH 2300 - Culture and Society
- COMM 3620 - Intercultural Communication
- COUN 2620 - Diversity and Cultural Awareness
- PSYC 4030 - Multicultural Psychology

Elective Intercultural Competence courses

6 additional hours from:

- ANTH 1100 - World Cultures
- ANTH 1150 - World Cultures Through Film
- ANTH 2200 - Gender in Cross-Cultural Perspective
- ANTH 2300 - Culture and Society
- ANTH 3110 - Indigenous Peoples of North America
- ANTH 3120 - Indigenous Cultures of the Southwest
- ANTH 3130 - African-American Anthropology
- ANTH 3210 - Meso America
- ANTH 3300 - Peoples and Cultures of the Pacific
- ANTH 3400 - Peoples and Cultures of Africa
- ANTH 3500 - Cultures and Civilizations of the Middle East
- ANTH 3700 - Peoples and Cultures of South Asia
- ANTH 3710 - Peoples and Cultures of East Asia
- ANTH 3720 - Peoples and Cultures of Southeast Asia

- ANTH 4200 - Health, Healing and Culture: Medical Anthropology
- ANTH 4210 - Culture and Human Sexuality
- ANTH 4300 - Migrants and Refugees
- COMM 3620 - Intercultural Communication
- COUN 2620 - Diversity and Cultural Awareness
- GEOG 1200 - Global Societies
- GEOG 2170 - Culture, Environment and Society
- HDFS 3153 - The Impact of Culture on Individuals and Families
- INST 2100 - Introduction to International Studies
- MUET 3030 - Music Cultures of the World
- PHIL 2070 - World Religions
- PHIL 3620 - Hinduism
- PHIL 3665 - Eastern Religion and the Environment
- PHIL 3680 - Buddhism, Daoism, Shintoism
- PHIL 4650 - Philosophy of Water
- PSCI 3500 - Human Security
- PSYC 4030 - Multicultural Psychology
- PSYC 4300 - Biopsychosocial Challenges Related to Sexually Transmitted Infections
- PSYC 4670 - Behavioral and Biopsychosocial Challenges within LGBTQIA+ Communities
- SOCI 4160 - Developing Societies
- SOCI 4620 - Sociology of Culture
- SOCI 4750 - World Population Trends and Problems
- SOWK 4540 - Human Diversity for the Helping Professions
- WGST 2100 - Introduction to Women's and Gender Studies

Interdisciplinary majors and minors

- Africana Studies minor
- American Studies minor
- Asian Studies minor
- Classical Studies minor
- Conflict and Human Security minor
- Environmental studies minor
- Game Studies and Design, BS
- Geographic Information Systems and Computer Science, BS
- Geography with a concentration in Earth Systems, BS
- Geography with a concentration in Environmental Studies, BS
- Integrative Studies, BA
- Integrative Studies, BS
- International Studies with a concentration in Business and Economics, BA

Nancy L. Stockdale, Director

Faculty

The international studies program offers an interdisciplinary degree designed to give students an awareness of the diversity, complexity, and interdependence of the global community. The major equips students with the necessary background, cultural competency, and skills necessary to understand and critically analyze the political, social, economic, and cultural aspects of contemporary global concerns, issues and problems, and to be successful in an increasingly complex and global job market.

The program offers the International Studies with a concentration in Human Security, BA, International Studies with a concentration in Business and Economics, BA, International Studies with a concentration in Global Conflict, BA and International Studies with a concentration in Global Perspectives, BA, plus an International Studies minor.

Majors

International Studies with a concentration in Business and Economics, BA

In our increasingly interconnected world, businesses and government agencies have increased their search for employees who understand world issues. A Bachelor of Arts with a major in international studies and a concentration in business and economics makes you a valuable asset to any organization with whom you choose to work.

This major is designed to prepare students for jobs in the public and private sectors, where globalization is increasing dramatically, or to enter a graduate degree program.

Degree requirements

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Arts degree as specified in the General University Requirements in the Academic policies section of this catalog and the College of Liberal Arts and Social Sciences requirements.

Major requirements

Majors need 42 hours from the list of approved courses below, including:

- INST 2100 - Introduction to International Studies
- INST 4852 - Critical Issues in Global Economics Senior Seminar
or
- INST 4800 - International Studies Internship

Business and Economics concentration, 36 hours

Twelve of the 36 hours must be advanced-level courses.

Economics, 9 hours

- ECON 1110 - Principles of Macroeconomics
- ECON 4100 - Comparative Economic Systems
- ECON 4420 - Open Economy Macroeconomics
- ECON 4850 - International Trade
- ECON 4855 - U.S.-Mexico Economic Relations
- FINA 4500 - International Finance
- GEOG 3010 - Economic Geography
- GEOG 4210 - Urban Geography
- INST 4854 - Political Economy of the Middle East
- PSCI 4860 - International Political Economy

Logistics & Business Practice, 12 hours

- ACCT 4420 - International Accounting
- BCIS 4730 - International Issues of Information Technology
- BLAW 4480 - International Business Law
- CMHT 4000 - Global Discovery in Merchandising and Hospitality Management
- GEOG 4220 - Applied Retail Geography
- GEOG 4230 - Location Intelligence: Business GIS Concepts and Applications
- GEOG 4245 - Geography of International Development
- HMGH 2800 - Foundations of International Travel and Tourism
- HMGH 2810 - Introduction to International Sustainable Tourism
- LSCM 4360 - Global Alliances and International Supply Chain Management
- MDSE 2750 - Consumers in a Global Market
- MDSE 4003 - Global Discovery: Hong Kong/China
- MDSE 4004 - Global Discovery: Europe

- MDSE 4010 - Global Sourcing
- MGMT 4660 - International Management Perspectives
- MKTG 2650 - Culture and Consumption
- PADM 4030 - Global Workplace Conflict

Marketing, 6 hours

- MKTG 3651 - Foundations of Marketing Practice for Non-Business Majors
- MKTG 4280 - Global Marketing Issues and Practice

Regional courses, 9 hours

- ANTH 3200 - Latin America
- ANTH 3220 - Mayan Culture
- ANTH 3300 - Peoples and Cultures of the Pacific
- ANTH 3400 - Peoples and Cultures of Africa
- ANTH 3500 - Cultures and Civilizations of the Middle East
- ANTH 3600 - Peoples and Cultures of Europe
- ANTH 3700 - Peoples and Cultures of South Asia
- ANTH 3710 - Peoples and Cultures of East Asia
- ANTH 3720 - Peoples and Cultures of Southeast Asia
- ANTH 4320 - Contemporary Middle East: Society, Culture and Politics
- ECON 4855 - U.S.-Mexico Economic Relations
- GEOG 3750 - Geography of Contemporary Sub-Saharan Africa
- GEOG 3760 - Geography of China: Environment and Society
- GEOG 3770 - Latin America: Geography and Globalization
- HIST 3450 - Islam and its Empires
- HIST 3460 - Modern Middle Eastern History

- PSCI 3650 - Middle East Politics
- PSCI 3700 - Area Politics
- PSCI 3701 - Politics of Mexico
- PSCI 3702 - Latin American Politics
- PSCI 3703 - Security in Latin America
- PSCI 3704 - U.S.-Latin American Relations
- WLLC 3100 - Arab Cultures in Film and Music
- WLLC 3200 - Chinese Culture and Society
- WLLC 3310 - The Best of French Pop Culture
- WLLC 3400 - The Holocaust and Film
- WLLC 3410 - German Popular Culture
- WLLC 3420 - German Graphic Novels
- WLLC 3530 - Cosa Nostra: The Mafia in History and Fiction
- WLLC 3600 - Japanese Popular Culture

Other course requirements

- 6 upper-division hours in a foreign language of the student's choice. International students who attended high school in a non-native English-speaking country and have been exempted from the College of Liberal Arts and Social Sciences foreign language requirement can substitute 6 hours of advanced English writing courses with prior approval of the International Studies director or academic advisor.
- Latin and Sign Language courses will not count toward this requirement.

Minor

Optional.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum Requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information, see an academic advisor in the College of Liberal Arts and Social Sciences.

Other information

ANTH 4701, PSCI 3700, PSCI 4700, PSCI 4820, HIST 4260, HIST 4262, HIST 4263, WGST 4260 can apply with advisor approval.

Students are strongly encouraged to take advantage of Study Abroad opportunities. Students are also encouraged to do an internship related to their area of concentration; only 3 hours will apply towards the major.

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years, and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

- WLLC 3530 - Cosa Nostra: The Mafia in History and Fiction
- WLLC 3600 - Japanese Popular Culture

Other course requirements

6 upper-division hours in a foreign language of the student's choice. International students who attended high school in a non-native English-speaking country and have been exempted from the College of Liberal Arts and Social Sciences foreign language requirement can substitute 6 hours of advanced English writing courses with prior approval of the International Studies director or academic advisor.

Latin and Sign Language courses will not count toward this requirement.

Minor

Optional.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information, see an academic advisor in the College of Liberal Arts and Social Sciences.

Other information

ANTH 4701, PSCI 3700, PSCI 4700, PSCI 4820, HIST 4260, HIST 4262, HIST 4263, WGST 4260 can apply with advisor approval.

Students are strongly encouraged to take advantage of Study Abroad opportunities. Students are also encouraged to do an internship related to their area of concentration; only 3 hours will apply towards the major.

International Studies with a concentration in Global Perspectives, BA

In our increasingly interconnected world, businesses and government agencies have increased their search for employees who understand world issues. A Bachelor of Arts with a major in international studies and a concentration in global perspectives makes students a valuable asset to any organization with whom they choose to work.

This major is designed to prepare students for jobs in the public and private sectors, where globalization is increasing dramatically, or to enter a graduate degree program.

Degree requirements

Hours require and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Arts degree as specified in the General University Requirements in the Academics section of this catalog and the College of Liberal Arts and Social Sciences requirements.

Major requirements

Majors need 42 hours from the list of approved courses below, including:

- INST 2100 - Introduction to International Studies
- One of the following, 3 hours (depending on area of concentration and in consultation with advisor)
- INST 4851 - International Security
- INST 4853 - Global Development: Issues and Challenges
- INST 4800 - International Studies Internship

Global Perspectives concentration, 36 hours

Twelve of the 36 hours must be advanced-level courses.

Culture courses, 12 hours

- ANTH 1100 - World Cultures
- ANTH 1150 - World Cultures Through Film
- ANTH 2200 - Gender in Cross-Cultural Perspective
- ANTH 2300 - Culture and Society

- WLLC 3600 - Japanese Popular Culture

Other course requirements

- 6 upper-division hours in a foreign language of the student's choice. International students who attended high school in a non-native English-speaking country and have been exempted from the College of Liberal Arts and Social Sciences foreign language requirement can substitute 6 hours of advanced English writing courses with prior approval of the International Studies director or academic advisor.
- Latin and Sign Language courses will not count toward this requirement.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information, see an academic advisor in the College of Liberal Arts and Social Sciences.

Minor

Optional.

Other information

- ANTH 4701, PSCI 3700, PSCI 4700, PSCI 4820, HIST 4260, HIST 4262, HIST 4263, and WGST 4260 can apply with advisor approval.
- Students are strongly encouraged to take advantage of Study Abroad opportunities. Students are also encouraged to do an internship related to their area of concentration; only 3 hours will apply towards the major.

Minors

International Studies minor

A minor in international studies requires 18 hours. Students choose one of four (4) areas of concentration for the minor:

- International Studies with a concentration in Business and Economics
- International Studies with a concentration in Global Perspectives
- International Studies with a concentration in Human Security
- International Studies with a concentration in Global Conflict

18 hours including 6 advanced hours from one of the following:

INST 2100 will be required for all four of the concentrations along with the INST Capstone class that is appropriate for that particular concentration.

Business and Economics

- INST 2100 - Introduction to International Studies
- Any INST 48xx course
- Four additional advanced courses from the approved course listing that are appropriate for their chosen concentration, excluding courses labeled as "Regional courses."

Global Perspectives

- INST 2100 - Introduction to International Studies
- Any INST 48xx course
- Four additional advanced courses from the approved course listing that are appropriate for their chosen concentration.

Human Security

- INST 2100 - Introduction to International Studies
- Any INST 48xx course
- Four additional advanced courses from the approved course listing that are appropriate for their chosen concentration, excluding courses labeled as "Regional courses."

Global Conflict

- INST 2100 - Introduction to International Studies
- Any INST 48xx course
- Four additional advanced courses from the approved course listing that are appropriate for their chosen concentration, excluding courses labeled as "Regional courses."

Undergraduate Academic Certificates

Arab and Islamic Studies certificate

The Arab and Islamic studies certificate is an undergraduate academic certificate designed to enable students to acquire knowledge skills about Arab and Islamic cultures, economies, societies and politics. The required course work in Arab and Islamic studies will help students develop cross-cultural communication skills and enhance their competitiveness to enter a professional program or occupation related to the Arab and Islamic worlds.

The Arab and Islamic studies certificate is open to all majors. It is administered by the International Studies Program in the College of Liberal Arts and Social Sciences in collaboration with the Contemporary Arab and Muslim Cultural Studies Initiative (CAMCSI) in the College of Visual Arts and Design.

Students are strongly encouraged to achieve Arabic language proficiency through the level of ARBC 1020 by completing course work or through examination.

Course requirements, 12 hours

To earn an Arab and Islamic studies certificate, students must complete 12 hours at UNT in such areas as the following (other courses may be used if approved by the certificate advisor):

Culture and art

- ANTH 3500 - Cultures and Civilizations of the Middle East
- ANTH 4320 - Contemporary Middle East: Society, Culture and Politics
- ARBC 3040 - Advanced Topics in the Culture of the Middle East
- ARTH 4805 - Topics in Medieval Art
- ARTH 4824 - Topics in Asian Art
- ARTH 4825 - Topics in Islamic and/or Middle Eastern Art
- INST 4859 - Middle East Politics and Society through Film

- MRTS 4415 - Topics in Film and Television Studies
- WLLC 3100 - Arab Cultures in Film and Music

History

- HIST 3450 - Islam and its Empires
- HIST 3460 - Modern Middle Eastern History
- HIST 4240 - Nationalism, Zionism and Islamism in Modern Middle Eastern History
- HIST 4245 - Gender, Race and Class Issues in Middle Eastern History
- HIST 4246 - Imperialism in the Modern Middle East
- HIST 4248 - Palestinian History
- HIST 4249 - Food, Sex, and Drugs in Middle Eastern History
- HIST 4250 - Modern Middle Eastern Diasporas
- HIST 4283 - Decolonization in Asia and Africa

Politics

- PSCI 3650 - Middle East Politics
- INST 4854 - Political Economy of the Middle East
- INST 4855 - International Relations and Politics of the Middle East

Other requirements

Students must also:

1. Acquire Arab and Islamic worlds experience via one or more of the following:
 - a. Study abroad in an Arab or Islamic country
 - b. Internship in an area related to the Arab and Islamic worlds
 - c. Volunteer service in projects related to the Arab and Islamic worlds
2. Participate in 5 international events or activities on campus or in the DFW community related to Arab and Islamic affairs. Include documentation of participating in these activities along with a summary report.

Students successfully completing the above requirements will file for the Arab and Islamic studies certificate in the International Studies Program and the certificate will be posted to their UNT transcript. The Contemporary Arab and Muslim Cultural Studies Initiative (CAMCSI) will also honor students graduating with the Arab and Islamic studies certificate with an annual reception in the spring semester.

Global Perspectives certificate

The global perspectives certificate is an undergraduate academic certificate designed to enable students to acquire knowledge, skills and attitudes in order to become a globally aware citizen of the world. The required course work and international experiences help students develop cross-cultural communication skills and will enhance their competitiveness to enter a professional program or the global workforce.

The global perspectives certificate is open to all majors and is administered through each school and college in collaboration with UNT International Affairs. Students successfully completing the requirements below will file for the certificate in global perspectives in their school or college, and the certificate will be posted to their UNT transcript.

To earn a global perspectives certificate, a student must complete the following:

Language proficiency

Achieve language proficiency in one foreign language through elementary II level by completing course work or through examination.

Course work, 12 hours

- INST 2100 - Introduction to International Studies

Plus 9 advanced hours

The remaining 9 advanced hours as approved in advance by the student's academic dean and in such areas as:

- International relations
- Global business, economics or resources
- Country or region studies
- Cultural perspectives

International experience

Acquire international experience via one or more of the following:

- Study abroad
- Student exchange
- Internship
- Volunteer service projects abroad
- Student Teaching Abroad

Campus or community events

Participate in eight international events or activities on campus or in the community other than those related to the student's own country. Include documentation of these activities, especially leadership contributions, along with the synthesis report.

Reflection and synthesis report/project

Prepare and present a reflection and synthesis report/project in the semester the student files for the certificate. Presentations are made in the student's school or college or at an event hosted by UNT International Affairs.

Doug Henry, Chair

Faculty

The Department of Anthropology offers a Bachelor of Arts with a major in anthropology for those who wish to pursue a career in the discipline of anthropology, for those simply interested in the human condition and for those who may wish to combine the study of anthropology with another discipline.

We also offer a number of courses which satisfy a breadth of requirements for other majors. Anthropology's focus on understanding cultural diversity makes it a useful subject for people planning careers in areas such as education, business, medicine, and law.

Anthropology majors at UNT receive a broad range of training in theory and methodology: ethnography, in-depth interviewing, survey research and quantitative analysis. Courses require intensive writing, and all students are encouraged to become proficient in a second language. UNT places emphasis on training students in the application of anthropological knowledge in the private, public and not-for-profit sectors, in local, regional and international arenas. Students are encouraged to travel abroad and often get hands-on experience while working in UNT's international field schools.

Majors

Anthropology, BA

A Bachelor of Arts with a major in anthropology provides the skills needed to work in a world transformed by global economic forces, shifting political borders, national conflicts, ethnic division, food and environmental crises, natural disasters, genocide and public health issues.

The following requirements must be satisfied for a Bachelor of Arts with a major in anthropology.

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Arts degree as specified in the University Core Curriculum in the Academic policies section of this catalog and the College of Liberal Arts and Social Sciences requirements.

Major requirements

Major of 39 hours in anthropology, including 15 hours of required anthropology courses:

- ANTH 1010 - Introduction to Anthropology
- ANTH 2300 - Culture and Society
- ANTH 4000 - Applied Anthropology
- ANTH 4011 - Anthropological Field Methods
- ANTH 4021 - Development of Anthropological Thought

Elective anthropology requirements, 24 hours

A minimum of 6 hours must be taken from 3000-level ANTH courses, 6 hours from 4000-level ANTH courses, 6 additional hours at the advanced level (either 3000- or 4000-level), and 6 hours of ANTH courses from any level.

Note: ARCH 2800 may be substituted for one lower-level elective anthropology course.

Minor

No minor is required.

Electives

See individual degree plan.

Other requirements

- Students must pass all courses required for the anthropology major with a C or higher;
- Transfer course work to be substituted for required anthropology courses must be approved by a student's faculty advisor during the degree plan process;
- Credit substitution requests must be pre-approved prior to a student enrolling in the course.

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years, and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

Year 1

Semester 1		Semester 2	
ANTH 1010 - Introduction to Anthropology	3 hours	ANTH 2300 - Culture and Society	3 hours

Minors

Anthropology minor

A minor requires completion of 18 hours in anthropology.

Required courses:

- ANTH 1010 - Introduction to Anthropology
or
- ANTH 2300 - Culture and Society
- 9 hours of anthropology courses from any level
- 6 hours of 3000- or 4000- level anthropology courses

Medical Anthropology minor

A minor in medical anthropology requires completion of 18 hours (6 must be advanced).

Requirements

3 hours from

- ANTH 1010 - Introduction to Anthropology
- ANTH 1100 - World Cultures
- ANTH 2300 - Culture and Society

3 hours from

- ANTH 4200 - Health, Healing and Culture: Medical Anthropology
- ANTH 4220 - Anthropology in Public Health

Approved electives, 12 hours

- AGER 3480 - Psychology of Adult Development and Aging
- AGER 4750 - Sexuality and Aging
- ANTH 4210 - Culture and Human Sexuality
- ANTH 4230 - Psychological Anthropology
- BEHV 3200 - Science, Skepticism and Weird Behavior
- BIOL 2301 - Human Anatomy and Physiology I and
- BIOL 2311 - Human Anatomy and Physiology I Laboratory
- BIOL 3350 - Human Heredity
- EADP 4010 - Public Health and Disasters

- EADP 4050 - Social Vulnerability in Disasters
- HLTH 1100 - School and Community Health Problems and Services
- HLTH 1570 - Environmental Health and Safety
- HLTH 2000 - Introduction to Public Health
- HLTH 2200 - Family Life and Human Sexuality
- HLTH 2400 - Introduction to Global Health
- HLTH 4430 - Planning, Administration and Evaluation of Health Programs
- PHIL 1400 - Ethics and Society
- PSYC 2580 - Health Psychology
- PSYC 3490 - Psychology of Women and Gender
- PSYC 4020 - Psychology of Death and Dying
- PSYC 4300 - Biopsychosocial Challenges Related to Sexually Transmitted Infections
- PUBH 1010 - Introduction to Public Health
- PUBH 3010 - Social Justice and Behavioral Foundations in Public Health
- PUBH 3020 - Community Health Education
- PUBH 3025 - Environmental Health
- PUBH 3030 - Global Public Health
- PUBH 4015 - Ethics in Public Health
- PUBH 4050 - Public Health and Health Policy
- PUBH 4060 - Public Health Management and Leadership
- SOCI 3110 - Sociology of Mental Health, Mental Illness and Mental Health Care
- SOCI 3120 - Sociology of Health and Illness
- SOCI 4250 - Gender and Society
- SOCI 4550 - Sociology of Aging
- SOCI 4750 - World Population Trends and Problems

Undergraduate Academic Certificates

Applied Anthropology certificate

An undergraduate academic certificate in applied anthropology requires 12 hours.

Required courses, 6 hours

- ANTH 2300 - Culture and Society
- ANTH 4000 - Applied Anthropology

Plus 6 hours of electives selected from

- ANTH 4060 - Community Engagement through Action Research
- ANTH 4110 - Design Anthropology
- ANTH 4200 - Health, Healing and Culture: Medical Anthropology
- ANTH 4220 - Anthropology in Public Health
- ANTH 4230 - Psychological Anthropology
- ANTH 4400 - Environmental Anthropology
- ANTH 4601 - Anthropology of Education

- ANTH 4720 - Human Rights Anthropology
- ANTH 4920 - Internship in Anthropology

Social Justice Studies certificate

The social justice studies certificate in anthropology teaches students to examine how inequitable power relations influence and shape various aspects of human life in the United States and around the globe, and to think critically about power dynamics in their own lives. The selected courses will highlight the social construction of categories such as gender, race, class, sexuality, ability, immigration status and more, and will consider how those categories intersect to differently position people in relation to systems of power and each other. Courses for this certificate will provide students with relevant skills including oral and written communication, critical thinking, teamwork, multicultural and diversity competencies, and conflict management. These abilities will prepare students to become engaged community members, locally and globally. Further, it will provide students with the knowledge and experience to approach careers in a variety of public, private and community-based domains.

Social Justice Studies certificate, 15 hours total

Students must take a combined total of 15 credit hours.

Two required courses from the following.

- ANTH 4550 - Race, Ethnicity and Identity
- ANTH 4730 - Feminist Anthropology
- ANTH 4760 - Inequality, Social Justice and the City

Electives, 9 hours

Three required electives courses from the following. One course must come from anthropology and one course from outside anthropology.

- ANTH 3130 - African-American Anthropology
- ANTH 3140 - Latinos in the U.S.
- ANTH 3700 - Peoples and Cultures of South Asia
- ANTH 4060 - Community Engagement through Action Research
- ANTH 4130 - Anthropology of Non-Governmental Organizations
- ANTH 4210 - Culture and Human Sexuality
- ANTH 4310 - Citizenship, Borders and Belonging in the United States
- ANTH 4400 - Environmental Anthropology
- ANTH 4550 - Race, Ethnicity and Identity
- ANTH 4720 - Human Rights Anthropology
- ANTH 4730 - Feminist Anthropology
- ANTH 4760 - Inequality, Social Justice and the City
- CJUS 3500 - Inequality, Crime and Justice
- CJUS 3600 - Criminology
- CJUS 4250 - Law and Social Problems
- COMM 3260 - Storytelling, Narrative and Everyday Life
- COMM 4140 - Gender and Communication
- COMM 4240 - Rhetoric and Popular Culture
- COMM 4540 - Communication Theories of Sexuality

- COMM 4640 - Latin@ Rhetorics
- ECON 3150 - Economics of Discrimination
- ENGL 4220 - Contemporary North American Indigenous Literature

Social Science and Popular Culture certificate

Interdisciplinary Certificate emphasizing application of social science thinking onto the medium of popular culture. Equips students with the skills to apply multifocal perspectives onto contemporary issues in processes of social knowledge production.

Requirements, 15 hours

9 hours must be advanced. No more than 6 hours from one department.

- ANTH 1150 - World Cultures Through Film
- ANTH 2400 - AnthroPop: Symbolic Anthropology and the Artistry of Popular Culture
- COMM 4120 - Communication and Sport
- COMM 4340 - Rhetoric and Politics
- HIST 3010 - History through Video Games
- HIST 3400 - History of American Country Music
- HIST 3900 - American Horror History
- MRTS 4530 - Gender and Sexuality in the Horror Film
- SOCI 1520 - Contemporary Social Problems
- SOCI 4620 - Sociology of Culture
- WLLC 3100 - Arab Cultures in Film and Music
- WLLC 3310 - The Best of French Pop Culture
- WLLC 3320 - Pop Culture and Everyday Life in the Francophone World
- WLLC 3410 - German Popular Culture
- WLLC 3600 - Japanese Popular Culture

Urban Studies certificate

The Department of Anthropology in conjunction with the Department of Geography and the Environment is offering a 12 credit academic certificate in urban studies. This certificate is a collaborative effort, providing undergraduates with a multi-disciplinary approach to the issues, histories and scholarship surrounding urban life. In applied social sciences, cities provide both the context and content of much of our work, pedagogy and problem-solving. Course electives in the certificate will allow students to customize their preparation for graduate studies and careers that span multiple fields of practice.

Required courses, 6 hours

- ANTH 4765 - Urban Beings
- GEOG 4210 - Urban Geography

Electives, 6 hours

Choose 6 hours from the following list:

- ANTH 4760 - Inequality, Social Justice and the City
- GEOG 3010 - Economic Geography
- GEOG 3100 - United States and Canada: Economies, Cities and Sustainability
- GEOG 4170 - Field Methods and Mapping
- PADM 3210 - Population Demographics and Urban Planning
- PADM 4250 - Community Development and Collaborative Planning
- PSCI 3010 - American State and Local Government
- PSCI 4020 - Urban Politics
- SOCI 3300 - Urban Sociology
- SOCI 3800 - Sociology of Work

- SOCI 4350 - Community Organization

Suzanne Enck, Chair

Faculty

Communication studies examines communication in human affairs and the symbolic processes through which humans interact by focusing on five basic behaviors associated with communication: analysis of self and others, effectively using and responding to verbal messages, effectively using and responding to non-verbal messages, listening and responding appropriately, and appropriately adapting messages to others. The curriculum is designed to facilitate student mastery of theory and research, to enhance communication skills and to enhance student preparation for a variety of careers or for graduate study. Many communication studies graduates pursue careers in consulting, marketing, advertising, training and development, education, non-profit leadership and human resources. Others find communication to be a useful major in preparing for law, the ministry, public relations, corporate communication, politics and community relations.

The department offers course work in rhetorical, performance and social science traditions. Students are afforded opportunities to explore communication from applied and theoretical perspectives in organizational settings and through co-curricular activities. Course work features the investigation of communication in organizational, interpersonal, aesthetic, health, small group, political, cultural, intercultural and international contexts. Students encounter topics such as gender and diversity issues, persuasion, technology, social change, conflict, narrative and cultural studies.

Debate and performance programs

Students may develop and enhance critical thinking skills by participating in intercollegiate debate and performance activities. The national-caliber debate team competes actively in both on-campus events and tournament competition at the regional and national levels. The performance interest group participates in national festivals, sponsors on-campus performances and hosts the Petit Jean National Performance Festival.

Digital media studies certificate

In conjunction with the departments of media arts and technical communication, the Department of Communication Studies offers a Digital Media Studies certificate (COMM).

Scholarships

Debate Alumni/William DeMougeot Scholarship

This scholarship is awarded on a competitive basis to outstanding students who participate in the activities of the North Texas Debate Team.

Olive M. Johnson Memorial Scholarship

This scholarship is awarded on a competitive basis to outstanding students who participate in the activities of the North Texas Debate Team.

Curtis M. Loveless Scholarship

This scholarship is awarded on a competitive basis to outstanding students who major in communication studies and participate in the activities of the North Texas Debate Team.

Information about debate scholarships may be obtained by writing to Dr. Brian Lain, Department of Communication Studies, brian.lain@unt.edu.

Leslie Woody Memorial Scholarship in Oral Interpretation and Performance Studies

This scholarship is awarded on a competitive basis to undergraduate students who participate in curricular performance studies classes and extracurricular performance studies, intercollegiate festivals and other activities.

Information about this scholarship may be obtained by writing to Dr. Justin Trudeau, Department of Communication Studies, justin.trudeau@unt.edu.

The Communication Studies Endowment Scholarship

The Communication Studies Endowment Scholarship is open to undergraduate COMM majors who have completed at least 60 hours and have a cumulative GPA of at least 3.0 and who have completed at least 12 hours of COMM classes with a 3.5 GPA in COMM classes. It is also open to COMM graduate students who have completed at least 9 hours and have a GPA of 3.5 in COMM classes.

Information about this scholarship may be obtained by writing COMMStudies@unt.edu.

Majors**Communication Studies, BA**

A Bachelor of Arts with a major in communication studies equips you with the effective communication, critical thinking and problem-solving skills needed for success in today's marketplace. You will investigate communication in aesthetic, health, international, interpersonal, cultural, legal, organizational and political contexts.

Communication studies admission and initial requirements

Entering students are classified as majors but must fulfill initial requirements for the degree prior to enrolling in upper division courses in the department. An advisor is available in the department to help students with questions regarding the degree and transitioning from lower division to upper division courses. To progress from lower division course work to upper division course work, students must complete the following requirements.

30 hours of college credit

Complete at least 30 hours of college credit, including:

English composition requirement

Complete the University Core English Composition and Rhetoric requirement with a grade of C or better in each course.

- ENGL 1310 - First-Year Writing I

- ENGL 1320 - First-Year Writing II
or
- TECM 2700 - Technical Writing

Communication studies (COMM) courses

Complete the following COMM courses with a grade of C or better in each course:

- COMM 1010 - Introduction to Communication
- COMM 2020 - Interpersonal Communication
- COMM 2060 - Performance of Literature
or
- COMM 3260 - Storytelling, Narrative and Everyday Life
- COMM 2140 - Advocating in Public
or
- COMM 3840 - Argumentation and Debate

GPA requirement for admission and initial requirements:

Have a UNT grade point average of 2.5 or higher.

Degree requirements

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Arts degree as specified in the "University Core Curriculum" in the Academics section of this catalog and the College of Liberal Arts and Social Sciences requirements. Students wishing to major in communication studies should consult an advisor in the Undergraduate Advising Office, General Academic Building, Room 320F.

Major requirements

A total of 36 semester credit hours:

Initial requirements, 15 core hours

- COMM 1010 - Introduction to Communication
- COMM 2020 - Interpersonal Communication
- COMM 2060 - Performance of Literature
or
- COMM 3260 - Storytelling, Narrative and Everyday Life
- COMM 2140 - Advocating in Public
or
- COMM 3840 - Argumentation and Debate

- COMM 3010 - Communication Perspectives

Initial upper-division course sequence requirements

COMM 3010 may be taken concurrently with **one** other communication course; students may either take COMM 3010 concurrently with their final 2000-level COMM core course or their first enrollment in an upper-division course. If students elect to take COMM 3010 concurrently with their first upper-division course, it must be approved by a Department of Communication Studies advisor.

Students who do not complete COMM 3010 with a grade of C or better are prohibited from enrolling in other upper-division communication courses until they have completed COMM 3010 successfully.

9 hours distributed

One course taken from each of the following groups:

Group A

- COMM 3120 - Nonverbal Communication
- COMM 3220 - Health Communication
- COMM 3320 - Communication and Conflict Management
- COMM 3420 - Communication and New Technology
- COMM 3520 - Advanced Interpersonal Communication
- COMM 3620 - Intercultural Communication
- COMM 3720 - Small Group Communication
- COMM 3820 - Social Media Perspectives
- COMM 3920 - Organizational Communication
- COMM 4120 - Communication and Sport
- COMM 4220 - Theories of Crisis Communication
- COMM 4320 - Communications and Virtual Gaming
- COMM 4420 - Communication and Relational Development
- COMM 4829 - Topics in Interpersonal/Organizational Studies

Group B

- COMM 3340 - Methods of Rhetorical Criticism
- COMM 3440 - Public Address Studies
- COMM 3445 - Propaganda and Persuasion
- COMM 3540 - The Zombie as Rhetorical Figure
- COMM 3840 - Argumentation and Debate
- COMM 4140 - Gender and Communication
- COMM 4240 - Rhetoric and Popular Culture
- COMM 4340 - Rhetoric and Politics
- COMM 4345 - The Rhetoric of Other Worlds
- COMM 4545 - Rhetorics of Protest, Movement(s) and Resistance
- COMM 4640 - Latin@ Rhetorics
- COMM 4740 - Landscapes of Public Memory

- COMM 4849 - Topics in Rhetorical Studies

Group C

- COMM 3260 - Storytelling, Narrative and Everyday Life
- COMM 3760 - Performance Methods
- COMM 3865 - Adaptation and Staging
- COMM 4065 - 20th Century Performance Styles
- COMM 4160 - Intertextuality and Performance
- COMM 4265 - Performance and Activism
- COMM 4360 - Performance Composition
- COMM 4460 - Performance Art
- COMM 4465 - Per[FORM]ing Autoethnography
- COMM 4869 - Topics in Performance Studies

3 hours of Theory from

- COMM 4020 - Communication Theory
- COMM 4040 - Rhetorical Theory
- COMM 4060 - Performance Theory
- COMM 4220 - Theories of Crisis Communication
- COMM 4520 - Theories of Persuasion
- COMM 4540 - Communication Theories of Sexuality

9 additional advanced hours in Communications Studies (COMM) courses

No more than 3 hours total credit for COMM 3880 may be applied to the communication studies major or minor.

Other course requirements

None.

Optional minor requirements

An optional minor of at least 18 hours, including 6 advanced hours, from another department, or an interdisciplinary minor.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information see an academic advisor in the College of Liberal Arts and Social Sciences.

Other requirements

A student who has completed 90 hours with at least a 3.5 grade point average is eligible to write a Senior Honors Thesis. Students who select this option are expected to complete their theses in the course of a single term/semester.

Students majoring in communication studies are required to have a minimum grade of C in all COMM courses that count toward the major to graduate. COMM courses taken beyond requirements for the major cannot be taken pass/no pass.

Students must observe prerequisites for each COMM course. If a student registered for a course has not completed prerequisite(s) for the course with a grade of C or better, the student is subject to being dropped from the course without notice. Prerequisites are listed with individual course descriptions.

All students taking COMM 3010 may only take one additional COMM class concurrently, which must be approved by a Department of Communication Studies advisor.

Because of the high demand for many COMM courses, students who miss the first class day without prior consent of the instructor are subject to being dropped from the course so that other students may be added. It is the student's responsibility to secure prior consent of the instructor.

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years, and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

Year 1

Semester 1		Semester 2	
COMM 1010 - Introduction to Communication	3 hours	COMM 2020 - Interpersonal Communication	3 hours
HIST 2610 - United States History to 1865	3 hours	HIST 2620 - United States History Since 1865	3 hours

Grad Track Options

Communication Studies, BA with grad track option leading to Communication Studies, MA

This program will target high-achieving undergraduate students majoring in communication studies, offering the opportunity for outstanding students to advance their careers by pursuing the Bachelor's and Master's degrees in a parallel and coordinated program. Students are eligible for acceptance into the program upon completion of 75 undergraduate hours, including COMM 3010 and enrollment in a theory course in communication studies.

Admissions Criteria

Students are eligible for acceptance beginning in the spring of their junior year upon completion of 75 undergraduate hours, including COMM 3010 and enrollment in a theory course in communication studies. To be considered for admission into the pathway program, students must: have a minimum 3.5 GPA both overall and in the communication studies major; completed COMM 3010 with a grade of A or B; and completed the undergraduate theory course in communication studies with a grade of A or B.

Application Process

Students will apply by submitting a letter of application, a resume or vita, 2 letters of recommendation from UNT communication studies faculty, and a scholarly writing sample from an upper-division course in communication studies.

Enrollment & Benefits

Students accepted into the grad track program can enroll in up to 12 hours of graduate-level coursework to count toward their Bachelor's degree in communication studies. As a pathway toward the Master's degree, students in this program will first earn their Bachelor's degree and then complete their Master's degree in communication studies. Students accepted into the program will be able to fulfill all degree requirements established by the department & university, while augmenting their undergraduate degree with master's level coursework that would count toward the student's upper-level electives and GROUP requirements. This pathway program will enable outstanding students to move more efficiently through their academic career.

Undergraduate course substitutes

The maximum number of graduate hours a grad track student could earn is 12 hours (4 graduate courses). These 12 hours can be comprised of a mixture of course substitutions for a combination of Group A-B-C course requirements and/or upper-division communication elective courses.

Students who are accepted into the grad track program can substitute the following graduate-level COMM courses for each corresponding COMM GROUP requirement.

All remaining courses for Communication Studies, BA must be completed.

GROUP A (Interpersonal/organizational studies)

- COMM 5120 - Group Processes
- COMM 5180 - Qualitative Research Methods in Communication
- COMM 5185 - Quantitative Research Methods in Communication
- COMM 5220 - Organizational Communication
- COMM 5221 - Crisis and Disaster Communication
- COMM 5225 - Interpersonal Communication
- COMM 5226 - Seminar in Health Communication
- COMM 5325 - Communication Theory
- COMM 5420 - Seminar in Computer-Mediated Communication
- COMM 5625 - Communication Consulting

- COMM 5820 - Seminar in Communication Processes

GROUP B (Rhetorical studies)

- COMM 5240 - Rhetoric and Mediated Culture
- COMM 5340 - Rhetorical Methods
- COMM 5345 - Rhetorical Theory
- COMM 5445 - Feminist Criticism
- COMM 5545 - Race and Public Culture
- COMM 5640 - Classical Rhetoric
- COMM 5740 - Visual Rhetoric
- COMM 5840 - Seminar in Rhetorical Studies
- COMM 5860 - Seminar in Performance Studies

GROUP C (Performance studies)

- COMM 5160 - Performative Writing
- COMM 5165 - Performance and U.S. Southern Culture
- COMM 5260 - Seminar in Adaptation and Staging
- COMM 5265 - Performance Methods
- COMM 5365 - Performance Theory
- COMM 5460 - Narrative Theory
- COMM 5560 - 20th Century Theory and Practice in Performance Studies
- COMM 5660 - Performance and Ethnography
- COMM 5760 - Performance, Culture and Tourism
- COMM 5860 - Seminar in Performance Studies

Additional information about advising for grad track students

Grad track students will choose classes in consultation with the graduate advisor to ensure that classes meet their level of preparation in the program.

Grad track students cannot enroll in COMM 5085 - Pedagogy and Communication until they have fulfilled all degree requirements for their Bachelor's degree.

COMM 5080 - Introduction to Graduate Study and Research in Communication Studies would count as a substitute for a grad track student's upper-level COMM elective.

Grad track students would be strongly advised not to take more than 12 hours (total) in a semester while still completing their Bachelor's degree (the ideal enrollment would be a split of 6 hours of undergrad courses and 3-6 hours of graduate courses). No grad track student would be permitted to take more than 3 graduate courses while still enrolled in their Bachelor's degree program.

Grad track students cannot enroll in more advanced seminars in the Master's program unless they have already taken a more general course in that area of the department (e.g., while still enrolled in the Bachelor's program, a grad track student would not be permitted to take COMM 5545 - Race and Public Culture unless they have already taken one of the rhetoric courses approved as a GROUP B substitute).

Grad track students would be advised to take graduate coursework alongside general degree electives in other departments to help balance out workload.

Courses taken for grad track credit will have a slightly different numbering system (So, instead of taking COMM 5221.601, the undergrad grad track student would sign up for COMM 5221.002 to distinguish them from the traditional Master's degree student).

Minors

Communication Studies minor

The minor in communication studies requires a total of 18 semester hours, including at least 6 upper-level hours. Minors must observe the system of prerequisites for upper-level courses.

No more than 3 hours total credit for COMM 3880 may be applied to the communication studies major or minor.

Departmental advisors are available for consultation on the minor in communication studies.

Secondary Teacher Certification

Communication Studies (Speech) teacher certification

The College of Liberal Arts and Social Sciences encourages students to explore teaching at the secondary level as a career option. The student's academic advisor in the Dean's Office for Undergraduates and Student Advising in GAB, Room 220, can assist students with specific requirements for teacher certification in speech. Upon completion of this program, students will be prepared to sit for the certification examinations in speech.

Communication studies admission and initial requirements

Entering students are classified as majors but must fulfill initial requirements for the degree prior to enrolling in upper division courses in the department. An advisor is available in the department to help students with questions regarding the degree and transitioning from lower division to upper division courses. To progress from lower division course work to upper division course work, students must complete the following requirements.

30 hours of college credit

Complete at least 30 hours of college credit, including:

English composition requirement

Complete the University Core English Composition and Rhetoric requirement with a grade of C or better in each course.

- ENGL 1310 - First-Year Writing I
- ENGL 1320 - First-Year Writing II
or
- TECM 2700 - Technical Writing

Communication studies (COMM) courses

Complete the following COMM courses with a grade of C or better in each course:

- COMM 1010 - Introduction to Communication
- COMM 2020 - Interpersonal Communication
- COMM 2060 - Performance of Literature
or
- COMM 3260 - Storytelling, Narrative and Everyday Life
- COMM 2140 - Advocating in Public
or
- COMM 3840 - Argumentation and Debate

GPA requirement for admission and initial requirements:

Have a UNT grade point average of 2.5 or higher.

Major requirements, 36 hours

Initial requirements, 18 core hours

- COMM 1010 - Introduction to Communication
- COMM 2020 - Interpersonal Communication
- COMM 2040 - Public Speaking
- COMM 2060 - Performance of Literature
or
- COMM 3260 - Storytelling, Narrative and Everyday Life
- COMM 2140 - Advocating in Public
or
- COMM 3840 - Argumentation and Debate
- COMM 3010 - Communication Perspectives

Initial upper-division course sequence requirements

COMM 3010 may be taken concurrently with one other communication course; students may either take COMM 3010 concurrently with their final 2000-level COMM core course or their first enrollment in an upper-division course. If students elect to take COMM 3010 concurrently with their first upper-division course, it must be approved by a Department of Communication Studies advisor.

Students who do not complete COMM 3010 with a grade of C or better are prohibited from enrolling in other upper-division communication courses until they have completed COMM 3010 successfully.

9 hours distributed

One course taken from each group:

Group A

- COMM 3120 - Nonverbal Communication
- COMM 3220 - Health Communication
- COMM 3320 - Communication and Conflict Management
- COMM 3420 - Communication and New Technology
- COMM 3520 - Advanced Interpersonal Communication
- COMM 3620 - Intercultural Communication
- COMM 3720 - Small Group Communication
- COMM 3820 - Social Media Perspectives
- COMM 3920 - Organizational Communication
- COMM 4120 - Communication and Sport
- COMM 4220 - Theories of Crisis Communication
- COMM 4320 - Communications and Virtual Gaming
- COMM 4420 - Communication and Relational Development
- COMM 4829 - Topics in Interpersonal/Organizational Studies

Group B

- COMM 3340 - Methods of Rhetorical Criticism
- COMM 3440 - Public Address Studies
- COMM 3540 - The Zombie as Rhetorical Figure
- COMM 3840 - Argumentation and Debate
- COMM 4140 - Gender and Communication
- COMM 4240 - Rhetoric and Popular Culture
- COMM 4340 - Rhetoric and Politics
- COMM 4640 - Latin@ Rhetorics
- COMM 4740 - Landscapes of Public Memory
- COMM 4849 - Topics in Rhetorical Studies

Group C

- COMM 3260 - Storytelling, Narrative and Everyday Life
- COMM 3760 - Performance Methods
- COMM 3865 - Adaptation and Staging
- COMM 4065 - 20th Century Performance Styles
- COMM 4160 - Intertextuality and Performance
- COMM 4360 - Performance Composition
- COMM 4460 - Performance Art
- COMM 4869 - Topics in Performance Studies

3 hours of theory, chosen from

- COMM 4020 - Communication Theory
- COMM 4040 - Rhetorical Theory
- COMM 4060 - Performance Theory
- COMM 4220 - Theories of Crisis Communication
- COMM 4540 - Communication Theories of Sexuality
- COMM 4520 - Theories of Persuasion

6 additional advanced hours in Communication Studies (COMM) courses

Chosen in consultation with an advisor.

Additional requirements

See major for additional course work and GPA requirements.

Majors are required to complete COMM core courses before registering in upper-division courses. Students who register for a course for which they have not completed prerequisite(s) with a grade of C or better are subject to being dropped from the course.

Because of the high demand for many COMM courses, students who miss the first class day without prior consent are subject to being dropped from the course so that other students may be added. It is the student's responsibility to secure prior consent of the instructor.

Students must also complete the required 21 hours in upper-level education courses (EDCI 3800, EDCI 3830, EDCI 4060, EDCI 4070, EDCI 4108, EDCI 4118, EDCI 4840) and meet all GPA requirements to apply for state certification. In order to progress through the required education courses, the student must make an application to the certification program in the College of Education's Educator Preparation Office in Matthews Hall, Room 119.

All state certification requirements and information on required examinations is available on the web site of the State Board for Educator Certification (SBEC), www.tea.state.tx.us.

Undergraduate Academic Certificates

Digital Media Studies certificate (COMM)

In this certificate program, students learn to utilize and analyze a variety of digital media tools for the purposes of communication, collaboration and research, and to develop social, political, academic and professional networks. The certificate is interdisciplinary; students must take the three core courses from MRTS, COMM and TECM. Applicable electives may be taken from any department with permission.

Certificate requirements, 15 hours

Students may receive a certificate in digital media studies by successfully completing the following courses with a grade of B or higher.

Required courses, 9 hours

- COMM 3420 - Communication and New Technology
- MRTS 3620 - Digital Media and Society
- TECM 1500 - New Media Experience

Electives, 6 hours

Select from the following courses:

- COMM 3820 - Social Media Perspectives
- COMM 4320 - Communications and Virtual Gaming

- JOUR 3270 - Media Entrepreneurship and Innovation
- JOUR 4270 - Strategic Social Media
- MRTS 3360 - Social Media Strategies
- MRTS 3445 - Video Game Histories
- MRTS 3525 - Content Development for Digital Media
- MRTS 3630 - Game Studies: Players, Culture and Industry
- MRTS 4415 - Topics in Film and Television Studies (when taught as "Media Genres/Authors - Video Game Authors")
- MRTS 4428 - Mobile Media
- MRTS 4450 - Topics in Media Industry Studies (when taught as "Digital Distribution")
- MRTS 4665 - Gender, Race and Digital Media
- Internship option (COMM 4800, MRTS 4480 or TECM 4920) with approval from undergraduate advisor
- Other courses approved by undergraduate advisor

Department of Dance and Theatre

Main Departmental Office
Radio, TV, Film and Performing Arts Building, Room 242

Mailing address:
1155 Union Circle #310607
Denton, TX 76203-5017
940-565-2211
E-mail: DanceAndTheatre@unt.edu
Web site: www.danceandtheatre.unt.edu

Dance Office
Dance and Theatre Building, Room 103

Steven Wolverton, Chair

Faculty

The Department of Dance and Theatre is dedicated to the professions of theatre and dance as central concerns of a civilized society and as primary methodologies in the education of its citizenry. Small groups of teachers and students, using as a foundation artists and artworks from both past and present and from all cultures and civilizations, collaborate in rehearsals and public performances derived from the finest possible classroom experiences.

Scholarly and empirical research are combined with a high level of spontaneous creativity to develop the entire spectrum of dance and theatre as art forms. Playwrights, actors, dancers, choreographers, directors, designers, technicians and teachers are encouraged to discover and to enhance their own creativity, to bear witness through their artistry to the richness of human life and to make artistic excellence an essential component of contemporary performance.

The Department of Dance and Theatre operates several facilities designed and equipped to generate, organize and conduct research in dance and dramatic performance, design and technical production.

The University Theatre, with a 475-seat proscenium-stage and a flexible studio theatre, both located in the Radio, TV, Film and Performing Arts Building; the Dance and Theatre Building; four dance studios; acting/directing studios; rehearsal rooms; a scene shop; a state-of-the-art costume design and construction space; the scenery and costume collection; and the department library represent a commitment to providing the finest possible theatre and dance education.

Current information regarding application, auditions, portfolio reviews, interviews and requirements is available at the department web site, www.danceandtheatre.unt.edu.

Academic advising

Students who wish to minor in dance should consult an advisor in the DATH building, Room 103C, about selection of courses, application of transfer credit in dance, and general academic requirements, policies and procedures. The approval of the department chair is required for degree audits. Theatre majors and minors will be advised by the academic advisor by contacting the department office, Room 242 of the Radio, TV, Film and Performing Arts Building.

All members of the dance and theatre faculty are available to help students achieve a successful enrollment at the University of North Texas and to provide guidance through their academic and professional careers.

Dance Advisor email: Dance-Advising@unt.edu

Theatre Advisor email: Theatre-Advising@unt.edu

Dance programs of study

The department offers undergraduate programs in the following area:

- Dance minor

Theatre programs of study

The department offers an undergraduate program in the following area:

- Bachelor of Arts with a major in theatre
- Theatre minor
- Theatre teacher certification
- Theatre Technologies certificate
- Theatre with a concentration in Design/Tech, BA
- Theatre with a concentration in Acting, BA
- Theatre with a concentration in Theatre Studies, BA

The department offers a minor in theatre and a series of courses designed to prepare students to sit for the certification examinations in theatre.

The Bachelor of Arts (BA) is a flexible liberal arts degree intended to offer a basic comprehensive knowledge of theatre, and the BA program in theatre is dedicated to providing a well-rounded major within a liberal arts context.

Undergraduate majors are required to complete courses in acting, design and technical theatre, and theatre history/dramatic literature, as well as electives at the 3000–4000 level. Theatre elective courses include courses in intermediate and advanced level acting and movement, design and technical theatre, stage management, teaching methods in creative drama, theatre for young audiences, playwriting, and a directing series. The balance of the course work provides opportunities in all elements of production. The faculty considers the optimum preparation for the theatre is to be comprised of a liberal arts undergraduate major in theatre and a graduate conservatory education. The BA program is projected to be a 4-year degree with the preferred entry point to occur during the fall semester. However, duration in the program can be affected by the timeliness of the major declaration, number and type of transfer credits and semester credit load.

Scholarships

The Ann Bradshaw Stokes Award is provided by a grant from the Ann Bradshaw Stokes Foundation. The Gaylord-Hughes Scholarship has been made possible through an endowment by noted actress Martha Gaylord and by Tom Hughes, late producer and managing director of the Dallas Summer Musicals and a Distinguished Alumnus; by the work of guest artists; and by contributions. Two recently endowed scholarships honoring former department chairs include the Ed DeLatte Scholarship in

musical theatre and the Ralph B. Culp Scholarship in directing. The Lucille Murchison Scholarships in dance, costuming and technical theatre are the result of the department's participation in the UNT Centennial Extravaganza. Dance scholarships are supported by gifts from faculty, students and alumni. The Chun Hui Lee Dance Scholarship is the result of the generosity of Mr. Chun Hui Lee. The Mills Dance Scholarship was established by an alumnus, the late Eugene Mills. The Joyce and C.R. Pennington Dance Education award is made possible by an endowment by Joyce and C.R. Pennington. The Jonathan Bostick Memorial Dance Scholarship is a result of an endowment in memoriam for dance alumnus, Jonathan Bostick.

All scholarships are presented to students majoring in Dance and Theatre or minoring in Dance within the Department of Dance and Theatre during any term/semester or summer session. Each year on announced dates, interested students must apply for departmental scholarships.

Information is available in the department office in the Radio, TV, Film and Performing Arts Building, Room 242, or from the department web site at www.danceandtheatre.unt.edu.

Organizations

The serious student of dance or theatre may become a member of The Drama Club and Chi Tau Epsilon which are undergraduate organizations that serve the dance and theatre department and other university programs.

Majors

Theatre with a concentration in Acting, BA

A Bachelor of Arts with a major in theatre provides you with a comprehensive understanding of theatre and the skills required to make a show work, both on and off the stage.

Degree requirements

The following requirements must be satisfied for a Bachelor of Arts with a major in theatre and a concentration in acting.

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Arts degree as specified in the "University Core Curriculum" in the Degree requirements and graduation section of this catalog and the College of Liberal Arts and Social Sciences (excluding the foreign language requirement).

Major requirements, 45 hours

A minimum of 45 semester hours, including a theatre core of 28 credit hours.

Theatre core, 28 hours

- THEA 1050 - Acting: Fundamentals
- THEA 1440 - Play Analysis
- THEA 2051 - Theatre Voice I
- THEA 2095 - Stage Production I
- THEA 2351 - Theatre Movement I
- THEA 3030 - World Theatre to 1700

- THEA 3040 - World Theatre After 1700
- THEA 3050 - Acting: Realism I
- THEA 3700 - Audition for the Stage
- THEA 4700 - The Business of Acting

Concentration in acting, 17 hours

Design/Tech, 3 hours from the following:

Students in the acting concentration are encouraged to take THEA 2380, as it offers the instruction of skills for career readiness in the field.

- THEA 1030 - Lighting and Sound I
- THEA 1043 - Costume I
- THEA 1046 - Stagecraft I
- THEA 1280 - Stage Management I
- THEA 2380 - Theatrical Makeup

Practicum, 2 hours from the following:

Acting concentration students are strongly encouraged to take THEA 3910 and THEA 4600, as these are courses based in acting skills.

- THEA 3910 - Actors' Ensemble
- THEA 4600 - Rehearsal and Performance for the Stage
- THEA 3095 - Stage Production II (one hour)
- THEA 4095 - Stage Production III (one hour)

Critical perspectives, 3 hours

3 hours chosen from the following:

- THEA 4260 - History of the Broadway Musical
- THEA 4370 - Contemporary Latinx Theatre
- THEA 4380 - LGBTQ Plays and Performance After 1960s
- THEA 4390 - Theatre and Social Change
- THEA 4395 - Theatre and the Holocaust

Areas of interest, 9 hours (advanced)

Work completed in THEA 4500, THEA 4600, THEA 4910, or THEA 4920 must be acting-based.

- THEA 4000 - Acting: Musical Theatre
- THEA 4050 - Acting: Realism II
- THEA 4051 - The Art and Craft of Voice Over
- THEA 4140 - Acting: Shakespeare
- THEA 4310 - Acting for the Camera
- THEA 4351 - Physical Theatre

- THEA 4500 - Theatre Topics
- THEA 4600 - Rehearsal and Performance for the Stage
- THEA 4910 - Special Problems
- THEA 4920 - Theatre Practicum

Other course requirements

Students must follow all course prerequisites.

Minor

Optional (a related field such as music, psychology or art is recommended).

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information, see an academic advisor in the College of Liberal Arts and Social Sciences.

Other requirements

1. To remain a theatre major and to graduate, students majoring in theatre must maintain a cumulative grade point average of 2.5 for all theatre courses.
2. Students majoring in theatre must enroll in a performance/production course (THEA 4600 or equivalent) each term/semester the student performs or designs in public productions sponsored or approved by the department.
3. Transfer work to be substituted for required theatre courses must be approved by the departmental advisor.
4. The department does not allow students to obtain a D or below more than twice in a theatre course comprising the major. Once the student receives the second D or below in the same course, the student will be dismissed from the major.
5. Students who miss the first day of class without consent of the instructor are subject to be administratively dropped from the course so that other students may be added. Students who miss the first day of class because of illness or some other acceptable excuse must notify the instructor on record the day of the absence.
6. Students must observe prerequisites for each theatre course. If a student has not completed prerequisites for a particular course, the student is subject to administrative drop without notice. Prerequisites are listed with individual course descriptions.
7. Students majoring or minoring in theatre who have received a grade of C in any of the three prerequisite acting courses (THEA 1050 Acting: Fundamentals, THEA 2051 Theatre Voice I, or THEA 2351 Theatre Movement I), even if they are transferring that course in from another institution, will be required to complete an audition in order to be considered for enrollment in THEA 3050 Acting: Realism I.

Theatre with a concentration in Design/Tech, BA

A Bachelor of Arts with a major in theatre provides you with a comprehensive understanding of theatre and the skills required to make a show work, both on and off the stage.

Degree requirements

The following requirements must be satisfied for a Bachelor of Arts with a major in theatre and a concentration in design/tech.

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Arts degree as specified in the University Core Curriculum in the Academic policies section of this catalog and the College of Liberal Arts and Social Sciences requirements (excluding the foreign language requirement).

Major requirements, 45 hours

A minimum of 45 semester hours, including a theatre core of 21 credit hours.

Theatre core, 21 hours

Required courses, 12 hours

- THEA 1440 - Play Analysis
- THEA 3030 - World Theatre to 1700
- THEA 3040 - World Theatre After 1700
- THEA 4346 - Design/Tech and The Profession

3 hours from

- THEA 1030 - Lighting and Sound I
- THEA 1043 - Costume I
- THEA 1046 - Stagecraft I
- THEA 1280 - Stage Management I
- THEA 2380 - Theatrical Makeup

3 hours from

- THEA 1050 - Acting: Fundamentals
- THEA 2051 - Theatre Voice I
- THEA 2351 - Theatre Movement I

3 courses from

Select three courses from the following:

- THEA 2095 - Stage Production I (one hour)
- THEA 3095 - Stage Production II (one hour)
- THEA 4095 - Stage Production III (one hour)
- THEA 4600 - Rehearsal and Performance for the Stage (one hour)

Concentration in design/tech, 24 hours

Required courses:

- THEA 1700 - Theatrical Design I
- THEA 1701 - Theatrical Design II

3 hours from

Select three hours from the following courses, in addition to the course chosen for the theatre core:

- THEA 1030 - Lighting and Sound I
- THEA 1043 - Costume I
- THEA 1046 - Stagecraft I
- THEA 1280 - Stage Management I
- THEA 2380 - Theatrical Makeup

Areas of interest, 15 hours (advanced)

15 advanced hours from the following courses in consultation with the department advisor:

- THEA 3070 - History of Theatrical Costume and Décor
- THEA 3130 - Lighting II
- THEA 3143 - Costume II
- THEA 3146 - Stagecraft II
- THEA 3280 - Stage Management II
- THEA 4110 - Scene Painting for the Theatre
- THEA 4112 - Advanced Scenic Painting for the Theatre
- THEA 4130 - Lighting III: Design
- THEA 4143 - Costume Design
- THEA 3701 - Scenic Design
- THEA 4190 - Sound Production and Design for the Theatre
- THEA 4910 - Special Problems
- THEA 4920 - Theatre Practicum
- THEA 3043 - Costume Crafts
- THEA 3046 - Computer Aided Drafting and Design for the Entertainment Industry

Other course requirements

Students must follow all course prerequisites.

Minor

Optional (a related field such as music, psychology or art is recommended).

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information, see an academic advisor in the College of Liberal Arts and Social Sciences.

Other requirements

- a. To remain a theatre major and to graduate, students majoring in theatre must maintain a cumulative grade point average of 2.5 for all theatre courses.
- b. Students majoring in theatre must enroll in a production course (THEA 4500 or equivalent) each term/semester the student performs or designs in public productions sponsored or approved by the department.
- c. Transfer work to be substituted for required theatre courses must be approved by the departmental advisor.
- d. The department does not allow students to obtain a D or below more than twice in a theatre course comprising the major. Once the student receives the second D or below in the same course, the student will be dismissed from the department.
- e. Students who miss the first day of class without consent of the instructor are subject to be administratively dropped from the course so that other students may be added. Students who miss the first day of class because of illness or some other acceptable excuse must notify the instructor on record the day of the absence.
- f. Students must observe prerequisites for each theatre course. If a student has not completed prerequisites for a particular course, the student is subject to administrative drop without notice. Prerequisites are listed with individual course descriptions.

Theatre with a concentration in Theatre Studies, BA

The BA program in theatre with a concentration in theatre studies provides students with a comprehensive understanding of the context, development, and implementation of live stage productions.

In this concentration, the delicate balance of hands-on training and effective communication skills with broad theoretical knowledge prepares you for a lifetime in theatre and dance that may include a career as an educator in schools and training programs, arts administrator, a private business owner, programming director for performance venues and arts festivals, public relations specialist, recreation worker, literary or talent agent, therapist, among others.

Degree requirements

The following requirements must be satisfied for a Bachelor of Arts with a major in theatre.

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Arts degree as specified in the University Core Curriculum in the Academics section of this catalog and the College of Liberal Arts and Social Sciences requirements (excluding the foreign language requirement).

Major requirements, 45 hours

A minimum of 45 semester hours, including a theatre core of 18 credit hours:

Theatre core, 18 hours

Required courses, 9 hours

- THEA 1440 - Play Analysis
- THEA 3030 - World Theatre to 1700
- THEA 3040 - World Theatre After 1700

3 hours from

- THEA 1030 - Lighting and Sound I
- THEA 1043 - Costume I
- THEA 1046 - Stagecraft I
- THEA 2380 - Theatrical Makeup

3 hours from

- THEA 1050 - Acting: Fundamentals
- THEA 2051 - Theatre Voice I
- THEA 2351 - Theatre Movement I

3 courses from

- THEA 2095 - Stage Production I (one hour)
or
- THEA 3095 - Stage Production II (one hour)
or
- THEA 4095 - Stage Production III (one hour)
or
- THEA 4600 - Rehearsal and Performance for the Stage (one hour)

Concentration in Theatre Studies, 27 hours

Select 3 hours from the following courses, in addition to course chosen for the theatre core:

- THEA 1030 - Lighting and Sound I
- THEA 1043 - Costume I
- THEA 1046 - Stagecraft I
- THEA 1050 - Acting: Fundamentals
- THEA 2051 - Theatre Voice I
- THEA 2351 - Theatre Movement I
- THEA 2380 - Theatrical Makeup
- Critical Perspectives, 3 hours from:
 - THEA 4260 - History of the Broadway Musical
 - THEA 4370 - Contemporary Latinx Theatre
 - THEA 4380 - LGBTQ Plays and Performance After 1960s
 - THEA 4390 - Theatre and Social Change
 - THEA 4395 - Theatre and the Holocaust

Areas of interest

You may choose a range of lower and upper-division theatre and dance courses, in consultation with the department theatre advisor.

The category of "Areas of interest" is constructed to accommodate multiple academic interests, whether that interest is dance or theatre history, writing production reviews, choreography, performance, directing, playwriting, design/tech, or teaching.

An exciting aspect of a concentration in theatre studies is the opportunity to design unique study pathways through the blending of any number of existing dance and theatre courses that reflect your particular interests.

For instance:

Study Pathway - Choreography for Musical Theatre: enroll in DANC 1250, DANC 2250, DANC 3250: Choreography I, II, III; courses from modern dance technique, ballet, tap, jazz, to hip hop, social club dance, musical theatre dance; THEA 4000: Musical Theatre Acting

Study Pathway - Directing High School Theatre Productions: enroll in THEA 1030: Lighting and Sound I, THEA 1043: Costume I, THEA 1046: Stagecraft I, or THEA 2380: Theatrical Makeup;

THEA 1050: Acting Fundamentals, THEA 2051: Theatre Voice I, THEA 2351: Theatre Movement I, THEA 3100: Directing I, THEA 3400: Theatre for Young Audiences, THEA 4460: Play and Film Scriptwriting.

Study Pathway - Movement Practices: enroll in DANC 3630: Laban Studies, DANC 3050: Dance Kinesiology, and THEA 2351 and THEA 3351: Theatre Movement I and II.

Some courses may have several prerequisites or require an audition prior to enrollment.

Other course requirements

Students must follow all course prerequisites.

Through a juried review process, theatre performance faculty will assess the skill level of all students completing THEA 3050 to determine eligibility for enrollment in the following courses: THEA 3140, THEA 4000, THEA 4140, THEA 4310. Individuals may be required to repeat THEA 3050.

Minor

Optional (a related field such as music, dance or art is recommended).

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information, see an academic advisor in the College of Liberal Arts and Social Sciences.

Other requirements

To remain a theatre major and to graduate with a degree in theatre, students majoring in theatre must maintain a cumulative grade point average of 2.5 for all theatre courses.

Students majoring in Theatre must enroll in a theatre performance/production course (THEA 3095, THEA 4095, THEA 4600 or equivalent) each term or semester the student performs or designs in public productions sponsored or approved by the department.

Transfer work to be substituted for required theatre courses must be approved by the theatre advisor.

The department does not allow students to obtain a D or below more than twice in a theatre course comprising the major. Once the student receives the second D or below in the same course, the student will be dismissed from the department.

Students who miss the first day of class without consent of the instructor are subject to be administratively dropped from the course so that other students may be added. Students who miss the first day of class because of illness or some other acceptable excuse must notify the instructor on record the day of the absence.

Students must observe prerequisites for each theatre course. If a student has not completed prerequisites for a particular course, the student is subject to administrative drop without notice. Prerequisites are listed with individual course descriptions.

Students majoring or minoring in theatre who have received a grade of C in any of three prerequisites (THEA 1050: Acting Fundamentals, THEA 2051: Theatre Voice I, or THEA 2351: Theatre Movement I), even if students are transferring in that course from another institution, will be required to complete an audition in order to be considered for enrollment in THEA 3050: Acting: Realism I.

Theatre, BA

A Bachelor of Arts with a major in theatre provides you with a comprehensive understanding of theatre and the skills required to make a show work, both on and off the stage.

Degree requirements

The following requirements must be satisfied for a Bachelor of Arts with a major in theatre.

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Arts degree as specified in the University Core Curriculum in the Academic policies section of this catalog and the College of Liberal Arts and Social Sciences requirements (excluding the foreign language requirement).

Major requirements

A minimum of 45 semester hours, including a theatre core of 18 credit hours:

Theatre core, 18 hours

Required courses, 9 hours

- THEA 1440 - Play Analysis
- THEA 3030 - World Theatre to 1700
- THEA 3040 - World Theatre After 1700

3 hours from

- THEA 1030 - Lighting and Sound I
- THEA 1043 - Costume I
- THEA 1046 - Stagecraft I
- THEA 1280 - Stage Management I
- THEA 2380 - Theatrical Makeup

3 hours from

- THEA 1050 - Acting: Fundamentals
- THEA 2051 - Theatre Voice I
- THEA 2351 - Theatre Movement I

3 courses from

- THEA 2095 - Stage Production I (one hour), or
- THEA 3095 - Stage Production II (one hour), or
- THEA 4095 - Stage Production III (one hour), or
- THEA 4600 - Rehearsal and Performance for the Stage (one hour)

Areas of interest, 27 hours

To complete the BA with a major in theatre, students may choose 27 hours from a range of lower and upper-division theatre courses (areas of interest) in consultation with department advisor.

Other course requirements

- a. Students must follow all course prerequisites.
- b. Through a juried review process, theatre performance faculty will assess the skill level of all students completing THEA 3050 to determine eligibility for enrollment in the following courses: THEA 3140, THEA 4000, THEA 4140, and THEA 4310. Individuals may be required to repeat THEA 3050.

Minor

Optional (a related field such as music, psychology or art is recommended).

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information, see an academic advisor in the College of Liberal Arts and Social Sciences.

Other requirements

- a. To remain a theatre major and to graduate, students majoring in theatre must maintain a cumulative grade point average of 2.5 for all theatre courses.
- b. Students majoring in theatre must enroll in a production course (THEA 4500 or equivalent) each term/semester the student performs or designs in public productions sponsored or approved by the department.
- c. Transfer work to be substituted for required theatre courses must be approved by the departmental advisor.
- d. The department does not allow students to obtain a D or below more than twice in a theatre course comprising the major. Once the student receives the second D or below in the same course, the student will be dismissed from the department.

- e. Students who miss the first day of class without consent of the instructor are subject to be administratively dropped from the course so that other students may be added. Students who miss the first day of class because of illness or some other acceptable excuse must notify the instructor on record the day of the absence.
- f. Students must observe prerequisites for each theatre course. If a student has not completed prerequisites for a particular course, the student is subject to administrative drop without notice. Prerequisites are listed with individual course descriptions.

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years, and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

Year 1

Semester 1		Semester 2	
Communication core	3 hours	PSCI 2305 - US Political Behavior and Policy	3 hours
Component Area Option A core	3 hours	THEA 1440 - Play Analysis	3 hours
Mathematics core	3 hours	Communication core	3 hours
THEA Acting selection	3 hours	Life and Physical Sciences core	1 hour
THEA Technical selection	3 hours	Stage Production and Performance selection	3 hours
		Elective	2 hours
Total	15 hours	Total	15 hours

Year 2

Semester 1		Semester 2	
HIST 2610 - United States History to 1865	3 hours	HIST 2620 - United States History Since 1865	3 hours

Minors

Dance minor

A minor in dance consists of 18 semester hours, including 9 advanced hours.

The dance minor seeks to provide, within 18 credit hours, an opportunity for students to explore the field of dance via breadth and some depth as tailored to their individual needs. Students will gain and apply artistic and intellectual knowledge in the field of dance that is relevant and applicable to each dance minor's interdisciplinary career goal or personal enrichment aim.

Requirements

9 hours: from dance courses at the 1000 and/or 2000 level

9 hours: from dance courses at the 3000 and/or 4000 level

Other requirements

Students will audition for initial placement in dance technique courses and meet with the department advisor prior to enrolling in courses.

Theatre minor

A minor in theatre consists of 18 semester hours.

Requirements

18 hours from the following:

9 hours from

- THEA 1030 - Lighting and Sound I
- THEA 1043 - Costume I
- THEA 1046 - Stagecraft I
- THEA 1050 - Acting: Fundamentals
- THEA 1440 - Play Analysis
- THEA 1700 - Theatrical Design I
- THEA 2051 - Theatre Voice I
- THEA 2351 - Theatre Movement I
- THEA 2380 - Theatrical Makeup

Plus 9 advanced hours in theatre

Secondary Teacher Certification

Dance teacher certification

The College of Liberal Arts and Social Sciences encourages students to explore teaching as a career option. The student's academic advisor in the Dean's Office for Undergraduates and Student Advising in GAB, Room 220, can assist students with specific requirements for teacher certification in dance.

All students seeking secondary teaching certification in dance will major in the Dance, BA (INACTIVE) and fulfill the following additional requirements.

Education courses, 21 hours

- EDCI 3800 - Professional Issues in Teaching

- EDCI 3830 - Teaching/Learning Process and Evaluation
- EDCI 4060 - Content Area Reading
- EDCI 4070 - Teaching in a Multicultural Classroom
- EDCI 4840 - Instructional Strategies and Classroom Management
- EDCI 4108 - Student Teaching in the Secondary School
- EDCI 4118 - Student Teaching in the Secondary School

Additional requirements

See Dance, BA (INACTIVE) for additional course work and GPA requirements.

Students must complete the 21 hours of education courses (above) and meet all GPA requirements to apply for state certification.

In order to enroll for the first required education course, the student must make application to the certification program in the College of Education in Matthews Hall, Room 105.

All state certification requirements and information on required examinations are available on the website of the State Board for Educator Certification (SBEC) at www.tea.state.tx.us.

Upon completion of this program, students will be prepared to sit for the certification examinations in dance.

All Level Teacher Certification

Theatre teacher certification

The College of Liberal Arts and Social Sciences encourages students to explore teaching as a career option. The student's academic advisor in the Dean's Office for Undergraduates and Student Advising in GAB, Room 220, can assist students with specific requirements for teacher certification in theatre.

Upon completion of this program, students will be prepared to sit for the certification examinations in Theatre.

Requirements for theatre teaching field

- THEA 1050 - Acting: Fundamentals
- THEA 1440 - Play Analysis
- THEA 2095 - Stage Production I
- THEA 3030 - World Theatre to 1700
- THEA 3040 - World Theatre After 1700
- THEA 3095 - Stage Production II
- THEA 3100 - Directing I
- THEA 3400 - Theatre for Young Audiences
- THEA 4095 - Stage Production III
- THEA 4240 - Theatre in the Classroom

6 hours from

- THEA 1700 - Theatrical Design I
- THEA 1701 - Theatrical Design II

- THEA 2051 - Theatre Voice I
- THEA 2351 - Theatre Movement I
- THEA 3070 - History of Theatrical Costume and Décor

6 hours from

- THEA 1030 - Lighting and Sound I
- THEA 1043 - Costume I
- THEA 1046 - Stagecraft I
- THEA 2380 - Theatrical Makeup

Additional requirements

See Theatre, BA for additional course work and GPA requirements.

Students must also complete the required 21 hours in upper-level education courses (EDCI 3800, EDCI 3830, EDCI 4060, EDCI 4070, EDCI 4108, EDCI 4118 and EDCI 4840) and meet all GPA requirements to apply for state certification. In order to progress through the required education courses, the student must make an application to the certification program in the College of Education's Educator Preparation Office in Matthews Hall, Room 119.

All state certification requirements and information on required examinations is available on the web site of the State Board for Educator Certification (SBEC), www.tea.state.tx.us.

Undergraduate Academic Certificates

Theatre Technologies certificate

The certificate program seeks to provide, within 15 credit hours, an opportunity for students to explore the field of theatre technologies in the international industry. Students will gain practical knowledge that is relevant and applicable to each student's career goal.

Interested students must apply and be admitted into the theatre technologies certificate program by the design/tech faculty of the Department of Dance and Theatre. Upon admittance, students must meet with the department advisor before enrolling in courses.

Required courses, 12 hours

- THEA 1030 - Lighting and Sound I
- THEA 1046 - Stagecraft I
- THEA 3130 - Lighting II
- THEA 4920 - Theatre Practicum

Plus 3 hours selected from

- THEA 3146 - Stagecraft II
- THEA 4190 - Sound Production and Design for the Theatre
- THEA 4920 - Theatre Practicum (in addition to THEA 4920 listed above)

Graduate, Wooten Hall, Rooms 343 and 348

Jeffrey Rous, Chair

Faculty

The Department of Economics prepares students for career opportunities in the increasingly competitive domestic and global marketplace. The department is committed to a balance of high-quality teaching and research. Students benefit from the personal attention of faculty and develop a clear understanding of applications of economic theory to real-world policy issues.

There are more than 59,000 economists in the United States working in three main areas: 42 percent work in business; 37 percent in teaching, research and consulting; and 21 percent in government. Economists work in many fields, including international trade, forecasting, environmental analysis, monetary theory, economic development, insurance, banking, finance, consulting, health care, communications, marketing, law and labor relations. There is an expected increase in the number of jobs for economists of 14% between 2019-2029, which is larger than the 4% increase in the number of jobs for all occupations.

An undergraduate major in economics is excellent preparation for graduate work in economics, business, law and other fields. An applied approach helps students develop the technical and quantitative skills necessary for graduate study in many of today's expanding career fields in business and research.

Programs of study

Programs in the Department of Economics offer students a diversity of options ranging from a liberal arts perspective to a more quantitative technical background.

In addition to the BA and BSECO degrees offered in the College of Liberal Arts and Social Sciences a Bachelor of Business Administration with a professional field in economics is available through the Department of Finance, Insurance, Real Estate and Law in the Ryan College of Business, and is served by advisors in the Department of Economics.

Bachelor of Business Administration

BBA candidates must complete a minimum of 120 semester hours, 42 of which must be advanced, and meet "University Core Curriculum" and "University Core Curriculum Requirements" as stated in the Academics section of this catalog, and general course and curriculum requirements of the Ryan College of Business. The professional field in economics is planned with the economics undergraduate advisor and includes ECON 3550, ECON 3560 and ECON 4140; 9 additional advanced economics hours; and 12 hours of approved supporting courses, including FINA 4500.

Scholarships

Scholarship applications are available online and in Wooten Hall, Room 325. The deadline for applying is early March. Scholarship winners are announced in late March.

The Melton-Cochran Scholarship

The Melton-Cochran Scholarship is in memory of Rosser B. "Abe" Melton (a faculty member from 1946-1975) and Kendall P. Cochran (on the faculty from 1957-1989, and department chair from 1969-1977). Melton and Cochran were both strong mentors and inspirations to students. This scholarship is awarded annually to an outstanding undergraduate economics major of junior standing who has completed at least 60 hours of coursework and maintains a minimum 3.5 overall grade point average.

Department of Economics Scholarships for Academic Excellence

Scholarships are awarded to outstanding undergraduate economics majors.

Students who have declared economics as their major are eligible, including entering freshmen.

To be eligible, an undergraduate student must have a minimum GPA of 3.0. Entering freshman who have a minimum SAT score of 1000 or an ACT score of at least 24 are eligible to apply.

The amount and number of awards depend on the availability of funding.

Rising Eagle Scholarship

This scholarship is for current economics majors who are graduating with a BA/BS/BBA in Economics and are applying to the master's-level program in economics. Students must have a minimum GPA of 3.0 and have made application to the graduate school. The number and amount of awards depend on the availability of funding.

Lewis M. Abernathy Scholarship

This scholarship is named in honor of Professor Lewis M. Abernathy, retired UNT economics faculty member and distinguished department chairman.

To be eligible, an undergraduate student must have a minimum GPA of 3.0.

The amount and number of awards depend on the availability of funding.

Dr. Margie Tieslau Scholarship

This scholarship is made possible by the contributions of Deborah Watkins (MS'97) in honor of Dr. Margie Tieslau's contributions to the department and education of our graduate students. The scholarship is merit based and is awarded to an undergraduate economics major with an outstanding academic record. Students must have a minimum GPA of 3.0 and maintain full time enrollment status unless they are graduating.

HOUS Scholarship

This scholarship is made possible by the contributions of Richard Johnson (BS'16) in honor of Dr. Hauge and Rous and their contributions to economic education. The scholarship is merit based and is awarded to an undergraduate or graduate economics major with an outstanding academic record. Students must have a minimum GPA of 3.0 and maintain full time enrollment status unless they are graduating.

Center for Economic Education

Steven L. Cobb, Director

The Center for Economic Education is committed to making formal instruction in economics more accessible to educators.

The center maintains an in-service teacher training program of course offerings regularly scheduled during evening hours and in the summer. This program provides a mechanism for the in-service training of economics teachers in community colleges and secondary and elementary schools.

In addition to these regional instructional programs, the center develops instructional material, conducts research in economics education, maintains an instructional resource center and provides technical assistance in matters pertaining to instruction in economics.

Economics Research Group

Michael C. Carroll, Director

The Department of Economics at the University of North Texas houses the Economics Research Group (ERG), one of the country's leading economics research groups. By providing support to communities and industry, the ERG is leading the study of the *innovation economy*, defining the dynamics of this economy and analyzing it to provide understanding and actionable data. ERG conducts in-depth research, solving tough economic issues leading to new ideas and solutions facing society. Examples include water costs and impacts, efficiencies associated with the movement of goods, infrastructure development and integration assessment, and bio-based industry growth.

Committed to the creation and application of world-class economic strategies, ERG is working with global partners to assess the economy and transform data and trends into innovative, actionable solutions. Areas of expertise include: innovation economy, social network theory, embedded economy, creative economy, economic impact studies, and economic development strategies.

Majors

Economics, BA

The Department of Economics helps students develop a clear understanding of how to apply economic theory to real-world policy issues. We administer a rigorous curriculum leading to a Bachelor of Arts with a major in economics.

Degree requirements

The following requirements must be satisfied for a Bachelor of Arts with a major in economics.

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Arts degree as specified in the University Core Curriculum in the Academic policies section of this catalog and the College of Liberal Arts and Social Sciences degree requirements.

Major requirements

Majors must complete at least 33 hours in economics, including:

- ECON 1100 - Principles of Microeconomics
- ECON 1110 - Principles of Macroeconomics
- ECON 3550 - Intermediate Micro-Theory
- ECON 3560 - Intermediate Macro-Theory
- ECON 4510 - History of Economic Thought

Plus 18 additional upper-division hours

Plus 18 additional upper-division hours above the 3000 level, including at least 9 hours from the following:

- ECON 4030 - Economic Cycles and Forecasting
- ECON 4100 - Comparative Economic Systems
- ECON 4140 - Managerial Economics
- ECON 4150 - Public Economics and Policy Analysis
- ECON 4180 - The Economics of Health Care
- ECON 4290 - Labor Economics
- ECON 4420 - Open Economy Macroeconomics
- ECON 4450 - Game Theory
- ECON 4460 - Industrial Organization
- ECON 4550 - Law and Economics
- ECON 4650 - Economics of Cities
- ECON 4870 - Introduction to Econometrics
- ECON 4875 - Empirical Linear Modeling

Additional requirements

To graduate with a BA with a major in economics, a student must have a GPA of 2.5 in all economics courses (including transfer work). Students may retake UNT economics courses to improve the overall economics GPA. In computing the economics GPA, only the grade in the last repetition of a course will be included. BA students may not use ECON 3200 to count toward a major in economics.

A student must earn at least a B in ECON 1100 and ECON 1110 and at least a C in all economics courses above the 3000 level.

Other course requirements

Math requirement

- MATH 1190 - Business Calculus
or
- MATH 1710 - Calculus I

Statistics requirement

- ECON 4630 - Data Analysis in Economics (with a grade of C or better)

Minor

Optional.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information, see an academic advisor in the College of Liberal Arts and Social Sciences.

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years, and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

Year 1

Semester 1		Semester 2	
ECON 1100 - Principles of Microeconomics	3 hours	ECON 1110 - Principles of Macroeconomics	3 hours
PSCI 2305 - US Political Behavior and Policy	3 hours	PSCI 2306 - US and Texas Constitutions and Institutions	3 hours
Communication core	3 hours	Communication core	3 hours
CLASS Foreign Language-elementary	3 hours	Creative Arts core	3 hours
Economics Mathematics selection	3 hours	CLASS Foreign Language-elementary	3 hours
Total	15 hours	Total	15 hours

Year 2

Semester 1		Semester 2	
ECON 3550 - Intermediate Micro-Theory	3 hours	ECON 3560 - Intermediate Macro-Theory	3 hours
HIST 2610 - United States History to 1865	3 hours	HIST 2620 - United States History Since 1865	3 hours
Language, Philosophy & Culture core	3 hours	Component Area Option A core	3 hours
Life & Physical Science core	3 hours	Life & Physical Science core	3 hours
CLASS Foreign Language-intermediate	3 hours	CLASS Foreign Language-intermediate	3 hours
Total	15 hours	Total	15 hours

Year 3

Semester 1		Semester 2	
ECON 4630 - Data Analysis in Economics	3 hours	ECON 4510 - History of Economic Thought	3 hours
Economics Elective selection	3 hours	Economics Elective selection	3 hours
Economics Elective selection	3 hours	CLASS Distribution-Cultural Diversity and Global Issues	3 hours
CLASS Distribution-Communication and Digital Skills	3 hours	Elective	3 hours
Elective	3 hours	Elective - Advanced	3 hours
Total	15 hours	Total	15 hours

Year 4

Semester 1		Semester 2	
Economics Elective selection	3 hours	Economics Elective selection	3 hours
Economics Elective selection	3 hours	Elective	3 hours
Elective	3 hours	Elective	3 hours
Elective	3 hours	Elective	3 hours
Elective	3 hours	Elective - Advanced	3 hours
Total	15 hours	Total	15 hours

Economics, BSECO

A Bachelor of Science in economics teaches you a marketable, transferable skill set that makes you a valuable asset to any company. Our curriculum provides a unique perspective on economics because of the shared resources between the Department of Finance, Insurance, Real Estate and Law and the Department of Economics.

Degree requirements

The following requirements must be satisfied for a Bachelor of Science in economics.

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Science degree as specified in the University Core Curriculum in the Academic policies section of this catalog and the College of Liberal Arts and Social Sciences requirements.

Major requirements

Majors must complete at least 33 hours in economics, including:

- ECON 1100 - Principles of Microeconomics
- ECON 1110 - Principles of Macroeconomics
- ECON 3550 - Intermediate Micro-Theory
- ECON 3560 - Intermediate Macro-Theory
- ECON 4870 - Introduction to Econometrics

Plus 18 additional upper-division hours

18 additional upper-division hours above the 3000 level, including at least 9 hours from the following:

- ECON 4030 - Economic Cycles and Forecasting
- ECON 4100 - Comparative Economic Systems
- ECON 4140 - Managerial Economics
- ECON 4150 - Public Economics and Policy Analysis
- ECON 4180 - The Economics of Health Care
- ECON 4290 - Labor Economics
- ECON 4420 - Open Economy Macroeconomics
- ECON 4450 - Game Theory
- ECON 4460 - Industrial Organization
- ECON 4510 - History of Economic Thought
- ECON 4550 - Law and Economics
- ECON 4650 - Economics of Cities
- ECON 4875 - Empirical Linear Modeling

Additional requirements

To graduate with a BS in economics, a student must have a GPA of 2.5 in all economics courses (including transfer work). Students may retake UNT economics courses to improve the overall economics GPA. In computing the economics GPA, only the grade in the last repetition of a course will be included. BSECO students may not use ECON 3200 to count toward a major in economics.

A student must receive at least a B in ECON 1100 and ECON 1110 and at least a C in all economics courses above the 3000 level.

Other course requirements

Math requirement

- MATH 1710 - Calculus I
- MATH 1720 - Calculus II
both with a grade of C or better

Statistics requirement

- ECON 4630 - Data Analysis in Economics (with a grade of C or better)

Foreign language requirement options

Students may complete either of two options to satisfy the College of Liberal Arts and Social Sciences foreign language requirement:

Option 1

Must attain intermediate II level (2050) in a foreign language.

Option 2

6 hours of mathematics, in addition to MATH 1710 and MATH 1720, chosen from:

- MATH 2000 - Discrete Mathematics
- MATH 2700 - Linear Algebra and Vector Geometry
- MATH 2730 - Multivariable Calculus
- MATH 3000 - Real Analysis I
- MATH 3350 - Introduction to Numerical Analysis
- MATH 3410 - Differential Equations I
- MATH 3420 - Differential Equations II
- MATH 3610 - Real Analysis II
- MATH 3740 - Vector Calculus
- MATH 4060 - Foundations of Geometry
- MATH 4100 - Fourier Analysis
- MATH 4200 - Dynamical Systems
- MATH 4430 - Introduction to Graph Theory
- MATH 4450 - Introduction to the Theory of Matrices
- MATH 4500 - Introduction to Topology
- MATH 4520 - Introduction to Functions of a Complex Variable
- MATH 4610 - Probability
- MATH 4650 - Statistics

Minor

Optional.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information, see an academic advisor in the College of Liberal Arts and Social Sciences.

Four-year degree plan (example)

Year 1

Year 2

Year 3

Semester 1		Semester 2	
Economics Electives selection	3 hours	ECON 4630 - Data Analysis in Economics	3 hours
Economics Electives selection	3 hours	Economics Electives selection	3 hours
Economics 3000 or 4000 Level selection	3 hours	Elective	3 hours

Elective	3 hours	Elective	3 hours
Elective	3 hours	Elective - Advanced	3 hours
Total	15 hours	Total	15 hours

Year 4

Semester 1		Semester 2	
ECON 4870 - Introduction to Econometrics	3 hours	Economics 3000 or 4000 Level selection	3 hours
Economics 3000 or 4000 Level selection	3 hours	Elective	3 hours
Elective	3 hours	Elective	2 hours
Elective	3 hours	Elective - Advanced	3 hours
Elective - Advanced	3 hours	Elective - Advanced	3 hours
Total	15 hours	Total	14 hours

Minors

Economics minor

Required courses

- ECON 1100 - Principles of Microeconomics (with a grade of C or better)
- ECON 1110 - Principles of Macroeconomics (with a grade of C or better)

Plus 12 hours

12 additional hours of upper-division courses (3000- or 4000-level) with a grade of C or better.

Undergraduate Academic Certificates

Data Analytics in Economics certificate

The Data Analytics in Economics certificate is designed for students with a foundation in economics who seek to enhance their resumes with statistical and econometric skills, with a focus on direct hands-on experience using statistical software including Excel, R, EViews, and SAS.

Requirements

This certificate program provides essential training in data analysis and econometrics, emphasizing the application of statistical and econometric tools to analyze intriguing relationships in economics, business, and other real-world contexts. This certificate is ideal for those who have completed at least one Principles of Microeconomics or Macroeconomics course and wish to pursue employment opportunities where advanced data analytic skills are essential.

Required

- ECON 1100 - Principles of Microeconomics
or
- ECON 1110 - Principles of Macroeconomics

Choose one of the following:

- DSCI 3710 - Business Statistics with Spreadsheets
- ECON 4630 - Data Analysis in Economics
- MATH 3680 - Applied Statistics

Choose two of the following:

- ECON 4030 - Economic Cycles and Forecasting
- ECON 4870 - Introduction to Econometrics
- ECON 4875 - Empirical Linear Modeling

Location Intelligence certificate

The location intelligence certificate at UNT brings together course work from both the departments of economics and geography and the environment to give students a solid technical and analytical foundation in this growing field. The 18 hours of required course work center on economic theory, locational decision-making, and software used to organize, analyze and present geospatial data.

Required courses

- ECON 1100 - Principles of Microeconomics
- GEOG 3500 - Introduction to Geographic Information Systems
- GEOG 4560 - Introduction to Python Programming

Elective geography courses

Choose one of the following:

- GEOG 4195 - Geospatial Data Analytics and Visualization
- GEOG 4220 - Applied Retail Geography
- GEOG 4230 - Location Intelligence: Business GIS Concepts and Applications

Elective economics courses

Choose two of the following:

- ECON 1110 - Principles of Macroeconomics
- ECON 3150 - Economics of Discrimination
- ECON 3200 - Behavioral Economics for Non-Economics Majors

- ECON 3550 - Intermediate Micro-Theory
- ECON 4440 - Economics of Natural Resources and Environment
- ECON 4650 - Economics of Cities
- ECON 4855 - U.S.-Mexico Economic Relations
- ECON 4870 - Introduction to Econometrics

Nicole Smith, Chair

Faculty

The study of English language and literature provides students with an intellectual foundation that will permanently enrich their lives and prepare them for a wide variety of professional paths. Our department features courses in British, American, and anglophone literature; in the art of poetry, fiction, and creative non-fiction; and in rhetoric and composition. All of these classes foster intellectual independence and help students to develop the skills of thinking critically, reading deeply, and writing clearly.

The English major is widely recognized as a core liberal arts degree, preparing students not only for graduate study in literature or creative writing, but for a range of careers – including teaching, the law, publishing, and business – in which the skills of analytical thinking and effective communication are at a premium. Whatever path they choose, English majors (and minors) will also have gained something invaluable: a fuller sense of the possibilities of life, expanded intellectual and imaginative horizons, and greater insight into the workings of human nature.

At all levels, our class sizes are restricted in order to provide opportunities for collaboration with other students and close interaction with professors. Our faculty specializes in a variety of literary traditions, critical methodologies, and genres of creative writing, and are devoted to training students in the most effective strategies for reading and writing.

Programs of study

Programs offered by the department, including concentrations under the English major, are listed below.

Endorsement in English as a Second Language

See the certification advisor in the College of Education for details.

Majors

English with a concentration in Creative Writing, BA

The English department plays a pivotal role in developing a student's writing and critical analysis skills. While pursuing the Bachelor of Arts with a major in English, you can choose from concentrations in literature, writing and rhetoric, creative writing and language arts with secondary teacher certification.

Degree requirements

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Arts degree as specified in the "General University Requirements" in the Academic policies section of this catalog and, the University Core Curriculum and the College of Liberal Arts and Social Sciences requirements.

Major requirements, 45 hours

Foundation courses, 12 hours

Note: ENGL 3000 should be taken in the first 18 hours of English course work.

- ENGL 1310 - First-Year Writing I
- ENGL 1320 - First-Year Writing II
- ENGL 3000 - Introduction to Literary Analysis

One of the following courses

- ENGL 2321 - British Literature
- ENGL 2326 - American Literature
- ENGL 2331 - World Literature
- ENGL 2341 - Forms of Literature
- ENGL 2351 - Mexican American Literature

Creative writing concentration, 18 hours

Required courses, 12 hours

Note: Majors in English with a concentration in creative writing must take ENGL 2100 before enrolling in an beginning workshop, and a beginning course in genre is a prerequisite for advanced in same genre. Transfer students should see the English Faculty Advisor for approved ENGL 2100 substitutes.

- ENGL 2100 - Introduction to Creative Writing
- ENGL 3140 - Beginning Fiction Writing
- ENGL 3150 - Beginning Poetry Writing
- ENGL 3160 - Beginning Creative Nonfiction Writing

Advanced workshops, 6 hours

- ENGL 4100 - Advanced Fiction Writing
- ENGL 4110 - Advanced Poetry Writing

- ENGL 4120 - Advanced Creative Nonfiction Writing

Additional requirements, 15 hours

Two courses from the following historical or genre surveys, 6 hours

- ENGL 3360 - Classical Literature and Mythology
- ENGL 3370 - The Bible as Literature
- ENGL 3430 - British Literature to 1780
- ENGL 3440 - British Anglophone Literature 1780 to the Present
- ENGL 3450 - Short Story
- ENGL 3455 - Dramatic Literature
- ENGL 3465 - The Literary Essay
- ENGL 3470 - Poetry
- ENGL 3830 - American Literature to 1870
- ENGL 3840 - American Literature 1870 to the Present
- ENGL 3920 - Ethnic American Literatures
- ENGL 3924 - Women's Literature

One single or dual author course, 3 hours

- ENGL 4410 - Chaucer
- ENGL 4430 - Shakespeare
- ENGL 4440 - Milton
- ENGL 4450 - Special Studies in a Single or Dual Author(s)

Two additional courses, each from different categories, 6 hours

Note: Courses that appear in more than one category may only be used to satisfy one category; a course used to satisfy a requirement listed above may not also be used to satisfy a category listed below.

Critical theory, writing studies and game studies

- ENGL 4130 - Editing and Publishing
- ENGL 4140 - Advanced Narrative Design for Gaming
- ENGL 4145 - Worldbuilding and Mythopoesis
- ENGL 4150 - Literary Criticism
- ENGL 4195 - Advanced Grammar and Usage
- ENGL 4200 - Studies in Modern Rhetoric
- ENGL 4205 - Multimodal Writing and Rhetoric
- ENGL 4210 - Advanced Studies in Writing
- ENGL 4215 - Advocacy and Action: Rhetoric and Writing in Communities
- ENGL 4225 - Rhetorical Play: Writing and Rhetoric in Gaming
- ENGL 4230 - Special Topics in Rhetoric and Writing Studies
- ENGL 4240 - Writing Center Theory and Practice
- ENGL 4245 - Postcolonial Literature and Theory
- ENGL 4255 - Mexican American Non-Fiction and Criticism

- ENGL 4285 - Africana Theory and Criticism
 - ENGL 4680 - Game Narratives as Literature
- Additional courses may apply. See faculty advisor for approvals.

Race, ethnicity and indigeneity

- ENGL 4220 - Contemporary North American Indigenous Literature
 - ENGL 4245 - Postcolonial Literature and Theory
 - ENGL 4250 - Latinx Literature
 - ENGL 4255 - Mexican American Non-Fiction and Criticism
 - ENGL 4260 - African American Literature
 - ENGL 4270 - Modern Jewish Literature
 - ENGL 4280 - Africana Literature, Media and Culture
 - ENGL 4285 - Africana Theory and Criticism
 - ENGL 4660 - Literature and the Holocaust
 - ENGL 4841 - Studies in Modern Irish Literature
- Additional courses may apply. See faculty advisor for approvals.

Gender, sexuality and the body

- ENGL 3924 - Women's Literature
 - ENGL 4405 - Medieval Women Writers
 - ENGL 4630 - Studies in Literature and Medicine
 - ENGL 4670 - Gender and Sexuality in Literature
- Additional courses may apply. See faculty advisor for approvals.

Early historical period: literature and culture from beginnings to 1800

- ENGL 4405 - Medieval Women Writers
 - ENGL 4410 - Chaucer
 - ENGL 4430 - Shakespeare
 - ENGL 4431 - Studies in Medieval Literature
 - ENGL 4432 - Studies in Renaissance Literature
 - ENGL 4433 - Studies in Restoration and 18th Century British Literature
 - ENGL 4440 - Milton
 - ENGL 4830 - Studies in the Literature of the Colonial Americas
 - ENGL 4831 - Studies in the Literature of the Eighteenth-Century Americas
- Additional courses may apply. See faculty advisor for approvals.

Middle historical period: literature and culture from 1800-1950

- ENGL 4434 - Studies in Romantic Literature
- ENGL 4435 - Studies in Victorian Literature
- ENGL 4490 - American Realism
- ENGL 4832 - Studies in 19th-Century American Literature
- ENGL 4841 - Studies in Modern Irish Literature
- ENGL 4842 - Studies in British Modernism

- ENGL 4844 - Studies in American Modernism
Additional courses may apply. See faculty advisor for approvals.

Late historical period: literature and culture from 1950 to the present

- ENGL 4220 - Contemporary North American Indigenous Literature
- ENGL 4610 - Children's and Young Adult Literature
- ENGL 4660 - Literature and the Holocaust
- ENGL 4665 - Studies in Science Fiction
- ENGL 4680 - Game Narratives as Literature
- ENGL 4845 - Studies in Contemporary American Literature
Additional courses may apply. See faculty advisor for approvals.

Other course requirements

None.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information, see an academic advisor in the College of Liberal Arts and Social Sciences.

Other requirements

A minimum grade of C in each is required for all English courses counting toward the Bachelor of Arts degree in English and a concentration in creative writing.

A minimum cumulative GPA of 2.5 for all English courses is required for graduation.

English with a concentration in Language Arts, BA

The English department plays a pivotal role in developing a student's writing and critical analysis skills. While pursuing the Bachelor of Arts with a major in English, you can choose from concentrations in literature, writing and rhetoric, creative writing, and language arts with secondary teacher certification.

Degree requirements

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Arts degree as specified in the "General University Requirements" in the Academic policies section of this catalog and, the University Core Curriculum and the College of Liberal Arts and Social Sciences requirements.

Major requirements, 45 hours

Foundation courses, 15 hours

Note: ENGL 3000 should be taken in the first 18 hours of English course work.

- ENGL 1310 - First-Year Writing I
- ENGL 1320 - First-Year Writing II
- ENGL 3000 - Introduction to Literary Analysis

Two of the following courses, 6 hours

- ENGL 2100 - Introduction to Creative Writing
- ENGL 2321 - British Literature
- ENGL 2326 - American Literature
- ENGL 2331 - World Literature
- ENGL 2341 - Forms of Literature
- ENGL 2351 - Mexican American Literature

Language arts concentration, 21 hours

Also satisfies teacher certification.

Required courses, 12 hours

- ENGL 3110 - Writing and Rhetoric in the Humanities
- ENGL 4195 - Advanced Grammar and Usage
- ENGL 4430 - Shakespeare
- ENGL 4700 - Instruction and Assessment in English Language Arts

Three courses from the following historical or genre surveys, 9 hours

- ENGL 3360 - Classical Literature and Mythology
- ENGL 3370 - The Bible as Literature
- ENGL 3430 - British Literature to 1780
- ENGL 3440 - British Anglophone Literature 1780 to the Present
- ENGL 3450 - Short Story
- ENGL 3455 - Dramatic Literature
- ENGL 3465 - The Literary Essay
- ENGL 3470 - Poetry
- ENGL 3830 - American Literature to 1870
- ENGL 3840 - American Literature 1870 to the Present
- ENGL 3920 - Ethnic American Literatures
- ENGL 3924 - Women's Literature

Additional requirements, 9 hours

Three additional courses, each from different categories.

Note: Courses that appear in more than one category may only be used to satisfy one category; a course used to satisfy a requirement listed above may not also be used to satisfy a category listed below.

Critical theory, writing studies and game studies

- ENGL 4130 - Editing and Publishing
 - ENGL 4140 - Advanced Narrative Design for Gaming
 - ENGL 4145 - Worldbuilding and Mythopoesis
 - ENGL 4150 - Literary Criticism
 - ENGL 4200 - Studies in Modern Rhetoric
 - ENGL 4205 - Multimodal Writing and Rhetoric
 - ENGL 4210 - Advanced Studies in Writing
 - ENGL 4215 - Advocacy and Action: Rhetoric and Writing in Communities
 - ENGL 4225 - Rhetorical Play: Writing and Rhetoric in Gaming
 - ENGL 4230 - Special Topics in Rhetoric and Writing Studies
 - ENGL 4240 - Writing Center Theory and Practice
 - ENGL 4245 - Postcolonial Literature and Theory
 - ENGL 4255 - Mexican American Non-Fiction and Criticism
 - ENGL 4285 - Africana Theory and Criticism
 - ENGL 4680 - Game Narratives as Literature
- Additional courses may apply. See faculty advisor for approvals.

Race, ethnicity and indigeneity

- ENGL 4220 - Contemporary North American Indigenous Literature
 - ENGL 4245 - Postcolonial Literature and Theory
 - ENGL 4250 - Latinx Literature
 - ENGL 4255 - Mexican American Non-Fiction and Criticism
 - ENGL 4260 - African American Literature
 - ENGL 4270 - Modern Jewish Literature
 - ENGL 4280 - Africana Literature, Media and Culture
 - ENGL 4285 - Africana Theory and Criticism
 - ENGL 4660 - Literature and the Holocaust
 - ENGL 4841 - Studies in Modern Irish Literature
- Additional courses may apply. See faculty advisor for approvals.

Gender, sexuality and the body

- ENGL 3924 - Women's Literature
 - ENGL 4405 - Medieval Women Writers
 - ENGL 4630 - Studies in Literature and Medicine
 - ENGL 4670 - Gender and Sexuality in Literature
- Additional courses may apply. See faculty advisor for approvals.

Early historical period: literature and culture from beginnings to 1800

- ENGL 4405 - Medieval Women Writers

- ENGL 4410 - Chaucer
 - ENGL 4431 - Studies in Medieval Literature
 - ENGL 4432 - Studies in Renaissance Literature
 - ENGL 4433 - Studies in Restoration and 18th Century British Literature
 - ENGL 4440 - Milton
 - ENGL 4830 - Studies in the Literature of the Colonial Americas
 - ENGL 4831 - Studies in the Literature of the Eighteenth-Century Americas
- Additional courses may apply. See faculty advisor for approvals.

Middle historical period: literature and culture from 1800-1950

- ENGL 4434 - Studies in Romantic Literature
 - ENGL 4435 - Studies in Victorian Literature
 - ENGL 4490 - American Realism
 - ENGL 4832 - Studies in 19th-Century American Literature
 - ENGL 4841 - Studies in Modern Irish Literature
 - ENGL 4842 - Studies in British Modernism
 - ENGL 4844 - Studies in American Modernism
- Additional courses may apply. See faculty advisor for approvals.

Late historical period: literature and culture from 1950 to the present

- ENGL 4220 - Contemporary North American Indigenous Literature
 - ENGL 4610 - Children's and Young Adult Literature
 - ENGL 4660 - Literature and the Holocaust
 - ENGL 4665 - Studies in Science Fiction
 - ENGL 4680 - Game Narratives as Literature
 - ENGL 4845 - Studies in Contemporary American Literature
- Additional courses may apply. See faculty advisor for approvals.

Additional courses required for teacher certification, 15 hours

- COMM 1010 - Introduction to Communication
- EDBE 2050 - Teaching Multilingual Students
- EDRE 4870 - Cross-Curricular (Content Area) Literacy Materials and Resources
- JOUR 1210 - Mass Communication and Society
- LING 3060 - Principles of Language Study

Other course requirements

None.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information see an academic advisor in the College of Liberal Arts and Social Sciences.

Other requirements

A minimum grade of C in each is required for all English/linguistics courses counting toward the Bachelor of Arts degree with a major in English and a concentration in language arts.

A minimum cumulative GPA of 2.5 for all English/linguistics courses is required for graduation.

Students must also complete teacher certification requirements.

English with a concentration in Literature, BA

The English department plays a pivotal role in developing a student's writing and critical analysis skills. While pursuing the Bachelor of Arts with a major in English, you can choose from concentrations in literature, writing and rhetoric, creative writing and language arts with secondary teacher certification.

Degree requirements

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Arts degree as specified in the "General University Requirements" in the Academic policies section of this catalog and, the University Core Curriculum and the College of Liberal Arts and Social Sciences requirements.

Major requirements, 45 hours

Foundation courses, 15 hours

Note: ENGL 3000 should be taken in the first 18 hours of English course work.

- ENGL 1310 - First-Year Writing I
- ENGL 1320 - First-Year Writing II
- ENGL 3000 - Introduction to Literary Analysis

Two of the following courses, 6 hours

- ENGL 2100 - Introduction to Creative Writing
- ENGL 2321 - British Literature
- ENGL 2326 - American Literature
- ENGL 2331 - World Literature
- ENGL 2341 - Forms of Literature
- ENGL 2351 - Mexican American Literature

Literature concentration, 27 hours

Two courses from the following historical or genre surveys, 6 hours

- ENGL 3360 - Classical Literature and Mythology
- ENGL 3370 - The Bible as Literature
- ENGL 3430 - British Literature to 1780
- ENGL 3440 - British Anglophone Literature 1780 to the Present
- ENGL 3450 - Short Story
- ENGL 3455 - Dramatic Literature
- ENGL 3465 - The Literary Essay
- ENGL 3470 - Poetry
- ENGL 3830 - American Literature to 1870
- ENGL 3840 - American Literature 1870 to the Present
- ENGL 3920 - Ethnic American Literatures
- ENGL 3924 - Women's Literature

One single or dual author course, 3 hours

- ENGL 4410 - Chaucer
- ENGL 4430 - Shakespeare
- ENGL 4440 - Milton
- ENGL 4450 - Special Studies in a Single or Dual Author(s)

One course each from the following six categories, 18 hours

Note: Courses that appear in more than one category may only be used to satisfy one category; a course used to satisfy a requirement listed above may not also be used to satisfy a category listed below.

Critical theory, writing studies and game studies

- ENGL 4130 - Editing and Publishing
 - ENGL 4140 - Advanced Narrative Design for Gaming
 - ENGL 4145 - Worldbuilding and Mythopoesis
 - ENGL 4150 - Literary Criticism
 - ENGL 4195 - Advanced Grammar and Usage
 - ENGL 4200 - Studies in Modern Rhetoric
 - ENGL 4205 - Multimodal Writing and Rhetoric
 - ENGL 4210 - Advanced Studies in Writing
 - ENGL 4215 - Advocacy and Action: Rhetoric and Writing in Communities
 - ENGL 4225 - Rhetorical Play: Writing and Rhetoric in Gaming
 - ENGL 4230 - Special Topics in Rhetoric and Writing Studies
 - ENGL 4240 - Writing Center Theory and Practice
 - ENGL 4245 - Postcolonial Literature and Theory
 - ENGL 4255 - Mexican American Non-Fiction and Criticism
 - ENGL 4285 - Africana Theory and Criticism
 - ENGL 4680 - Game Narratives as Literature
- Additional courses may apply. See faculty advisor for approvals.

Race, ethnicity and indigeneity

- ENGL 4220 - Contemporary North American Indigenous Literature
 - ENGL 4245 - Postcolonial Literature and Theory
 - ENGL 4250 - Latinx Literature
 - ENGL 4255 - Mexican American Non-Fiction and Criticism
 - ENGL 4260 - African American Literature
 - ENGL 4270 - Modern Jewish Literature
 - ENGL 4280 - Africana Literature, Media and Culture
 - ENGL 4285 - Africana Theory and Criticism
 - ENGL 4660 - Literature and the Holocaust
 - ENGL 4841 - Studies in Modern Irish Literature
- Additional courses may apply. See faculty advisor for approvals.

Gender, sexuality and the body

- ENGL 3924 - Women's Literature
 - ENGL 4405 - Medieval Women Writers
 - ENGL 4630 - Studies in Literature and Medicine
 - ENGL 4670 - Gender and Sexuality in Literature
- Additional courses may apply. See faculty advisor for approvals.

Early historical period: literature and culture from beginnings to 1800

- ENGL 4405 - Medieval Women Writers
 - ENGL 4410 - Chaucer
 - ENGL 4430 - Shakespeare
 - ENGL 4431 - Studies in Medieval Literature
 - ENGL 4432 - Studies in Renaissance Literature
 - ENGL 4433 - Studies in Restoration and 18th Century British Literature
 - ENGL 4440 - Milton
 - ENGL 4830 - Studies in the Literature of the Colonial Americas
 - ENGL 4831 - Studies in the Literature of the Eighteenth-Century Americas
- Additional courses may apply. See faculty advisor for approvals.

Middle historical period: literature and culture from 1800-1950

- ENGL 4434 - Studies in Romantic Literature
 - ENGL 4435 - Studies in Victorian Literature
 - ENGL 4490 - American Realism
 - ENGL 4832 - Studies in 19th-Century American Literature
 - ENGL 4841 - Studies in Modern Irish Literature
 - ENGL 4842 - Studies in British Modernism
 - ENGL 4844 - Studies in American Modernism
- Additional courses may apply. See faculty advisor for approvals.

Late historical period: literature and culture from 1950 to the present

- ENGL 4220 - Contemporary North American Indigenous Literature

- ENGL 4610 - Children's and Young Adult Literature
 - ENGL 4660 - Literature and the Holocaust
 - ENGL 4665 - Studies in Science Fiction
 - ENGL 4680 - Game Narratives as Literature
 - ENGL 4845 - Studies in Contemporary American Literature
- Additional courses may apply. See faculty advisor for approvals.

Additional requirements, 3 hours

One additional 4000-level course from any of the above listed categories.

Other course requirements

None.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information, see an academic advisor in the College of Liberal Arts and Social Sciences.

Other requirements

A minimum grade of C is required in all English courses counting toward the Bachelor of Arts degree with a major in English and a concentration in literature.

A minimum cumulative GPA of 2.5 for all English courses is required for graduation.

English with a concentration in Writing and Rhetoric, BA

The English department plays a pivotal role in developing a student's writing and critical analysis skills. While pursuing the Bachelor of Arts with a major in English, you can choose from concentrations in literature, writing and rhetoric, creative writing and language arts with secondary teacher certification.

Degree requirements

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Arts degree as specified in the "General University Requirements" in the Academic policies section of this catalog and, the University Core Curriculum and the College of Liberal Arts and Social Sciences requirements.

Major requirements, 45 hours

Foundation courses, 15 hours

Note: ENGL 3000 should be taken in the first 18 hours of English course work.

- ENGL 1310 - First-Year Writing I
- ENGL 1320 - First-Year Writing II
- ENGL 3000 - Introduction to Literary Analysis

2000-level courses, 6 hours

Take two of the following courses:

- ENGL 2100 - Introduction to Creative Writing
- ENGL 2321 - British Literature
- ENGL 2326 - American Literature
- ENGL 2331 - World Literature
- ENGL 2341 - Forms of Literature
- ENGL 2351 - Mexican American Literature

Writing and Rhetoric concentration, 18 hours

Required courses, 9 hours

- ENGL 3110 - Writing and Rhetoric in the Humanities
- ENGL 3200 - Rhetorical History and Historiography

One course from the following

- ENGL 3210 - Studies in Writing
- ENGL 3225 - Games, Play, and Stories
- ENGL 3500 - Beginning Game Writing Workshop: Storytelling Through Narrative Design

Three courses from the following, 9 hours

- ENGL 4200 - Studies in Modern Rhetoric
- ENGL 4205 - Multimodal Writing and Rhetoric
- ENGL 4210 - Advanced Studies in Writing
- ENGL 4215 - Advocacy and Action: Rhetoric and Writing in Communities
- ENGL 4225 - Rhetorical Play: Writing and Rhetoric in Gaming
- ENGL 4230 - Special Topics in Rhetoric and Writing Studies
- ENGL 4240 - Writing Center Theory and Practice

Additional requirements, 12 hours

Four additional courses, each from different categories.

Note: Courses that appear in more than one category may only be used to satisfy one category; a course used to satisfy a requirement listed above may not also be used to satisfy a category listed below.

Critical theory, writing studies and game studies

- ENGL 4130 - Editing and Publishing
 - ENGL 4140 - Advanced Narrative Design for Gaming
 - ENGL 4145 - Worldbuilding and Mythopoesis
 - ENGL 4150 - Literary Criticism
 - ENGL 4195 - Advanced Grammar and Usage
 - ENGL 4200 - Studies in Modern Rhetoric
 - ENGL 4205 - Multimodal Writing and Rhetoric
 - ENGL 4210 - Advanced Studies in Writing
 - ENGL 4215 - Advocacy and Action: Rhetoric and Writing in Communities
 - ENGL 4230 - Special Topics in Rhetoric and Writing Studies
 - ENGL 4240 - Writing Center Theory and Practice
 - ENGL 4245 - Postcolonial Literature and Theory
 - ENGL 4255 - Mexican American Non-Fiction and Criticism
 - ENGL 4285 - Africana Theory and Criticism
 - ENGL 4680 - Game Narratives as Literature
- Additional courses may apply. See faculty advisor for approvals.

Race, ethnicity and indigeneity

- ENGL 4220 - Contemporary North American Indigenous Literature
 - ENGL 4245 - Postcolonial Literature and Theory
 - ENGL 4250 - Latinx Literature
 - ENGL 4255 - Mexican American Non-Fiction and Criticism
 - ENGL 4260 - African American Literature
 - ENGL 4270 - Modern Jewish Literature
 - ENGL 4280 - Africana Literature, Media and Culture
 - ENGL 4285 - Africana Theory and Criticism
 - ENGL 4660 - Literature and the Holocaust
 - ENGL 4841 - Studies in Modern Irish Literature
- Additional courses may apply. See faculty advisor for approvals.

Gender, sexuality and the body

- ENGL 3924 - Women's Literature
 - ENGL 4405 - Medieval Women Writers
 - ENGL 4630 - Studies in Literature and Medicine
 - ENGL 4670 - Gender and Sexuality in Literature
- Additional courses may apply. See faculty advisor for approvals.

Early historical period: literature and culture from beginnings to 1800

- ENGL 4405 - Medieval Women Writers
- ENGL 4410 - Chaucer
- ENGL 4430 - Shakespeare
- ENGL 4431 - Studies in Medieval Literature
- ENGL 4432 - Studies in Renaissance Literature
- ENGL 4433 - Studies in Restoration and 18th Century British Literature

- ENGL 4440 - Milton
 - ENGL 4830 - Studies in the Literature of the Colonial Americas
 - ENGL 4831 - Studies in the Literature of the Eighteenth-Century Americas
- Additional courses may apply. See faculty advisor for approvals.

Middle historical period: literature and culture from 1800-1950

- ENGL 4434 - Studies in Romantic Literature
 - ENGL 4435 - Studies in Victorian Literature
 - ENGL 4490 - American Realism
 - ENGL 4832 - Studies in 19th-Century American Literature
 - ENGL 4841 - Studies in Modern Irish Literature
 - ENGL 4842 - Studies in British Modernism
 - ENGL 4844 - Studies in American Modernism
- Additional courses may apply. See faculty advisor for approvals.

Late historical period: literature and culture from 1950 to the present

- ENGL 4220 - Contemporary North American Indigenous Literature
 - ENGL 4610 - Children's and Young Adult Literature
 - ENGL 4660 - Literature and the Holocaust
 - ENGL 4665 - Studies in Science Fiction
 - ENGL 4680 - Game Narratives as Literature
 - ENGL 4845 - Studies in Contemporary American Literature
- Additional courses may apply. See faculty advisor for approvals.

Other course requirements

None.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information, see an academic advisor in the College of Liberal Arts and Social Sciences.

Other requirements

A minimum grade of C in each is required for all English courses counting toward the Bachelor of Arts degree with a major in English and a concentration in writing and rhetoric.

A minimum cumulative GPA of 2.5 for all English courses is required for graduation.

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years, and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

Year 1

Semester 1		Semester 2	
ENGL 1310 - First-Year Writing I	3 hours	ENGL 1320 - First-Year Writing II	3 hours
PSCI 2305 - US Political Behavior and Policy	3 hours	PSCI 2306 - US and Texas Constitutions and Institutions	3 hours

Grad Track Options

English with a concentration in Literature, BA with grad track option leading to English, MA

The Department of English offers a grad track pathway in which students complete a Bachelor's Degree with a concentration in literature in four years, and then go on to earn a master's degree in literature in the fifth year. This accelerated program, which is cost-effective and time-saving, is designed for exceptional, highly motivated majors who have maintained at least a 3.5 GPA. Students must apply to this program in their junior year. Admitted students will take twelve graduate hours during their senior year, which can count both toward their bachelor's and master's degrees, as permitted by university rules.

Admission requirements

To be eligible for acceptance, students must have completed 75 undergraduate hours, including the following courses:

- ENGL 3000 - Introduction to Literary Analysis
- ENGL 3430 - British Literature to 1780 OR ENGL 3830 - American Literature to 1870
- ENGL 3440 - British Anglophone Literature 1780 to the Present OR ENGL 3840 - American Literature 1870 to the Present

In addition to completing the required courses, students will need to submit:

- One or more writing samples;
- A statement of purpose;
- A curriculum vita or resume;
- Two letters of recommendation testifying to student's ability to do graduate-level work; and
- An application to the Toulouse Graduate School.

GRE scores are not required. Students in the UNT Honors Program and students who satisfy the requirements are guaranteed admission to the program and need not provide letters of recommendation.

Program policies

Undergraduate students who have been accepted to a grad track pathway option must complete their bachelor's degree requirements and graduate within 12 months of the first day of the semester for which they were admitted to the accelerated program in order to continue into the graduate program.

Admitted students will take twelve graduate hours during their senior year, which will also count toward their BA as permitted by university rules.

Requirements

In lieu of 4 advanced undergraduate electives in the fourth year, students for the MA in literature will take 3 5000-level graduate literature classes and ENGL 5760 in their senior year. The literature classes should be chosen from the following list with an eye to fulfilling period distribution requirements for the BA and the MA.

- ENGL 5000 - Old English
- ENGL 5010 - Beowulf
- ENGL 5020 - Chaucer: Major Works
- ENGL 5030 - Studies in Medieval Literature and Culture
- ENGL 5100 - Studies in British Literature and Culture of the Romantic Period
- ENGL 5200 - Studies in British Literature and Culture of the Victorian Period
- ENGL 5250 - Studies in British Literature and Culture of the Eighteenth Century
- ENGL 5260 - Studies in Nineteenth-Century British Literature and Culture
- ENGL 5310 - Studies in Rhetorical Theory
- ENGL 5320 - Studies in Composition Theory
- ENGL 5400 - Studies in Shakespeare
- ENGL 5410 - Studies in the British Renaissance
- ENGL 5490 - Studies in the Twentieth-Century British Novel
- ENGL 5500 - Studies in American Literature and Culture from the Beginning to 1800
- ENGL 5510 - Studies in American Literature and Culture, 1800 to 1865
- ENGL 5515 - Studies in the American Renaissance
- ENGL 5520 - Studies in American Literature and Culture, 1865 to 1914
- ENGL 5525 - Studies in American Realism
- ENGL 5530 - Studies in American Literature and Culture, 1914 to the Present
- ENGL 5540 - Studies in Twentieth-Century British or Irish Literature and Culture
- ENGL 5550 - Studies in the Teaching of Composition
- ENGL 5560 - Studies in the Teaching of Literature
- ENGL 5600 - Studies in European Literature and Culture
- ENGL 5605 - Studies in the Literature and Culture of the Colonial Americas
- ENGL 5610 - Studies in Early African-American Literature and Culture

- ENGL 5620 - Studies in Contemporary African-American Literature and Culture
- ENGL 5635 - Mexican-American Literature and Theory Before 1954
- ENGL 5640 - Mexican-American Literature and Theory After 1954
- ENGL 5650 - United States Ethnic Literature and Culture
- ENGL 5680 - Studies in Global Literature and Culture
- ENGL 5720 - Literature and Science
- ENGL 5730 - Literature and the Environment
- ENGL 5750 - Methods of Historical Research
- ENGL 5760 - Scholarly and Critical Writing
- ENGL 5800 - Studies in Literary Genres
- ENGL 5810 - Survey of Critical Theory
- ENGL 5890 - Studies in the American Novel, 1914 to the Present
- ENGL 5900 - Special Problems
- ENGL 5910 - Special Problems

All remaining courses for the English with a concentration in Literature, BA must be completed.

Minors

American Studies minor

Requirements

The minor in American studies requires a total of 18 hours, including either ENGL 3830 - American Literature to 1870 or ENGL 3840 - American Literature 1870 to the Present; at least one upper-division course in American history (the core curriculum classes in American history do not count); and at least one other upper-division course in English. No more than 2 courses in a single department may be applied toward the minor.

The following courses may be applied toward the American studies minor. Designated sections of other courses may also count, subject to approval by the minor advisor.

Anthropology

- ANTH 3101 - Issues in Contemporary American Culture and Society
- ANTH 3110 - Indigenous Peoples of North America
- ANTH 3120 - Indigenous Cultures of the Southwest
- ANTH 3130 - African-American Anthropology
- ANTH 3140 - Latinos in the U.S.

Art education and art history

- ARTH 4816 - American Art
- ARTH 4817 - Topics in American Art

Criminal justice

- CJUS 2100 - Crime and Justice in the United States

Dance and theatre

- DANC 3800 - History of Concert Dance in the U.S.: 1900–Present
- THEA 4370 - Contemporary Latinx Theatre

English

- ENGL 3830 - American Literature to 1870
- ENGL 4830 - Studies in the Literature of the Colonial Americas
- ENGL 3832 - Nineteenth-Century American Poetry
- ENGL 3833 - The American Renaissance
- ENGL 3840 - American Literature 1870 to the Present
- ENGL 3843 - Twentieth- and Twenty-first-Century American Poetry
- ENGL 4490 - American Realism
- ENGL 4825 - The Literature of Texas and the Southwest
- ENGL 4810 - Topics in American Literature
- ENGL 3920 - Ethnic American Literatures
- ENGL 4220 - Contemporary North American Indigenous Literature
- ENGL 4250 - Latinx Literature
- ENGL 4255 - Mexican American Non-Fiction and Criticism
- ENGL 4260 - African American Literature
- ENGL 4270 - Modern Jewish Literature
- ENGL 4400 - American Fiction
- ENGL 4480 - American Drama
- ENGL 4831 - Studies in the Literature of the Eighteenth-Century Americas
- ENGL 4832 - Studies in 19th-Century American Literature
- ENGL 4844 - Studies in American Modernism
- ENGL 4845 - Studies in Contemporary American Literature

Designated sections of:

- ENGL 4200 - Studies in Modern Rhetoric
- ENGL 4450 - Special Studies in a Single or Dual Author(s)
- ENGL 4650 - Literature and the Environment
- ENGL 4850 - Literature in Context

American history

- HIST 3150 - Historical and Cultural Development of the Mexican-American Community
- HIST 4150 - Mexican Immigration and the Chicano Community
- HIST 4155 - Mexican American Autobiography
- HIST 4160 - Chicano Political History: 19th and 20th Century
- HIST 3200 - The Spanish Frontier in North America
- HIST 3210 - Indigenous Peoples of the Southern Plains
- HIST 4261 - Topics in United States History
- HIST 4435 - American Jewish Experience

- HIST 3240 - African American History and Culture to 1865
- HIST 3250 - African American History and Culture Since 1865
- HIST 4451 - African American History During Segregation Era
- HIST 4455 - History of Black Women in America
- HIST 3061 - Women in the United States to 1900
- HIST 3062 - Women in the United States Since 1900
- HIST 4475 - Jewish Women in Modern America
- HIST 3480 - Colonial America
- HIST 4490 - The American Revolution – Causes and Consequences
- HIST 3495 - United States Food History
- HIST 4830 - Rise and Fall of the Slave South
- HIST 4840 - Making of the Modern South
- HIST 3850 - The Early National Period of the United States, 1789–1848
- HIST 4860 - The Civil War and Reconstruction
- HIST 4870 - Making of the Modern United States, 1877–1929
- HIST 4890 - Civil Rights and Black Power Movements in the U.S.

Geography

- GEOG 3100 - United States and Canada: Economies, Cities and Sustainability

Journalism

- JOUR 4820 - History of American Media

Media arts

- MRTS 3465 - American Film History
- MRTS 3450 - U.S. Radio History
- MRTS 3455 - U.S. Television History
- MRTS 4520 - African American Film

Music history, theory and ethnomusicology

- MUET 3060 - African-American Music
- MUMH 2060 - History of Rock
- MUMH 4000 - Seminar in Music History

Jazz studies

- MUJS 3070 - History of Jazz

Philosophy and religion

- PHIL 3140 - Religion and American Society
- PHIL 3360 - American Philosophy

Political science

- PSCI 4320 - American Political Theory
- PSCI 4830 - American Foreign Policy
- PSCI 4840 - Major Problems of American Foreign Policy

Women's and gender studies

- WGST 4460 - History of Black Women in America

English minor

The minor requires a total of 21 hours, including 9 advanced.

Special problems courses

These courses may count toward the minor only with the written consent of the department chair:

- ENGL 4900 - Special Problems
- ENGL 4910 - Special Problems

Secondary Teacher Certification

English Language Arts and Reading teacher certification

The College of Liberal Arts and Social Sciences encourages students to explore teaching at the secondary level as a career option. The student's academic advisor in the Dean's Office for Undergraduates and Student Advising in GAB, Room 220, can assist students with specific requirements for teacher certification in English language arts and reading. Upon completion of this program, students will be prepared to sit for the certification examinations in English language arts and reading.

Requirements

Completion of the requirements for the Language Arts concentration under the major in English.

Education courses

Students must complete the required 21 hours in upper-level education courses.

- EDCI 3800 - Professional Issues in Teaching

- EDCI 3830 - Teaching/Learning Process and Evaluation
- EDCI 4060 - Content Area Reading
- EDCI 4070 - Teaching in a Multicultural Classroom
- EDCI 4108 - Student Teaching in the Secondary School
- EDCI 4118 - Student Teaching in the Secondary School
- EDCI 4840 - Instructional Strategies and Classroom Management

Additional requirements

See English with a concentration in Language Arts, BA for additional course work and GPA requirements.

Students must meet all GPA requirements to apply for state certification. In order to progress through the required required education courses, the student must make application to the certification program in the College of Education's Educator Preparation Office in Matthews Hall, Room 119.

All state certification requirements and information on required examinations is available on the web site of the State Board for Educator Certification (SBEC), www.tea.state.tx.us.

Undergraduate Academic Certificates

American Studies certificate

To earn a certificate in American studies, students must complete 12 credit hours of applicable courses at UNT (Denton campus) with a grade of C or above. There is great flexibility in how students may choose to configure their particular concentration within American studies. Of the 12 hours, at least 9 hours must be at the 3000 and 4000 levels, at least two courses must be outside the student's major discipline, at least one course must be in English, and at least one course must be in history (though the Core Curriculum classes in American history do not count).

The following courses may be applied toward the American studies certificate. Designated sections of other courses may also count, subject to approval by the certificate advisor.

Anthropology

- ANTH 3101 - Issues in Contemporary American Culture and Society
- ANTH 3110 - Indigenous Peoples of North America
- ANTH 3120 - Indigenous Cultures of the Southwest
- ANTH 3130 - African-American Anthropology
- ANTH 3140 - Latinos in the U.S.

Medieval and Renaissance Studies certificate

The medieval and Renaissance studies certificate is an undergraduate academic certificate that enables students to acquire proficiency in European medieval and Renaissance cultures and societies, as well as comparable cultural developments in non-western countries. The required course work in medieval and Renaissance studies promotes both inter- and trans-disciplinary work, which in turn provides the tools necessary for nuanced examination of not only a distant society but also, in its reflection, of our own.

The medieval and Renaissance studies certificate is open to all majors. It is administered by the Department of English in the College of Liberal Arts and Social Sciences. Students are strongly encouraged to achieve proficiency in a foreign language important to medieval and/or Renaissance Europe through course work or examination.

Requirements

To earn a certificate in medieval and Renaissance studies, students must complete 12 hours of courses at UNT with a grade of C or above. Of the 12 hours, 9 hours must be at 3000 and 4000 levels, two courses must be outside the student's major discipline, one course must be in medieval studies and one course must be in Renaissance studies.

Courses should be chosen from the areas listed below. Other courses may apply, subject to approval by the certificate advisor.

Art and music

- ARTH 4804 - Medieval Art
- ARTH 4805 - Topics in Medieval Art
- ARTH 4806 - Topics in Renaissance Art
- MUMH 3500 - Music History and Literature to 1750

English

- ENGL 3370 - The Bible as Literature
- ENGL 3430 - British Literature to 1780
- ENGL 4405 - Medieval Women Writers
- ENGL 4410 - Chaucer

- ENGL 4430 - Shakespeare
- ENGL 4431 - Studies in Medieval Literature
- ENGL 4432 - Studies in Renaissance Literature
- ENGL 4440 - Milton

History

- HIST 3450 - Islam and its Empires
- HIST 3762 - Rome: The Biography of a City
- HIST 3770 - Ancient and Medieval Women, Gender and Sexuality
- HIST 4080 - History of Early England from the Anglo-Saxons Through the Tudors
- HIST 4218 - Early Medieval Europe, ca. 312–1095
- HIST 4219 - Late Medieval Europe, 1095 to 1400
- HIST 4220 - The Renaissance
- HIST 4290 - Intellectual, Cultural and Social History of Medieval and Early Modern Europe
- HIST 4310 - Gender and Sexuality in Early Modern Europe
- HIST 4315 - History of Anti-Semitism from Ancient Times to the Present
- HIST 4380 - The European Witch Hunts

Philosophy and religion studies

- PHIL 2070 - World Religions
- PHIL 2100 - Introduction to Judaism
- PHIL 3120 - Social and Political Philosophy
- PHIL 3310 - Ancient Greek Philosophy
- PHIL 3320 - Medieval Philosophy
- PHIL 3525 - Rabbinic Judaism
- PHIL 3540 - Judaism and Philosophy

World languages

- WLLC 3700 - Classical Mythology

Additional information

Students successfully completing the above requirements will file for the medieval and Renaissance certificate in the English department, and the certificate will be posted to their UNT transcript. The Medieval and Renaissance Colloquium will also honor students graduating with the medieval and Renaissance certificate with an annual reception in the spring semester.

Pinliang Dong, Chair

Faculty

Geography is both an academic and an applied field, and our graduates enjoy highly successful careers in diverse parts of the job market. Majors are prepared for a broad range of employment, including geographic information systems, regional and urban planning, retail and industrial site location analysis, transportation planning, parks and recreation planning, housing and community development, land and water resources management, environmental consulting and regulatory work, and land surveying. Completion of the department's programs also prepares students for graduate course work in geography and environmental science.

The Department of Geography and the Environment offers courses for students majoring in geography or other fields. Students in the colleges of liberal arts and social sciences, business, education, engineering, information, journalism, public affairs and community service, and merchandising, hospitality and tourism will find that geography provides excellent support for their majors. Students majoring in any field may minor in geography or geology (all offered through this department); complete courses to fill core requirements; obtain the department's certificate in geographic information systems, sustainability, GeoPhoto, geospatial analytics, water resources, or health and medical geography or take courses for general interest. Students may elect an optional concentration in environmental studies or earth systems in the Bachelor of Science degree in geography. Students may also elect the Bachelor of Science in Geographic Information Systems + Computer Science (GIS+CS) program.

Geography courses are divided into three subfields: human geography, earth science and geospatial technology. Human geography involves the study of the organization of human activity (particularly, the economic, socio-political and cultural dimensions) across space as they affect and in turn respond to the world about us. Earth science courses explore physical processes that operate inside the earth, at its surface and in the atmosphere, and interactions between humans and the physical environment. The earth science courses are under both physical geography and geology headings. Geospatial technology courses include geographic information system (GIS). GIS programming, remote sensing (including LiDAR), and digital image processing.

Students planning to transfer to another institution to pursue a geology major should consult with the undergraduate advisor.

Programs of study

Programs offered by the department are listed below. Through course selection, students may elect to emphasize earth science, human geography or techniques.

Majors

Geographic Information Systems and Computer Science, BS

A Bachelor of Science degree in Geographic Information Systems + Computer Science (GIS+CS) enables understanding of geospatial processes as well as process-based/algorithmic approaches to problem solving. The changing nature of geospatial data (e.g. location-based data) and associated analytical methods (e.g. machine learning) requires professionals who can blend these two approaches – i.e. develop processes and algorithms while understanding the larger context within which they occur. The GIS+CS degree provides this blend but also offers two tracks – Computer Science (CS) or Information Technology (IT). The CS Track focuses on machine learning and artificial intelligence. The IT Track focuses on construction, maintenance and management of computational infrastructure and IT project management.

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Science degree as specified in the University Core Curriculum in the Academic policies section of this catalog and the College of Liberal Arts and Social Sciences requirements.

Major requirements, 46 hours

Computer science, 13 hours

- CSCE 1030 - Computer Science I
or
- CSCE 1035 - Computer Programming I
- CSCE 1040 - Computer Science II
or
- CSCE 1045 - Computer Programming II
- CSCE 2100 - Foundations of Computing
- CSCE 2110 - Foundations of Data Structures

Geographic information systems, 18 hours

- GEOG 3500 - Introduction to Geographic Information Systems
- GEOG 4550 - Advanced Geographic Information Systems
- GEOG 4560 - Introduction to Python Programming
- GEOG 4570 - Special Topics in GIS
- GEOG 4590 - Advanced GIS Programming

Plus 3 hours selected from:

- GEOG 4195 - Geospatial Data Analytics and Visualization
- GEOG 4230 - Location Intelligence: Business GIS Concepts and Applications
- GEOG 4580 - GIS in Health

Other program requirements

An additional 15 hours are required in one of the tracks listed below. Blending courses from tracks requires advisor approval.

Computer science, 15 hours

- CSCE 3110 - Data Structures and Algorithms

Plus 12 hours selected from:

- CSCE 3850 - Introduction to Computational Life Science

- CSCE 4110 - Algorithms
- CSCE 4201 - Introduction to Artificial Intelligence
- CSCE 4205 - Introduction to Machine Learning
- CSCE 4230 - Introduction to Computer Graphics
- CSCE 4350 - Fundamentals of Database Systems
- CSCE 4380 - Data Mining
- CSCE 4810 - Bioinformatics Algorithms
- CSCE 4820 - Advances in Bioinformatics

Information technology, 15 hours

- CSCE 3055 - IT Project Management
- CSCE 3615 - Enterprise Systems Architecture and Design

Plus 9 hours selected from:

- CSCE 3220 - Human Computer Interfaces
- CSCE 3420 - Internet Programming
- CSCE 3530 - Introduction to Computer Networks
- CSCE 3550 - Foundations of Cybersecurity
- CSCE 3600 - Principles of Systems Programming
- CSCE 3850 - Introduction to Computational Life Science
- CSCE 4350 - Fundamentals of Database Systems
- CSCE 4810 - Bioinformatics Algorithms
- CSCE 4820 - Advances in Bioinformatics

Electives

Students should consult with their academic advisor on courses for electives or undergraduate certificates that enhance their career options.

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years, and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

Year 1

Semester 1		Semester 2	
MATH 1100 - Algebra	3 hours	GEOG 1710 - Earth Science	3 hours
PSCI 2305 - US Political Behavior and Policy	3 hours	MATH 1650 - Pre-Calculus	5 hours
Communication core	3 hours	PSCI 2306 - US and Texas Constitutions and Institutions	3 hours

Semester 1		Semester 2	
Creative Arts core	3 hours	Communication core	3 hours
Life and Physical Sciences core	3 hours	Component Area Option A core	3 hours
Total	15 hours	Total	17 hours

Year 2

Semester 1		Semester 2	
CSCE 1035 - Computer Programming I	3 hours	CSCE 1045 - Computer Programming II	3 hours
GEOG 1200 - Global Societies	3 hours	GEOG 3500 - Introduction to Geographic Information Systems	3 hours
HIST 2610 - United States History to 1865	3 hours	HIST 2620 - United States History Since 1865	3 hours
Component Area Option B core	3 hours	Elective	3 hours
Language, Philosophy and Culture core	3 hours	Elective	3 hours
Total	15 hours	Total	15 hours

Year 3

Semester 1		Semester 2	
CSCE 2100 - Foundations of Computing	3 hours	GEOG 4560 - Introduction to Python Programming	3 hours
CSCE 2110 - Foundations of Data Structures	3 hours	Computer Science track selection	3 hours
GEOG 4550 - Advanced Geographic Information Systems	3 hours	GIS selection	3 hours
Elective	3 hours	Elective	3 hours
Elective-advanced	3 hours	Elective-advanced	3 hours
Total	15 hours	Total	15 hours

Year 4

Semester 1		Semester 2	
GEOG 4570 - Special Topics in GIS	3 hours	GEOG 4590 - Advanced GIS Programming	3 hours
Computer Science track selection	3 hours	Computer Science track selection	3 hours
Computer Science track selection	3 hours	Computer Science track selection	3 hours
Elective	3 hours	Elective	3 hours
Elective-advanced	3 hours	Elective	1 hour
Total	15 hours	Total	12 hours

Geography with a concentration in Earth Systems, BS

A Bachelor of Science with a major in geography and a concentration in earth systems focuses on the Earth's natural systems and how they affect people and society. With this concentration, students will develop skills to study earth processes.

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Science degree as specified in the University Core Curriculum in the Academic policies section of this catalog and the College of Liberal Arts and Social Sciences requirements (excluding foreign language).

Major requirements, 36 hours

A minimum grade of C is required in all major courses to graduate with a major in this department.

Required courses, 12 hours

- GEOG 2110 - Foundations of Geographic Research
- GEOG 2170 - Culture, Environment and Society
- GEOG 2180 - Geosystems, Environment and Society
- GEOG 4800 - Geography Capstone

Earth systems concentration, 24 hours

Earth science

Choose five courses, at least one in each area. (Courses can only count for one area.)

Geomorphology

- GEOG 4350 - Geomorphology
- GEOL 3010 - Environmental Geology

- GEOL 3020 - Historical Geology
- GEOL 3030 - Earthquakes and Volcanoes

Climatology

- GEOG 3800 - Weather and Climate
- GEOG 4260 - Oceanography

Hydrology

- GEOG 4260 - Oceanography
- GEOG 4750 - Surface Water Hydrology
- GEOL 4850 - Introduction to Groundwater Hydrology

Biogeography

- GEOG 3420 - Applied Biogeography
- GEOG 4710 - Ecosystems: Structure, Function and Services

Techniques

Choose two courses:

- GEOG 3050 - Introduction to Cartography
- GEOG 3500 - Introduction to Geographic Information Systems
- GEOG 4170 - Field Methods and Mapping
- GEOG 4185 - Statistical Research Methods in Geography
- GEOG 4525 - Using LiDAR Data in GIS
- GEOG 4530 - Remote Sensing and Digital Image Processing
- GEOG 4550 - Advanced Geographic Information Systems

Human geography

Choose one course.

- GEOG 3100 - United States and Canada: Economies, Cities and Sustainability
- GEOG 3200 - Sustainability
- GEOG 3770 - Latin America: Geography and Globalization
- GEOG 4115 - Our Energy Futures
- GEOG 4420 - Capitalism, Nature and Climate Change

Other course requirements

Mathematics

- MATH 1680 - Elementary Probability and Statistics (or equivalent)

Science

- GEOG 1710 - Earth Science

One additional science course

- BIOL 1132 - Environmental Science
- BIOL 2140 - Principles of Ecology
- BIOL 2241 - Biology of Higher Plants
- BIOL 2251 - Biodiversity and Conservation of Animals
- CHEM 1360 - Context of Chemistry
- CHEM 1410 - General Chemistry I for Science Majors (or equivalent)
- PHYS 1315 - Introduction to the World of Physics
- PHYS 1410 - General Physics I (or equivalent)

Minor

Optional.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information, see an academic advisor in the College of Liberal Arts and Social Sciences.

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years, and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

Year 1

Semester 1		Semester 2	
GEOG 1710 - Earth Science	3 hours	GEOG 2110 - Foundations of Geographic Research	3 hours
GEOG 2170 - Culture, Environment and Society	3 hours	GEOG 2180 - Geosystems, Environment and Society	3 hours

Geography with a concentration in Environmental Studies, BS

A Bachelor of Science with a major in geography and a concentration in environmental studies focuses on the complex interactions between the environment and society. With this concentration, students will develop skills to address both the natural and social aspects of environmental issues.

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Science degree as specified in the University Core Curriculum in the Academic policies section of this catalog and the College of Liberal Arts and Social Sciences requirements (excluding foreign language).

Major requirements, 36 hours

A minimum grade of C is required in all major courses to graduate with a major in this department.

Required courses, 12 hours

- GEOG 2110 - Foundations of Geographic Research
- GEOG 2170 - Culture, Environment and Society
- GEOG 2180 - Geosystems, Environment and Society
- GEOG 4800 - Geography Capstone

Environmental studies concentration, 24 hours

Earth science

Choose three courses, one course in three of the four areas. (Courses can only count for one area.)

Geomorphology

- GEOG 4350 - Geomorphology
- GEOL 3010 - Environmental Geology
- GEOL 3020 - Historical Geology
- GEOL 3030 - Earthquakes and Volcanoes

Climatology

- GEOG 3800 - Weather and Climate
- GEOG 4260 - Oceanography

Hydrology

- GEOG 4260 - Oceanography
- GEOG 4750 - Surface Water Hydrology
- GEOL 4850 - Introduction to Groundwater Hydrology

Biogeography

- GEOG 3420 - Applied Biogeography
- GEOG 4710 - Ecosystems: Structure, Function and Services

Human geography

Choose three courses: one course from the subfields group, two courses from any of the three groups.

Subfields

- GEOG 3010 - Economic Geography
- GEOG 3600 - Political Geography
- GEOG 3120 - Medical Geography
- GEOG 4210 - Urban Geography

Regional

- GEOG 3100 - United States and Canada: Economies, Cities and Sustainability
- GEOG 3750 - Geography of Contemporary Sub-Saharan Africa
- GEOG 3770 - Latin America: Geography and Globalization

Global issues

- GEOG 3200 - Sustainability
- GEOG 4115 - Our Energy Futures
- GEOG 4245 - Geography of International Development
- GEOG 4420 - Capitalism, Nature and Climate Change

Techniques

Choose two courses:

- GEOG 3050 - Introduction to Cartography
- GEOG 3500 - Introduction to Geographic Information Systems
- GEOG 4170 - Field Methods and Mapping
- GEOG 4185 - Statistical Research Methods in Geography
- GEOG 4525 - Using LiDAR Data in GIS

- GEOG 4530 - Remote Sensing and Digital Image Processing
- GEOG 4550 - Advanced Geographic Information Systems
- GEOG 4570 - Special Topics in GIS

Other course requirements

Mathematics

- MATH 1680 - Elementary Probability and Statistics (or equivalent)

Science

- GEOG 1710 - Earth Science

One additional science course

- BIOL 1132 - Environmental Science
- BIOL 2140 - Principles of Ecology
- BIOL 2241 - Biology of Higher Plants
- BIOL 2251 - Biodiversity and Conservation of Animals
- CHEM 1360 - Context of Chemistry
- CHEM 1410 - General Chemistry I for Science Majors (or equivalent)
- PHYS 1315 - Introduction to the World of Physics
- PHYS 1410 - General Physics I (or equivalent)

Environmental electives

Choose one course:

- ANTH 4400 - Environmental Anthropology
- BIOL 3160 - Conservation Biology
- BIOL 4100 - Introduction to Environmental Impact Assessment
- BIOL 4440 - Stream Ecology
- ECON 4440 - Economics of Natural Resources and Environment
- ENGL 4650 - Literature and the Environment
- HIST 4275 - American Environmental History
- PHIL 2500 - Environment and Society
- PHIL 4700 - Environmental Philosophy
- PHIL 4740 - Environmental Justice

Minor

Optional.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information, see an academic advisor in the College of Liberal Arts and Social Sciences.

Geography, BA

A Bachelor of Arts with a major in geography gives you the knowledge and skills to study and address environmental problems associated with climate change, natural disasters, population growth, public health and urban sprawl. This degree is highly marketable and offers an advantage in an increasingly competitive job market.

Degree requirements

The following requirements must be satisfied for a Bachelor of Arts with a major in geography.

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Arts degree as specified in the University Core Curriculum in the Academic policies section of this catalog and the College of Liberal Arts and Social Sciences requirements.

Major requirements, 36 hours

A minimum grade of C is required in all courses counting toward the major.

Required courses, 12 hours

- GEOG 1710 - Earth Science
- GEOG 2110 - Foundations of Geographic Research
- GEOG 2170 - Culture, Environment and Society
- GEOG 4800 - Geography Capstone

Other courses in the major

Three courses from human geography; one course from earth science; one course from techniques; and three electives from any group.

GEOG 4900 and GEOG 4920 can be applied to any group.

Human geography

- ARCH 3650 - Origins of Civilization
- ARCH 4620 - Topics in Archaeology
(can count for earth science or human geography; may be repeated as topics vary)
- GEOG 3010 - Economic Geography
- GEOG 3100 - United States and Canada: Economies, Cities and Sustainability
- GEOG 3120 - Medical Geography
- GEOG 3200 - Sustainability
- GEOG 3600 - Political Geography
- GEOG 3750 - Geography of Contemporary Sub-Saharan Africa
- GEOG 3760 - Geography of China: Environment and Society
- GEOG 3770 - Latin America: Geography and Globalization
- GEOG 4030 - British Isles Field School (6 hours; counts as one course in earth science and one course in human geography)
- GEOG 4115 - Our Energy Futures
- GEOG 4210 - Urban Geography
- GEOG 4220 - Applied Retail Geography
- GEOG 4230 - Location Intelligence: Business GIS Concepts and Applications
- GEOG 4245 - Geography of International Development
- GEOG 4410 - Location-Allocation Modeling
- GEOG 4420 - Capitalism, Nature and Climate Change
- GEOG 4885 - Human Geography Topics

Earth science

- ARCH 4620 - Topics in Archaeology (can count as either earth science or human geography; may be repeated as topics vary)
- GEOG 3420 - Applied Biogeography
- GEOG 3800 - Weather and Climate
- GEOG 4030 - British Isles Field School (6 hours; counts as one course in earth science and one course in human geography)

- GEOG 4240 - Meteorology
- GEOG 4250 - Climatology
- GEOG 4260 - Oceanography
- GEOG 4350 - Geomorphology
- GEOG 4710 - Ecosystems: Structure, Function and Services
- GEOG 4750 - Surface Water Hydrology
- GEOG 4875 - Earth Science Topics
- GEOL 3000 - Geology of Texas
- GEOL 3010 - Environmental Geology
- GEOL 3020 - Historical Geology
- GEOL 3030 - Earthquakes and Volcanoes
- GEOL 4630 - Soils Geomorphology
- GEOL 4850 - Introduction to Groundwater Hydrology

Techniques

- ARCH 4810 - Archaeological Field School (6 hours; counts as two courses in techniques)
- GEOG 3050 - Introduction to Cartography
- GEOG 3500 - Introduction to Geographic Information Systems
- GEOG 4060 - Applied GIS: MapInfo Professional®
- GEOG 4170 - Field Methods and Mapping
- GEOG 4185 - Statistical Research Methods in Geography
- GEOG 4195 - Geospatial Data Analytics and Visualization
- GEOG 4525 - Using LiDAR Data in GIS
- GEOG 4530 - Remote Sensing and Digital Image Processing
- GEOG 4540 - Introduction to Enterprise GIS Applications
- GEOG 4550 - Advanced Geographic Information Systems
- GEOG 4560 - Introduction to Python Programming
- GEOG 4570 - Special Topics in GIS
- GEOG 4580 - GIS in Health
- GEOG 4590 - Advanced GIS Programming

Other course requirements

- MATH 1680 - Elementary Probability and Statistics or equivalent.

Minor

Optional.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information, see an academic advisor in the College of Liberal Arts and Social Sciences.

Geography, BS

A Bachelor of Science with a major in geography gives you the knowledge and skills to study and address environmental problems associated with climate change, natural disasters, population growth, public health and urban sprawl. This degree is highly marketable and offers an advantage in an increasingly competitive job market.

Degree requirements

The following requirements must be satisfied for a Bachelor of Science with a major in geography.

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Science degree as specified in the University Core Curriculum in the Academic policies section of this catalog and the College of Liberal Arts and Social Sciences requirements (excluding foreign language).

Major requirements, 36 hours

A minimum grade of C is required in all courses counting toward the major.

Required courses, 12 hours

- GEOG 2110 - Foundations of Geographic Research
- GEOG 2170 - Culture, Environment and Society
- GEOG 2180 - Geosystems, Environment and Society
- GEOG 4800 - Geography Capstone

Other courses in the major

Three courses from earth science; one course from human geography; two courses from techniques; and two electives from any group.

GEOG 4900 and GEOG 4920 can be applied to any group.

Earth science

- ARCH 4620 - Topics in Archaeology (can count as either earth science or human geography; may be repeated as topics vary)
- GEOG 3420 - Applied Biogeography
- GEOG 3800 - Weather and Climate
- GEOG 4030 - British Isles Field School (6 hours; counts as one course in earth science and one course in human geography)
- GEOG 4240 - Meteorology
- GEOG 4250 - Climatology
- GEOG 4260 - Oceanography
- GEOG 4350 - Geomorphology
- GEOG 4710 - Ecosystems: Structure, Function and Services
- GEOG 4750 - Surface Water Hydrology
- GEOG 4875 - Earth Science Topics
- GEOL 3000 - Geology of Texas
- GEOL 3010 - Environmental Geology
- GEOL 3020 - Historical Geology
- GEOL 3030 - Earthquakes and Volcanoes
- GEOL 4630 - Soils Geomorphology
- GEOL 4850 - Introduction to Groundwater Hydrology

Human geography

- ARCH 3650 - Origins of Civilization
- ARCH 4620 - Topics in Archaeology (can count as either earth science or human geography; may be repeated as topics vary)
- GEOG 3010 - Economic Geography
- GEOG 3100 - United States and Canada: Economies, Cities and Sustainability
- GEOG 3120 - Medical Geography
- GEOG 3200 - Sustainability

- GEOG 3600 - Political Geography
- GEOG 3750 - Geography of Contemporary Sub-Saharan Africa
- GEOG 3760 - Geography of China: Environment and Society
- GEOG 3770 - Latin America: Geography and Globalization
- GEOG 4030 - British Isles Field School (6 hours; counts as one course in earth science and one course in human geography)
- GEOG 4115 - Our Energy Futures
- GEOG 4210 - Urban Geography
- GEOG 4220 - Applied Retail Geography
- GEOG 4230 - Location Intelligence: Business GIS Concepts and Applications
- GEOG 4245 - Geography of International Development
- GEOG 4410 - Location-Allocation Modeling
- GEOG 4420 - Capitalism, Nature and Climate Change
- GEOG 4885 - Human Geography Topics

Techniques

- ARCH 4810 - Archaeological Field School (6 hours; counts as two courses in techniques)
- GEOG 3050 - Introduction to Cartography
- GEOG 3500 - Introduction to Geographic Information Systems
- GEOG 4060 - Applied GIS: MapInfo Professional®
- GEOG 4170 - Field Methods and Mapping
- GEOG 4185 - Statistical Research Methods in Geography
- GEOG 4195 - Geospatial Data Analytics and Visualization
- GEOG 4525 - Using LiDAR Data in GIS
- GEOG 4530 - Remote Sensing and Digital Image Processing
- GEOG 4540 - Introduction to Enterprise GIS Applications
- GEOG 4550 - Advanced Geographic Information Systems
- GEOG 4560 - Introduction to Python Programming
- GEOG 4570 - Special Topics in GIS
- GEOG 4580 - GIS in Health
- GEOG 4590 - Advanced GIS Programming

Other course requirements

Mathematics

- MATH 1680 - Elementary Probability and Statistics (or equivalent)

Sciences

- GEOG 1710 - Earth Science

And one additional science course:

- BIOL 1132 - Environmental Science

- BIOL 1710 - Biology for Science Majors I (or equivalent)
- BIOL 2140 - Principles of Ecology
- BIOL 2241 - Biology of Higher Plants
- BIOL 2251 - Biodiversity and Conservation of Animals
- CHEM 1360 - Context of Chemistry
- CHEM 1410 - General Chemistry I for Science Majors (or equivalent)
- PHYS 1315 - Introduction to the World of Physics
- PHYS 1410 - General Physics I (or equivalent)

Minor

Optional.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information, see an academic advisor in the College of Liberal Arts and Social Sciences.

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years, and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

Year 1

Semester 1		Semester 2	
GEOG 1710 - Earth Science	3 hours	GEOL 1610 - Introduction to Geology	3 hours
GEOG 2170 - Culture, Environment and Society	3 hours	GEOG 2110 - Foundations of Geographic Research	3 hours
MATH 1680 - Elementary Probability and Statistics	3 hours	GEOG 2180 - Geosystems, Environment and Society	3 hours
PSCI 2305 - US Political Behavior and Policy	3 hours	PSCI 2306 - US and Texas Constitutions and Institutions	3 hours
Communication core	3 hours	Communication core	3 hours
Total	15 hours	Total	15 hours

Year 2

Semester 1		Semester 2	
GEOG 1200 - Global Societies	3 hours	HIST 2620 - United States History Since 1865	3 hours
HIST 2610 - United States History to 1865	3 hours	Component Area Option B core	3 hours
Component Area Option A core	3 hours	BS Geography Science Requirement	3 hours
Creative Arts core	3 hours	Elective	3 hours
Language, Philosophy and Culture core	3 hours	Elective	3 hours
Total	15 hours	Total	15 hours

Year 3

Semester 1		Semester 2	
Geography Earth Science Group	3 hours	Geography Earth Science Group	3 hours
Geography Techniques Group	3 hours	Geography Earth Science Group	3 hours
Elective	3 hours	Geography Techniques Group	3 hours
Elective	3 hours	Elective	3 hours
Elective - advanced	3 hours	Elective	3 hours
Total	15 hours	Total	15 hours

Year 4

Semester 1		Semester 2	
Geography Combined Groups	3 hours	GEOG 4800 - Geography Capstone	3 hours
Geography Human Geography Group	3 hours	Geography Combined Groups	3 hours
Elective	3 hours	Elective	3 hours
Elective - advanced	3 hours	Elective - advanced	3 hours
Elective - advanced	3 hours	Elective - advanced	3 hours
Total	15 hours	Total	15 hours

Grad Track Options

Geography, BA/BS with grad track option leading to Geography, MS

The Department of Geography and the Environment offers a grad-track pathway in which students complete a Bachelor's Degree in Geography or in Geographic Information Systems and Computer Science in four years, and then go on to earn a master's degree in geography in the fifth year. This accelerated program, which is cost-effective and time-saving, is designed for exceptional, highly motivated majors who have maintained at least a 3.5 GPA and who desire to emphasize geographic techniques. Students must apply to this program in their junior year. Admitted students will take up to twelve graduate hours during their senior year, which can count toward first their bachelor's and then transfer to the master's degree, as permitted by university rules.

Admission requirements and program policies

Admission requirements

To be eligible for acceptance, students must have completed 75 undergraduate hours, including 12 upper-division hours in the major.

In addition to completing the required courses, students will need to submit:

- A statement of purpose;
- A curriculum vitae or resume;
- One letter of recommendation testifying to student's ability to do graduate-level work; and
- An application to the Toulouse Graduate School.

GRE scores are not required. Students in the UNT Honors Program and students who satisfy the requirements are guaranteed admission to the program and need not provide letters of recommendation.

Program requirements

In lieu of 3 to 12 credit hours of advanced undergraduate electives in the fourth year, students for the MS in Geography may take up to four 5000-level graduate classes in their senior year with the approval of their advisor. The classes should be chosen from the following list with an eye to fulfilling requirements for the BA/BS and the non-thesis MS. See the requirements for the BA with a major in Geography the BS with a major in Geography and the MS in Geography.

Graduate level courses

- GEOG 5170 - Field Methods (aligns with GEOG 4170)
- GEOG 5185 - Statistical Research Methods in Geography (aligns with GEOG 4185)
- GEOG 5195 - Advanced Geospatial Data Analytics (aligns with GEOG 4195)
- GEOG 5220 - Applied Retail Geography (aligns with GEOG 4220)
- GEOG 5230 - Location Intelligence: Advanced Business GIS Concepts & Applications (aligns with GEOG 4230)
- GEOG 5525 - LiDAR Data Analysis in GIS (aligns with GEOG 4525)
- GEOG 5530 - Remote Sensing and Digital Image Analysis (aligns with GEOG 4530)
- GEOG 5540 - Enabling Business Intelligence Using Enterprise GIS (aligns with GEOG 4540)

Minors

Geography minor

Students planning to minor in geography should consult the geography undergraduate advisor.

Requirements

The minor requires 18 hours, usually including the following:

- GEOG 1200 - Global Societies
or
- GEOG 2170 - Culture, Environment and Society
- GEOG 1710 - Earth Science
- 12 advanced hours

Geology minor

Geography majors may minor in geology, but none of the courses taken to satisfy the minor can also be applied to the major.

Requirements

A minor in geology requires 18–19 hours in geology and earth science, including:

- GEOL 1610 - Introduction to Geology
- GEOL 3020 - Historical Geology

Four additional courses from

- GEOG 4350 - Geomorphology
- GEOG 4750 - Surface Water Hydrology
- GEOL 3000 - Geology of Texas
- GEOL 3010 - Environmental Geology
- GEOL 3030 - Earthquakes and Volcanoes
- GEOG 4260 - Oceanography
- GEOL 4630 - Soils Geomorphology
- GEOL 4850 - Introduction to Groundwater Hydrology

Undergraduate Academic Certificates

Geographic Information Systems certificate

This certificate may be acquired within the geography major but is also open to students in other programs, non-degree seeking students or outside professionals who wish to add GIS capabilities to their present careers.

A grade of at least B is required in every course counted toward the certificate.

Course sequence, 15 hours

The certificate requires five courses as follows:

Required Courses

- GEOG 3500 - Introduction to Geographic Information Systems
- GEOG 4560 - Introduction to Python Programming

Group A

One course from Group A:

- GEOG 4550 - Advanced Geographic Information Systems
- GEOG 4590 - Advanced GIS Programming

Group B

Two courses from Group B:

- GEOG 4195 - Geospatial Data Analytics and Visualization
- GEOG 4220 - Applied Retail Geography
- GEOG 4525 - Using LiDAR Data in GIS
- GEOG 4530 - Remote Sensing and Digital Image Processing
- GEOG 4540 - Introduction to Enterprise GIS Applications
- GEOG 4550 - Advanced Geographic Information Systems (if not taken as Group A) (when topic is approved by advisor)
- GEOG 4590 - Advanced GIS Programming
(If not taken as Group A)

GeoPhoto: Imaging Technology and Visualization certificate

The GeoPhoto certificate program requires five courses (15 hours) and provides students with a comprehensive mix of conceptual and technical instruction in imaging technology and visualization. Students will learn methods for collecting, exploring, interpreting and analyzing visual data and diverse forms of data synthesis and presentation.

Requirements, 15 hours

- ASTU 2501 - Beginning Photography: Photo I
- ASTU 3507 - Intermediate Photography: Field Photography
- GEOG 3500 - Introduction to Geographic Information Systems
- GEOG 4195 - Geospatial Data Analytics and Visualization
- GEOG 4530 - Remote Sensing and Digital Image Processing

Additional information

For additional information, please contact John South at John.South@unt.edu.

Geospatial Analytics certificate

Geospatial analytics provides the tools that enable the rapidly expanding field of Location Intelligence (LI). LI is the combined application of geographic thinking, visualization, and analytics to empower organizations of all kinds to incorporate a consideration of place and space in making better decisions. Studies have found that 97% of companies believe that location intelligence is crucial to their success, two-thirds of business executives use LI to gain a competitive edge, and more than half use it to create new market opportunities.

Students who complete the certificate will gain an understanding of how location theory and data analytics can be leveraged to provide a strategic advantage to various domains including data science, public sector and non-profit organizations. The 12-credit hour certificate sequence includes coursework in application areas including business and retail, health and medical, exploratory data analysis, as well as Geographic Information Systems (GIS).

For more information on the Geospatial Analytics certificate, please contact the certificate coordinator, Dr. Murray Rice, at murray.rice@unt.edu.

Required courses

- GEOG 4185 - Statistical Research Methods in Geography
- GEOG 4195 - Geospatial Data Analytics and Visualization
- GEOG 4220 - Applied Retail Geography
or
- GEOG 4230 - Location Intelligence: Business GIS Concepts and Applications

One additional course from:

- EADP 4050 - Social Vulnerability in Disasters
- GEOG 4220 - Applied Retail Geography (if not taken as a required course)
- GEOG 4230 - Location Intelligence: Business GIS Concepts and Applications (if not taken as a required course)
- GEOG 4580 - GIS in Health

Health and Medical Geography certificate

Careers in Environmental Health, Public Health, Geographic Information Systems (GIS), and Geography are intertwined because prevention, detection, management, and research on health in populations are inherently geographic. This certificate blends powerful analytical skills and concepts from Health and Medical Geography. A grade of B or better is required in all courses applied to the certificate. For more information please contact the certificate coordinator, Dr. Lisa Nagaoka, at lisa.nagaoka@unt.edu.

Required courses, 12 hours

A grade of B or better is required in all courses applied to the certificate. Choose four courses.

- ANTH 4200 - Health, Healing and Culture: Medical Anthropology
- ANTH 4220 - Anthropology in Public Health
- GEOG 3120 - Medical Geography

- GEOG 3500 - Introduction to Geographic Information Systems
- GEOG 4185 - Statistical Research Methods in Geography
- GEOG 4580 - GIS in Health

Sustainability certificate

Sustainability is about preserving planet Earth for future generations when referring to natural resource extraction, production and consumption. Sustainability literally means capable of being maintained without exhausting or depleting natural resources. The three components to sustainability are 1) stewardship of natural resources, 2) economic responsibility, and 3) social and community well-being. The certificate prepares students in each of these areas through two required courses that cover global cultures and environments as well as electives from three major course groups (15 credit hours of course work, including 9 advanced).

Required courses

6 hours from:

- GEOG 1710 - Earth Science
- GEOG 3200 - Sustainability

Group 1 - Natural resources conservation

Choose one course (3 hours) from:

- BIOL 2251 - Biodiversity and Conservation of Animals
- BIOL 3160 - Conservation Biology
- GEOG 2180 - Geosystems, Environment and Society
- GEOL 3010 - Environmental Geology
- GEOG 3420 - Applied Biogeography
- GEOG 4710 - Ecosystems: Structure, Function and Services

Group 2 - Economic responsibility

Choose one course (3 hours) from:

- ECON 3000 - Current Economic Issues
- ECON 4440 - Economics of Natural Resources and Environment
- GEOG 3010 - Economic Geography
- GEOG 3100 - United States and Canada: Economies, Cities and Sustainability
- GEOG 4115 - Our Energy Futures
- GEOG 4245 - Geography of International Development

Group 3 - Social and community well-being

Choose one course (3 hours) from:

- ANTH 4310 - Citizenship, Borders and Belonging in the United States
- ANTH 4400 - Environmental Anthropology

- ANTH 4760 - Inequality, Social Justice and the City
- GEOG 2170 - Culture, Environment and Society
- GEOG 4420 - Capitalism, Nature and Climate Change
- PHIL 4700 - Environmental Philosophy
- WGST 4250 - Gender and Sustainable Development

Water Resources certificate

The water resources certificate focuses on the study of water above, upon, and beneath the earth's surface. The certificate provides a foundation in the study of water resources, including the basics of hydrology and area courses from which students may select options in biology, emergency management, geography, and philosophy (15 hours).

Requirements

Required courses:

- GEOG 3800 - Weather and Climate
- GEOG 4750 - Surface Water Hydrology
- GEOL 4850 - Introduction to Groundwater Hydrology

Additional courses

Choose two courses from the following:

- BIOL 4085 - Fish Diversity and Ecology
- BIOL 4380 - Fundamentals of Aquatic Toxicology
- EADP 4015 - Flood Plain Management
- GEOL 3010 - Environmental Geology
- GEOG 4260 - Oceanography
- PHIL 4650 - Philosophy of Water

Rachel Moran, Chair

Faculty

History encompasses all aspects of past human endeavors. It encourages students to think broadly and to integrate all of their knowledge into a meaningful whole. From history a person develops a better understanding of current events and a better

appreciation of art, architecture, ideas, politics, and fellow human beings and their activities. It also provides a guide for the future. The study of history is important for journalists, teachers, businesspeople, theologians, politicians, scientists, lawyers, librarians, archivists, museologists and those in many other professions. Students planning any career could benefit from majoring or minoring in history or from choosing history as the lead subject in a social science major or for elective credits. History is an interest that students may retain for life.

U.S. history requirement

Texas state law requires that the university may not award a baccalaureate degree or a lesser degree or academic certificate unless the student has credit for 6 semester hours in American history. A student is entitled to submit as much as 3 hours of credit, or its equivalent, in Texas history in partial satisfaction of this requirement. The university may determine that a student has met the requirement by work transferred from another accredited college or upon successful completion of an advanced standing examination. The student may satisfy the entire 6-hour United States/Texas history requirement by advanced standing examination. This requirement may be satisfied by credit in HIST 2610 (HIST 1301) and HIST 2620 (HIST 1302) (United States history) or HIST 2675 and HIST 2685 (Honors United States history).

Scholarships

The Department of History offers the following undergraduate scholarships:

- Hagler-Marquis History Scholarship
- History Excellence Scholarship
- Howard H. Schultz Scholarship and Watt Family Scholarship in Jewish Studies
- Harry and Ruth Kamman Scholarship
- Gus Seligmann History Scholarship
- Ledbetter Family Scholarship
- CBS Mechanical Inc. History Scholarship
- Nation's Heritage Scholarship
- Benjamin Lyon Chapter DAR Scholarship
- Kingsbury-Thomason Scholarship (for students who intend to major in history and to teach history in Texas public schools).

History majors who are entering freshmen, transfer students or continuing students may apply. The application deadline is February 20. For information and application forms, contact Miranda Leddy, Administrative Coordinator, at 940-369-8932 or miranda.leddy@unt.edu.

Majors

History, BA

Students pursuing a Bachelor of Arts with a major in history are supported by the History Help Center, which can assist you with preparing for exams and writing papers. There are also opportunities for hands-on research with professors specializing in a wide range of topics.

Degree requirements

The following requirements must be satisfied for a Bachelor of Arts with a major in history.

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Arts degree as specified in the University Core Curriculum in the Academic policies section of this catalog and the College of Liberal Arts and Social Sciences requirements.

Major requirements

Required courses

- HIST 1050 - World History to the Sixteenth Century
- HIST 1060 - World History from the Sixteenth Century
- HIST 2610 - United States History to 1865
- HIST 2620 - United States History Since 1865

Upper-level history courses, 24 hours

24 semester hours of advanced work (3000-4000 level), with four courses in a single geographic area, at least one course in each of the remaining geographic areas and two courses in a single theme.

Each student will choose a geographic focus area for his or her advanced course work by taking at least four courses in one of three groups: United States; Europe; or Africa, Asia, Latin America and the Middle East. Students must take at least one course from each of the other two geographic areas outside of their focus. Each student will also select one of the following themes by taking two courses within that theme: culture and everyday life; empires and borderlands; food and the body; gender and sexuality; mass violence and atrocities; politics, policy and economics; premodern Europe and the Mediterranean; race and ethnicity; Texas, the South and the West; and war, military and society. Students must finish a history course with a grade of C or better for it to count toward the history major.

Geographic area: United States

- HIST 3001 - Exploring U.S. Latinx Archives: Methodologies and Memory
- HIST 3010 - History through Video Games
- HIST 3020 - Introduction to the Medical Humanities
- HIST 3021 - History of Medicine, 1400 to Present
- HIST 3060 - History of Sexualities in U.S.
- HIST 3061 - Women in the United States to 1900
- HIST 3062 - Women in the United States Since 1900
- HIST 3063 - U.S. Gender and Race Since 1945
- HIST 3065 - United States LGBTQ History
- HIST 3080 - 20th Century U.S. Anti-War Movements
- HIST 3150 - Historical and Cultural Development of the Mexican-American Community
- HIST 3160 - Latinx Civil Rights Movements
- HIST 3240 - African American History and Culture to 1865
- HIST 3250 - African American History and Culture Since 1865
- HIST 3260 - Slavery in the Americas
- HIST 3280 - The French Empire since 1600
- HIST 3333 - Horticultural Histories of North Texas
- HIST 3400 - History of American Country Music
- HIST 3407 - Fitness Culture in U.S. History
- HIST 3408 - Madness and Mental Health in U.S. History

- HIST 3410 - History of American Childhood
- HIST 3480 - Colonial America
- HIST 3490 - Tracing Global Histories of U.S. Coffee Consumption
- HIST 3495 - United States Food History
- HIST 3630 - U. S. Navy, 1775–Present: Sails
- HIST 3700 - Texas History
- HIST 3800 - History of the Present
- HIST 3850 - The Early National Period of the United States, 1789–1848
- HIST 3871 - America in the Gilded Age
- HIST 3875 - Prosperity, Depression and a New Deal, 1918-1941
- HIST 3900 - American Horror History
- HIST 4072 - World War II in Asia and the Pacific
- HIST 4074 - The Vietnam War
- HIST 4150 - Mexican Immigration and the Chicano Community
- HIST 4155 - Mexican American Autobiography
- HIST 4160 - Chicano Political History: 19th and 20th Century
- HIST 4170 - History of Tejanos/as
- HIST 4261 - Topics in United States History
- HIST 4270 - The American West
- HIST 4271 - Hollywood and the Wild West
- HIST 4272 - Explorers of North America
- HIST 4275 - American Environmental History
- HIST 4276 - Animal Histories
- HIST 4282 - Settler Colonialism and Empire
- HIST 4303 - Age of Empire 1848-1914
- HIST 4315 - History of Anti-Semitism from Ancient Times to the Present
- HIST 4391 - War Crimes, Genocide, and Justice
- HIST 4405 - History of the Body
- HIST 4406 - Sickness and Health in U.S. History
- HIST 4411 - Pirates, Smugglers, and States in the Atlantic World, 1600-1856
- HIST 4435 - American Jewish Experience
- HIST 4444 - Historical Teaching and Scholarship on Race
- HIST 4451 - African American History During Segregation Era
- HIST 4455 - History of Black Women in America

Other course requirements

None.

Minor

Optional.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information, see an academic advisor in the College of Liberal Arts and Social Sciences.

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years, and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

Year 1

Semester 1		Semester 2	
HIST 1050 - World History to the Sixteenth Century	3 hours	HIST 1060 - World History from the Sixteenth Century	3 hours

Minors

Africana Studies minor

Students with questions about this minor may contact Dr. Christopher Todd, Department of History (christopher.todd@unt.edu).

Requirements

A minor in African American studies requires 18 hours, including:

- ENGL 4260 - African American Literature
- HIST 3240 - African American History and Culture to 1865
- HIST 3250 - African American History and Culture Since 1865
- HIST 4580 - Africa to the Nineteenth Century

Plus 6 hours

Select from the following:

- ANTH 3130 - African-American Anthropology
- ANTH 3400 - Peoples and Cultures of Africa
- ANTH 4550 - Race, Ethnicity and Identity
- ECON 3150 - Economics of Discrimination
- ENGL 4280 - Africana Literature, Media and Culture
- ENGL 4285 - Africana Theory and Criticism
- HIST 4451 - African American History During Segregation Era
- HIST 4455 - History of Black Women in America
- HIST 4830 - Rise and Fall of the Slave South
- HIST 4840 - Making of the Modern South
- LING 3010 - African American English
- MRTS 4520 - African American Film
- MUCM 3617 - Percussion Ensemble
- MUET 3050 - Music of Africa
- MUET 3060 - African-American Music
- MUET 3617 - African Music and Movement
- MUJS 3070 - History of Jazz
- PSCI 3106 - African-American Politics
- PSYC 4040 - Psychology of Race in the U.S.
- SOCI 3540 - Racial and Ethnic Minorities

Other classes may be approved at the discretion of the advisor to the minor.

Classical Studies minor

A minor in classical studies requires 18 hours. Six of these hours, but no more than 12 hours, must be in Latin or Greek language courses at any level. The remaining hours can be selected from any of the courses below. (Topics courses count when their focus is ancient, upon adviser approval.)

Latin or ancient Greek, at least 6 hours but no more than 12

At least 6 hours, but no more than 12 hours, of Latin (LATI) or ancient Greek language classes at any level.

Plus 6 to 12 hours from the courses listed below

The remaining hours to fulfill the 18-hour requirement may be selected from the courses listed below:

- ARCH 3650 - Origins of Civilization
- ART 2350 - Art History Survey I
- ARTH 4802 - Art of Ancient Greece
- ARTH 4803 - Art of Ancient Rome
- ENGL 3200 - Rhetorical History and Historiography
- ENGL 3360 - Classical Literature and Mythology
- HIST 3300 - Ancient Near East
- HIST 3301 - Ancient Egypt
- HIST 3302 - Ancient Greece
- HIST 3303 - The Roman Republic and Augustus
- HIST 3305 - The Early Byzantine Empire
- HIST 3307 - Roman Warfare
- HIST 3600 - Evolution of Warfare to Napoleon
- HIST 3762 - Rome: The Biography of a City
- HIST 3770 - Ancient and Medieval Women, Gender and Sexuality
- HIST 4004 - The Roman Empire
- HIST 4006 - Roman Law and Order
- HIST 4008 - Ancient Religion and Magic
- HIST 4215 - Jews Under Greek and Roman Rule
- HIST 4216 - Rome's Eastward Expansion: From the Punic Wars to the Jewish Wars
- HIST 4217 - Jew, Greek and Roman: Backgrounds of Early Christianity
- HIST 4315 - History of Anti-Semitism from Ancient Times to the Present
- PHIL 3310 - Ancient Greek Philosophy
- PHIL 3500 - Christianity and Philosophy
- PHIL 3510 - Hebrew Bible
- PHIL 3520 - Early Christian Thought
- PSCI 3310 - Political Theory: Quest for Justice
- THEA 3030 - World Theatre to 1700
- WLLC 3700 - Classical Mythology

or, when focus is ancient,

- ARCH 2900 - Special Problems
- ARCH 4620 - Topics in Archaeology
- ARCH 4810 - Archaeological Field School
- ARTH 4801 - Topics in Art History
- HIST 4260 - Topics in History
- HIST 4262 - Topics in European History
- HIST 4263 - Topics in African-, Asian- or Latin American History
- HIST 4900 - Special Problems
- PSCI 4330 - Topics in Political Theory

Additional Information

Other courses may also qualify, if approved by the classical studies advisor. Interested students should contact Dr. Zoe Ortiz at zoe.ortiz@unt.edu.

History minor

Students may minor in history by completing 18 semester hours.

Required courses

- HIST 2610 - United States History to 1865
- HIST 2620 - United States History Since 1865
- 12 hours of additional history courses, 6 of which must be at the 3000 or 4000 level.

Mexican-American Studies minor

A minor in Mexican-American studies requires 18 hours.

Requirements

- ANTH 3210 - Meso America
- HIST 3150 - Historical and Cultural Development of the Mexican-American Community
- HIST 4150 - Mexican Immigration and the Chicano Community

Plus three of the following courses

Plus three of the following courses chosen in consultation with the Mexican-American studies minor advisor and representing at least two different departments:

- ANTH 3140 - Latinos in the U.S.
- ENGL 4250 - Latinx Literature
- HIST 3160 - Latinx Civil Rights Movements
- HIST 4155 - Mexican American Autobiography
- HIST 4160 - Chicano Political History: 19th and 20th Century
- HIST 4180 - Colonial Mexico and the Spanish Southwest
- HIST 4190 - Mexico, 1810–Present
- SOCI 2010 - Race, Class, Gender and Ethnicity
- SPAN 3140 - Mexican Civilization

Additional information

Periodic special topics courses offered by departments in the fine arts, humanities and social sciences (when topics relate directly to Mexican-American studies and with permission of the Mexican-American studies minor advisor) may also qualify and be included as part of the Mexican-American studies minor on a course-by-course basis.

Students interested in this minor should contact Dr. Manuel Grajales at manuel.grajales@unt.edu or Dr. ToniAnn Trevino at toniann.trevino@unt.edu.

Secondary Teacher Certification

History teacher certification

The College of Liberal Arts and Social Sciences encourages students to explore teaching at the secondary level as a career option. The student's academic advisor in the Dean's Office for Undergraduates and Student Advising in GAB, Room 220, can assist students with specific requirements for teacher certification in History. Upon completion of this program, students will be prepared to sit for the certification examinations in History.

All state certification requirements and information on required examinations are available on the web site of the State Board for Educator Certification (SBEC), www.tea.state.tx.us.

Required courses

- HIST 1050 - World History to the Sixteenth Century
- HIST 1060 - World History from the Sixteenth Century
- HIST 2610 - United States History to 1865
- HIST 2620 - United States History Since 1865
- HIST 3700 - Texas History
- HIST 4750 - Social Studies Teaching Methods

Upper-level history courses, 21 hours

21 semester hours of advanced work (3000- to 4000-level), with three courses in a single geographic area, at least one course in each of the remaining geographic areas, and two courses in a single theme.

Each student will choose a geographic focus area for his or her advanced course work by taking at least three courses in one of three groups:

- United States;
- Europe; or
- Africa, Asia, Latin America, and the Middle East.

Students must take at least one course from the other two geographic areas outside of their focus.

Each student will also select one of the following themes by taking two courses within that theme:

- culture and everyday life;
- empires and borderlands;
- food and the body;
- gender and sexuality;
- mass violence and atrocities;
- politics, policy and economics;
- premodern Europe and the Mediterranean;
- race and ethnicity;
- Texas, the South and the West; and
- war, military and society.

Students must finish a history course with a grade of C or better for it to count toward the BA in history with secondary education certification.

Education courses, 21 hours

- EDCI 3800 - Professional Issues in Teaching
- EDCI 3830 - Teaching/Learning Process and Evaluation
- EDCI 4060 - Content Area Reading
- EDCI 4070 - Teaching in a Multicultural Classroom
- EDCI 4108 - Student Teaching in the Secondary School
- EDCI 4118 - Student Teaching in the Secondary School
- EDCI 4840 - Instructional Strategies and Classroom Management

Additional requirements

See History, BA for additional course work and GPA requirements.

Students meet all GPA requirements to apply for state certification.

In order to progress through the required education courses, the student must make an application to the certification program in the College of Education's Educator Preparation Office in Matthews Hall, Room 119.

Undergraduate Academic Certificates

Africana Studies certificate

The Africana studies certificate offers undergraduate students an interdisciplinary curriculum that introduces and expands knowledge related to cultures and histories of African people throughout the Diaspora. Utilizing scholarly research, theoretical inquiry and policy analysis, UNT graduates will be prepared to impact their communities in ways that will promote social justice, anti-racism, inclusion, equity and mutual respect.

Students with questions about this certificate may contact Dr. Christopher Todd, Department of History (christopher.todd@unt.edu).

Requirements, 12 hours

Six hours selected from:

- HIST 3240 - African American History and Culture to 1865
- HIST 3250 - African American History and Culture Since 1865
- HIST 4580 - Africa to the Nineteenth Century

Six hours selected from:

- ANTH 3130 - African-American Anthropology
- ANTH 3400 - Peoples and Cultures of Africa
- ANTH 4550 - Race, Ethnicity and Identity
- CJUS 3500 - Inequality, Crime and Justice
- ECON 3150 - Economics of Discrimination
- EDCI 4070 - Teaching in a Multicultural Classroom

- ENGL 4260 - African American Literature
- ENGL 4280 - Africana Literature, Media and Culture
- ENGL 4285 - Africana Theory and Criticism
- GEOG 3750 - Geography of Contemporary Sub-Saharan Africa
- HIST 3240 - African American History and Culture to 1865
- HIST 3250 - African American History and Culture Since 1865
- HIST 4451 - African American History During Segregation Era
- HIST 4455 - History of Black Women in America
- HIST 4580 - Africa to the Nineteenth Century
- HIST 4830 - Rise and Fall of the Slave South
- HIST 4840 - Making of the Modern South
- HIST 4890 - Civil Rights and Black Power Movements in the U.S.
- LING 3010 - African American English
- MRTS 4520 - African American Film
- MUCM 3617 - Percussion Ensemble
- MUET 3050 - Music of Africa
- MUET 3060 - African-American Music
- MUET 3617 - African Music and Movement
- MUJS 3070 - History of Jazz
- PSCI 3105 - Political Economy of Race, Gender and Immigration
- PSCI 3106 - African-American Politics
- PSYC 4040 - Psychology of Race in the U.S.
- Other courses as approved by the Africana studies certificate advisors.

Food Studies certificate

The food studies certificate is an undergraduate academic program designed to help students acquire both broad and specific skills and training in the interdisciplinary field of food studies. Students can customize their certificate to best suit their individual career and intellectual goals. This certificate benefits students interested in pursuing careers in fields such as education, food science, food writing, hospitality and tourism, health services, conservation and environmental stewardship, museum studies, agriculture and many other areas.

Students interested in the food studies certificate should contact Dr. Michael D. Wise, Department of History (michael.wise@unt.edu).

Requirements

To earn a food studies certificate students must complete 12 hours at UNT, including 9 advanced credits, of coursework relevant to food studies.

Required course

3 hours from:

- HIST 3495 - United States Food History
- PHIL 3900 - Philosophy of Food

Plus three courses (9 hours)

Including, but not limited to, the following:

- ANTH 4520 - Food, Culture and Globalization
- BIOL 1142 - Microbes and Society
- HIST 4173 - Latin American Food History
- HIST 4275 - American Environmental History
- HIST 4276 - Animal Histories
- HIST 4405 - History of the Body
- HIST 4406 - Sickness and Health in U.S. History
- HIST 3495 - United States Food History
- HIST 4249 - Food, Sex, and Drugs in Middle Eastern History
- HMGH 1450 - Principles of Nutrition
- HMGH 3470 - Global Kitchen: A Culinary Journey
- JOUR 4230 - Arts and Culture Journalism
- KINE 3030 - Fundamentals of Sport Nutrition
- KINE 4300 - Exercise Leadership
- PHIL 3900 - Philosophy of Food
- WLLC 3310 - The Best of French Pop Culture

For approval of other courses, contact the food studies certificate advisor in the Department of History.

Medical Humanities certificate

The Medical Humanities Certificate bridges the gap between biomedicine and the cultural aspects of health by uncovering the ways that social and political structures shape experiences of illness and disability and even determine healthcare access and outcomes. The certificate trains students to mobilize skills from the liberal arts to scrutinize complex issues within the natural sciences and medicine. Such an interdisciplinary approach produces healthcare practitioners better prepared to grapple with the ethical complexities of modern medicine and, crucially, to communicate such intricacy to diverse stakeholders. By learning to apply the humanistic skills of interpretation, reflection, and subjectivity to subjects of medicine, students will enhance their ability to evaluate sources, analyze evidence, and formulate arguments. These skills are instrumental for developing fact literacy and combating the ongoing erosion of public trust in science, all of which are essential and necessary skills for competitive job candidates.

Students with questions about this certificate may contact Dr. Jakob Burnham, Department of History (Jakob.burnam@unt.edu).

Requirements

15 hours, including 9 advanced.

- HIST 3020 - Introduction to the Medical Humanities

Plus four courses

An additional four courses (12 hours) are chosen by the student; students may choose from, but are not limited to, the following list.

- ANTH 4200 - Health, Healing and Culture: Medical Anthropology
- ANTH 4220 - Anthropology in Public Health
- COMM 3220 - Health Communication (requires COMM 2020 as a prerequisite)

- ENGL 3110 - Writing and Rhetoric in the Humanities
- ENGL 4630 - Studies in Literature and Medicine
- GEOG 3120 - Medical Geography
- GEOG 4580 - GIS in Health
- HIST 3021 - History of Medicine, 1400 to Present
- HIST 3407 - Fitness Culture in U.S. History
- HIST 4405 - History of the Body
- HIST 4406 - Sickness and Health in U.S. History
- JOUR 4212 - Science, Health and Environmental Reporting
- PHIL 3160 - Philosophy of Death and Dying
- PHIL 3250 - Philosophy of Science
- PHIL 3440 - Bioethics
- SOCI 3120 - Sociology of Health and Illness
- SPAN 3550 - Spanish for the Medical Professions I (requires SPAN 2050 as a prerequisite)
- SPAN 3560 - Spanish for the Medical Professions II (requires SPAN 3550 as a prerequisite)

Tania Khalaf, Associate Chair

Faculty

Radio, television, film and digital media platforms play a significant role in society by providing both entertainment and information in a constantly changing world. The Department of Media Arts prepares students with a wide range of knowledge and skills for careers in traditional media (broadcasting, film production, editing, on-air talent, audience research, media management), newer media (writing and producing for social media and digital media platforms) and video game design and development (games studies, design, narrative development, art and animation).

Media Arts students engage in a curriculum that combines a liberal arts education with hands-on experience utilizing similar tools used by industry professionals. The Media Arts department equips students with the foundational principles, critical thinking, skills and opportunities they need to succeed in today's ever-changing media world. Courses offer students unique opportunities to learn from expert faculty members who are committed to preparing students for future careers in the media industry or academia.

Located within the thriving Dallas–Fort Worth media market (currently ranked 5th in the U.S.) the department frequently hosts professionals who serve as guest speakers and adjunct professors. The location within the DFW market offers numerous internship and part-time employment opportunities while students are pursuing their degrees.

The department offers two degrees:

- a Bachelor of Arts with a major in Media Arts (MRTS)
- a Bachelor of Arts with a major in Converged Broadcast Media (CBCM)

The College of Liberal Arts and Social Sciences offers a Bachelor of Science with a major in Game Studies and Design (GMSD) in collaboration with the Department of Media Arts.

The MRTS undergraduate major provides comprehensive hands-on experiences in media production along with courses devoted to writing, industry practices, broadcast and film history, digital media, film styles, genres and critical/cultural studies.

The CBCM undergraduate major provides extensive background in media convergence, web-based production of news and information, as well as courses devoted to covering sports, entertainment and politics, as well as interviewing and on-air performance.

The GMSD undergraduate major provides a robust foundation in game design, development, and storytelling, with courses focused on game art, animation, design principles, and game studies. Students gain hands-on experience in creating interactive projects while exploring industry practices, game history, player psychology, and narrative techniques.

With more than 1300 undergraduate students, Media Arts is one of the largest and most active programs in the College of Liberal Arts and Social Sciences. Students have the opportunity to work for our local television station, ntTV, or our radio station, KNTU. Students can also join a variety of film clubs, student-run organizations focused on peer mentorship, production opportunities and critical analysis.

The department's diverse faculty includes top research scholars and media practitioners with many years of experience. Faculty frequently publish monographs, anthologies, textbooks, and articles in top-tier journals and present research at top-ranked national and international conferences. Our creative faculty have produced multiple award-winning narrative films and documentaries that are screened in local, national, and international festivals. Students also gain expert knowledge from faculty who have years of professional experience working in the media industry.

Admission to the major

Students who are interested in becoming an MRTS, CBCM or GMSD major must fulfill some initial requirements and be advised by the advising office. For further information on admissions and requirements, see Media Arts, BA, Converged Broadcast Media, BA or Game Studies and Design, BS.

KNTU-FM

KNTU-FM 88.1 HD1 & HD2.

The University's radio station serves North Texas and Southern Oklahoma and is listed in Nielsen Audio Ratings for Dallas-Fort Worth, the 5th largest radio market in the nation. KNTU operates two radio stations 24 / 7 / 365 – 88.1 indie (alternative rock on FM 88.1 HD1 and 88.1indie.com) and KNTU The One (jazz on FM 88.1 HD2 and kntu.com). The station also operates the North Texas Streaming Network, an internet video streaming project of high school sports. All UNT students are eligible to work at any of KNTU's platforms to participate in creating content for radio, internet, and social media. There are a few paid, part time middle manager jobs; other students work to gain practicum/internship credit toward their degrees, and some are volunteers who gain invaluable training toward beginning a media career. More information is available at www.kntu.com.

North Texas Television

ntTV (North Texas Television) is a nationally recognized, award-winning student-run television operation. ntTV offers all UNT students the dynamic opportunity to produce, write, direct and broadcast their work across the DFW area. Content areas include news, sports, entertainment and marketing, as well as long-form live productions.

Organizations

The department participates actively as an institutional member of the Broadcast Education Association; the University Film and Video Association; the Texas Association of Broadcast Educators; the Society for Cinema and Media Studies; and the Radio, Television Digital News Association (RTDNA) student chapter.

Scholarships

Each year, the Department of Media Arts distributes scholarships to help undergraduate students pay the cost of their education. These funds -- from private individual donors, corporations, and foundations -- are for direct student support and do not have to be repaid. Scholarships are awarded to students based on qualifications specified by each award which include things like field of study, career interests, and academic merit. Applications are submitted via the Media Arts website and are reviewed by a committee of Media Arts faculty with awards announced at the end of each academic year. Scholarships are typically for amounts up to \$1,500 and the money is applied towards tuition in the Fall semester. The number and dollar amount of awards available each year depends on the total dollar amount of funding available.

The Alan and Beverly Albarran Scholarship is an award established by Dr. Alan Albarran, former professor and department chair in the Department of Media Arts, and his wife Beverly, to provide scholarships for undergraduate or graduate students in the Department of Media Arts who are pursuing an industry studies emphasis in their degree.

The Bill Mercer Endowment for Broadcast Media is a scholarship established by UNT alumnus Bill Mercer (M.A., 1966), the original "Voice of the Mean Green" and a member of the Texas Radio Hall of Fame, to support Media Arts students studying broadcast media or journalism.

The Bud Buschardt Memorial Scholarship is a scholarship in memory of Bud Buschardt who served as an adjunct professor in the Department of Media Arts for 46 years. Starting in 1963, he produced and hosted television and radio shows on WFAA and KVIL; and in 2010, he was inducted into the Texas Radio Hall of Fame. This scholarship is intended to honor Buschardt by providing an opportunity for Converged Broadcast Media (CBCM) students to pursue their passions and to create their own successful paths to the future. Applicants must be entering or currently in their junior year (completed at least 60 hours of coursework) at the time of application. If there are no eligible Converged Broadcast Media applicants, Media Arts majors will be eligible for consideration. This scholarship may not be awarded to a previous recipient.

The Cindy Coyle Memorial Scholarship is a scholarship in memory of Cindy Coyle, who spent her career working in marketing and promotions for DFW radio stations, to provide support for students with an expressed career interest in radio.

The Country Radio Broadcasters Scholarship is a scholarship for undergraduate students interested in a career in radio or a related field. Students must have a minimum GPA of 2.75 and have completed a minimum of 60 hours of coursework toward their degree at the time of application.

Department of Media Arts Executive Board Scholarship is a scholarship for undergraduate and graduate students in the department of Media Arts. Students must be enrolled for at least 12 hours (undergraduate) or at least 9 hours (graduate) of study in both the Spring and Fall semesters. Students must have completed at least 60 hours of coursework towards a degree at the time of application and have a minimum UNT GPA of 3.0.

The Edwin L. Glick Scholarship is a scholarship established by former UNT professor and Media Arts Department Chair Dr. Edwin Glick to encourage students to pursue careers in broadcasting, cable, and other related media industries that might develop in the future. Students must have completed at least 12 hours in Media Arts coursework at UNT and be enrolled as a full-time Media Arts student in the semester for which the scholarship was awarded. Students must have a minimum GPA of 3.0 and demonstrate interest in a career in broadcasting/cable such as production, sales, management, operations, or broadcast journalism, through appropriate courses, internships, extracurricular activities (e.g. KNTU or ntTV) or other industry-related employment. It is not the intent of this scholarship to support film production or video production except for news documentary.

The First Broadcasting Scholarship is a scholarship for students who have a demonstrated an interest in radio broadcasting as a career through participation with either KNTU or through off-campus internships. Students must have completed at least 60 hours of coursework and have a GPA of at least 2.5.

The Kathleen Woodby Scholarship was established by UNT alumna Kathleen Woodby for undergraduate students in the Department of Media Arts.

The Kurt D. Uglund Scholarship is a scholarship in memory of Kurt D. Uglund, a Department of Media Arts alumnus and former executive producer of the City of Plano's Television Network (PTN), to support undergraduate or graduate students in television production in the Department of Media Arts who demonstrate exceptional creativity.

The Mark Rybczyk Scholarship was established by Mark Rybczyk, a UNT alumnus who is a radio personality known as Mark "Hawkeye" Louis on the DFW radio station 96.3 KSCS, for undergraduate students studying radio, television and film. Rybczyk is a member of the Country Radio Hall of Fame, the Texas Radio Hall of Fame, winner of the Billboard Air personality of the Year, the Academy of Country Music DJ of the Year, and winner of the Marconi Radio Award in the category of Major Market Personality of the Year.

The Melanie Goodwin RTVF Scholarship provides support for Media Arts students in memory of former UNT student Melanie Goodwin.

Paramount Pictures Undergraduate Scholarship is an academic scholarship award to recognize excellence and promise in the undergraduate study and production of radio, television and/or film media at UNT.

Walter Deed Memorial Scholarship is a scholarship in honor of Walter P. Deed, chief video engineer in the Department of Media Arts from 2000-2007, to provide support for undergraduate students studying television engineering and who maintain a GPA of 3.0.

Westcott Foundation Scholarship is a fund to support undergraduate students in the Department of Media Arts who have demonstrated merit, motivation and talent with the means to complete their education at the University of North Texas.

Requirements

1. Applicants must meet minimum entrance and academic performance standards of the College of Liberal Arts and Social Sciences and the Department of Media Arts.
2. Applicants must be enrolled for at least 12 hours of undergraduate study in both the spring and fall semesters.
3. Applicants must be enrolled as full-time undergraduate majors in the Department of Media Arts.
4. Additional requirements specific to each award are available in the Scholarship section of the Department of Media Arts website.

Application

Applications are accepted via links in the Scholarship section of the Department of Media Arts website (mediaarts.unt.edu/scholarships) in the Spring semester after the call for applications is posted. Please refer to that website for the most up-to-date information, application instructions, and eligibility requirements.

Majors

Converged Broadcast Media, BA

In the Converged Broadcast Media program, you will receive a comprehensive education in media convergence, broadcast television, and their social media and Internet components. In addition, you will learn about live TV news broadcasting, live on-location production, sports, entertainment and political events coverage.

The Bachelor of Arts with a major in Converged Broadcast Media integrates a broad and thorough overview of the ever-changing electronic news media, with intermediate and advanced courses in writing and reporting for radio, television and the Internet; interviewing and performance; shooting and editing for television; television and radio news producing; news media analysis; electronic news management; plus classes in legal and ethical issues and covering cross-cultural communities. Students further

develop their skills through NTTV, KNTU-FM and their web sites. An optional certificate in television news producing is also available within the major.

Admission to the major and initial requirements

Note: Only Media Arts (MRTS) and Converged Broadcast Media (CBCM) majors can take MRTS Courses.

Degree requirements

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Arts degree as specified in the "University Core Curriculum" in the Academics section of this catalog and the College of Liberal Arts and Social Sciences requirements (excluding the foreign language requirement).

Major Requirements

Students must complete 42 hours in the major (at least 33 advanced), including:

Required courses

- MRTS 1330 - Foundations of Media Arts
- MRTS 2010 - Introduction to Media Arts Writing
- MRTS 2210 - Introduction to Media Arts Production
- MRTS 3500 - Video Photography, Editing and Reporting for Digital Media
- MRTS 3525 - Content Development for Digital Media
- MRTS 3560 - Interviewing and Performance for Electronic News
- MRTS 4320 - Media Law and Regulations
- MRTS 4455 - Media Ethics
- MRTS 4480 - Internship in Media Arts

Additional requirements

15 hours of advanced MRTS electives.

No more than 9 hours of MRTS practicum, internship or special problem courses may be applied to the 42 hours of MRTS courses required for the degree.

Other course requirements, 6 hours

Students must complete 6 hours of a foreign language, equivalent to 1010 and 1020 in one language, or demonstrate proficiency at the Elementary II (1020) level.

Minor

Optional.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information see an academic advisor in the College of Liberal Arts and Social Sciences.

Other requirements

CBCM majors must maintain a UNT GPA of 2.75. CBCM major students whose GPAs fall below 2.75 cannot enroll in any Media Arts classes until they return their UNT GPA to 2.75 or better.

A minimum 2.0 cumulative UNT GPA and a 2.75 major GPA is required to graduate. Only 12 hours of MRTS courses taken at other institutions may be applied toward the major.

Students majoring in Converged Broadcast Media are required to have a minimum grade of C in all MRTS courses to count towards the major. Students may have only two attempts for a grade of C or better for each required MRTS course.

Students must observe prerequisites for each MRTS course. If a student has not completed prerequisites for a course with a grade of C or better, the student is subject to administrative drop from the course without notice. Prerequisites are listed with individual course descriptions.

Students may register for only one section of a course at a time. Students registered for more than one section of a course will be dropped from all sections of that course without notice. The policy does not apply to courses such as special topics, which may bear the same course number but different topics and are therefore different courses.

Specific competency and departmental approval for internship, seminar and special problems courses are required.

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years, and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

Media Arts, BA

A Bachelor of Arts with a major in media arts provides a strong, theoretical education combined with hands-on experience utilizing the same tools used by industry professionals.

Admission to the major and initial requirements

Note: Only Media Arts (MRTS) and Converged Broadcast Media (CBCM) majors can take MRTS courses.

Degree requirements

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Arts degree as specified in the "University Core Curriculum" in the Academics section of this catalog and the College of Liberal Arts and Social Sciences degree requirements (excluding the foreign language requirement).

Major requirements

Students must complete 42 hours (at least 33 advanced) in the major, including:

Required courses

- MRTS 1330 - Foundations of Media Arts
- MRTS 2010 - Introduction to Media Arts Writing
- MRTS 2210 - Introduction to Media Arts Production

Production and performance, 6 hours

6 hours of advanced credit in production and performance courses selected from:

- MRTS 3210 - Audio Production
- MRTS 3220 - Multi Camera Studio Production
- MRTS 3230 - Film Style Production
- MRTS 3260 - Introduction to Level Design
- MRTS 3300 - Radio and Television Announcing
- MRTS 3330 - Sports Broadcasting I
- MRTS 3340 - Sports Broadcasting II

- MRTS 3400 - Intermediate Screenwriting
- MRTS 3482 - Radio Practicum
- MRTS 3501 - Television Practicum I
- MRTS 3502 - Television Practicum II
- MRTS 3525 - Content Development for Digital Media
- MRTS 3540 - Fundamentals of Motion Design
- MRTS 3560 - Interviewing and Performance for Electronic News
- MRTS 4140 - Advanced Film Production I
- MRTS 4150 - Cinematography
- MRTS 4165 - Podcasting
- MRTS 4210 - Advanced Audio Production
- MRTS 4400 - Advanced Film Production II
- MRTS 4405 - Documentary Production
- MRTS 4411 - Video Production Topics
- MRTS 4412 - Film Production Topics
- MRTS 4413 - Audio Production Topics
- MRTS 4500 - Advanced Screenwriting
- MRTS 4650 - Location Recording and Post Sound Production
- MRTS 4740 - Editing I
- MRTS 4745 - Editing II
- MRTS 4750 - Advanced Video Production
- MRTS 4755 - Virtual Studio Production
- MRTS 4760 - Documentary Preproduction
- MRTS 4810 - Directing Narrative Media
- MRTS 4820 - Producing and Managing Narrative Media

Industry studies, 6 hours

6 hours of advanced credit in industry studies courses selected from:

- MRTS 3350 - History of Broadcasting in Britain
- MRTS 3355 - Contemporary Broadcasting in Britain
- MRTS 3360 - Social Media Strategies
- MRTS 3410 - Intermediate Topics in Media Studies
- MRTS 3420 - Histories of Latin/x American Media
- MRTS 3615 - Understanding Media Industries
- MRTS 3620 - Digital Media and Society
- MRTS 3630 - Game Studies: Players, Culture and Industry
- MRTS 4320 - Media Law and Regulations
- MRTS 4360 - Global Media
- MRTS 4420 - Media Programming
- MRTS 4425 - Audience Research
- MRTS 4428 - Mobile Media
- MRTS 4430 - Media Management
- MRTS 4435 - Media Marketing and Branding
- MRTS 4440 - Media Sales
- MRTS 4445 - Media in the 21st Century
- MRTS 4450 - Topics in Media Industry Studies

- MRTS 4455 - Media Ethics
- MRTS 4465 - Writing for Television
- MRTS 4470 - Topics in Media Writing
- MRTS 4515 - Teen Media
- MRTS 4665 - Gender, Race and Digital Media
- MRTS 4670 - Media Economics
- MRTS 4675 - Media and Power in Latin America
- MRTS 4850 - Television News Producing

History or criticism, 6 hours

6 hours of advanced credit in history or criticism courses selected from:

- MRTS 3350 - History of Broadcasting in Britain
- MRTS 3410 - Intermediate Topics in Media Studies
- MRTS 3420 - Histories of Latin/x American Media
- MRTS 3445 - Video Game Histories
- MRTS 3450 - U.S. Radio History
- MRTS 3455 - U.S. Television History
- MRTS 3460 - Diversity in U.S. Cinema
- MRTS 3465 - American Film History
- MRTS 3470 - International Film History to 1945
- MRTS 3475 - International Film History from 1945
- MRTS 3610 - Film and Television Analysis
- MRTS 3620 - Digital Media and Society
- MRTS 3630 - Game Studies: Players, Culture and Industry
- MRTS 3640 - Scene Analysis
- MRTS 4125 - History and Theory of Film Remakes
- MRTS 4200 - Media Aesthetics and Design Thinking
- MRTS 4215 - British Cinema and Television
- MRTS 4220 - Post-War European Film
- MRTS 4225 - Women in Film
- MRTS 4230 - Affect, Emotion and the Movies
- MRTS 4235 - Masculinities in the Movies
- MRTS 4240 - Hitchcock Films
- MRTS 4245 - Documentary, Visual Anthropology and Immersive Storytelling
- MRTS 4250 - Cinema Beyond the West
- MRTS 4340 - History of the Documentary
- MRTS 4350 - Media Authors
- MRTS 4410 - Topics in Digital Media Studies
- MRTS 4415 - Topics in Film and Television Studies
- MRTS 4515 - Teen Media
- MRTS 4520 - African American Film
- MRTS 4530 - Gender and Sexuality in the Horror Film
- MRTS 4540 - Lesbian, Gay and Queer Film and Video
- MRTS 4550 - Cinema Verite
- MRTS 4570 - Game Genre: Adventure Games
- MRTS 4660 - Gender and Gaming

- MRTS 4665 - Gender, Race and Digital Media
- MRTS 4675 - Media and Power in Latin America

Additional requirements

15 hours of advanced MRTS electives.

No more than 6 hours of MRTS practicum, internship or special problem courses may be applied to the 42 hours of MRTS courses required for the degree.

Other course requirements, 6 hours

Students must complete 6 hours of a foreign language, equivalent to 1010 and 1020 in one language, or demonstrate proficiency at the Elementary II (1020) level.

Minor

Optional.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information, see an academic advisor in the College of Liberal Arts and Social Sciences.

Other requirements

MRTS majors must maintain a UNT GPA of 2.75. MRTS major students whose GPAs fall below this standard will be informed of their status by the Media Arts department and will not be able to take any classes in the Media Arts department until they return their UNT GPA to 2.75 or better.

A minimum 2.0 cumulative UNT GPA and a 2.75 major GPA is required to graduate. Only 12 hours of MRTS courses taken at other institutions may be applied toward the 42-hour requirement toward the major.

Students majoring in Media Arts are required to have a minimum grade of C in all MRTS courses to count toward the major. Students may have only two attempts for a grade of C or better for each required MRTS course.

Students must observe prerequisites for each MRTS course. If a student has not completed prerequisites for a course with a grade of C or better, the student is subject to administrative drop from the course without notice. Prerequisites are listed with individual course descriptions.

Students may register for only one section of a course at a time. Students registered for more than one section of a course will be dropped from all sections of that course without notice. The policy does not apply to courses such as special topics, which may bear the same course number but are different topics and are therefore different courses.

Specific competency and departmental approval for internship, seminar and special problem courses are required.

Undergraduate Academic Certificates

Certificate in Spanish Language Media

This certificate provides students with the precise skills to develop Spanish language media, as well as an understanding of the specific linguistic, economic, political, and historical contexts that underpin its global production. The electives allow students to pursue advanced study within one of four knowledge domains (Spanish Language & Bilingualism, Land & Natural Resources, Art & Aesthetics, and Politics & Society) in high demand for careers within Spanish language media industries. This certificate is only open to students majoring in MRTS or CBCM.

Certificate requirements, 15 hours (optional recommended internship)

Required courses

Students must complete the three following courses:

- MRTS 3420 - Histories of Latin/x American Media
- MRTS 4675 - Media and Power in Latin America
- MRTS 4850 - Television News Producing (when the television program is bilingual or in Spanish), or a different MRTS 4000-level course approved by the Certificate advisor.

Elective courses

Students must complete two courses (6 hours) from within one of the following knowledge domains:

Spanish Language & Bilingualism

- ASLP 2020 - Phonetics
- LING 2050 - The Language of Now: Pop Culture, Technology and Society
- LING 2070 - Language and Discrimination
- LING 3040 - The Politics of Language
- SPAN 3001 - Advanced Conversation for Non-Native Speakers
- SPAN 3002 - Advanced Conversation for Native/Heritage Speakers
- SPAN 3003 - Advanced Grammar
- WLLC 3000 - Linguistic Landscapes Around the World

Art & Aesthetics

- ARTH 4818 - Topics in Latin American Art
- ENGL 2351 - Mexican American Literature
- ENGL 4250 - Latinx Literature
- ENGL 4255 - Mexican American Non-Fiction and Criticism
- MUET 3080 - Studies in Latin-American Music
- PHIL 4775 - Latin American Philosophy
- SPAN 3180 - Latin American Culture Through Film
- SPAN 4450 - Contemporary Spanish Culture Through Cinema
- THEA 4370 - Contemporary Latinx Theatre

Land & Natural Resources

- ANTH 4400 - Environmental Anthropology
- EADP 2020 - Images of Disasters in Film and Media
- EADP 4060 - Emerging Technology and Disasters
- GEOG 3770 - Latin America: Geography and Globalization
- PHIL 2500 - Environment and Society
- PHIL 4740 - Environmental Justice

Politics & Society

- ECON 3150 - Economics of Discrimination
- ECON 4855 - U.S.-Mexico Economic Relations
- HIST 3150 - Historical and Cultural Development of the Mexican-American Community
- HIST 4170 - History of Tejanos/as
- PHIL 4740 - Environmental Justice
- PSCI 3101 - Latino Politics
- PSCI 3102 - U.S. Immigration Policy
- PSCI 3611 - Politics of Central America and the Caribbean

- PSCI 3701 - Politics of Mexico
- PSCI 3702 - Latin American Politics

*Note: Only SPAN 3001 and SPAN 3002 are taught in Spanish. All other electives are taught in English.
All required courses are in English.

Digital Media Studies certificate (MRTS)

In this certificate program, students learn to utilize and analyze a variety of digital media tools for the purposes of communication, collaboration and research, and to develop social, political, academic and professional networks. The certificate is interdisciplinary; students must take the three core courses from MRTS, COMM and TECM. Applicable electives may be taken from any department with permission.

Certificate requirements, 15 hours

Students may receive a certificate in digital media studies by successfully completing the following courses with a grade of B or higher.

Required courses, 9 hours

- COMM 3420 - Communication and New Technology
- MRTS 3620 - Digital Media and Society
- TECM 1500 - New Media Experience

Electives, 6 hours

Select from the following courses:

- COMM 3820 - Social Media Perspectives
- COMM 4320 - Communications and Virtual Gaming
- JOUR 3270 - Media Entrepreneurship and Innovation
- JOUR 4270 - Strategic Social Media
- MRTS 3360 - Social Media Strategies
- MRTS 3445 - Video Game Histories
- MRTS 3525 - Content Development for Digital Media
- MRTS 3630 - Game Studies: Players, Culture and Industry
- MRTS 4415 - Topics in Film and Television Studies (when taught as "Media Genres/Authors - Video Game Authors")
- MRTS 4428 - Mobile Media
- MRTS 4450 - Topics in Media Industry Studies (when taught as "Digital Distribution")
- MRTS 4665 - Gender, Race and Digital Media
- Internship option (COMM 4800, MRTS 4480 or TECM 4920) with approval from undergraduate advisor
- Other courses approved by undergraduate advisor

Game Studies and Design certificate

The game studies and design certificate is a 15-hour, interdisciplinary certificate. Developed in coordination with Dallas-Fort Worth area game studios, the certificate introduces students to contemporary ideas in game studies, design and project leadership experiences.

Requirements, 15 hours

9 hours in foundational courses are required.

- CSCE 1010 - Discovering Computer Science
- ENGL 3225 - Games, Play, and Stories
- MRTS 3630 - Game Studies: Players, Culture and Industry

6 hours chosen from:

6 hours, with at least 3 hours outside the student's major, chosen from:

- COMM 3720 - Small Group Communication
- COMM 3920 - Organizational Communication
- COMM 4320 - Communications and Virtual Gaming
- ENGL 3140 - Beginning Fiction Writing
- ENGL 3203 - Rhetorical Play: Writing and Rhetoric in Video Games
- ENGL 3500 - Beginning Game Writing Workshop: Storytelling Through Narrative Design
- ENGL 4140 - Advanced Narrative Design for Gaming
- ENGL 4680 - Game Narratives as Literature
- JOUR 3250 - Game Design for Journalism
- MRTS 3250 - Introduction to Game Design
- MRTS 3445 - Video Game Histories
- MRTS 3400 - Intermediate Screenwriting
- MRTS 4350 - Media Authors (when taught as "Video Game Authors")
- MRTS 4465 - Writing for Television
- MRTS 4660 - Gender and Gaming
- MRTS 4740 - Editing I
- Other courses as approved in consultation with the program director

Media Management certificate

This certificate is designed to provide students interested in non-production careers a credential that will be useful in seeking entry-level employment in the electronic media industry.

Required courses, 12 hours

- MRTS 4430 - Media Management
- MRTS 4670 - Media Economics

Plus two courses selected from

- MRTS 4320 - Media Law and Regulations

- MRTS 4360 - Global Media
- MRTS 4420 - Media Programming
- MRTS 4450 - Topics in Media Industry Studies
- Or other course approved by program advisor

Television News Producing certificate

This certificate program is open to students majoring in MRTS or CBCM. Interested students must apply and be admitted into the restricted television news producing certificate program. Students must complete 18 hours in MRTS courses as described below. An internship in a professional news operation (radio, television, web, etc.) is recommended to supplement the program, but is not required for completion of the certificate.

MRTS courses, 15 hours

- MRTS 1330 - Foundations of Media Arts
- MRTS 2010 - Introduction to Media Arts Writing
- MRTS 2210 - Introduction to Media Arts Production
- MRTS 3500 - Video Photography, Editing and Reporting for Digital Media
- MRTS 4850 - Television News Producing

Elective, 3 hours

Plus one 3-hour elective course selected from:

- MRTS 3525 - Content Development for Digital Media
- MRTS 4320 - Media Law and Regulations
- MRTS 4430 - Media Management
- MRTS 4450 - Topics in Media Industry Studies

David M. Kaplan, Chair

Matthew Lampert, Undergraduate Advisor

Faculty

The great virtue of philosophy is that it teaches not what to think, but how to think. It is the study of meaning, of the principles underlying conduct, thought and knowledge. The skills it hones are the ability to analyze, to question orthodoxies and to express things clearly. However arcane some philosophical texts may be ... the ability to formulate questions and follow arguments is the essence of education.... Philosophy is, in commercial jargon, the ultimate "transferable work skill."

— The Times, London, August 15, 1998

Philosophy, from the Greek words "philein" and "sophia" translated as "love of wisdom", has always been an important part of higher education. In the early Greek proto-universities, the Academy of Plato and the Lyceum of Aristotle, philosophy was the very foundation of all study. It has been studied as an end in itself and in its relation to other areas. Most specialized sciences find their origins in philosophical questions. It is also an excellent preparation for studies in graduate and professional schools.

Studying philosophy develops analytic skills and problem-solving abilities that are extremely useful in almost any academic or scientific field and in a variety of professional careers, such as journalism, business, law, medicine and government. It provides insight into our cultural heritage through courses in the history of ideas and critical insight into many other fields in the humanities and the sciences through such courses as ethical theories, social-political philosophy, philosophy of technology, and philosophy of ecology. Philosophy seeks to teach students methods of thinking about perennial questions—such as 'what is truth' and 'what is beauty'— and about the timeless themes of goodness and wisdom.

The study of religions is also an important part of higher education. Religions are an integral part of our history, social life, politics, economy, foreign policy and domestic interactions. The study of religions exposes students to the beliefs, practices and histories of various religious traditions and analyzes their significance to societies. It also provides the opportunity for inter-religious comparison and evaluation. It's an interdisciplinary major, with courses from many departments, such as philosophy, history, anthropology, sociology, political science, art history, English and music.

The study of religions helps students think and write critically, engage in big questions about worldviews, and apply disciplinary knowledge to local and global issues. It equips students for employment in the public, private and nonprofit sectors including medicine, law, business, publishing, social service and teaching. This major is also excellent preparation for graduate and professional schools.

Pre-theology and pre-seminary

Students intending to pursue post-baccalaureate work in seminaries or divinity schools should consult with the undergraduate advisor of the Department of Philosophy and Religion.

Scholarships and financial aid

A \$500 award is given to the John Kimmey Memorial Scholar in the spring semester. The scholar is selected by the department and is the honoree at the Honors Day convocation.

The Samuel and Mabel Danford Scholarship in Religion awards \$1,000 to one student every fall term. A student must be a religion major to apply. Inquiries concerning the scholarship should be directed to philosophy@unt.edu.

A scholarship in honor of Richard Owsley provides an annual award of \$500 to a recipient who submits and wins an essay competition held each spring. The topic of the essay should fall within the scope of continental philosophy.

Majors

Philosophy, BA

A Bachelor of Arts with a major in philosophy involves the study of the history of Western and non-Western philosophy and religion. Our coursework will provide you not only insight into the world's cultural heritage, but also into every other field of study in the sciences and humanities.

Degree requirements

The following requirements must be satisfied for a Bachelor of Arts with a major in philosophy.

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Arts degree as specified in the University Core Curriculum in the Academic policies section of this catalog and the College of Science requirements.

Major requirements

The major requires completion of 33 hours in philosophy including:

- PHIL 1050 - Introduction to Philosophy
or
- PHIL 1400 - Ethics and Society
or
- PHIL 1900 - Philosophy of Art
or
- PHIL 2500 - Environment and Society
or
- PHIL 2600 - Ethics in Science

- PHIL 2050 - Logic and Critical Thinking
or
- PHIL 3300 - Symbolic Logic

- PHIL 3310 - Ancient Greek Philosophy

Religion, BA

With a Bachelor of Arts with a major in religion, you gain a thorough understanding of the beliefs, practices and histories of multiple religious traditions; you learn to appreciate the perspectives of others and the complexity of global issues; and you improve your oral and written communication skills.

Degree requirements

The following requirements must be satisfied for a Bachelor of Arts with a major in religion.

Hours required/general college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Arts degree as specified in the University Core Curriculum in the Academic policies section of this catalog and the College of Liberal Arts and Social Sciences requirements.

Major requirements

Majors must complete 11 courses/33 hours of credit.

Theoretical approaches, 3 hours

- ANTH 4751 - Culture, Religion and Ritual
- PHIL 3600 - Philosophy of Religion
- SOCI 3700 - Sociology of Religion

Christianity, 3 hours

- HIST 4217 - Jew, Greek and Roman: Backgrounds of Early Christianity
- PHIL 3500 - Christianity and Philosophy
- PHIL 3520 - Early Christian Thought

Judaism, 3 hours

- PHIL 3050 - Judaism and Religious Diversity
- PHIL 3510 - Hebrew Bible
- PHIL 3530 - Kabbalah: Jewish Mysticism, Myth and Magic
- PHIL 3540 - Judaism and Philosophy

Islam, 3 hours

- HIST 3450 - Islam and its Empires
- HIST 3460 - Modern Middle Eastern History
- PHIL 3570 - Islam and Philosophy

South Asian religions, 3 hours

- ANTH 3700 - Peoples and Cultures of South Asia
- HIST 4610 - Contemporary South Asia
- PHIL 3620 - Hinduism
- PHIL 3630 - Jainism

East Asia religions, 3 hours

- PHIL 3670 - Chinese Philosophy
- PHIL 3680 - Buddhism, Daoism, Shintoism

Religion and history, 3 hours

- HIST 3308 - Ancient Israel
- HIST 3550 - Imperial China
- HIST 3570 - Japanese History
- HIST 4008 - Ancient Religion and Magic
- HIST 4218 - Early Medieval Europe, ca. 312–1095
- HIST 4219 - Late Medieval Europe, 1095 to 1400
- HIST 4230 - The Age of the Reformation
- HIST 4290 - Intellectual, Cultural and Social History of Medieval and Early Modern Europe
- HIST 4315 - History of Anti-Semitism from Ancient Times to the Present
- HIST 4462 - Religion in American History

Interreligious Engagement, 3 hours

- HIST 4215 - Jews Under Greek and Roman Rule
- HIST 4223 - Crusade and Jihad
- HIST 4240 - Nationalism, Zionism and Islamism in Modern Middle Eastern History
- HIST 4246 - Imperialism in the Modern Middle East
- PHIL 2070 - World Religions
- PHIL 3140 - Religion and American Society

Current issues, 3 hours

- PHIL 3640 - Gender and Christianity
- PHIL 3650 - Religion and Science
- PHIL 3660 - Religion and the Environment
- PSCI 3650 - Middle East Politics
- PSCI 4150 - Religion and Politics in the United States

Advanced electives, 6 hours

Students must take two advanced electives, either from the above groups of courses or any of the following approved electives:

- ANTH 3110 - Indigenous Peoples of North America
- ARTH 4804 - Medieval Art
- ARTH 4805 - Topics in Medieval Art
- ARTH 4825 - Topics in Islamic and/or Middle Eastern Art
- ENGL 3370 - The Bible as Literature
- ENGL 4270 - Modern Jewish Literature
- ENGL 4440 - Milton
- ENGL 4660 - Literature and the Holocaust
- HIST 3762 - Rome: The Biography of a City
- HIST 3770 - Ancient and Medieval Women, Gender and Sexuality
- HIST 4390 - The Holocaust, 1933–1945
- HIST 4435 - American Jewish Experience
- HIST 4475 - Jewish Women in Modern America
- MUET 3090 - Music of India and Pakistan
- MUMH 4800 - Nazism, Judaism and the Politics of Classical Music in Germany
- MUMH 4810 - Jews, Judaism, Anti-Semitism and Opera
- PHIL 3160 - Philosophy of Death and Dying
- PHIL 3320 - Medieval Philosophy
- PHIL 3550 - Jewish Business Ethics
- PHIL 3960 - Topics in Religion
- PHIL 4500 - Existentialism
- THEA 4395 - Theatre and the Holocaust
- WLLC 3400 - The Holocaust and Film

Other course requirements

None.

Minor

Optional.

Other requirements

A minimum grade of C is required for all courses counting toward the Bachelor of Arts with a major in religion. Students majoring in religion must contact the Department of Philosophy and Religion Director of Undergraduate Studies to prepare their degree audits.

Grad Track Options

Philosophy, BA with grad track option leading to Philosophy, MA

Admission requirements

1. Applicants for the grad track option must be students in the UNT College of Liberal Arts and Social Sciences pursuing the Bachelor of Arts in philosophy degree.
2. Students may apply for the grad track option during their junior year and must have completed at least 75 credit hours at the time of application to grad track.
3. Minimum of 3.5 cumulative GPA required at the time of application submission.
4. The student will provide two recommendation forms from philosophy and religion faculty members who can evaluate the student's ability to complete graduate level work.
5. The application will be reviewed by the philosophy and religion curriculum committee and the undergraduate and graduate advisors.

Requirements

Students in the grad track program may select up to 6 hours of 5000-level PHIL courses to fulfill the 6 hours of advanced philosophy courses required for the BA degree in Philosophy. Students may select the remaining courses (up to 12 hours total) from 5000-level PHIL courses chosen to align with the required courses for the major in Philosophy. These courses can be comprised from the following Groups. If none of these courses are available, the student may select suitable alternatives with approval from the Director of Graduate Studies and the Director of Undergraduate Studies.

Group A - Environmental Philosophy

- PHIL 5000 - Environmental Ethics (for PHIL 4700) or
- PHIL 5010 - Seminar in the Philosophy of Ecology (for PHIL 4450) or
- PHIL 5700 - Environmental Philosophy (for PHIL 4740) or
- PHIL 5800 - Philosophies of Climate Change (for PHIL 3475)

Group B - History of Philosophy

- PHIL 5100 - Ancient Greek Philosophy (for PHIL 3310) or
- PHIL 5200 - Modern European Philosophy (for PHIL 3330) or
- PHIL 5250 - Topics in the History of Philosophy or
- PHIL 5900 - Special Problems

Group C - Normativity and Values

- PHIL 5150 - Feminist Philosophy (for PHIL 4150)
- PHIL 5300 - Social and Political Philosophy (for PHIL 3120) or
- PHIL 5400 - Seminar in Ethical Theory (for PHIL 3400) or
- PHIL 5500 - Philosophy of Science and Technology (for PHIL 3450)

Group D - Philosophy of Religion

- PHIL 5600 - Philosophy of Religion (for PHIL 3600) or
- PHIL 5650 - Asian Philosophies and Religions in Practice (for PHIL 3620)

All remaining courses for Philosophy, BA must be completed.

Note

Student progress will be monitored on a semester-by-semester basis by the directors of graduate and undergraduate studies. Students must meet with each of the directors and must maintain a 3.0 GPA in the graduate coursework. Students must complete the bachelor's degree prior to being fully admitted to the MA in philosophy. A student can take a maximum of 12 hours of graduate courses through the grad track pathway.

Minors

Environmental studies minor

The minor in environmental studies is interdisciplinary and requires 18 hours (6 classes): at least two classes in Philosophy, and up to four from a list of departments including ANTH, BIOL, ECON, ENGL, GEOG, HIST, HLTH, SOCI, WGST, and more.

The Department of Philosophy and Religion Undergraduate Advisor may approve courses that are not on the pre-approved list, such as topics courses that address environmental issues.

Complete 18 hours, including 6 advanced, from the following:

At least two courses must be from the Department of Philosophy and Religion and at least two from other departments from the list of pre-approved classes.

Any courses not selected from the list must be approved by the Philosophy and Religion undergraduate advisor.

- ANTH 4400 - Environmental Anthropology
- BIOL 1132 - Environmental Science
- BIOL 1142 - Microbes and Society
- BIOL 2140 - Principles of Ecology
- BIOL 2251 - Biodiversity and Conservation of Animals
- BIOL 3160 - Conservation Biology
- BIOL 3170 - Plants and Human Society
- EADP 2030 - Climate Change Resilience
- EADP 4015 - Flood Plain Management
- ECON 4440 - Economics of Natural Resources and Environment
- ENGL 4650 - Literature and the Environment
- GEOG 1710 - Earth Science
- GEOG 2170 - Culture, Environment and Society
- GEOG 2180 - Geosystems, Environment and Society
- GEOG 3200 - Sustainability
- GEOG 3800 - Weather and Climate
- GEOG 4250 - Climatology
- GEOG 4260 - Oceanography
- GEOG 4420 - Capitalism, Nature and Climate Change
- GEOL 1610 - Introduction to Geology
- GEOL 3010 - Environmental Geology
- GEOL 3020 - Historical Geology
- GEOL 3030 - Earthquakes and Volcanoes
- HIST 4275 - American Environmental History
- HIST 4276 - Animal Histories
- HLTH 1570 - Environmental Health and Safety
- HLTH 4350 - Environmental Community Health
- HMGD 2810 - Introduction to International Sustainable Tourism
- HMGD 2850 - Introduction to Agritourism
- PHIL 2500 - Environment and Society
- PHIL 3475 - Philosophy of Climate Change
- PHIL 3660 - Religion and the Environment
- PHIL 3850 - Philosophy of Animals
- PHIL 3900 - Philosophy of Food
- PHIL 4053 - Introduction to Subantarctic Biocultural Conservation
- PHIL 4054 - Tracing Darwin's Path
- PHIL 4200 - Science, Technology and Society
- PHIL 4450 - Philosophy of Ecology
- PHIL 4650 - Philosophy of Water
- PHIL 4700 - Environmental Philosophy
- PHIL 4740 - Environmental Justice

- PUBH 3025 - Environmental Health
- SOCI 4170 - Environmental Sociology
- WGST 4250 - Gender and Sustainable Development

Jewish Studies minor

A minor in Jewish studies requires 18 hours (6 courses) from the approved list.

Jewish studies minor courses

Requires 18 hours, including 6 advanced hours, chosen from the following. Additional courses must be approved by the Jewish studies advisor.

- ENGL 4270 - Modern Jewish Literature
- ENGL 4660 - Literature and the Holocaust
- HIST 3460 - Modern Middle Eastern History
- HIST 3470 - History of the Israeli-Palestinian Conflict
- HIST 4215 - Jews Under Greek and Roman Rule
- HIST 4216 - Rome's Eastward Expansion: From the Punic Wars to the Jewish Wars
- HIST 4217 - Jew, Greek and Roman: Backgrounds of Early Christianity
- HIST 4240 - Nationalism, Zionism and Islamism in Modern Middle Eastern History
- HIST 4247 - A History of Jews in the Middle East
- HIST 4250 - Modern Middle Eastern Diasporas
- HIST 4315 - History of Anti-Semitism from Ancient Times to the Present
- HIST 4320 - Anti-Semitism in Europe, French Revolution to Present
- HIST 4385 - Nazi Germany
- HIST 4390 - The Holocaust, 1933–1945
- HIST 4395 - The State of Israel
- HIST 4435 - American Jewish Experience
- HIST 4475 - Jewish Women in Modern America
- JOUR 4240 - Comparative International Media Systems
- MUMH 4800 - Nazism, Judaism and the Politics of Classical Music in Germany
- MUMH 4810 - Jews, Judaism, Anti-Semitism and Opera
- PHIL 2070 - World Religions
- PHIL 3050 - Judaism and Religious Diversity
- PHIL 3120 - Social and Political Philosophy
- PHIL 3320 - Medieval Philosophy
- PHIL 3510 - Hebrew Bible
- PHIL 3515 - David, Saul and Solomon: The Early Israelite Monarchy
- PHIL 3525 - Rabbinic Judaism
- PHIL 3530 - Kabbalah: Jewish Mysticism, Myth and Magic
- PHIL 3535 - Classical Jewish Thought: The 13 Principles of Faith
- PHIL 3540 - Judaism and Philosophy
- PHIL 3550 - Jewish Business Ethics
- PSCI 3650 - Middle East Politics
- PSCI 3700 - Area Politics
- PSCI 4850 - Critical Issues in World Politics

- THEA 4395 - Theatre and the Holocaust
- WLLC 3400 - The Holocaust and Film

Additional information

Other courses may also qualify if approved by the Jewish studies advisor. For more information or to sign up for a minor in Jewish studies, contact jewish-studies@unt.edu.

Philosophy minor

A minor in philosophy consists of 18 semester hours, including 9 advanced hours.

Religion minor

A minor in religion consists of 18 semester hours from the Departments of Philosophy and Religion, Anthropology, History, and English. 9 hours must be advanced (3000 or 4000-level) courses, and 9 hours must be PHIL courses. Any courses not selected from the approved list must be approved by the Department of Philosophy and Religion undergraduate advisor.

Undergraduate Academic Certificates

Jain Studies certificate

A certificate in Jain studies will provide specialized knowledge of the Jain religious tradition in the context of the history and culture in which it developed.

Requirements

The certificate in Jain studies requires 12 semester hours, including 9 advanced, selected from a list of approved courses.

Required courses

- PHIL 3620 - Hinduism
- PHIL 3630 - Jainism

6 hours from the following:

- ANTH 3700 - Peoples and Cultures of South Asia
- ARTH 4824 - Topics in Asian Art (may be repeated for credit as topics vary)
- HIST 4605 - History of South Asia, 1757–1947
- HIST 4610 - Contemporary South Asia
- MUET 3090 - Music of India and Pakistan
- PHED 1260 - Yoga (1 hour)
- PHIL 3660 - Religion and the Environment
- Other courses may be approved by the Jain studies advisor.

Additional information

For additional information, contact the Jain studies advisor, Dr. Leah Kalmanson, or visit the Jain studies website, jainstudies.unt.edu.

Jewish Studies certificate

The Jewish studies certificate is an undergraduate academic certificate that enables students the flexibility to pursue Jewish studies without commitment to the full minor. The required course work in Jewish studies promotes interdisciplinary work which will allow students to pursue topics within Jewish studies that are most relevant to their career paths and to gain knowledge of the religion, cultures and historical experiences of the Jewish people.

To earn a certificate in Jewish studies, students must complete 12 hours of Jewish studies courses with a grade of C or above. At least nine hours must be upper-division 3000- and 4000-level courses. Students may choose these courses from the entirety of the Jewish studies course offerings (listed on our web site, www.jewishstudies.unt.edu) in at least two departments. Three hours of internship credit can be accepted after approval by the director.

For more information or to sign up for the certificate, contact jewish-studies@unt.edu.

John Ishiyama, Chair

Faculty

Department courses meet the needs of both undergraduate and graduate students preparing to enter national, state and local government employment; public and private foreign service; law; politics; public and private research; writing and reporting of public affairs and political science; and government and social science teaching.

Pre-law information

UNT annually prepares many students to enter law school. To be competitive with nationally recognized law schools, a grade point average of 3.5 or higher is recommended, and a GPA of 3.0 or higher is recommended for application to any law school. While many students undertake a liberal arts degree, law schools place important emphasis on the diversity of their student body and seek persons from different backgrounds, including the natural sciences. Consequently, there is no required pre-law program of courses, and students from any major are encouraged to consider law school; however, UNT offers an array of courses that will help prepare students for law school.

Future law school students should take courses that emphasize writing and oral skills; analytical reasoning; reading comprehension and integration of multiple texts; and logical reasoning. Pre-law students may wish to consider a certificate of legal studies (contact the department for more information). Pre-law students should take the Law School Admission Test (LSAT) during the summer before or fall term/semester of their senior year. Students should plan to attend a pre-law orientation session early in their career (freshman or sophomore year) at UNT. For more information, check www.cas.unt.edu/advising/prelaw/ or send inquiries to prelaw@unt.edu.

Political science requirement

The university may not award a baccalaureate degree or a lesser degree or academic certificate unless the student has completed 6 hours of credit in American government that include consideration of the Constitutions of the United States and Texas. The university may determine that a student has met the requirement in whole or in part on the basis of credit transferred from another accredited college or upon successful completion of an advanced standing examination. Completion of 12 semester hours of upper division ROTC courses may be substituted for PSCI 2305. The student may satisfy part (3 hours) or all of the 6-hour political science requirement by credit through examination.

Global learning programs

The Department of Political Science is home to several global learning programs. Students may participate in the global learning program in London, where courses on British politics, British legal systems, European politics and terrorism have been taught. Students also meet with members of the British Parliament, key leaders of British political parties, cabinet ministers, and judges and practitioners in the British legal system. The summer program in The Hague, Netherlands, brings students to the International Criminal Tribunal for the former Yugoslavia where they study international law and attend sessions of the court. Students also meet with judges, members of the prosecutor's office and other top officials.

Degree audits

During the sophomore year of enrollment, the student should make a degree audit. The student must meet with the departmental advisor, with whom an advisory sheet is made. Advisory sheets are then sent to General Academic Building, Room 220, for the completion of the degree audit. The process should be completed in time for the next registration period.

Pender Scholars

The department annually awards two \$1,000 scholarships based on merit to incoming students (fall term) who declare their intention to major in political science. The awardees are known as Pender Scholars in honor of the first chair of the political science department, J.W. "Dad" Pender.

High school seniors must rank in the top quarter of their class and have a score of at least 1100 on the SAT (or its equivalent). Transfer students must have a 3.5 grade point average and a score of at least 1100 on the SAT (or its equivalent). Application deadline is April 1; awards are announced September 15. Contact the undergraduate advisor in Wooten Hall, Room 141, for more information.

Majors

Latino and Latin American Studies, BA

The BA with major in Latino and Latin American Studies (LLAS) examines the anthropology, culture, economics, history, language, literature, politics, sociology and creative accomplishments of Latinos in the US. This diverse population includes people who trace their heritage to Cuba, El Salvador, Guatemala, Mexico, Nicaragua, Puerto Rico, and many other Latin American and Caribbean nations. Students take four required substantive classes (12 hours), four classes (12 hours) in two of

three elective areas and also complete either an internship and/or senior research paper (6 hours). LLAS will prepare students to be more competitive in the increasingly challenging and diverse workforce environment.

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor's degree as specified in the University Core Curriculum in the Academic policies section of this catalog and the College of Liberal Arts and Social Sciences requirements.

Major requirements

A minimum of 30 hours is required in the major, including:

Required courses, 18 hours

- ANTH 3140 - Latinos in the U.S.
- ENGL 4250 - Latinx Literature
- HIST 3150 - Historical and Cultural Development of the Mexican-American Community

- PSCI 3101 - Latino Politics
OR
- PSCI 3102 - U.S. Immigration Policy

- 6 hours from:
 - PSCI 4953 - Capstone Internship
OR
 - PSCI 4954 - Research Capstone

Electives, 12 hours

Plus four classes (12 hours) in two of three elective areas:

Country of Origin Studies

- ARTH 4820 - Pre-Columbian Art of Mesoamerica
- ANTH 3210 - Meso America
- BUSI 4700 - Topics in International Business Practices and Policies (when topic is "Mexican Business Practices and Policies")
- ENGL 4255 - Mexican American Non-Fiction and Criticism
- HIST 4150 - Mexican Immigration and the Chicano Community
- HIST 4155 - Mexican American Autobiography
- HIST 4171 - Latin America: The Colonial Experience, 1492–1821
- HIST 4172 - Modern Latin America: 1810-Present
- HIST 4180 - Colonial Mexico and the Spanish Southwest
- HIST 4190 - Mexico, 1810–Present
- PSCI 3701 - Politics of Mexico
- PSCI 3702 - Latin American Politics
- SPAN 3140 - Mexican Civilization

- SPAN 4010 - Aspects of Contemporary Mexican Culture

Culture and Humanities

- ENGL 4825 - The Literature of Texas and the Southwest
- ENGL 3920 - Ethnic American Literatures
- HIST 3200 - The Spanish Frontier in North America
- JOUR 4250 - Race, Gender and the Media: A Methods Approach
- SOCI 2010 - Race, Class, Gender and Ethnicity or
- WGST 2420 - Race, Class, Gender and Ethnicity
- SOCI 2070 - Introduction to Race and Ethnic Relations
- SOCI 3540 - Racial and Ethnic Minorities
- SPAN 3110 - Discovery of Hispanic Literature
- SPAN 3140 - Mexican Civilization
- SPAN 3180 - Latin American Culture Through Film
- SPAN 4010 - Aspects of Contemporary Mexican Culture
- SPAN 4385 - Hispanic Culture in the United States
- THEA 4370 - Contemporary Latinx Theatre

Politics and Public Policy

- ECON 3150 - Economics of Discrimination
- HIST 4160 - Chicano Political History: 19th and 20th Century
- PSCI 3101 - Latino Politics
- PSCI 3102 - U.S. Immigration Policy
- PSCI 3103 - U.S. Immigration Politics
- PSCI 3104 - Race and Ethnic Politics
- PSCI 3105 - Political Economy of Race, Gender and Immigration
- PSCI 3701 - Politics of Mexico
- PSCI 3702 - Latin American Politics
- PSCI 3703 - Security in Latin America
- PSCI 3704 - U.S.-Latin American Relations
- PSCI 4650 - Comparative Public Policy
- PSCI 4670 - Third World Politics
- PSCI 4700 - Topics in Comparative Politics (when topic is "Politics and Issues of Development")
- PSYC 4849 - Topics in Psychology (when topic is "Psychology of Race in the United States")
- SOCI 3540 - Racial and Ethnic Minorities

Minor

Students who wish to earn a minor are encouraged to choose business marketing or management, public administration, criminal justice or international studies.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information, see an academic advisor in the College of Liberal Arts and Social Sciences.

Other requirements

A minimum grade of C is required for an LLAS course to count toward the major.

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years, and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

Political Science, BA

A Bachelor of Arts with a major in political science combines cutting-edge research with award-winning teaching to ensure your academic and career goals are met. Our courses provide a deep understanding of relevant issues in local, national and international governments.

Degree requirements

The following requirements must be satisfied for a Bachelor of Arts with a major in political science.

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Arts degree as specified in the University Core Curriculum in the Academic policies section of this catalog and the College of Liberal Arts and Social Sciences requirements.

Major requirements

36 hours in political science

Political science majors must complete 36 hours in political science:

- PSCI 2306 - US and Texas Constitutions and Institutions
or
- PSCI 2316 - Honors U.S. and Texas Constitutions and Institutions

- PSCI 2305 - US Political Behavior and Policy
or
- PSCI 2315 - Honors US Political Behavior and Policy

- PSCI 3300 - Political Science Research Methods
- 27 advanced hours, including at least one advanced course each in three of the listed areas of study; and completion of either PSCI 4951, PSCI 4952, PSCI 4953 or PSCI 4954.

Advanced courses

Advanced courses are offered in six areas of study:

Field A, American government and politics

- PSCI 3010 - American State and Local Government
- PSCI 3100 - Topics in American Government *
- PSCI 3101 - Latino Politics
- PSCI 3103 - U.S. Immigration Politics
- PSCI 3104 - Race and Ethnic Politics
- PSCI 3105 - Political Economy of Race, Gender and Immigration
- PSCI 3110 - The Legislative Process
- PSCI 3120 - Women and Politics
- PSCI 3130 - Interest Groups
- PSCI 3140 - LGBT Politics
- PSCI 3160 - Mass Media in American Politics
- PSCI 3420 - Bureaucracy and Public Policy
- PSCI 4020 - Urban Politics
- PSCI 4100 - Political Parties
- PSCI 4120 - Public Opinion and Participation
- PSCI 4140 - The Presidency
- PSCI 4450 - Public Policy Analysis

Field B, Public law

- PSCI 3200 - The American Legal System
- PSCI 3210 - The U.S. Supreme Court
- PSCI 4200 - Constitutional Law: Powers of Government
- PSCI 4210 - Constitutional Law: Rights and Liberties
- PSCI 4220 - Jurisprudence
- PSCI 4230 - The Constitution and the Rights of Criminal Defendants
- PSCI 4810 - International Law

Field C, Political theory and methodology

- PSCI 3310 - Political Theory: Quest for Justice
- PSCI 3320 - Political Theory: The State and its Critics
- PSCI 4300 - Topics in Political Research Methodology
- PSCI 4320 - American Political Theory
- PSCI 4330 - Topics in Political Theory *
- PSCI 4360 - International Ethics

Field D, Public policy

- PSCI 3102 - U.S. Immigration Policy
- PSCI 3420 - Bureaucracy and Public Policy
- PSCI 4450 - Public Policy Analysis
- PSCI 4490 - Topics in Public Policy

Field E, Comparative government and politics

- PSCI 3600 - Governments and Politics around the World
- PSCI 3611 - Politics of Central America and the Caribbean
- PSCI 3620 - Politics of Western Europe
- PSCI 3621 - Politics of Russia, Eurasia, and East Europe
- PSCI 3631 - Peace and Conflict in Africa
- PSCI 3641 - Politics of Japan
- PSCI 3642 - Politics of China
- PSCI 3650 - Middle East Politics
- PSCI 3700 - Area Politics *
- PSCI 3701 - Politics of Mexico
- PSCI 3702 - Latin American Politics
- PSCI 3703 - Security in Latin America
- PSCI 3704 - U.S.-Latin American Relations
- PSCI 4640 - Revolution and Political Violence
- PSCI 4650 - Comparative Public Policy
- PSCI 4660 - Democracy and Democratization
- PSCI 4661 - Politics of Autocracy
- PSCI 4662 - Civil-Military Relations
- PSCI 4663 - Comparative Judicial Politics
- PSCI 4670 - Third World Politics
- PSCI 4671 - Globalization and Development

- PSCI 4700 - Topics in Comparative Politics
- PSCI 4720 - Ethnicity in World Politics
- PSCI 4826 - Women, War and Peace
- PSCI 4845 - Foreign Policy Around the World

Field F, International relations

- PSCI 3500 - Human Security
- PSCI 3810 - International Relations
- PSCI 4520 - International Human Rights
- PSCI 4800 - The Politics of International Organization
- PSCI 4815 - Advocacy and Activism
- PSCI 4810 - International Law
- PSCI 4820 - Contemporary International Problems *
- PSCI 4821 - International Conflict
- PSCI 4823 - International Criminal Tribunals and War Crimes
- PSCI 4826 - Women, War and Peace
- PSCI 4827 - Negotiation and Diplomacy
- PSCI 4828 - Geography, History, and International Relations
- PSCI 4830 - American Foreign Policy
- PSCI 4840 - Major Problems of American Foreign Policy
- PSCI 4845 - Foreign Policy Around the World
- PSCI 4850 - Critical Issues in World Politics
- PSCI 4860 - International Political Economy

Other advanced options

- PSCI 3165 - Topics in Politics and Pop Culture
- PSCI 4950 - Writing, Advocacy, and Communication

Notes

Courses listed in more than one area of study may be counted toward the requirements of only one area.

*May be repeated for credit as topics vary.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information, see an academic advisor in the College of Liberal Arts and Social Sciences.

Other requirements

Academic requirements for graduation with a BA degree in political science: A student must have a minimum of 2.5 grade point average in all courses counting toward the political science major; the student must have a 2.0 grade point average in all work attempted, including transfer, correspondence, extension and residence work in all courses.

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years, and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

Grad Track Options

Political Science, BA with grad track option leading to Political Science, MA

The Department of Political Science offers a grad track option in which the student can complete a bachelor's degree in four years, and then complete a master's degree with a fifth year of study. The program is for highly motivated political science majors who have maintained at least a 3.5 GPA. Students should apply during their junior year to this program.

Undergraduate students who have been accepted to a grad track pathway option must complete all their bachelor's degree requirements and graduate within 12 months of the first day of the semester for which they were admitted to the accelerated program or enrollment in graduate level course work may be suspended.

Admitted students will take 12 graduate hours during their senior year, which will count first toward the bachelor's degree and then be transferred to the master's degrees as permitted by university rules.

Admission requirements and program policies

Admission requirements

Students are eligible for acceptance at the end of their junior year, upon completion of 75 undergraduate hours, including:

- PSCI 2305 - US Political Behavior and Policy
- PSCI 2306 - US and Texas Constitutions and Institutions
- PSCI 3300 - Political Science Research Methods
- A writing sample
- Three letters of recommendation
- A statement of purpose
- A resume
- The submission of an application to the Toulouse Graduate School

Submission of GRE scores is not required.

For students in the UNT Honors College, admission to the graduate program is guaranteed for students who satisfy these requirements.

Program policies

Undergraduate students who have been accepted to a grad track pathway option must complete all of their bachelor's degree requirements and graduate within 12 months of the first day of the semester for which they were admitted to the accelerated program or enrollment in graduate level course work will be suspended.

Admitted students will take twelve graduate hours during their senior year, which will also count toward their BA as permitted by university rules.

Program requirements

In lieu of 4 advanced undergraduate electives in the fourth year, students will take:

- PSCI 5300 - Practical Research Methods
- or
- PSCI 5340 - Seminar in Political Science Scope and Methods

Plus three courses from the following:

- PSCI 5020 - Proseminar in American Government and Politics
- PSCI 5030 - Proseminar in American Political Institutions
- PSCI 5040 - Proseminar in American Political Behavior
- PSCI 5310 - Proseminar in Political Theory
- PSCI 5320 - Quantitative Political Research Methods
- PSCI 5370 - Writing, Advocacy and Communication
- PSCI 5610 - Proseminar in Comparative Government
- PSCI 5900 - Special Problems

All remaining courses for BA with a major in political science must be completed.

Minors

Conflict and Human Security minor

Students wishing to obtain a minor in conflict and human security must complete a minimum of 18 hours (6 advanced), including PSCI 3500 and two core courses and three electives from the lists below.

Core courses

Select two courses from the list below.

- ANTH 4550 - Race, Ethnicity and Identity
- ANTH 4720 - Human Rights Anthropology
- CJUS 4330 - Domestic and International Terrorism
- HIST 3610 - Evolution of Warfare from Napoleon
- HIST 4391 - War Crimes, Genocide, and Justice
- HIST 4642 - War and American Society, 1608-2001
- PSCI 3104 - Race and Ethnic Politics
- PSCI 4520 - International Human Rights
- PSCI 4640 - Revolution and Political Violence
- PSCI 4821 - International Conflict
- SOCI 3550 - Social Movements

Electives

Students select three courses from the list below.

- ANTH 3130 - African-American Anthropology
- ANTH 3140 - Latinos in the U.S.
- ANTH 4300 - Migrants and Refugees
- ANTH 4550 - Race, Ethnicity and Identity
- ANTH 4720 - Human Rights Anthropology
- ANTH 4760 - Inequality, Social Justice and the City
- CJUS 3500 - Inequality, Crime and Justice
- CJUS 4330 - Domestic and International Terrorism
- COMM 3320 - Communication and Conflict Management
- EADP 4090 - Terrorism and Emergency Management
- ECON 3150 - Economics of Discrimination
- HIST 4066 - World War I
- HIST 4070 - World War II: European Theater
- HIST 4072 - World War II in Asia and the Pacific
- HIST 4073 - World War II: The Soviet-German War
- HIST 4075 - The Korean and Vietnam Wars
- HIST 4110 - British Empire in Asia, Africa, and the Pacific
- HIST 4125 - The Military History of England and its Colonies
- HIST 4174 - Revolutions in Twentieth-Century Latin America
- HIST 4246 - Imperialism in the Modern Middle East
- HIST 4248 - Palestinian History
- HIST 4283 - Decolonization in Asia and Africa
- HIST 4300 - The French Revolution, 1774–1799
- HIST 4302 - Wars of Napoleon, 1792–1815
- HIST 4303 - Age of Empire 1848-1914
- HIST 4335 - Age of Revolutions: Europe, 1700–1918
- HIST 4385 - Nazi Germany

- HIST 4390 - The Holocaust, 1933–1945
- HIST 4391 - War Crimes, Genocide, and Justice
- HIST 3063 - U.S. Gender and Race Since 1945
- HIST 4640 - History of U.S Military in 19th Century
- HIST 4641 - History of U.S. Military in 20th Century
- HIST 4642 - War and American Society, 1608-2001
- HIST 4860 - The Civil War and Reconstruction
- HIST 4890 - Civil Rights and Black Power Movements in the U.S.
- INST 4851 - International Security
- INST 4856 - Human Trafficking
- PHIL 3130 - Philosophy of Race and Racism
- PHIL 4740 - Environmental Justice
- PSCI 3103 - U.S. Immigration Politics
- PSCI 3104 - Race and Ethnic Politics
- PSCI 3105 - Political Economy of Race, Gender and Immigration
- PSCI 3120 - Women and Politics
- PSCI 3140 - LGBT Politics
- PSCI 3631 - Peace and Conflict in Africa
- PSCI 3650 - Middle East Politics
- PSCI 3702 - Latin American Politics
- PSCI 3703 - Security in Latin America
- PSCI 3704 - U.S.-Latin American Relations
- PSCI 4360 - International Ethics
- PSCI 4520 - International Human Rights
- PSCI 4640 - Revolution and Political Violence
- PSCI 4660 - Democracy and Democratization
- PSCI 4661 - Politics of Autocracy
- PSCI 4662 - Civil-Military Relations
- PSCI 4720 - Ethnicity in World Politics
- PSCI 4815 - Advocacy and Activism
- PSCI 4821 - International Conflict
- PSCI 4823 - International Criminal Tribunals and War Crimes
- PSCI 4826 - Women, War and Peace
- PSCI 4827 - Negotiation and Diplomacy
- PSCI 4828 - Geography, History, and International Relations
- PSCI 4830 - American Foreign Policy
- PSCI 4845 - Foreign Policy Around the World
- SOCI 2010 - Race, Class, Gender and Ethnicity
- SOCI 2070 - Introduction to Race and Ethnic Relations
- SOCI 3550 - Social Movements
- SOCI 3540 - Racial and Ethnic Minorities

Or, when topic is appropriate

- HIST 4260 - Topics in History
- PSCI 4700 - Topics in Comparative Politics

Additional information

Practicums, internships and special problems courses may also apply if approved by the director of the conflict and human security program. Interested students should contact Dr. James Meernik, Department of Political Science, 139 Wooten Hall, or by e-mail at meernik@unt.edu.

Legal studies minor

The legal studies minor requires 18 credit hours, including 6 advanced hours. The minor allows students to pursue a credential that is widely recognized by law schools and to further develop key skills that lawyers need.

Requirements

To earn a legal studies minor, students must complete 18 hours, including 6 advanced, comprised of one course in each of the following six categories.

Foundations, 3 hours

Choose from:

- CJUS 3210 - Judicial and Legal Systems
- PSCI 3200 - The American Legal System

Analytical reasoning, 3 hours

Choose from:

- COMM 2140 - Advocating in Public
- COMM 3840 - Argumentation and Debate
- ECON 4550 - Law and Economics
- PHIL 2050 - Logic and Critical Thinking
- PSCI 4250 - Legal Reasoning and Analysis

Critical thinking, 3 hours

Choose from:

- PHIL 3120 - Social and Political Philosophy
- PHIL 3310 - Ancient Greek Philosophy
- PHIL 3320 - Medieval Philosophy
- PHIL 3330 - Modern European Philosophy
- PHIL 3340 - Nineteenth-Century Philosophy
- PHIL 3400 - Ethical Theory
- PSCI 3310 - Political Theory: Quest for Justice
- PSCI 3320 - Political Theory: The State and its Critics
- PSCI 4220 - Jurisprudence
- PSCI 4330 - Topics in Political Theory

Oral and written advocacy, 3 hours

Choose from:

- COMM 2040 - Public Speaking
- ENGL 3110 - Writing and Rhetoric in the Humanities
- PADM 4000 - Mediation
- PADM 4050 - Negotiation
- PSCI 4950 - Writing, Advocacy, and Communication

Applied legal studies, 3 hours

Choose from:

- BLAW 4450 - Corporation Law
- BLAW 4480 - International Business Law
- CJUS 2500 - Criminal Law
- PSCI 4200 - Constitutional Law: Powers of Government
- PSCI 4210 - Constitutional Law: Rights and Liberties
- PSCI 4230 - The Constitution and the Rights of Criminal Defendants
- PSCI 4240 - LGBTQ+ Rights and the Constitution

Practical legal applications, 3 hours

Choose from:

- PSCI 3910 - Practicum (offered fall semester only)
- PSCI 3933 - Legal Internship for Non-Majors

Additional information

For more information, please visit www.class.unt.edu/advising/pre-law. If you wish to declare your intent to seek a legal studies certificate, contact the College of Liberal Arts and Social Sciences Student Advising office (sscluster@unt.edu).

Political Science minor

A minor in political sciences requires 18 hours:

Required courses

- PSCI 2305 - US Political Behavior and Policy
- PSCI 2306 - US and Texas Constitutions and Institutions

Plus 12 hours

Plus 12 semester hours of PSCI courses, including 6 advanced hours.

Undergraduate Academic Certificates

Legal Studies certificate

A legal studies certificate may be earned by students who have completed a concentration of academic work designed to prepare them for admission to and success in law school, regardless of major or minor at UNT. The Department of Political Science will award the certificate to students who have completed 15 hours of approved course work and maintained a 3.25 in the courses taken for the certificate as well as a 3.0 cumulative UNT GPA. Classes that count toward the student's major, minor or core requirements may also count toward this certificate. In keeping with university policy, all course work for the certificate must be completed at UNT.

Requirements

All recipients of the certificate **MUST** complete 15 hours, one course from each of the following five areas:

Foundations, 3 hours

Choose from:

- CJUS 3210 - Judicial and Legal Systems
- PSCI 3200 - The American Legal System

Analytical reasoning, 3 hours

Choose from:

- COMM 2140 - Advocating in Public
- COMM 3840 - Argumentation and Debate
- ECON 4550 - Law and Economics
- PHIL 2050 - Logic and Critical Thinking
- PSCI 4250 - Legal Reasoning and Analysis

Oral and written advocacy, 3 hours

Choose from:

- COMM 2040 - Public Speaking
- ENGL 3110 - Writing and Rhetoric in the Humanities
- PADM 4000 - Mediation
- PADM 4050 - Negotiation
- PSCI 4950 - Writing, Advocacy, and Communication

Applied legal studies, 3 hours

Choose from:

- BLAW 4450 - Corporation Law
- BLAW 4480 - International Business Law

- CJUS 2500 - Criminal Law
- PSCI 4200 - Constitutional Law: Powers of Government
- PSCI 4210 - Constitutional Law: Rights and Liberties
- PSCI 4230 - The Constitution and the Rights of Criminal Defendants
- PSCI 4240 - LGBTQ+ Rights and the Constitution

Critical thinking, 3 hours

Choose from:

- PHIL 3120 - Social and Political Philosophy
- PHIL 3310 - Ancient Greek Philosophy
- PHIL 3320 - Medieval Philosophy
- PHIL 3330 - Modern European Philosophy
- PHIL 3340 - Nineteenth-Century Philosophy
- PHIL 3400 - Ethical Theory
- PSCI 3310 - Political Theory: Quest for Justice
- PSCI 3320 - Political Theory: The State and its Critics
- PSCI 4220 - Jurisprudence
- PSCI 4330 - Topics in Political Theory

Additional information

For more information, please visit www.class.unt.edu/advising/pre-law. If you wish to declare your intent to seek a legal studies certificate, contact the College of Liberal Arts and Social Sciences Student Advising office (sscluster@unt.edu).

Peace Studies certificate

15 hours, at least 9 of which must be upper division, including PSCI 3500 - Human Security and at least one course from each of three areas in the Conflict and Human Security minor: determinants of violence, conflict resolution and issues of justice. Three hours of internship credit can be accepted.

Department of Psychology

Donald Dougherty, Chair

Faculty

The Department of Psychology offers training for individuals interested in combining a major in psychology with a variety of career areas. Careful selection of courses required to complete a major in psychology can provide preparation for the following possibilities: (1) graduate training in such specialty areas of psychology as experimental, clinical, counseling, quantitative, health psychology/behavioral medicine, physiological; (2) application to dental, medical and law schools; or (3) entry-level employment in such fields as advertising, gerontology, child development/child care, computer science, criminal justice, marketing, recreation, rehabilitation, human resources, sales, research assistant, and technical writing. Other areas also are available upon consultation with an advisor.

Programs of study

Programs offered by the department are described below.

Graduation requirements

The following are graduation requirements for the psychology major, over and above those course requirements stated in the Bachelor of Arts and Bachelor of Science paragraphs below:

- Psychology, BA – a GPA of 2.5 in all psychology courses must be maintained for the student to graduate. If the psychology GPA falls below 2.5, additional psychology courses must be taken and passed with grades high enough to retain a 2.5 major GPA to graduate.
- Psychology, BS – a GPA of 2.5 in all psychology courses must be maintained for the student to graduate. If the psychology GPA falls below 2.5, additional psychology courses must be taken and passed with grades high enough to retain a 2.5 major GPA to graduate.
- Psychology majors must earn a grade of C or better for any psychology courses used in the major.

Majors

Psychology, BA

A Bachelor of Arts with a major in psychology gives you a scientific basis of psychological knowledge. With practical experience and classes, you learn the many ways psychology is applied to everyday life.

Degree requirements

The following requirements must be satisfied for a Bachelor of Arts with a major in psychology.

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Arts degree as specified in the University Core Curriculum in the Academic policies section of this catalog and the College of Liberal Arts and Social Sciences requirements.

Major requirements

At least 35 hours of psychology coursework.

Psychology core, 14 hours

- PSYC 1630 - General Psychology I
- PSYC 2317 - Quantitative Methods (prerequisite MATH 1680)
- PSYC 3317 - Quantitative Methods Lab (1 hour; prerequisite MATH 1680; concurrent enrollment or completion of PSYC 2317)
- PSYC 3650 - Experimental Methods (4 hours; prerequisites PSYC 2317, PSYC 3317, and ENGL 1320 or TECM 2700)
- PSYC 4600 - History and Systems (prerequisite PSYC 3650)

Note: PSYC 1630, PSYC 2317, PSYC 3317 and PSYC 3650 are prerequisites for many of the advanced psychology courses.

Additional psychology courses, 21 hours

PSYC 4849 may apply toward one of the categories when the topic is appropriate. See your academic advisor to have the course applied to the corresponding category.

Brain, behavior and cognition

3 hours selected from:

- PSYC 1650 - Biological Psychology
- PSYC 4640 - Psychophysiology
- PSYC 4690 - Introduction to Learning and Memory
- PSYC 4820 - Sensation and Perception
- PSYC 4830 - Cognitive Psychology

Applied psychology

3 hours selected from:

- PSYC 3520 - Introduction to Industrial Organizational Psychology
- PSYC 3530 - Forensic Psychology
- PSYC 3630 - Research in Psychological Measurement
- PSYC 4110 - Interviewing for Paraprofessionals in Psychology
- PSYC 4480 - New Directions in Psychology
- PSYC 4510 - Practicum
- PSYC 4850 - Research in Psychology
- PSYC 4900 - Special Problems
- PSYC 4910 - Special Problems

Diversity and inclusivity

6 hours selected from:

- PSYC 3490 - Psychology of Women and Gender
- PSYC 4030 - Multicultural Psychology
- PSYC 4040 - Psychology of Race in the U.S.
- PSYC 4670 - Behavioral and Biopsychosocial Challenges within LGBTQIA+ Communities

Health and development

3 hours selected from:

- PSYC 2580 - Health Psychology
- PSYC 3000 - Positive Psychology
- PSYC 3480 - Adult Development and Aging
- PSYC 3620 - Developmental Psychology
- PSYC 4020 - Psychology of Death and Dying
- PSYC 4300 - Biopsychosocial Challenges Related to Sexually Transmitted Infections
- PSYC 4470 - Sexual Behavior
- PSYC 4700 - Psychobiology of Stress: The Mind-Body Connection

Psychopathology and personality

3 hours selected from:

- PSYC 2480 - Psychosocial Adjustment
- PSYC 3300 - Psychology of Addictive Behaviors
- PSYC 4520 - Personality
- PSYC 4610 - Psychopathology
- PSYC 4620 - Child Psychopathology

Relationships

3 hours selected from:

- PSYC 2600 - Interpersonal Behavior
- PSYC 3100 - Social Psychology
- PSYC 3640 - Intimate Partnerships and Caregiving

Other course requirements

- MATH 1680/MATH 1681X or approved substitution.
- Completion of the university composition requirement with a grade of C or better to enroll in PSYC 3650.

Minor

Optional.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information, see an academic advisor in the College of Liberal Arts and Social Sciences.

Other requirements

- At least 18 hours of psychology course work must be taken at UNT. Of these 18 hours, *at least 12 hours must be advanced hours*.
- A 2.0 overall GPA.
- A 2.5 Psychology major GPA.
- A grade of C or better is required for each psychology class used in the major.

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years, and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

Year 1

Semester 1		Semester 2	
MATH 1680 - Elementary Probability and Statistics	3 hours	PSCI 2306 - US and Texas Constitutions and Institutions	3 hours

Psychology, BS

A Bachelor of Science with a major in psychology gives you a scientific basis of psychological knowledge. This degree can prepare you to enter medical school, law school or seminary.

Degree requirements

The following requirements must be satisfied for a Bachelor of Science with a major in psychology.

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Science degree as specified in the University Core Curriculum in the Academic policies section of this catalog and the College of Liberal Arts and Social Sciences requirements.

Major requirements

At least 41 hours of psychology coursework.

Psychology core, 14 hours

- PSYC 1630 - General Psychology I
- PSYC 2317 - Quantitative Methods (3 hours; prerequisite MATH 1680)
- PSYC 3317 - Quantitative Methods Lab (1 hour; prerequisite MATH 1680; concurrent enrollment in or completion of PSYC 2317)
- PSYC 3650 - Experimental Methods (4 hours; prerequisite PSYC 2317, PSYC 3317, and ENGL 1320 or TECM 2700)
- PSYC 4600 - History and Systems (prerequisite PSYC 3650)

Note: PSYC 1630, PSYC 2317 and PSYC 3650 are prerequisites for many of the advanced psychology courses.

Additional psychology courses, 27 hours

Foundation courses, 9 hours

- PSYC 3100 - Social Psychology
- PSYC 3620 - Developmental Psychology
- PSYC 4610 - Psychopathology

Plus 18 hours from the following psychology categories

PSYC 4849 - Topics in Psychology may apply toward one of the categories when the topic is appropriate. See your academic advisor to have the course applied to the corresponding category.

Brain behavior and cognition

6 hours selected from:

- PSYC 1650 - Biological Psychology
- PSYC 4640 - Psychophysiology
- PSYC 4690 - Introduction to Learning and Memory
- PSYC 4820 - Sensation and Perception
- PSYC 4830 - Cognitive Psychology

Applied psychology

3 hours selected from:

- PSYC 3520 - Introduction to Industrial Organizational Psychology
- PSYC 3530 - Forensic Psychology
- PSYC 3630 - Research in Psychological Measurement

- PSYC 4110 - Interviewing for Paraprofessionals in Psychology
- PSYC 4480 - New Directions in Psychology
- PSYC 4510 - Practicum
- PSYC 4850 - Research in Psychology
- PSYC 4900 - Special Problems
- PSYC 4910 - Special Problems

Diversity and inclusivity

3 hours selected from:

- PSYC 3490 - Psychology of Women and Gender
- PSYC 4030 - Multicultural Psychology
- PSYC 4040 - Psychology of Race in the U.S.
- PSYC 4670 - Behavioral and Biopsychosocial Challenges within LGBTQIA+ Communities

Health and development

3 hours selected from:

- PSYC 2580 - Health Psychology
- PSYC 3000 - Positive Psychology
- PSYC 3480 - Adult Development and Aging
- PSYC 4020 - Psychology of Death and Dying
- PSYC 4300 - Biopsychosocial Challenges Related to Sexually Transmitted Infections
- PSYC 4470 - Sexual Behavior
- PSYC 4700 - Psychobiology of Stress: The Mind-Body Connection

Psychopathology and personality

3 hours selected from:

- PSYC 2480 - Psychosocial Adjustment
- PSYC 3300 - Psychology of Addictive Behaviors
- PSYC 4520 - Personality
- PSYC 4620 - Child Psychopathology

Other course requirements

- MATH 1680/MATH 1681X or approved substitution.
- Completion of the university composition requirement with a grade of C or better (required before enrolling in PSYC 3650).

Minor

Optional.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information, see an academic advisor in the College of Liberal Arts and Social Sciences.

Other requirements

- At least 18 hours of psychology course work must be taken at UNT. Of these 18 hours, *at least 12 hours must be advanced hours*.
- A 2.0 overall GPA.
- A 2.5 Psychology major GPA.
- A grade of C or better is required for each psychology class used in the major.

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years, and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

Matthew Painter, Chair

Faculty

The Department of Sociology offers a variety of degrees, including a Bachelor of Arts (BA) with a major in sociology; a Bachelor of Science (BS) with a major in sociology; a BS + MS Grad Track, a Master of Science (MS), with a major in sociology; and a Doctor of Philosophy (PhD) with a major in sociology.

Faculty teach and conduct research in a variety of areas, including sustainable societies, sociology of disaster, globalization, medical sociology, sociology of the family, sociology of culture, environmental sociology, economic sociology, sociology of religion, sociology of education and other topics.

The undergraduate degree with a major in sociology focuses on developing a core set of marketable skills required by all sociologists and then allows students to investigate specific social institutions or structures of interest. Through a combination of required and elective courses, students develop well-rounded skills, grounded in both theory and research methods.

The program is designed to prepare students for graduate study in sociology or for professional careers in a variety of fields, including research, education, government, social services, probation, law enforcement and aging services. A minor in sociology provides useful background for those pursuing a degree in areas such as business, psychology, criminal justice, communications, education and music.

Degree Plan

Degree plans are worked out in consultation with the undergraduate faculty advisor, Dr. Helen Potts. Call 940-565-2296 or e-mail Helen.Potts@unt.edu.

Majors

Sociology, BA

A Bachelor of Arts with a major in sociology provides a well-rounded and comprehensive understanding of social theory and research methods and prepares you for numerous careers in human services and corporations or for an entry-level research job as an interviewer or statistician.

Degree Requirements

The following requirements must be satisfied for a Bachelor of Arts with a major in sociology.

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Arts degree as specified in the University Core Curriculum in the Academic policies section of this catalog and the College of Liberal Arts and Social Sciences degree requirements.

Major requirements

33 hours in sociology, of which 24 must be advanced, including the sociology core curriculum (15 specified hours in sociology), of which 12 must be taken at UNT and at the advanced level (3000 or 4000). Note: Students must receive a C or better in sociology core curriculum courses.

Sociology core curriculum

- SOCI 1510 - Introduction to Sociology
- SOCI 3200 - Sociological Theory
- SOCI 3220 - Quantitative Data Collection
- SOCI 3240 - Qualitative Research Methods
- SOCI 3280 - Quantitative Data Analysis

Minor

Recommended but not required.

Other requirements

- Minimum sociology grade point average of 2.25 is required for graduation.
- A total of 42 hours upper-division work (advanced courses).
- 30-hour residence requirement.

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years, and will serve as a guide for you to design your pathway to degree completion. Grad Track Options

Sociology, BS with grad track option leading to Sociology, MS

The sociology BS with grad track option leading to the MS in sociology with a concentration in research and theory program will prepare students for their future career paths and allow them more flexibility in employment. Following this academic path is an indicator of potential work ethic for employers, illustrates maturity, and the ability to handle a multitude of challenging situations, along with problem-solving capabilities. Students pursuing the sociology BS with grad track option leading to the MS in sociology with a concentration in research and theory program will also be well prepared for any PhD program, as they will graduate with a concentrated training in a variety of sociological theoretical thought and the ability to apply research methodology and statistical procedures in applied settings.

Earning the BS and the MS in sociology with a concentration in research and theory will also prepare emerging professionals enrolled to fulfill the following career aspirations:

- Attain and then sustain positions as project managers in the for- and not-for-profit sectors in organizations that require people who can operate as well as teach the skill sets and habits of mind necessary to manage expectations, forge and maintain relationships and facilitate common understanding;

- Use the knowledge they gain from their enrollment in this program to effectively begin PhD programs in areas that include but are not limited to sociology, anthropology, psychology and other social science disciplines;
- Assume management-level positions in a wide array of organizations (including non-profit organizations) that require those who work for them to be able to formulate, design, and effectively analyze evidence-based results gleaned from the social research processes, and then use this evidence to support crucial decisions and actions;
- Assume leadership roles in both private and public sector organizations that involve establishing and sustaining community outreach; and
- Use the knowledge and skill sets such as research that they will have learned during their enrollment in this program to attain and fulfill positions in organizations that require the services of leaders who can actually innovate and, when necessary, apply theory as a means to resolve complex, systemic problems.

Admission Criteria

To be eligible for acceptance, students must have completed a minimum of 75 undergraduate credit hours, including four of the six core sociology courses for a BS in sociology with a grade of C or better:

- SOCI 1510 - Introduction to Sociology
- SOCI 3200 - Sociological Theory
- SOCI 3220 - Quantitative Data Collection
- SOCI 3240 - Qualitative Research Methods
- SOCI 3280 - Quantitative Data Analysis
- SOCI 4850 - Applied Research and Careers in Sociology

Requirements

To earn this grad track degree, an undergraduate student must have completed 90 credit hours toward the fulfillment of a specific UNT bachelor's degree program with a cumulative GPA of 3.5 or better and have satisfied the rest of its stated admissions requirements. Students who are accepted into this program must elect to enroll in up to two, first-year-of-graduate-study, 5000-level courses in the sociology graduate MS curriculum as substitutions for up to two, advanced elective courses in the undergraduate degree.

Each candidate must complete a minimum of 30 credit hours of study at 5000-level earned from passing the (up to) six hours of 5000-level courses with a letter grade of C or better to earn this degree. Candidates must earn up to 6 credit hours toward their degree from the required courses listed below:

- SOCI 5050 - Sociological Theory (3 credit hours)
- SOCI 5200 - Research Methods and Design (3 credit hours)
- SOCI 5210 - Introduction to Social Statistics (3 credit hours)
- SOCI 5XXX as approved by grad track advisor.

Once (up to) two, first-year-of-graduate-study, 5000-level courses in the sociology MS graduate program curriculum have been completed successfully (i.e. passed with a letter grade of C or better), the candidate's bachelor's degree can be conferred, as long as they have met the requirements for whatever undergraduate plan they have filed.

All remaining courses for Sociology, BS must be completed.

Minors

Sociology minor

A minor in sociology requires a minimum of 18 hours, including 6 advanced and SOCI 1510.

Undergraduate Academic Certificates

Applied Sociology and Career Readiness certificate

Junior and senior majors are encouraged to explore opportunities for deeper engagement, such as undergraduate research opportunities, internships, the sociology capstone experience (Applied Research and Careers in Sociology), and directed "Special Problem" courses under the supervision of a faculty member. Students interested in developing their career readiness to apply data and methodological skills should consider enhancing their resumes by completing the Applied Sociology and Career Readiness Certificate.

Requirements

12 credit hours of statistics/methods and career-readiness courses.

Required courses (9 credit hours):

- SOCI 3220 - Quantitative Data Collection
- SOCI 3240 - Qualitative Research Methods
- SOCI 3280 - Quantitative Data Analysis

Plus ONE of the following courses (3 credit hours):

- SOCI 4850 - Applied Research and Careers in Sociology
- SOCI 4900 - Special Problems
- SOCI 4950 - Sociology Internship
- SOCI 4951 - Honors College Capstone Thesis (with a Sociology faculty mentor)
McNair Scholar Program (with a Sociology faculty mentor)

Gabe Ignatow, Chair

Faculty

Research

Research conducted by departmental faculty members in Spanish includes linguistics, cultural studies, Spanish and Latin American poetry, contemporary Spanish-American literature, Spanish literature of the Golden Age, Latino and Latin American theatre, Mexican literature and culture, literary theory and women's studies. Spanish literature of the 19th and 20th centuries is another area of interest.

Majors

Spanish, BA

The Spanish section provides insight into world cultures and languages. While perfecting your Spanish, you can consider teacher certification, a certificate in professional Spanish or a minor in another language. There are opportunities for Spanish majors to study abroad.

Degree requirements

The following requirements must be satisfied for a Bachelor of Arts with a major in Spanish.

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Arts degree as specified in the University Core Curriculum in the Academic policies section of this catalog and the College of Liberal Arts and Social Sciences degree requirements.

Major requirements, 36-39 hours

A minimum of 36-39 hours of Spanish, including:

Required Spanish courses, 9-12 hours

- SPAN 1010 - Elementary Spanish and
- SPAN 1020 - Elementary Spanish
or
- SPAN 1030 - Review of Elementary Spanish

- SPAN 2040 - Intermediate Spanish
- SPAN 2050 - Intermediate Spanish

Note

Placement or credit by examination may be used to satisfy SPAN 1010, SPAN 1020, SPAN 2040 and SPAN 2050.

Spanish core, 18 hours

A core of 18 hours of specific course work must be met:

Required grammar and literature courses, 6 hours

- SPAN 3110 - Discovery of Hispanic Literature (this course is also a prerequisite for all 4000-level Spanish literature courses)
- SPAN 3003 - Advanced Grammar

Composition and oral practice, 6 hours

6 hours selected from:

- SPAN 3001 - Advanced Conversation for Non-Native Speakers
OR
- SPAN 3002 - Advanced Conversation for Native/Heritage Speakers
- SPAN 3004 - Advanced Composition

Hispanic culture (3000 level), 3 hours

3 hours of a 3000-level Hispanic culture course:

- SPAN 3140 - Mexican Civilization
- SPAN 3150 - Spanish Culture and Civilization
- SPAN 3160 - Latin American Culture and Civilization
- SPAN 3180 - Latin American Culture Through Film

Hispanic literature survey (4000 level), 3 hours

3 hours of 4000-level Hispanic literature survey courses:

- SPAN 4310 - Survey of Spanish Literature
- SPAN 4320 - Survey of Spanish Literature
- SPAN 4360 - Survey of Spanish-American Literature
- SPAN 4370 - Survey of Spanish-American Literature

Advanced Spanish courses, 9 hours

9 hours of advanced Spanish courses (3000- and 4000-level courses). At least 6 hours must be at the 4000 level.

Other course requirements

None.

Minor

Suggested minors: Students who wish to earn a minor are encouraged to choose a second foreign language. Spanish majors should also consider history, geography, business, hospitality management and cultural studies courses that deal specifically with their area of interest.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information, see an academic advisor in the College of Liberal Arts and Social Sciences.

Other requirements

- Students majoring in Spanish should consider taking history and geography courses that deal specifically with their language study.
- A minimum grade of C is required for a course to count toward the major.
- Minimum GPA of 2.75 in Spanish course work is required for graduation.

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years, and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

Grad Track Options

Spanish, BA with grad track option leading to Spanish, MA

Admissions Criteria

Outstanding BA students in their senior year with a minimum overall GPA of 3.5; must have completed at least 75 credit hours of the BA in Spanish; recommended by at least two Spanish professors familiar with their work and performance and with whom they've taken at least 2 classes; 5-6 page writing sample of a research paper in Spanish; a 20-minute oral interview with 2 professors who will determine the candidate's preparation for graduate work in Spanish as well as oral ability and a one-page essay in Spanish explaining why the candidate wants to pursue a MA in Spanish.

Requirements

Students will take 12 hours of graduate courses in Spanish in lieu of 12 elective hours at the undergraduate level; students cannot take graduate courses in lieu of required culture, civilization or literature survey courses at the undergraduate level; all graduate courses presently in the catalog qualify for the graduate track pathway.

All remaining courses for Spanish, BA must be completed.

Minors

Spanish minor

A minor in Spanish consists of a minimum of 18 semester hours in Spanish, including 6 advanced hours. Demonstration of proficiency may be substituted for credit in courses equivalent SPAN 1010 through SPAN 2050. A minimum grade of C is required for a course to count toward the minor.

All Level Teacher Certification

Spanish teacher certification (not currently accepting students)

The College of Liberal Arts and Social Sciences encourages students to explore teaching at the secondary level as a career option. The student's academic advisor in the Dean's Office for Undergraduates and Student Advising in GAB, Room 220, can assist students with specific requirements for teacher certification in Spanish.

Requirements

- SPAN 1010 - Elementary Spanish and
- SPAN 1020 - Elementary Spanish
- or
- SPAN 1030 - Review of Elementary Spanish
- SPAN 2040 - Intermediate Spanish
- SPAN 2050 - Intermediate Spanish
- SPAN 3001 - Advanced Conversation for Non-Native Speakers
- or
- SPAN 3002 - Advanced Conversation for Native/Heritage Speakers
- SPAN 3003 - Advanced Grammar
- SPAN 3004 - Advanced Composition
- SPAN 3110 - Discovery of Hispanic Literature
- SPAN 4150 - Foreign Language Teaching Methods
- SPAN 4210 - Spanish Phonetics and Pronunciation
- or
- SPAN 4260 - Linguistic Structures of Spanish
- 3 hours of 3000-level SPAN culture
- 3 hours of 4000-level SPAN literature

- 3 hours of 3000-4000 level SPAN
- Must pass the TExES Languages Other than English (LOTE)-Spanish or the equivalent for Spanish or the Bilingual Target Language Proficiency Test (BTLPT) for Spanish.
- Must choose one of the following options to demonstrate level of oral proficiency in Spanish prior to graduation; Official ACTFL Oral Proficiency Interview (OPI); Official ACTFL Oral Proficiency Interview-Computer (OPI-C).

Education courses, 21 hours

- EDCI 3800 - Professional Issues in Teaching
- EDCI 3830 - Teaching/Learning Process and Evaluation
- EDCI 4060 - Content Area Reading
- EDCI 4070 - Teaching in a Multicultural Classroom
- EDCI 4108 - Student Teaching in the Secondary School
- EDCI 4118 - Student Teaching in the Secondary School
- EDCI 4840 - Instructional Strategies and Classroom Management

Additional requirements

Students must also meet all GPA requirements to apply for state certification. In order to enroll for the first required education course, the student must make application to the certification program in the College of Education in Matthews Hall, Room 105.

All state certification requirements and information on required examinations is available on the web site of the State Board for Educator Certification (SBEC), www.tea.state.tx.us.

Undergraduate Academic Certificates

Professional Spanish certificate

This certificate requires 15 hours of advanced Spanish, including:

Required courses

Students must take any two of the following Spanish courses as part of their certificate program. These courses may be taken simultaneously to each other and to the professions courses, but not after the professions courses:

- SPAN 3001 - Advanced Conversation for Non-Native Speakers
- SPAN 3002 - Advanced Conversation for Native/Heritage Speakers
- SPAN 3003 - Advanced Grammar
- SPAN 3004 - Advanced Composition

Professional Spanish, 6-9 hours

Students must take a minimum of two courses in professional Spanish chosen from:

- SPAN 3510 - Spanish for Law Enforcement
- SPAN 3520 - Spanish for Social Services
- SPAN 3530 - Spanish for Hotel and Restaurant Management

- SPAN 3540 - Spanish for Travel and Tourism
- SPAN 3550 - Spanish for the Medical Professions I
- SPAN 3560 - Spanish for the Medical Professions II
- SPAN 3570 - Spanish in the Bilingual Classroom
- SPAN 4040 - Spanish Writing for the Mass Media Professions
- SPAN 4080 - Business Spanish

0-3 additional advanced hours

Students may take any Spanish upper-division course (3000 or 4000 level) to fulfill the 15 credit hours.

Ryan K. Boettger, Chair

Faculty

The field of technical communication focuses on making technical topics understandable and using technology to make information usable. The Department of Technical Communication emphasizes evidence-based approaches to preparing students with the technical communication skills required in modern workplaces: writing, designing, and coding. We offer graduate and undergraduate degrees and certificates. Courses are taught by an internationally recognized faculty whose research is at the forefront of the field. Students have numerous leadership opportunities through teaching assistant positions for both undergraduate and graduate students, lab tutor positions in our TECM Lab, participation in our mentorship program partnership with the Society for Technical Communication (STC), and involvement in our student organization. We facilitate connections among faculty, students, and practitioners through client-sponsored course projects, internships, regular networking events, and our industry-led Advisory Board.

A degree in technical and professional communication prepares students for entry-level positions as technical writers/editors, content developers, or usability professionals, most commonly working on teams to create user guides, web content, and proposals in companies within the information technology, consulting, and healthcare industries. Texas employs more technical communicators than any other state except California, and the DFW metroplex employs the fourth most technical communicators among metropolitan areas in the United States. The number of employed technical communicators should increase 7% from 2022 to 2032, which is greater than the 3% increase expected for all occupations and the 3% for all media and communication workers (Bureau of Labor Statistics, 2022-2023 edition). Our MA graduates enjoy a 100% placement rate.

Majors

Content Strategy, BA

The Bachelor of Arts program prepares students for roles as content strategists, digital content managers, UX writers, and audience engagement specialists. The program emphasizes a deep understanding of audience analysis, digital content creation, platform optimization, and data-driven content decisions essential for creating targeted and meaningful digital narratives. Graduates typically collaborate on multidisciplinary teams to develop compelling web content, targeted content campaigns, and digital strategies in digital marketing agencies, tech startups, e-commerce platforms, and media publishing houses.

Degree requirements

The following requirements must be satisfied for a Bachelor of Arts with a major in content strategy.

General Requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Arts degree as specified in the University Core Curriculum in the Academic policies section of this catalog and the College of Liberal Arts and Social Sciences degree requirements (excluding foreign language).

Major requirements

Foundation courses, 18 hours

The foundation courses establish the groundwork for students to excel as adept content strategists. Students acquire hands-on skills in technical writing, editing, content strategy, AI tools and an understanding of content strategy as a career.

- TECM 2700 - Technical Writing
- TECM 3010 - The Profession of Technical Communication
- TECM 3550 - Content Strategy in Technical Communication
- TECM 4010 - AI and Automation in Technical Communication
- TECM 4180 - Advanced Technical Communication
- TECM 4190 - Technical Editing

Content strategy core courses, 18 hours

The core courses enhance students' grasp of marketing practices, project management, empirical research methods, and advanced rhetorical persuasion.

- TECM 3100 - Visual Technical Communication
- TECM 3500 - Digital Media for Professional Communication
- TECM 4100 - Proposal Writing
- TECM 4500 - Content Analysis in Technical Communication
- MKTG 3651 - Foundations of Marketing Practice for Non-Business Majors

- INFO 4306 - Project Management for Information Systems
or
- LTEC 4060 - Project Management and Applied Technology Performance Improvement

Additional courses, 6 hours

Students complete six additional hours of advanced-level courses in TECM or six hours in the same foreign language, or an approved area related to content strategy. If taking courses outside the department, consult the TECM undergraduate advisor.

Other course requirements

A minimum grade of C is required in all TECM courses counting toward the Bachelor of Arts degree with a major in content strategy.

A minimum cumulative GPA of 2.5 for all TECM courses is required for graduation.

For more information, see department advisor.

Minor

Optional.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirements (42) and/or the minimum total hours required for the degree. For specific information, see an academic advisor in the College of Liberal Arts and Social Sciences (CLASS).

Other requirements

A minimum grade of C is required in all TECM courses counting toward the Bachelor of Arts degree with a major in content strategy.

A minimum cumulative GPA of 2.5 for all TECM courses is required for graduation.

For more information, see the undergraduate advisor.

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years, and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

Year 1

Technical Communication, BS

The Bachelor of Science program prepares students for entry-level positions as technical writers/editors, content developers, or usability professionals, most commonly working on teams to create user guides, web content, and proposals in companies within the information technology, consulting, and healthcare industries.

Degree requirements

The following requirements must be satisfied for a Bachelor of Science with a major in technical communication (TECM).

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Science degree as specified in the University Core Curriculum in the Academic policies section of this catalog and the College of Liberal Arts and Social Sciences degree requirements.

Major requirements

Foundation courses, 18 hours

The foundation courses establish the groundwork for students to become proficient technical communicators. Students gain practical skills in technical writing, content strategy, AI tools, advanced technical communication, technical editing and an understanding of tech comm as a career.

- TECM 2700 - Technical Writing
- TECM 3010 - The Profession of Technical Communication
- TECM 3550 - Content Strategy in Technical Communication
- TECM 4010 - AI and Automation in Technical Communication
- TECM 4180 - Advanced Technical Communication
- TECM 4190 - Technical Editing

Technical communication core courses, 18 hours

The core courses build advanced skills in information design and specialized writing attuned to audience, purpose and rhetorical situation. Three rigorous research methods courses equip students with empirical research expertise essential for user-centered design, assessment, and data analysis.

- TECM 3200 - Information Design for Electronic Media
- TECM 4200 - Research Methods for the Practitioner
- TECM 4250 - Writing Technical Procedures and Manuals
- TECM 4300 - Usability and User Experience in Technical Communication
- TECM 4500 - Content Analysis in Technical Communication

- TECM 4100 - Proposal Writing
or
- TECM 4700 - Writing in the Sciences

Additional courses, 3 hours

Students complete three additional hours of advanced-level courses in TECM or an approved area. If taking additional courses outside the department, consult the TECM undergraduate advisor.

Practicum, 3 hours

Students can either identify their own internship opportunity (TECM 4920) or participate in a community outreach project through the Technical Communication and Community Outreach (TACO) Research Lab (TECM 4950). Both options require the submission and successful evaluation of a professional portfolio of work.

Those who pursue an internship must collaborate with the TECM Director of Corporate Relations to ensure the scope of their work is relevant to the field and appropriately scaled.

- TECM 4920 - Cooperative Education in Technical Communication
or
- TECM 4950 - Senior Capstone Course

Other requirements

A minimum grade of C is required in all TECM courses counting toward the Bachelor of Science degree with a major in technical communication.

A minimum cumulative GPA of 2.5 for all TECM courses is required for graduation.

For more information, see the undergraduate advisor.

Minor

Optional.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information, see an academic advisor in the College of Liberal Arts and Social Sciences (CLASS).

Grad Track Options

Technical Communication, BS with grad track option leading to Professional and Technical Communication, MA

The Department of Technical Communication offers a BS with grad track option leading to an MA program for highly motivated technical communication majors. The grad track program will enable students to earn a BS and MA in five years. The grad track will also help students save money and prepare themselves for the rigors of graduate education while still enrolled as an undergraduate by first earning a bachelor's degree, then transferring graduate hours to the master's degree.

All applications are reviewed by the department's director of graduate studies. Students must contact the department to arrange a meeting. Email TCGrad@unt.edu for more information.

Eligibility

To be eligible to apply to the grad track program, students must

- Have maintained a cumulative 3.5 GPA, including transfer credit
- Have completed 75 undergraduate credit hours, including TECM 2700 and TECM 3010 with A's (75 credit hours are required for admission)
- Be a declared technical communication major
- Meet with the department's director of graduate studies and undergraduate advisor for a short interview

The admission decision is made by the department's director of graduate studies. The student's GPA and the following criteria inform that decision:

- A resume
- A response to a writing prompt
- Nominations from two TECM faculty
- An interview with the department's director of graduate studies

Course requirements

The learning outcomes in the undergraduate courses are met by the graduate courses. Grad track students will choose two courses in consultation with the director of graduate studies to replace undergraduate courses and to ensure that classes meet the appropriate level of preparation in both degree programs:

- TECM 5170 - Grants and Proposals (replaces TECM 4100 - Proposal Writing)
- TECM 5185 - Principles of Technical Communication (replaces TECM 4180 - Advanced Technical Communication)
- TECM 5191 - Digital Literacies for Professional Communicators (replaces TECM 3200 - Information Design for Electronic Media)
- TECM 5195 - Editing Technical Documents (replaces TECM 4190 - Technical Editing)
- TECM 5200 - Digital Content Strategies for Communication Professionals (replaces TECM 3550 - Content Strategy in Technical Communication)
- TECM 5740 - Content Analysis in Technical Communication (replaces TECM 4500 - Content Analysis in Technical Communication)
- TECM 5750 - Measuring Usability and User Experience for Professional and Technical Communication (replaces TECM 4300 - Usability and User Experience in Technical Communication)
- TECM 5000-level elective for TECM 4000-level elective

All remaining courses for Technical Communication, BS must be completed.

Restrictions

The grad track pathway requires students to take 6 graduate credits (2 courses) in their undergraduate senior year. Course work taken for undergraduate credit is considered advance credit, students must complete the 2 graduate courses within 12 calendar months of enrolling in their first graduate course

Students are not permitted to take more than 6 graduate credits until they fully complete the requirements for the BA or BS degree. Students who complete the 6 credits are automatically admitted to the MA program.

Students admitted to a grad track program must complete 90 credit hours before taking the courses in this program. Students must complete the bachelor's degree **within one academic year** of their first grad track course in order to have the graduate course credits transferred to their graduate plan of study.

Students in the grad track must apply formally for admission to the graduate program associated with the pathway. This requires submitting a formal application for admission to the Toulouse Graduate School typically during the fall semester of their senior year.

Minors

Content Strategy minor

The Content Strategy minor offers an innovative curriculum equipping students with essential skills to strategically plan, develop, and manage content across digital platforms and channels. Through a mix of coursework in writing, project management, data analytics, and marketing, students gain hands-on expertise to create cohesive digital experiences that engage users and align to business goals.

The 18-credit hour minor requires coursework in technical writing, marketing, and projective management. This blend of disciplines provides graduates with a strategic mindset and technical toolset to coordinate content effectively as social media specialists, digital marketers, web designers, SEO managers, and whatever new professions created by AI and automation advancements.

Requirements, 18 hours

The minor in Content Strategy equips students with skills to strategically plan, develop, and govern content across digital platforms. Through coursework integrating writing, project management, marketing, and analytics, students learn to create cohesive digital experiences that engage users and align to business objectives.

This innovative, application-focused minor positions students to address organizations' growing content needs and drive impactful outcomes in our evolving digital landscape.

The minor includes 18 credit hours and requires TECM 2700, 3010, 3550, 4500, and MKTG 3651. Additionally, students choose between INFO 4306 or LTEC 4060.

- INFO 4306 - Project Management for Information Systems
or
- LTEC 4060 - Project Management and Applied Technology Performance Improvement

- MKTG 3651 - Foundations of Marketing Practice for Non-Business Majors
- TECM 2700 - Technical Writing
- TECM 3010 - The Profession of Technical Communication
- TECM 3550 - Content Strategy in Technical Communication
- TECM 4500 - Content Analysis in Technical Communication

Technical Communication minor

The minor requires a total of 18 semester hours. A minimum grade of C is required in each technical communication course counted toward the minor.

Required courses, 6 hours

- TECM 2700 - Technical Writing
- TECM 3010 - The Profession of Technical Communication

Remaining 12 hours

Students must choose an additional four courses (12 hours) with a TECM prefix. Three courses must be at the 3000 or 4000 level.

Undergraduate Academic Certificates

Artificial Intelligence in Professional Communication certificate

The four-course certificate examines the role of Artificial Intelligence (AI) in professional communication, emphasizing the strengths and limitations of AI-driven writing tools, its implications on visual technical content, and the evolving ethics and practices in AI-augmented documentation.

Requirements, 12 hours

The coursework provides students with essential knowledge and AI skills tailored to professional communication. Through hands-on courses, students learn to apply AI tools for content creation, data visualization, and data analysis, while critically evaluating ethical implications.

- TECM 1600 - AI in Professional Settings
- TECM 3100 - Visual Technical Communication
- TECM 4010 - AI and Automation in Technical Communication
- TECM 4500 - Content Analysis in Technical Communication

Digital Media Studies certificate (TECM)

In this certificate program, students learn to utilize and analyze a variety of digital media tools for the purposes of communication, collaboration and research, and to develop social, political, academic and professional networks. The certificate is interdisciplinary; students must take the three core courses from MRTS, COMM and TECM. Applicable electives may be taken from any department with permission.

Certificate requirements, 15 hours

Students may receive a certificate in digital media studies by successfully completing the following courses with a grade of B or higher.

Required courses, 9 hours

- COMM 3420 - Communication and New Technology
- MRTS 3620 - Digital Media and Society
- TECM 1500 - New Media Experience

Electives, 6 hours

Select from the following courses:

- COMM 3820 - Social Media Perspectives
- COMM 4320 - Communications and Virtual Gaming

- JOUR 3270 - Media Entrepreneurship and Innovation
- JOUR 4270 - Strategic Social Media
- MRTS 3360 - Social Media Strategies
- MRTS 3445 - Video Game Histories
- MRTS 3525 - Content Development for Digital Media
- MRTS 3630 - Game Studies: Players, Culture and Industry
- MRTS 4415 - Topics in Film and Television Studies (when taught as "Media Genres/Authors - Video Game Authors")
- MRTS 4428 - Mobile Media
- MRTS 4450 - Topics in Media Industry Studies (when taught as "Digital Distribution")
- MRTS 4665 - Gender, Race and Digital Media
- Internship option (COMM 4800, MRTS 4480 or TECM 4920) with approval from undergraduate advisor
- Other courses approved by undergraduate advisor

Technical Communication certificate

Students may receive a certificate in technical communication from the Department of Technical Communication by successfully completing the following courses with a grade of B or higher:

Courses, 12 hours

- TECM 2700 - Technical Writing
- Nine additional hours in TECM courses at the 3000 or 4000 level.

Additional information

Contact the undergraduate advisor for more information.

Writing in the Sciences certificate

The certificate explores effective communication in the sciences, emphasizing process-oriented techniques, the intersection of ethics and scientific inquiry, and the advanced skills required for proposals, manuals, and diverse scientific contexts.

Requirements, 15 hours

The Writing in the Sciences certificate provides students with specialized skills in communicating scientific and technical information to diverse audiences. Through coursework covering scientific writing genres, proposal development, technical procedures, and research ethics, students gain proficiency in conveying complex concepts and data to experts and laypersons.

The certificate program includes 15 credit hours and requires TECM 2700, 4100, and 4700. Additionally, students choose between TECM 1700 and PHIL 2600, as well as between TECM 4180 and 4250.

- TECM 1700 - Introduction to Professional, Science, and Technical Writing
or
- PHIL 2600 - Ethics in Science
- TECM 2700 - Technical Writing

- TECM 4100 - Proposal Writing
- TECM 4180 - Advanced Technical Communication
or
- TECM 4250 - Writing Technical Procedures and Manuals
- TECM 4700 - Writing in the Sciences

Department of World Languages, Literatures and Cultures

Web site: www.worldlanguages.unt.edu

Christoph Weber, Chair

Faculty

The Department of World Languages, Literatures and Cultures offers students instruction that enables them to understand, speak, read and write the language chosen for study. Further, the department helps students to gain, through the use of these tools, a knowledge of the countries where the language is spoken and, as a result of this knowledge, to gain an understanding of the people themselves.

The department's place in the College of Liberal Arts and Social Sciences is based on the effective performance of the task of creating a climate of understanding between peoples separated by linguistic and cultural barriers. The department maintains and promotes a strong program of studies in French, German, and Japanese furnishing the appropriate courses in language, literature, culture and pedagogy.

Departmental examination

Prior to enrollment in a foreign language course, a student who has earned high school credit for a foreign language or who has acquired language skills will be required to take an examination to determine appropriate placement. Based on the results of the examination and if credit is desired, the student will pay a fee for the posting of 3–12 hours of credit corresponding to credit earned in courses 1010–2050. Students will be required to enroll for their first language course at UNT according to the course level indicated by the results of the examination. Any questions should be directed to the Department of World Languages, Literatures and Cultures.

Faculty-led study abroad programs

Students majoring, minoring or just wanting to complete their foreign language requirement abroad can participate in several faculty-led programs offered by the department in French, German, Italian, and Japanese. Contact the departmental office for additional details.

Bilingual Education concentration

Interested students should consult with the Department of Teacher Education and Administration in the College of Education for further information.

All program courses in the Department of World Languages, Literatures and Cultures are taught in the specific language of the corresponding program, except for those carrying the prefix LANG or WLLC.

Majors

French, BA

Programs offered by the Department of World Languages, Literatures and Cultures provide insight into world cultures and languages. You can perfect your French as well as earn a certificate in professional French through immersive study at UNT and abroad.

Degree requirements

The following requirements must be satisfied for a Bachelor of Arts with a major in French.

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Arts degree as specified in the University Core Curriculum in the Academic policies section of this catalog and the College of Liberal Arts and Social Sciences requirements.

Major requirements

39 hours of French, including

- FREN 1010 - Elementary French
- FREN 1020 - Elementary French
- FREN 2040 - Intermediate French
- FREN 2050 - Intermediate French
- Plus 27 semester hours of advanced work, including 6 hours in 4000-level courses or above

Placement or credit by examination may be used to satisfy

FREN 1010, FREN 1020, FREN 2040, FREN 2050

Suggested minors for BA with a major in French

Students who wish to earn a minor are encouraged to choose a second foreign language, business, computer science, economics, English, history and hospitality management.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information, see an academic advisor in the College of Liberal Arts and Social Sciences.

Other requirements

- Students majoring in French should consider taking history and geography courses that deal specifically with their language study.
- Minimum grade of C is required for a course to count toward the major.
- Minimum GPA of 2.75 in French course work is required for graduation.

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years, and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

German Studies, BA

Programs offered by the Department of World Languages, Literatures and Cultures provide insight into world cultures and languages. You can perfect your German through the study at UNT and abroad.

Degree Requirements

The following requirements must be satisfied for a Bachelor of Arts with a major in German Studies.

Hours required and general/college requirements

The German studies major consists of a minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Arts degree as specified in the General University Requirements in the Academic policies section of the catalog and the College of Liberal Arts and Social Sciences requirements.

Major requirements

Required courses, 18 hours

Demonstration of proficiency may be substituted for credit in courses equivalent to GERM 1010 through GERM 2050.

- GERM 1010 - Elementary German
- GERM 1020 - Elementary German
- GERM 2040 - Intermediate German
- GERM 2050 - Intermediate German
- GERM 3060 - Advanced German I (Oral Communication)
- GERM 3070 - Advanced German II (Written Communication)

Advanced-level courses, 21 hours

Students take an additional 21 semester hours of advanced work, including 9 hours in 4000-level courses. Students have the option to enroll in two English-taught courses (6 hours) related to German culture, history and literature included in the list below.

- ENGL 4660 - Literature and the Holocaust
- GERM 3020 - Topics in German Studies
- GERM 3022 - Professional German
- GERM 3034 - Advanced German Grammar
- GERM 3040 - Topics in German Culture
- GERM 3042 - German Cultural History (1900-2020)
- GERM 3044 - Contemporary Germany
- GERM 3046 - German Culture Through Film
- GERM 3048 - Cultural History of Berlin
- GERM 3050 - Topics in German Literature
- GERM 3052 - German Literary Survey 1750-1918
- GERM 3054 - German Short Stories
- GERM 3056 - German Novella
- GERM 3058 - German Graphic Novels
- GERM 3996 - Honors College Mentored Research Experience
- GERM 4310 - Topics in Advanced German Culture
- GERM 4312 - The Weimar Republic
- GERM 4314 - The Third Reich
- GERM 4320 - Topics in German Cinema
- GERM 4330 - Topics in Advanced German Language
- GERM 4338 - German Translation
- GERM 4350 - Topics in Advanced German Literature

- GERM 4352 - German Travel Literature
- GERM 4354 - German Disaster Narratives
- GERM 4900 - Special Problems
- GERM 4920 - Cooperative Education in German
- GERM 4951 - Honors College Capstone Thesis
- HIST 4073 - World War II: The Soviet-German War
- HIST 4364 - Germany from Luther to Napoleon, 1500 to 1815
- HIST 4365 - Modern Germany, 1815–Present
- HIST 4385 - Nazi Germany
- HIST 4390 - The Holocaust, 1933–1945
- WLLC 3010 - Global Diversity
- WLLC 3400 - The Holocaust and Film
- WLLC 3410 - German Popular Culture
- WLLC 3420 - German Graphic Novels

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information, see an academic advisor in the College of Liberal Arts and Social Sciences.

Additional information

- A minimum grade of C is required for a course to count toward the German studies major.
- A minimum GPA of 2.5 in the course work that applies to the major is required for graduation.
- Additional courses taught in English may be approved in consultation with the German coordinator.

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years, and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

Year 1

Semester 1		Semester 2

Japanese, BA

Programs offered by the Department of World Languages, Literatures and Cultures provide insight into world cultures and languages. You can perfect your Japanese as well as earn a certificate of achievement in Japanese through immersive study at UNT and abroad.

Degree requirements

The following requirements must be satisfied for a Bachelor of Arts with a major in Japanese.

Hours required and general/college requirements

A minimum of 120 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Arts degree as specified in the University Core Curriculum in the Academic policies section of this catalog and the College of Liberal Arts and Social Sciences degree requirements.

Major requirements

39 hours of Japanese, including

- JAPN 1010 - Elementary Japanese
- JAPN 1020 - Elementary Japanese
- JAPN 2040 - Intermediate Japanese
- JAPN 2050 - Intermediate Japanese
- JAPN 3020 - Advanced Japanese I
- JAPN 3030 - Advanced Japanese II

Courses, 21 hours

Students take an additional 21 semester hours of advanced work, including 9 hours in 4000-level courses. Students who use JAPN 4150 to count toward the major must also take 9 hours of other JAPN 4000-level courses.

Suggested minors for BA with a major in Japanese

Students who wish to earn a minor are encouraged to choose a second foreign language, English, business, computer science, economics, history or hospitality management.

Electives

Hours required for electives may vary based on course selection and the University Core Curriculum requirements. Electives may be required to satisfy the advanced hour requirement (42) and/or the minimum total hours required for the degree. For specific information, see an academic advisor in the College of Liberal Arts and Social Sciences.

Other requirements

- Students majoring in Japanese should consider taking history and geography courses that deal specifically with their language study.
- Minimum grade of C is required for a course to count toward the major.
- Minimum GPA of 2.75 in Japanese course work is required for graduation.

Four-year degree plan (example)

The following four-year plan is **one** example of a variety of ways in which you can complete your chosen degree in four years, and will serve as a guide for you to design your pathway to degree completion. Variations will depend on whether you need to take prerequisites or have college credit from exams or dual enrollment.

Minors

Arabic minor

A minor in Arabic consists of a minimum of 18 semester hours in Arabic, including 6 advanced hours. Demonstration of proficiency may be substituted for credit in courses equivalent to ARBC 1010 through ARBC 2050. A minimum grade of C is required for a course to count toward the minor.

Asian Studies minor

Various courses are offered in the areas of anthropology, art, history, geography, language, philosophy, political science, and world languages to complete the 18-hour minor in Asian studies. Students may apply up to 6 hours of Chinese, Hindi, Japanese or Korean language at any level to the minor. Students interested in this minor should contact Angela Harris, Department of World Languages, Literatures and Cultures (Angela.Harris@unt.edu).

Chinese minor

A minor in Chinese consists of a minimum of 18 semester hours in Chinese, including 6 advanced hours. Demonstration of proficiency may be substituted for credit in courses equivalent to CHIN 1010 through CHIN 2050. A minimum grade of C is required for a course to count toward the minor.

French minor

A minor in French consists of a minimum of 21 semester hours in French, including 9 advanced hours. Demonstration of proficiency may be substituted for credit in courses equivalent to FREN 1010 through FREN 2050. A minimum grade of C is required for a course to count toward the minor.

German minor

A minor in German consists of a minimum of 21 semester hours in German, including 9 advanced hours. Demonstration of proficiency may be substituted for credit in courses equivalent to GERM 1010 through GERM 2050. A minimum grade of C is required for a course to count toward the minor.

Italian Studies minor

The minor in Italian studies requires 18 hours of course work (at least 6 hours of advanced courses).

Required courses, 12 hours

Demonstration of proficiency may be substituted for credit in courses equivalent to ITAL 1010 through ITAL 2050.

- ITAL 1010 - Elementary Italian
- ITAL 1020 - Elementary Italian
- ITAL 2040 - Intermediate Italian
- ITAL 2050 - Intermediate Italian

Group I, 3 hours

Choose one of the following courses:

- ITAL 3040 - Topics in Italian Culture

- ITAL 3050 - Contemporary Italian Culture Through Film
- WLLC 3530 - Cosa Nostra: The Mafia in History and Fiction
- WLLC 3540 - The Worlds of Dante

Group II, 3 hours

Choose one of the following courses:

- HIST 3303 - The Roman Republic and Augustus
- HIST 4218 - Early Medieval Europe, ca. 312–1095
- HIST 4219 - Late Medieval Europe, 1095 to 1400
- HIST 4220 - The Renaissance
- HIST 4303 - Age of Empire 1848-1914
- ITAL 3040 - Topics in Italian Culture
- ITAL 3050 - Contemporary Italian Culture Through Film
- WLLC 3530 - Cosa Nostra: The Mafia in History and Fiction
- WLLC 3540 - The Worlds of Dante

Additional information

A minimum grade of C is required for a course to count towards the minor.

Additional courses may be approved in consultation with the Italian coordinator.

Japanese minor

A minor in Japanese consists of a minimum of 21 semester hours in Japanese, including JAPN 3020 and JAPN 3030. Demonstration of proficiency may be substituted for credit in courses equivalent to JAPN 1010 through JAPN 2050. A minimum grade of C is required for a course to count toward the minor.

Latin minor

A minor in Latin consists of a minimum of 18 semester hours in Latin, including 6 advanced hours. Demonstration of proficiency may be substituted for credit in courses equivalent to LATI 1010 through LATI 2050. A minimum grade of C is required for a course to count toward the minor.

All Level Teacher Certification

French teacher certification (not currently accepting students)

The College of Liberal Arts and Social Sciences encourages students to explore teaching at the secondary level as a career option. The student's academic advisor in the Dean's Office for Undergraduates and Student Advising in GAB, Room 220, can assist students with specific requirements for teacher certification in French.

Requirements

- FREN 1010 - Elementary French

- FREN 1020 - Elementary French
- FREN 2040 - Intermediate French
- FREN 2050 - Intermediate French
- FREN 4150 - Foreign Language Instruction and Assessment
- 6 hours of 4000-level French courses
- 18 hours of 3000- or 4000-level French courses
- Must pass the TExES Languages Other than English (LOTE) - French or the equivalent for French
- Must choose one of the following options to demonstrate level of oral proficiency in French prior to graduation:
Official ACTFL Oral Proficiency Interview (OPI); Official ACTFL Oral Proficiency Interview - Computer (OPI-C).

Education courses, 21 hours

- EDCI 3800 - Professional Issues in Teaching
- EDCI 3830 - Teaching/Learning Process and Evaluation
- EDCI 4060 - Content Area Reading
- EDCI 4070 - Teaching in a Multicultural Classroom
- EDCI 4108 - Student Teaching in the Secondary School
- EDCI 4118 - Student Teaching in the Secondary School
- EDCI 4840 - Instructional Strategies and Classroom Management

Additional requirements

See French, BA for additional course work and GPA requirements.

Students must also meet all GPA requirements to apply for state certification. In order to progress through the required education courses, the student must make an application to the certification program in the College of Education's Educator Preparation Office in Matthews Hall, Room 119.

All state certification requirements and information on required examinations is available on the web site of the State Board for Educator Certification (SBEC), www.tea.state.tx.us.

German teacher certification (not currently accepting students)

The College of Liberal Arts and Social Sciences encourages students to explore teaching at the secondary level as a career option. The student's academic advisor in the Dean's Office for Undergraduates and Student Advising in GAB, Room 220, can assist students with specific requirements for teacher certification in German.

Requirements

- GERM 1010 - Elementary German
- GERM 1020 - Elementary German
- GERM 2040 - Intermediate German
- GERM 2050 - Intermediate German
- GERM 3060 - Advanced German I (Oral Communication) or
- GERM 3070 - Advanced German II (Written Communication) or
- GERM 3034 - Advanced German Grammar

- GERM 4150 - Foreign Language Instruction and Assessment
- 6 hours of 4000-level German courses
- 15 hours of 3000- or 4000-level German courses
- Must pass the TExES Languages Other than English (LOTE)-German or the equivalent for German
- Must choose one of the following options to demonstrate the candidate's level of oral proficiency in German: Official ACTFL Oral Proficiency Interview (OPI); Official ACTFL Oral Proficiency Interview - Computer (OPI-C)

Education courses, 21 hours

- EDCI 3800 - Professional Issues in Teaching
- EDCI 3830 - Teaching/Learning Process and Evaluation
- EDCI 4060 - Content Area Reading
- EDCI 4070 - Teaching in a Multicultural Classroom
- EDCI 4108 - Student Teaching in the Secondary School
- EDCI 4118 - Student Teaching in the Secondary School
- EDCI 4840 - Instructional Strategies and Classroom Management

Additional requirements

See German Studies, BA for additional course work and GPA requirements.

Students must also meet all GPA requirements to apply for state certification. In order to progress through the required education courses, the student must make an application to the certification program in the College of Education's Educator Preparation Office in Matthews Hall, Room 119.

All state certification requirements and information on required examinations is available on the web site of the State Board for Educator Certification (SBEC), www.tea.state.tx.us.

Undergraduate Academic Certificates

Certificate of Achievement in Japanese

Required courses

12 advanced hours, 6 of which must be at the 4000 level.

Web site: afrotc.unt.edu

Lt Col Matthew Campise, Chair

Faculty

The Air Force Reserve Officer Training Corps (AFROTC) program (Aerospace Studies) recruits, educates and commissions officer candidates as an integral part of the UNT curriculum. The Air Force ROTC program consists of three parts: the General Military Course (first two years); Summer Field Training (two weeks over the summer); and the Professional Officer Course (last two years). Students enroll in AERO classes at the same time and in the same manner as other UNT courses. AERO courses normally receive academic credit as part of a student's electives. Each instructor is an active duty Air Force officer.

Four-year program

The first two years of the Air Force ROTC four-year program—the General Military Course (GMC)—consist of one hour of classroom work and two hours of leadership laboratory each week. Cadets who wish to compete for an enrollment allocation and entry into the last two years of the program—the Professional Officer Course (POC)—must do so under the requirements of the Professional Officer Course Selection Process. This process uses qualitative factors such as grade point average, unit commander evaluation and aptitude test scores to determine a student's officer potential. After POC selection, students must complete the two-week Field Training encampment at an assigned Air Force base. Cadets enrolled in the POC attend class three hours a week and participate in a weekly leadership laboratory lasting two hours. All GMC and POC cadets must also participate in weekly physical training consisting of at least two sessions lasting one hour each.

In the POC, cadets apply what they have learned in the GMC and at Field Training. The AFROTC detachment at UNT has a cadet corps based on the Air Force organizational pattern of flight, squadron, group and wing. POC cadets are assigned to leadership positions, conduct the leadership laboratories and manage the unit's cadet corps.

Once enrolled in the POC, cadets are enlisted in the Air Force Reserve and assigned to the obligated reserve section. This entitles them to a monthly, non-taxable allowance during the calendar year.

Two- and three-year programs

The last two years of the AFROTC program consist of the Professional Officer Course (POC). Students with at least two undergraduate academic years remaining at UNT may apply for a two- or three-year program, sign up for GMC courses, and compete for an enrollment allocation for entry into the POC. Entrance into the POC is highly competitive; two- and three-year applicants must be selected through the selection process described above.

Leadership Laboratory

Cadets must take a required Leadership Laboratory (LLAB) that consists of a two-hour block per week throughout their enrollment in AFROTC. LLAB is conducted within the framework of the cadet organization with a progression of experiences designed to develop each student's leadership potential. The curriculum involves study of Air Force customs and courtesies, drill and ceremonies, career opportunities in the Air Force, and the life and work of an Air Force junior officer. Students develop leadership in a wide variety of practical, supervised environments.

Physical Training (PT)

Each cadet must attend at least two one-hour Physical Training (PT) sessions per week. PT is designed to motivate cadets to pursue an active, physically fit lifestyle. Cadets must meet Air Force physical fitness requirements to attend Field Training, enter the POC and to be commissioned.

Uniforms and textbooks

Uniforms and textbooks for AFROTC courses are issued at no cost to the cadets.

Scholarships

Current emphasis in the Air Force ROTC college scholarship program is to award scholarships to candidates pursuing undergraduate engineering or other scientific and technical disciplines. Nearly 90 percent of Air Force ROTC scholarships are awarded in these disciplines. However, students in every degree program enjoy scholarship opportunities as the Air Force seeks to engage students who excel both academically and militarily. Scholarships are awarded at various amounts in increments of four, three and two years and entitlements may be extended to cover a fifth year of school if the student is taking an approved technical major.

Eligibility requirements

Air Force ROTC is open to any male or female UNT student completing any undergraduate academic degree. Graduate students may be eligible for the Air Force ROTC program, but should consult the UNT Air Force ROTC recruiting officer for additional details due to the program's unique requirements.

GMC entry requirements include:

1. full-time student status (minimum 12 hours);
2. good physical condition;
3. being of good moral character; and
4. being able to compete for POC before reaching 29 years if programmed for flying training or 39 years if programmed for non-flying training.

POC entry requirements include:

1. requirements 1–4 above;
2. U.S. citizenship;
3. at least a 2.0 cumulative grade point average;
4. at least two undergraduate academic years remaining at UNT;
5. passing score on the Air Force Physical Fitness Assessment;
6. pass Air Force medical examination; and
7. completion of Summer Field Training.

Contact the Aerospace Studies department at 940-565-2074 for additional information on how to join.

Active-duty service commitments

Cadets in the POC and second-year Air Force scholarship cadets are contract cadets who agree to accept a commission as a second lieutenant in the Air Force after completing all Air Force ROTC and academic degree requirements. Most cadets incur a four-year, active-duty commitment which begins after commissioning, but may extend to up to ten years of active duty if selected for certain career fields (e.g. pilot).

Credit for University Core Curriculum

With written approval from the students' major department, completion of upper-division AERO courses may be substituted for up to 3 hours credit toward the Political Science requirement of the University Core Curriculum.

Courses of instruction

All courses of instruction are located in Course descriptions.

The GMC curriculum includes 1000- and 2000-level AERO lecture courses with associated lab (LLAB) and recitation (PT) hours. The POC curriculum includes 3000- and 4000-level AERO lecture courses with associated lab (LLAB) and recitation (PT) hours.

Minors

Aerospace Studies minor

Requirements

A minor in aerospace studies requires 18 hours, including:

- Two semesters of GMC or applicable cooperative education class approved by department chair
- AERO 3310 - Leading People and Effective Communication
- AERO 3320 - Leading People and Effective Communication
- AERO 4310 - National Security Affairs/Preparation for Active Duty
- AERO 4320 - National Security Affairs/Preparation for Active Duty

Army ROTC

Mailing address:
1155 Union Circle #310977
Denton, TX 76203-5017
940-369-8011
Web site: www.armyrotc.unt.edu

Lieutenant Colonel Scott Pieluszcak: Department Chair and Professor of Military Science

Faculty

Captain Trae Wolfe: Executive Officer and Assistant Professor of Military Science

Captain Jake Jackson: Scholarship & Recruiting Officer and Assistant Professor of Military Science

First Lieutenant Tanner Tallman: Cavazos Recruiting Officer and Military Science Instructor

Sergeant First Class Ferdinand AwumeeL Senior Military Science Instructor

Sergeant First Class Andrew CullumL Texas Army National Guard On Campus Recruiter and Military Science Instructor

Lieutenant Colonel (retired) Bruce Cunningham: Military Science Instructor

Major Diego Hernandez: Adjunct Assistant Professor of Military Science

Staff

Misty Willis: Senior Administrative Specialist

Command Sergeant Major (retired) Carrie Glover: U.S. Army Human Resource Assistant

The Department of Military Science offers an Army ROTC program that develops leadership skills and provides military education vital to a career as an Army officer as an integral part of the UNT curriculum. Active-duty Army personnel provide all classroom instruction and program administration.

The program is open to male and female students. Freshmen may enroll in the four-year program, and sophomores through graduate students with at least two undergraduate or graduate academic years remaining at UNT may apply for a two- or three-year program. Deviations from these programs must be approved by the chair of the Department of Military Science. Students who complete any program with at least a bachelor's degree are awarded commissions as U.S. Army officers.

Three- and four-year program eligibility requirements

1. Full-time student (12 credit hours).
2. Good physical condition (ACFT 420 or above).
3. Good moral character.
4. Able to complete the Basic/Advanced Course prior to the age of 31 years (year of commissioning). Non-scholarship students can be granted waivers up to 39 years of age.
5. Able to meet eligibility requirements 2–5 of the two-year program below after the first two years of Army ROTC training (Basic Course).

Enrollment procedures for the first two years of Army ROTC, known as the Basic Course, are the same as for any other course at UNT. In the last semester of the Basic Course, students who wish to enroll for the last two years of the program, known as the Advanced Course, must contract with the U.S. Army.

Requirements for contracting (non-scholarship) are a 2.5 GPA, approved medical screening (DODMERB), and a passing score on the Army Physical Fitness Test. As a Contracted cadet, each student receives a tax-free stipend for the duration of the school year of \$450 per month.

Two-year program eligibility requirements

1. Meet eligibility requirements 1–4 of the four-year program.
2. U.S. citizen.
3. Have at least a 2.5 cumulative grade point average to be awarded an Army scholarship.
4. Have at least two undergraduate or graduate academic years remaining at UNT.
5. Pass a physical fitness test and pass a Department of Defense Medical Examination Review Board (DODMERB) medical examination.
6. Complete a paid six-week summer training course at Fort Knox, Ky.

Once students in the two-year program compete successfully for a slot and enter into the Advance Course, they will receive the same stipend as other cadets. Each student accepted into the two-year program must contract with the U.S. Army.

Credit for required courses

Completion of 12 semester hours of upper division ROTC courses can be substituted for PSCI 2305 with prior written approval from the student's major department.

Leadership Laboratory

A required corresponding level leadership laboratory is taken an average of three hours per week throughout the student's enrollment in AROTC. Instruction is conducted within the framework of an organized cadet corps with a progression of experiences designed to develop each student's leadership potential.

Leadership laboratory involves a study of Army customs and courtesies, tactics and techniques, drill and ceremonies, career opportunities in the Army, and the life and work of an Army junior officer. Students develop their leadership potential in a practical, supervised laboratory, which typically includes scenario-driven activities.

Army ROTC physical training (PT) program

This required program includes three mandatory one-hour PT sessions each week. PT involves enhancing the fitness level of cadets and prepares them to meet AROTC and Army standards. The program is designed to motivate cadets to pursue a physically fit and active lifestyle and to improve both safety and efficiency of physical training within AROTC. Cadets must meet physical fitness requirements in order to be commissioned.

Special consideration to veterans

Students with prior active duty military service may be granted waivers on a portion of the Basic Course. For information, consult the department office.

Uniforms

Uniforms and equipment for Army ROTC courses are issued to contracted/scholarship cadets. Textbooks and study material are issued at no cost to non-contracted cadets.

Scholarships

Scholarships, available to qualified students in the four-year, two-year and two and a half-year programs, provide full tuition, or Room and Board, a textbook allowance (\$1,200) and a tax-free subsistence allowance between \$300 and \$500 per month. Competition is based on SAT or ACT results, high school or college academic record, extracurricular and athletic activities, and passing the ACFT. For information, contact the department office.

Minors

Military Science minor

To be eligible for a minor in military science, the student must meet the following requirements.

- Be enrolled in the University of North Texas ROTC program (Department of Military Science); and
- Have military science accepted as a minor by the student's major degree department.

Course requirements

Successfully complete, with a grade of B or better, four of the following courses:

- MILS 3341 - Leadership I
- MILS 3342 - Leadership II
- MILS 4341 - Advanced Leadership I
- MILS 4342 - Advanced Leadership II
- MILS 4391 - Conference Course

Plus 6 additional hours

Successfully complete 6 additional military science hours with a grade of B or better (MILS 1180 can be repeated for credit to meet this requirement).

Army ROTC Advanced Camp

Successfully complete the Army ROTC Advanced Camp offered annually in the summer.

U.S. Army prerequisites

Meet all U.S. Army prerequisites to earn a commission as an Army officer upon graduation.

James Mueller, Interim Dean

Faculty

Careers in journalism and strategic communication are exciting, dynamic and critical to the future of an informed and enlightened American society. The Mayborn School of Journalism provides students with the creative, practical and critical-thinking skills for a successful career in the following fields:

- news, political, entertainment and sports reporting and producing; visual (stills and video) and written content creation across platforms that includes storytelling for social media, web outlets, television, newspapers, magazines, books;
- advertising and strategic communication in corporations, agencies, profit and non-profit organizations, and media;
- public relations and strategic communication in agencies, corporations, government, and non-profit organizations;
- teach journalism and mass communication in secondary schools.

The curriculum prepares students with hands-on skills for work in multiple media platforms; to develop their skills to analyze, evaluate and inform; and to consider the ethical implications of mass communication and its impact in today's world. Students learn in multimedia labs using state-of-the-art equipment and software. The Mayborn School of Journalism comprises six concentrations: advertising; video, broadcast and multimedia journalism; digital and print journalism; photojournalism; public relations, and sports journalism and communication.

The journalism major with a video, broadcast and multimedia, print and digital, or photojournalism concentration prepares students for careers in reporting, writing, producing, editing and photojournalism (shooting video and stills) for social media, web outlets, television, newspapers, magazines and radio. With a strong focus on multi-platform journalism, students receive hands-on opportunities as news reporters, sports reporters, writers, producers, photojournalists, designers, and editors for online, on air and in print for the *North Texas Daily*, NTDaily.com, NTDaily TV, Hatch photo agency and other area media. Teacher certification is available in journalism.

Students receive hands-on experience from faculty with extensive professional experience in broadcast, print, online and digital news. They also can complete internships at news outlets including newspaper, television, radio and web organizations in the Dallas-Fort Worth area, the nation's fifth largest media market, and in other news organizations in the area and across the state.

The journalism major with an advertising or public relations concentration prepares students to work in strategic communication in a variety of settings: advertising/public relations, marketing agencies, corporations, non-profit agencies, government, public affairs, media, entertainment and more. Students gain critical thinking skills, creative practice and professional experience by working with real world clients to develop campaigns that accomplish the strategic communication goals of the companies. Students create materials including advertisements for traditional and non-traditional media, newsletters, news releases, public service announcements, web sites and social media strategies. Students also plan and execute events. Students can gain experience through SWOOP, the student-managed advertising and public relations agency.

Faculty in the advertising and public relations concentrations have decades of professional experience and extensive networks and contacts in the industries. Students are required to complete internships at companies in Dallas-Fort Worth, which is the fifth largest media market and one of the fastest growing corporate job hubs in the nation.

Vision statement

To create the most innovative professional and academic program while maintaining our journalism heritage.

Mission statement

To prepare students with ethical values, life-time communication and intellectual skills, as well as for successful careers in the professions represented by the school's undergraduate departments and graduate degree programs.

Accreditation

The Frank W. and Sue Mayborn School of Journalism is among the elite journalism programs that have earned national accreditation by the ACEJMC, the Accrediting Council on Education in Journalism and Mass Communication. (University of Kansas School of Journalism, Stauffer-Flint Hall 1435 Jayhawk Blvd., Lawrence, KS 66045; telephone 785-864-3973; or visit www2.ku.edu/~acejmc/FULLINFO.HTML.)

Academic advising

Information about academic matters is available in the Office of Student Advising for the School of Journalism. Students will work with professional and faculty advisors concerning degree audits, application of transfer credit, individual career needs and general academic requirements.

Degree audit

Each student should have a degree audit prepared by the School of Journalism. This official degree audit should be made upon completion of new student orientation. Transfer students should have degree audits prepared during their first term/semester at UNT. Information is available from the Journalism Office of Student Advising office, Sycamore Hall, Room 205.

Programs of study

The program is divided into six concentrations: advertising; video, broadcast and multimedia journalism; digital and print journalism; photojournalism; public relations, and sports journalism and communications.

Core curriculum

Candidates for the Bachelor of Arts degree in the Mayborn School of Journalism must complete the University Core and the Journalism degree requirements shown below. Students should see the Office of Student Advising for their major for more information.

University Core Curriculum

1. Communication (English Composition and Rhetoric) (6 hours): See approved list in the Academics section of this catalog.
2. Mathematics (3 hours): See approved list in the Academics section of this catalog.
3. Life and Physical Sciences (6 hours): See approved list in the Academics section of this catalog.
4. American History (6 hours): See approved list in the Academics section of this catalog.
5. Government/Political Science (6 hours): See approved list in the Academics section of this catalog.
6. Creative Arts (3 hours): See approved list in the Academics section of this catalog.
7. Language, Philosophy and Culture (3 hours): See approved list in the Academics section of this catalog.
8. Social and Behavioral Sciences (3 hours): See approved list in the Academics section of this catalog.
9. Component Area Option (6 hours): See approved list in the Academics section of this catalog.

Mayborn School of Journalism degree requirements

The following requirements are in addition to or a specification of the University Core Curriculum requirements for Bachelor of Arts degrees.

1. Mathematics (3 hours, also satisfies the university core): MATH 1680. Students must follow all prerequisites as listed in this catalog.
2. Foreign Language (6–8 hours, or proficiency): two foreign language classes in the same language from 1010 and 1020 are required. Students may test out of these courses and still satisfy the requirement.
3. Social Science/Marketing (12 advanced hours): selected from 3000- or 4000-level courses in anthropology, economics, geography (regional science only), history, philosophy, political science, psychology, social work, sociology and MKTG 3650.

Major and minor

For requirements in the major and minor, students should consult "University Core Curriculum" in the Academics section of this catalog, and department or division sections.

Other requirements

Elective hours as needed at either the lower level or advanced level to meet the minimum of 120 semester hours for graduation, including 42 advanced hours. Electives should be chosen in consultation with an advisor.

Internships

Students can gain additional experience through internships at web outlets, television and radio stations, newspapers, magazines, book publishing companies, advertising agencies, public relations agencies, and large and small businesses throughout the Dallas–Fort Worth region and the nation.

Because a journalism education provides students with strong writing, research and critical thinking skills, journalism graduates also find work at a variety of jobs outside the media industry or use the degree to enter graduate or law studies.

Mayborn Conference

The Mayborn School of Journalism hosts the nationally acclaimed Mayborn Literary Nonfiction Conference each year. For more information, go to journalism.unt.edu/maybornconference.

North Texas Daily

The award-winning *North Texas Daily*, UNT's student newspaper in print and online, provides practical experience for UNT students in and outside the School of Journalism. The Student Publications Committee selects the editor each term/semester, and staff jobs are open to any UNT student. The *Daily* is published once a week in the fall and spring terms/semesters and less frequently in the summer. The *Daily* has been providing news and entertainment to UNT students since 1948. For more information, contact the *Daily's* advisor at 940-565-2205, or visit the *Daily's* web site at www.ntdaily.com.

North Texas Daily TV

Beside working on the student-run newspaper *NTDaily* and NTDaily.com, students may also practice the skills they learn in journalism classes by working on the *NTDaily* TV newscast, sports talk shows and highlight shows, community affairs, and other local programs. The student-produced programming is shown on Denton Community Television (DCTV), the city's public access channel which is operated on campus by the Mayborn School of Journalism. Students may also create and produce other programming of interest to the university community and residents of Denton.

SWOOP Agency
